KEY POINTS

TREND ESTIMATES

- The provisional trend estimate of the balance on goods and services was a deficit of \$2,292m in May, an increase of \$128m on the deficit in April.
- Goods and services credits fell \$269m to \$11,503m. Goods and services debits fell \$141m to \$13,795m.

SEASONALLY ADJUSTED ESTIMATES

- In seasonally adjusted terms, the balance on goods and services was a deficit of \$1,940m in May, a decrease of \$1,109m on the deficit in April. The decrease was due to an increase in credits and a larger fall in debits.
- Goods and services credits rose \$240m (2%) to \$11,438m. Rural goods fell \$68m (4%) while non-rural and other goods rose \$341m (5%). Services credits fell \$33m (1%).
- Goods and services debits fell \$869m (6%) to \$13,378m, with goods debits down \$805m (7%) and services debits down \$64m (2%).

ORIGINAL ESTIMATES

- In original terms, the May balance on goods and services was a deficit of \$1,793m, a decrease of \$870m on the deficit in April.
- Goods and services credits rose \$326m (3%), while goods and services debits fell \$544m (4%). Goods credits in the 11 months of the financial year to May were down \$4.2b on the corresponding period in 2001-02.
- For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070 or Tom Jebbink on Canberra 02 6252 5540.

ANALYSIS AND COMMENTS

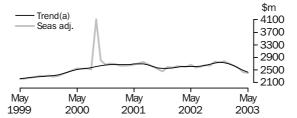

BALANCE ON GOODS AND Services	The trend estimate of the balance on goods and services in May 2003 was a deficit of \$2,292m, an increase of \$128m on the deficit in April.
	In seasonally adjusted terms, the balance on goods and services in May was a deficit of \$1,940m, a decrease of \$1,109m on the deficit in April.
EXPORTS OF GOODS AND SERVICES	The trend estimate of goods and services credits fell \$269m in May to \$11,503m.
	In seasonally adjusted terms, goods and services credits rose \$240m in May to \$11,438m.
	Rural goods fell \$68m (4%), while non-rural and other goods rose \$341m (5%). Services

GOODS CREDITS

credits fell \$33m (1%), driven by a fall in travel services.

SERVICES CREDITS

(a) Trend estimates exclude the impact of the Olympics in September and October 2000 $% \left(\mathcal{O}_{1}^{2}\right) =0$

Rural goods

The trend estimate of rural goods fell \$44m (2%) to \$1,837m.

In seasonally adjusted terms, rural goods fell \$68m (4%) to \$1,791m.

Rural goods, in original terms, increased \$9m to \$1,853m. Rural goods in the 11 months to May were down \$4.1b on the corresponding period in 2001-02.

Contributing to the fall in the seasonally adjusted series were:

- wool and sheepskins, down \$67m (27%), in contrast to an average April to May rise over the previous three years of 8%. Exports of greasy wool fell \$55m (36%), with volumes down 24% and prices down 9%;
- other rural goods, up \$42m (5%), compared to an average April to May rise over the previous three years of 12%; and
- meat and meat preparations, down \$14m (3%), in contrast to an average April to May rise over the previous three years of 9%.

ANALYSIS AND COMMENTS continued

.

.

.

.

Rural goods continued	Offsetting these effects was a rise in the exports of cereal grains and cereal preparations, up \$48m (\$16%), in contrast to an average April to May fall over the previous three years of 2%. Exports of wheat rose \$87m (47%), with volumes up 50% and prices down 2%, while exports of other cereal grains fell.
Non-rural and other goods	The trend estimate of non-rural and other goods exports fell \$166m (2%) to \$7,233m.
	Seasonally adjusted, non-rural and other goods rose \$341m (5%) to \$7,284m.
	In original terms, non-rural goods rose \$350m (6%) to \$6,616m. Non-rural goods in the 11 months to May were down \$1.2b on the corresponding period in 2001-02.
	 Contributing to the rise in the seasonally adjusted series were: transport equipment, up \$177m (47%), compared to an average April to May rise over the previous three years of 8%. Other transport equipment increased \$111m, which included two passenger ferries, and road vehicles increased \$59m (22%); other mineral fuels, up \$56m (7%), compared to the average April to May rise over the previous three years of 1%. Exports of petroleum and petroleum products increased \$38m. Exports of gas also increased, up \$18m (7%); and other manufactures, up \$130m (12%), compared to an average April to May rise over the previous three years of 9%.
	 Partly offsetting these effects were: other non-rural, down \$73m (10%), in contrast to an average April to May rise over the previous three years of 8%; other goods, up \$119m (22%), compared to an average April to May rise over the previous three years of 39%; and machinery, up \$33m (6%), compared to the average April to May rise over the previous three years of 10%.
IMPORTS OF GOODS AND SERVICES	The trend estimate of goods and services debits fell \$141m to \$13,795m. In seasonally adjusted terms, goods and services debits fell \$869m (6%) to \$13,378m. Goods debits fell \$805m (7%) and services debits fell \$64m (2%).

(a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day.

(b) May 1970=100. The trade-weighted index is reweighted annually (on 1 October) and on special occasions if required.

EXPLANATORY NOTES

INTRODUCTION	1 This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis and merchandise import and export statistics on a recorded trade basis.
	2 Merchandise trade statistics on a recorded trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs Service (ACS). Adjustments for coverage, timing and valuation are made to recorded trade data to convert them to a balance of payments basis. The main source for services data is the quarterly Survey of International Trade in Services.
	3 More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available on Ausstats or by subscription to tailored services.
CONCEPTS, SOURCES AND METHODS	4 The conceptual framework used in compiling Australia's merchandise trade statistics can be found in <i>International Merchandise Trade, Australia: Concepts, Sources and Methods, 2001</i> (cat. no. 5489.0).
	5 The conceptual framework used in compiling Australia's balance of payments statistics is based on the Fifth Edition of the International Monetary Fund's <i>Balance of Payments Manual</i> (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling the estimates are presented in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0). To bring merchandise trade statistics on a recorded trade basis to a balance of payment basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by ACS. Adjustments are also made to imports to take account of distortions which arise when significant changes occur in the volume of import entries lodged but not yet processed by ACS in a given month. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on international merchandise trade on a recorded trade basis.
	6 Both of the Concepts, Sources and Methods publications are available for free from the ABS web site, see $<$ http://www.abs.gov.au $>$ -select <i>About Statistics</i> then <i>Concepts & Classifications</i> .
SEASONAL ADJUSTMENT	7 Monthly original estimates are volatile, being subject to calendar-related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing systematic calendar related effects, such as seasonal and trading day influences, from the original series. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording. The international trade in goods and services on a balance of payments basis estimates are seasonally adjusted. The merchansdise exports and imports statistics on a recorded trade basis are not.
TREND ESTIMATES	8 The month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour because they include irregular or non-seasonal movements. Trend estimates are derived by applying a 13-term Henderson moving average to the seasonally adjusted series. The use of a 13-term Henderson average can result in revisions to the estimates for the most recent six months as additional observations become available. Revisions can also occur because of changes in the original data and as a result of the annual re-estimation of the seasonal factors.

EXPLANATORY NOTES *continued*

SIGN CONVENTION	9 In keeping with balance of payments conventions, where statistics are on a balance of payments basis, credit entries (exports) are shown without sign and debit items (imports) are shown as negative entries. For statistics on a recored trade basis, both imports and exports are shown without sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.
COMMODITY BREAKDOWNS OF GOODS	10 For details of the classification used for goods exports on a balance of payments basis (credits), see table 6.6 in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0).
	11 Details of the classification of goods imports on a balance of payments basis (debits) are provided in table 6.7 in cat. no. 5331.0. Most of the commodity groups shown in table 4 for goods debits are available for more detailed sub-groups from Ausstats.
	12 The recorded trade statistics shown in tables 7 and 8 are classified by the Standard International Trade Classification 2 (SITC). The first section of tables 7 and 8 show the most significant commodities (by value) at the SITC 3 digit level.
COMMODITY BREAKDOWNS OF SERVICES	13 The quarterly detailed services data published in Table 6 are consistent with the monthly aggregates shown in Table 5. Services trade data by major partner countries and by Australian state of production/consumption are published on a financial year basis are a calendar year basis.
	14 Monthly indicators for many of the services components that are only surveyed quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. The estimates for these items shown in table 5 are therefore derived by dividing the quarterly estimate by three.
RELATED PRODUCTS OR SERVICES	15 More detailed balance of payments and recorded merchandise trade data, including forward seasonal factors, are available from Ausstats. Very detailed merchandise trade data by commodity, country and state are available by contacting the National Information and Referral Service, as shown on the back of this publication.
	 16 Users may also wish to refer to the following publications which are available from ABS Bookshops and on the ABS web site: Balance of Payments and International Investment Position, Australia (cat. no. 5302.0) - issued quarterly
	 International Merchandise Imports, Australia (cat. no. 5439.0) - issued monthly International Trade Price Indexes, Australia (cat. no. 6457.0) - issued quarterly Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (cat. no. 5331.0) Information Paper: Quality of Australian Balance of Payments Statistics (cat. no. 5342.0)
	 International Merchandise Trade, Australia: Concepts, Sources and Methods (cat. no. 5489.0) A Guide to Australian Balance of Payments and International Investment Position Statistics (cat. no. 5362.0.55.001).
