KEY POINTS

TREND ESTIMATES

- The provisional trend estimate of the balance on goods and services was a deficit of \$1,307m in March 2006, a decrease of \$104m on the revised deficit in February.
- Goods and services credits rose \$161m (1%) to \$16,434m. Goods and services debits rose \$57m to \$17,741m.

SEASONALLY ADJUSTED ESTIMATES

- In seasonally adjusted terms, the balance on goods and services was a deficit of \$1,545m in March, an increase of \$1,130m on the revised deficit in February.
- Goods and services credits fell \$886m (5%) to \$16,072m. Non-rural and other goods fell \$1,009m (9%) while rural goods rose \$153m (7%). Services credits fell \$30m (1%).
- Goods and services debits rose \$244m (1%) to \$17,617m. Capital goods rose \$410m (13%), consumption goods rose \$46m (1%), while intermediate and other goods fell \$176m (3%). Services debits fell \$36m (1%).

ORIGINAL ESTIMATES

- In original terms, the March balance on goods and services was a deficit of \$1,158m, a turnaround of \$1,165m on the revised surplus of \$7m in February. Goods and services credits rose \$931m (6%) and goods and services debits rose \$2,096m (13%).
- In the nine months to March, exports of non-rural and other goods were up \$19.9b
 (27%) while rural goods were down \$0.6b (3%) on the corresponding period in 2004–05.

INQUIRIES

ANALYSIS AND COMMENTS

BALANCE ON GOODS AND SERVICES	The trend estimate of the balance on goods and services in March 2006 was a deficit of \$1,307m, a decrease of \$104m on the deficit in February.
	In seasonally adjusted terms, the balance on goods and services in March 2006 was a deficit of \$1,545m, an increase of \$1,130m on the deficit in February.
	The sum of the seasonally adjusted balances for the three months to March 2006 was a deficit of \$4,382m, a decrease of \$325m on the deficit of \$4,707m for the three months to December 2005. However, if the seasonal factors used in compiling quarterly Balance of Payments are applied, the preliminary March quarter 2006 deficit was \$4,676m, an increase of \$502m on the revised December quarter 2005 deficit of \$4,174m.
EXPORTS OF GOODS AND SERVICES	The trend estimate of goods and services credits rose \$161m (1%) between February and March to \$16,434m. In seasonally adjusted terms, goods and services credits fell \$886m (5%) to \$16,072m. Non-rural and other goods fell \$1.009m (9%) while rural goods rose \$153m (7%).

Exports of goods GOODS CREDITS - Trend (a) Seas adj. Mar 2006 Mar Mar Mar Mar

2002

Services credits fell \$30m (1%).

(a) Trend breaks of \$300m have been applied to April 2004 and \$600m to April 2005.

2004

RURAL GOODS

2003

The trend estimate of rural goods exports rose \$35m (2%) to \$2,194m.

2005

In seasonally adjusted terms, exports of rural goods rose \$153m (7%) to \$2,260m.

\$m

14000

12000

10000 8000

All seasonally adjusted components of rural goods contributed to the rise with:

- cereal grains and cereal preparations, up \$76m (18%)
- other rural, up \$35m (4%)
- wool and sheepskins, up \$26m (13%)
- meat and meat preparations, up \$16m (3%).

In original terms, exports of rural goods rose \$326m (16%) to \$2,339m.

Exports of goods continued

NON-RURAL GOODS

The trend estimate of non-rural goods exports rose \$60m (1%) to \$10,019m.

In seasonally adjusted terms, exports of non-rural goods fell \$940m (9%) to \$9,674m.

The main movements in the seasonally adjusted components contributing to the fall were:

- metal ores and minerals, down \$471m (18%)
- other mineral fuels, down \$398m (29%)
- metals (excluding non-monetary gold), down \$68m (7%)
- other non-rural, down \$42m (4%)
- other manufactures, down \$29m (2%).

Partly offsetting these effects were:

- coal, coke and briquettes, up \$48m (2%)
- transport equipment, up \$21m (5%).

Movements in the original series contributing to the fall in seasonally adjusted terms were:

- metal ores and minerals, down \$109m (5%), in contrast to an average February to March rise of 24% over the previous three years, largely driven by:
 - copper ore, down \$135m (37%), on decreased volumes
 - non-agglomerated iron ore, down \$81m (8%), with volumes down 12% and prices up 4%.
- other mineral fuels, down \$230m (19%), in contrast to an average February to March rise of 14% over the previous three years, largely driven by decreased volumes for:
 - crude oil, down \$144m (26%)
 - LNG exports, down \$90m (25%).
- metals (excluding non-monetary gold), up \$129m (14%), compared to an average February to March rise of 27% over the previous three years, largely due to copper and aluminium exports not sustaining the previous three year average increase.

Consistent with reporting by market commentators and the press, export volumes of iron ore, crude oil and LNG have been adversely impacted by cyclones in the Pilbara region of Western Australia during the first quarter of 2006, with temporary closures of operations and some flooding of mining sites.

OTHER GOODS

The trend estimate of other goods exports rose \$37m (4%) to \$947m.

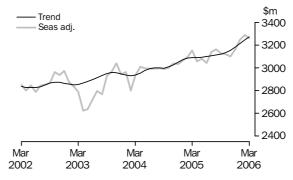

In seasonally adjusted terms, exports of other goods fell \$69m (7%) to \$878m.

The main component contributing to the fall in the seasonally adjusted estimates was non-monetary gold, down \$103m (16%), partly offset by goods for processing, up \$26m (15%).

ANALYSIS AND COMMENTS continued

Exports of services

SERVICES CREDITS

In trend terms, services credits rose \$29m (1%) to \$3,274m.

Seasonally adjusted, services credits fell \$30m (1%) to \$3,260m.

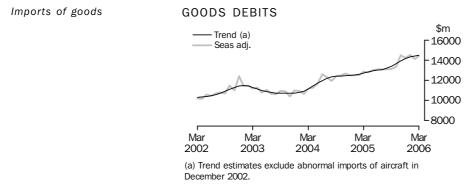

The movements in the seasonally adjusted components contributing to this fall were:

- travel services, down \$12m (1%)
- other services, down \$12m (1%)
- transportation services, down \$6m (1%).

Seasonally adjusted, tourism related services credits fell \$16m (1%) to \$2,069m.

IMPORTS OF GOODS ANDThe trend estimate of goods and services debits rose \$57m between February and MarchSERVICESto \$17,741m.

In seasonally adjusted terms, goods and services debits rose \$244m (1%) to \$17,617m. Capital goods rose \$410m (13%), consumption goods rose \$46m (1%), other goods rose \$66m (11%), while intermediate and other merchandise goods fell \$242m (4%). Services debits fell \$36m (1%).

Preliminary analysis shows that goods imports volumes, in seasonally adjusted terms, increased about 0.9% during the March quarter 2006. The Chain Laspeyres price index rose about 2.3% and the implicit price deflator rose about 2.5%. The final volume and price outcomes will be published in the March quarter 2006 issue of *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0).

Imports of goods continued

CONSUMPTION GOODS

The trend estimate of imports of consumption goods fell \$6m to \$4,194m.

In seasonally adjusted terms, imports of consumption goods rose \$46m (1%) to \$4,144m.

The components contributing to the rise in the seasonally adjusted estimates were:

- non-industrial transport equipment, up \$31m (3%)
- textiles, clothing and footwear, up \$20m (4%)
- household electrical items, up \$13m (4%).

Partly offsetting these effects were:

- food and beverages for consumption, down \$9m (2%)
- toys, books and leisure goods, down \$8m (2%).

In original terms, imports of consumption goods rose \$502m (14%) to \$4,131m

CAPITAL GOODS

The trend estimate of imports of capital goods fell \$5m to \$3,544m.

In seasonally adjusted terms, imports of capital goods rose \$410m (13%) to \$3,615m.

All components contributed to the rise in the seasonally adjusted estimates. The main movements were:

- civil aircraft, up \$195m
- machinery and industrial equipment, up \$76m (6%)
- industrial transport equipment n.e.s., up \$63m (12%)
- capital goods n.e.s., up \$57m (14%).

In original terms, imports of capital goods rose \$869m (32%) to \$3,551m.

INTERMEDIATE AND OTHER MERCHANDISE GOODS

The trend estimate of imports of intermediate goods rose \$30m to \$6,087m.

In seasonally adjusted terms, intermediate goods imports fell \$242m (4%) to \$5,991m.

The main components contributing to the fall in the seasonally adjusted estimates were:

- processed industrial supplies n.e.s., down \$121m (10%)
- fuel and lubricants, down \$68m (3%)
- organic and inorganic chemicals, down \$66m (18%).

Partly offsetting these effects was iron and steel, up \$13m (5%).

In original terms, intermediate and other merchandise goods rose \$387m (7%) to \$6,306m.

Imports of goods continued

OTHER GOODS

The trend estimate of imports of other goods rose \$39m (6%) to \$653m.

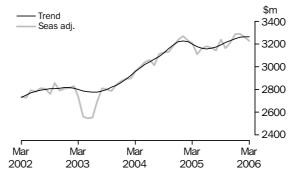

In seasonally adjusted terms, other goods imports rose \$66m (11%) to \$643m.

The main component contributing to the rise in the seasonally adjusted estimates was goods for processing, up \$61m (14%).

In original terms, other goods imports rose \$70m (12%) to \$647m.

Imports of services

SERVICES DEBITS

In trend terms, services debits fell \$1m to \$3,263m.

Seasonally adjusted, services debits fell \$36m (1%) to \$3,224m.

The movements in the seasonal components contributing to this fall were:

- transportation services, down \$41m (3%), with freight services down \$53m
- other services, down \$7m (1%).

Partly offsetting these effects was travel services, up \$12m (1%).

Seasonally adjusted, tourism related services debits rose \$15m (1%) to \$1,665m.

(a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

(b) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(c) This component is not seasonally adjusted.

(d) From October 1995, this component is not seasonally adjusted.

(a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day.

(b) May 1970=100. The trade-weighted index is reweighted annually on 1 October and on special occasions if required.

EXPLANATORY NOTES

INTRODUCTION	1 This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis and merchandise import and export statistics on a recorded trade basis.
	2 Merchandise trade statistics on a recorded trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs Service (ACS). Adjustments for coverage, timing and valuation are made to recorded trade data to convert them to a balance of payments basis. The main source for services data is the quarterly Survey of International Trade in Services.
	3 More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available on AusStats or by subscription to tailored services.
CONCEPTS, SOURCES AND METHODS	4 The conceptual framework used in compiling Australia's merchandise trade statistics can be found in <i>International Merchandise Trade, Australia: Concepts, Sources and Methods, 2001</i> (cat. no. 5489.0).
	5 The conceptual framework used in compiling Australia's balance of payments statistics is based on the Fifth Edition of the International Monetary Fund's <i>Balance of Payments Manual</i> (BPM5,1993). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling the estimates are presented in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0). To bring merchandise trade statistics on a recorded trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by ACS. Adjustments are also made to imports to take account of distortions which arise when significant changes occur in the volume of import entries lodged but not yet processed by ACS in a given month. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on international merchandise trade on a recorded trade basis.
	6 Both of the Concepts, Sources and Methods publications are available for free from the ABS web site, see <http: www.abs.gov.au=""> – select <i>About Statistics</i> then <i>Concepts & Classifications</i>.</http:>
SEASONAL ADJUSTMENT	7 Monthly original estimates are volatile, being subject to calendar-related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing systematic calendar related effects, such as seasonal and trading day influences, from the original series. Trading day effects are removed from the original estimates prior to the seasonal adjustment process. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording. The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted. The merchandise exports and imports statistics on a recorded trade basis are not.
TREND ESTIMATES	8 The month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour because they include irregular or non-seasonal movements. Trend estimates are derived by applying a 13-term Henderson moving average to the seasonally adjusted series. The use of a 13-term Henderson average can result in revisions to the estimates for the most recent six months as additional observations become available. Revisions can also occur because of changes in the original data and as a result of the annual re-estimation of the seasonal factors.

EXPLANATORY NOTES *continued*

SIGN CONVENTION	9 In keeping with balance of payments conventions, where statistics are on a balance of payments basis, credit entries (exports) are shown without sign and debit items (imports) are shown as negative entries. For statistics on a recorded trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.
COMMODITY BREAKDOWNS OF GOODS	10 For details of the classification used for goods exports on a balance of payments basis (credits), see table 6.6 in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0).
	11 Details of the classification of goods imports on a balance of payments basis (debits) are provided in table 6.7 in cat. no. 5331.0. Most of the commodity groups shown in table 4 for goods debits are available for more detailed subgroups from AusStats.
	12 The recorded trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification 2 (SITC). The first section of tables 12 and 13 show the most significant commodities (by value) at the SITC 3 digit level.
COMMODITY BREAKDOWNS OF SERVICES	13 The quarterly detailed services data published in table 11 are consistent with the monthly aggregates shown in table 9.
	14 Monthly indicators for many of the services components that are only surveyed quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. The estimates for these items shown in table 9 are therefore derived by dividing the quarterly estimate by three. Where quarterly survey data are not available, freight debits are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIFE) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last month's data by an average of movements for the same month over the three previous years.
TOURISM RELATED SERVICES	15 The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. These series are not complied on a balance of payments conceptual basis. However, they do provide a reasonable approximation of world tourism related activities.
	16 The memorandum items have been derived by re-aggregating relevant components of the international trade in services series of the balance of payments accounts. The tourism related indicator has been derived by combining total travel services (business, education-related and other personal travel), passenger fares, and the air transport component of other transportation services which relates to agency fees and commission receipts.
SERVICES BY STATE AND BY PARTNER COUNTRY	17 Annual services data by state and by partner country are released twice yearly. Calendar year data are released with the March issue of this publication and financial year data are released with the September issue. The data are available from AusStats.
	18 Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel and communication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Education, Science and Training. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of

EXPLANATORY NOTES continued

SERVICES BY STATE AND BY PARTNER COUNTRY continued	provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.
	19 A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of <i>Balance of Payments and International Investment Position, Australia - Concepts, Sources and Methods</i> (cat. no. 5331.0). Approximately 8% of total services credits and 6% of total services debits for 2004–05 are either confidential, or unable to be allocated to individual countries.
RELATED PRODUCTS OR SERVICES	20 More detailed balance of payments and recorded merchandise trade data, including forward seasonal factors, are available from AusStats. Very detailed merchandise trade data by commodity, country and state are available by contacting the National Information and Referral Service, as shown on the back of this publication.
	 21 Users may also wish to refer to the following publications which can be downloaded free of charge from the ABS web site: <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0) – issued quarterly <i>International Merchandise Imports, Australia</i> (cat. no. 5439.0) – issued monthly <i>International Trade Price Indexes, Australia</i> (cat. no. 6457.0) – issued quarterly <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Metbods</i> (cat. no. 5331.0) <i>Information Paper: Quality of Australian Balance of Payments Statistics</i> (cat. no. 5342.0) <i>International Merchandise Trade, Australia: Concepts, Sources and Metbods</i> (cat. no. 5489.0) <i>A Guide to Australian Balance of Payments and International Investment Position Statistics</i> (cat. no. 5362.0.55.001).
CAUTIONARY NOTE	22 The tables in this publication are presented on two bases. Tables 1–11 contain estimates of Australia's international trade in goods and services which have been adjusted for coverage, valuation and timing to a balance of payments basis. Tables 12–15 contain estimates of merchandise exports and imports based on Australian Customs Service records. Paragraph 5 of the Explanatory Notes provides an explanation of the difference between these bases.
