Purchase of new dwellings	1 701	8.1	-10.0
Purchase of established dwellings	34 791	9.2	13.5

#### MARCH KEY POINTS

#### TREND ESTIMATES

- The number of dwellings financed increased by 1.8% in March 1999, continuing the upward trend which commenced in October 1998.
- Commitments for construction of dwellings increased by 2.8% and commitments for the purchase of established dwellings also rose by 1.7% in March.
- The number of commitments for the purchase of new dwellings was steady in March, arresting the decline evident in the series since June 1997.

### SEASONALLY ADJUSTED ESTIMATES

- The number of dwellings financed rose 9.7% in March 1999 following three relatively small monthly movements.
- The commitments to finance the construction of dwellings and the purchase of new dwellings increased by 12.9% and 8.1% respectively in March 1999 following increases of 5.6% and 6.7% respectively in February 1999.
- . Commitments to finance the purchase of established dwellings increased by 9.2% in March 1999 following a 2.7% decrease last month.

### ORIGINAL ESTIMATES

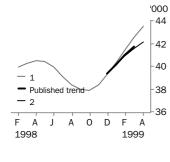

The average value of all commitments for housing finance in March 1999 increased to \$129 600 and is 13.3% up on the average commitment of \$114 400 in March 1998.

### NUMBER OF DWELLINGS FINANCED

DWELLINGS FINANCED

The March 1999 trend estimate for the total number of dwellings financed rose 1.8%, continuing the recent trend growth that commenced in October 1998. In March, the trend estimates increased in all States with the strongest percentage growth occuring in the Northern Territory (4.6%), Tasmania (2.3%) and Victoria (2.2%).

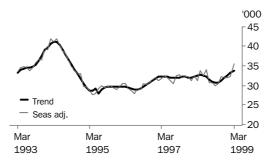

In seasonally adjusted terms, all States except Western Australia recorded increases in March 1999, contributing to the national increase of 9.7%. The most significant increases occurred in the Northern Territory (39.6%), NSW (15.0%) and Victoria (14.6%) while the estimate for Western Australia fell by 0.4%.

The total number of dwellings financed in the quarter ending March 1999 was 120 167 in original terms, up 5.2% on the same period last year, and reflecting an increase in commitments for the purchase of established dwellings.

### DWELLINGS FINANCED EXCLUDING REFINANCING

The March 1999 trend estimate for the total number of dwellings financed excluding refinancing rose by 1.9% to 33 810, the sixth consecutive monthly increase. Seasonally adjusted, total commitments excluding refinancing increased by 10.1%.

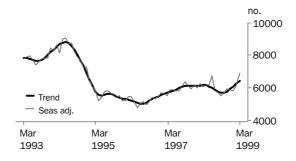

VALUE OF COMMITMENTS

The trend estimate for the value of commitments increased by 2.3% to \$5 398 million in March, the seventh consecutive month of growth. Seasonally adjusted, the value of commitments increased by 10.7% to \$5 600 million in March.

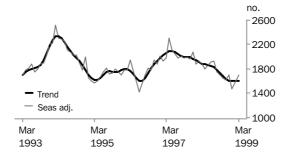

### PURPOSE OF FINANCE

CONSTRUCTION OF DWELLINGS The trend series for construction finance commitments increased by 2.8% in March 1999. The trend series has been revised upward in all months since November 1998, reflecting the strong seasonally adjusted estimate for March 1999. The March increase in the seasonally adjusted series was 12.9% to 6 936 commitments, following a 5.6% increase in February.

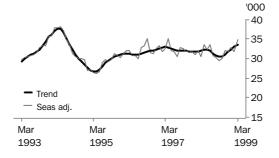

### PURCHASE OF NEW DWELLINGS

The trend estimate for March 1999 for commitments to finance the purchase of new dwellings is 1 603, little changed on the level for January and February. The strength of the monthly increases in the seasonally adjusted series in both February (6.7%) and March (8.1%) has arrested the decline in the trend series which began in June 1997.

#### PURCHASE OF ESTABLISHED DWELLINGS

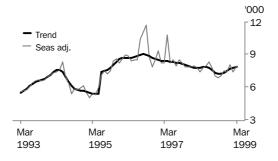

Movements in both the trend series and the seasonally adjusted series for established dwelling commitments continue to be mirrored in the series for total finance commitments. The trend estimate for established dwellings increased by 1.7% in March 1999, while the seasonally adjusted estimate increased by 9.2% to 34 791 commitments following a fall of 2.7% last month.

### PURPOSE OF FINANCE continued

#### REFINANCING

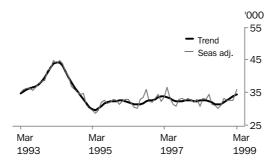

The refinancing series continued to display the volatility of recent months with the seasonally adjusted series increasing by 8.0% to 7 987 commitments in March 1999, after a similar increase in January was reversed by an 8% fall in February. The trend series increased by 1.4% in March, with some upward revisions to the trend series observed back to December 1998.

### TYPE OF LENDER

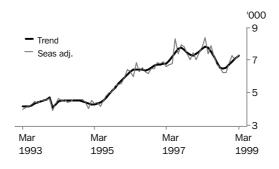

BANKS

The very strong March 1999 seasonally adjusted estimate for total dwelling commitments was primarily due to the strength of the increase in the series for banks. The seasonally adjusted increase of 10.8% in March 1999 comes after three months of decline in the series, and represents an additional 3 532 finance commitments made by banks out of an increase of 3 843 commitments by all lenders. The trend series of commitments by banks increased by 1.7%, the sixth successive increase in the series.

#### NON-BANKS

The trend estimate for commitments by non-bank lenders increased by 2.3% in March 1999 with the corresponding seasonally adjusted series increasing by 4.4%. This follows last month's fall of 3.8% in the seasonally adjusted series. The trend series has now exhibited increases in excess of 2% for each of the past four months.

## HOUSING FINANCE COMMITMENTS(a), By Purpose

(b) Excludes refinancing.

### EXPLANATORY NOTES

INTRODUCTION	<b>1</b> This publication presents statistics of secured housing finance commitments made by significant lenders to individuals. The commitments are for the construction or purchase of owner–occupied dwellings. Commitments for the purchase of land, or for the construction or purchase of dwellings for rental or resale, are excluded and shown in <i>Lending Finance</i> (Cat. no. 5671.0).	
SCOPE	<ul> <li>2 The following types of lenders are included:</li> <li>Banks</li> <li>Permanent building societies</li> <li>Credit unions/co-operative credit societies</li> <li>Life or general insurance companies</li> <li>General government enterprises</li> <li>Superannuation funds</li> <li>Organisations raising funds through the secondary mortgage market for approved home buyers under State government housing schemes</li> <li>Other financial corporations registered under the <i>Financial Corporations A 1974</i></li> <li>Other providers of consumer finance registered with State credit tribunals, including mortgage managers.</li> </ul>	
COVERAGE	<ul> <li>3 The statistics cover significant lenders only. Significant lenders are the largest lenders to individuals for the construction and purchase of owner–occupied dwellings. They account in aggregate for at least 95% of the Australian total and at least 90% of each State total of finance commitments for owner-occupied housing.</li> <li>4 An annual collection is conducted to maintain coverage of significant lenders. New lenders are included as their lending for owner-occupied housing becomes significant.</li> </ul>	
	<b>5</b> All banks and permanent building societies qualify as significant lenders and are therefore covered by these statistics. The category 'other lenders' includes a large number of small lenders that do not qualify as significant lenders and therefore are excluded from the survey. Although their omission does not have a serious impact on the overall coverage of lending activity, the statistics for 'other lenders' are affected to a greater extent by this coverage constraint.	
	<b>6</b> Changes in the classification of lenders (for example, the conversion of a permanent building society to a bank) are reflected in the 'type of lender' statistics from the month of such changes. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly <i>Bulletin</i> in the section on Technical Notes to Tables.	
REVISIONS	<b>7</b> Revisions to previously published statistics are included in the publication as they occur.	
REFINANCING	<b>8</b> Data on refinancing has been collected separately since July 1991. The seasonally adjusted estimates should be considered preliminary until additional observations are available to produce more reliable seasonal estimates. Refinancing excludes an institution's refinancing of its own loans over the same dwelling (refer to glossary).	

.....

### EXPLANATORY NOTES

•••••	• • • • • • • • • • • • • • • • • • • •				
MORTGAGE MANAGERS	<b>9</b> Commitments for housing finance by mortgage managers are included in 'other lenders' and 'total lenders' when not separately identified. Data for mortgage managers are only available separately from July 1995. Prior to July 1995, the more significant mortgage managers were included with 'other lenders'. Seasonally adjusted data for mortgage managers will not be available until a sufficient number of observations are available to estimate seasonal patterns.				
	<b>10</b> Care should be exercised in the interpretation of these statistics as:				
	<ul> <li>only those mortgage managers identified as significant lenders are included;</li> <li>only those commitments funded by securitisers are included. Commitments made by mortgage managers acting as agents or brokers for other financial institutions are reported by those lending institutions providing the finance, and are included in the lender type category relating to those institutions;</li> <li>commitments by mortgage managers for investment housing are excluded. The value of those commitments is included in Commercial Finance estimates.</li> </ul>				
SEASONAL ADJUSTMENT	<b>11</b> Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects' (arising from the varying amounts of activity on different days of the week and the varying reporting practices of the lenders). Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (for example, a change in interest rates) from the series.				
	<b>12</b> Over the period from early 1990 to April 1995, each of the four major banks changed from reporting for the 4 or 5 weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data takes account of this change in pattern.				
	<b>13</b> Two other developments in recent years may induce some change in the trading day and seasonal patterns of housing finance data. These comprise the changes in the classification of some major financial institutions (in particular, the conversion of building societies into banks) and the recent expansion of activity by mortgage managers. Estimation of seasonal adjustment and trading day factors that reflect the full effect of all these changes will not be possible until a sufficient number of years of data have been collected. Accordingly, the trend estimate data provide the most reliable indicator of underlying movement in housing finance commitments.				
	<b>14</b> State component series have been seasonally adjusted independently of the Australian series. The sum of the States components is therefore unlikely to equal the corresponding Australian total series. The State component series are also affected by the changes mentioned in paragraphs 12 and 13.				
TREND ESTIMATES	<b>15</b> Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the respective seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to <i>A Guide to Interpreting Time Series—Monitoring 'Trends': an Overview</i> (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on 02 6252 6345.				

### EXPLANATORY NOTES

•••••	• • • •	••••••••••••••••				
TREND ESTIMATES continued	<b>16</b> While the smoothing technique described in paragraph 15 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.					
	<b>17</b> Volatility in the refinancing series means that the most recent trend estimates may be subjected to greater revision than usual. Users are advised to exercise care when interpreting movements affected by this volatility.					
RELATED RELEASES	<b>18</b> Estimates for months prior to those shown in this publication are available. ### GLOSSARY

Alterations and additions Average borrowing	Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work. Average borrowing is calculated as follows: <u>Total value of lending commitments per month</u>			
	Total number of dwellings financed per month Average borrowing does not necessarily represent the average loan size per dwelling. For instance, average borrowing separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.			
Commitment	A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.			
Commitments not advanced	Commitments not advanced at the end of the period are calculated as follows:			
	<ul> <li>Balance of unadvanced commitments at the end of the previous period</li> <li>+ Total new housing commitments (including refinancing)</li> <li>+ Alterations and additions</li> </ul>			
	= Total commitments			
	<ul><li>Cancellations of commitments</li><li>Commitments advanced during the period</li></ul>			
	= Commitments not advanced at the end of the period			
Commitment value	The commitment value for a contract of sale is the dwelling's sale value less any deposit.			
Construction of dwellings	Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner–occupied dwellings.			
Dwelling	A dwelling is either a house or other dwelling. A house is a single self-contained place of residence detached from other buildings. An other dwelling is a single self–contained place of residence other than a house. Examples of other dwellings are individual flats, home units, town houses, terrace house, etc.			
Dwelling units	Dwelling units refer to the number of houses and other dwellings for which commitments have been made, either on the security of first mortgage or on contract of sale.			
Established dwelling	An established dwelling is one which has been completed for more than twelve months prior to the lodgement of a loan application, or which has been previously occupied.			
First home buyers	First home buyers are persons entering the home ownership market for the first time.			

### GLOSSARY

Fixed rate loan	Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.
Mortgage Managers	Mortgage Managers obtain funds from financial institutions and through securitisation to lend for housing finance. In general, they manage the loans that they originate on behalf of the wholesale lenders. To avoid double counting, only those mortgage manager commitments funded by securitisers are included in the housing finance statistics. Those commitments made by mortgage managers acting as agents/brokers for other financial institutions are reported by those institutions.
Newly erected dwelling	A new dwelling that has been completed within twelve months of the lodgement of a loan application, and the borrower will be the first occupant.
Refinancing	Refinancing represents a commitment to refinance an existing loan where the refinancing lender is not the lender who made the original loan. Excluded are an institution's refinancing of its own loans and the refinancing of loans to fund a change of residence. The latter is treated as a new lending commitment.
Secured housing finance	This is all secured commitments to individuals for the construction or purchase of houses and other dwellings for owner occupation, regardless of type of security. Commitments for housing that will be occupied by persons other than the owner(s) are excluded.
Self-contained	The dwelling includes bathing and cooking facilities.
Significant lenders	Significant lenders are those lenders who committed funds of more than \$34 million Australia-wide during the calendar year 1997.
