JULY KEY POINTS

TREND ESTIMATES

- The trend estimate for total housing finance commitments declined by 1.6% in July 2000. The series declined for all purposes of finance, with commitments to finance the purchase of new dwellings down 3.3% and finance commitments for the purchase of established dwellings falling slightly by 0.7%.
- The trend series for construction finance commitments remained in steep decline, falling by 7.7% in July 2000 for the eighth month of decline.

SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted series for housing finance commitments rose by 7.4% in July 2000, partially reversing the 14.2% decrease of the previous month.
- Commitments for the purchase of established dwellings rose by 9.5%, comprising a 16.6% rise in commitments other than refinancing and a fall in refinancing commitments of 8.5%. A significant component of the increase is attributable to first home buyers.
- The seasonally adjusted series for construction finance commitments declined by 3.8% in July 2000 to its lowest level since August 1987. Finance commitments for the purchase of new dwellings fell by 9.8%.

ORIGINAL ESTIMATES

- The proportion of commitments to first home buyers increased to 24.4% in July 2000 following the introduction on 1 July 2000 of the First Home Owner Grant as part of The New Taxation System. The number of commitments to first home buyers jumped by 64%.

- For further information about these and related statistics, contact Karen Young on Sydney 02 9268 4784, or the National Information Service on 1300 135 070.

CHANGES IN THIS ISSUE

Following the annual review of survey coverage, an updated sample of significant lenders has been introduced (see Explanatory Notes 3 to 5). The June 2000 estimates have been re-published using the updated sample so as to ensure that all monthly movements from June 2000 to July 2000 use a common sample.

SENSITIVITY ANALYSIS

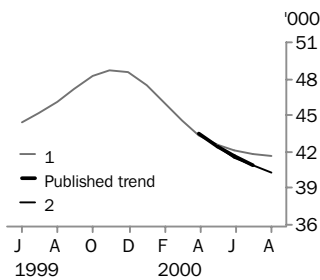

Readers should exercise care when interpreting this month's trend estimates because they will be revised when next month's seasonally adjusted estimates become available. For further information, see Explanatory Notes 15 to 17.

The graph below presents the effect of two possible scenarios on the previous trend estimates:

- 1** The August 2000 seasonally adjusted estimate of number of dwellings financed is *higher* than the July 2000 seasonally adjusted estimate by 4.0%.
- 2** The August 2000 seasonally adjusted estimate of number of dwellings financed is *lower* than the July 2000 seasonally adjusted estimate by 4.0%.

The percentage change of 4.0% was chosen because the average absolute percentage change of the seasonally adjusted series, based on the last 10 years of data, has been 4.0%.

HOUSING FINANCE: Summary of findings

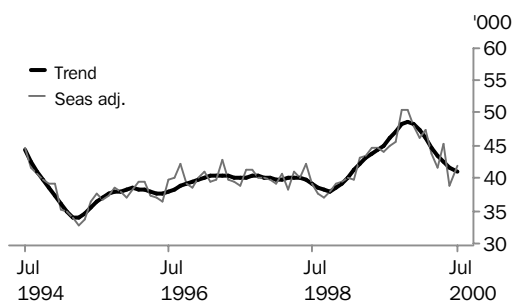

NUMBER OF DWELLINGS FINANCED

DWELLINGS FINANCED

After a decrease of 14.2% in June, the seasonally adjusted series for total housing finance commitments continued its recent pattern of volatility with a 7.4% increase in July 2000. However, the trend series, which has been in continuous decline since December 1999, continued to fall, down 1.6% in July.

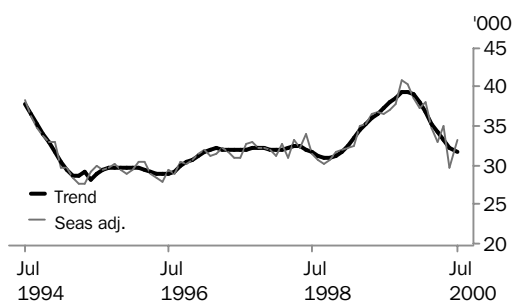

Following last month's significant falls across all states, the seasonally adjusted series for July has risen in nearly all states with the exception of the ACT (down 44 commitments, or 5.7%), the Northern Territory (down 10 commitments, or 2.9%) and New South Wales (down 137 commitments, or 1.0%). The increase was most pronounced in Tasmania (up by 184 commitments, or 19.4%), Victoria (up by 1 013 commitments, or 11.7%), Queensland (up by 746 commitments, or 11.5%) and South Australia (up by 361 commitments, or 11.3%). However, in trend terms, all states continued to decline with the exception of Tasmania (up 5.6%).

The proportion of commitments to first home buyers rose to 24.4% in July 2000 following last month's series low of 14.7%, reflecting the introduction of the First Home Owner Grant on 1 July 2000.

DWELLINGS FINANCED EXCLUDING REFINANCING

The trend estimate for housing finance, excluding refinancing, fell by 1.9% in July 2000, while the seasonally adjusted increased by 12.4%. Significantly, seasonally adjusted commitments for the purchase of established dwellings, excluding refinancing, rose by 16.6%, while the refinancing series continued to decline, down 8.5% in July 2000 following a 9.0% fall in June.

VALUE OF COMMITMENTS

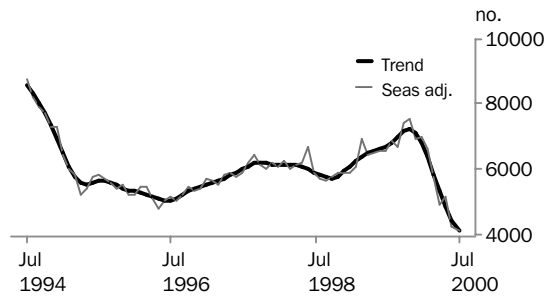

The value of housing finance commitments increased by 2.7% in seasonally adjusted terms in July 2000 to \$5 328 million after a decrease of 14.1% in June 2000. The trend series continued to decline with a fall of 3.4% in July 2000. The rate of decline now exceeds 3% for six successive months. The average borrowing size (original terms) was \$129 100 in July 2000, down from \$136 100 average borrowing size in June 2000, due in part to the increase in first home buyer commitments (whose average value is usually lower).

HOUSING FINANCE: Summary of findings

PURPOSE OF FINANCE

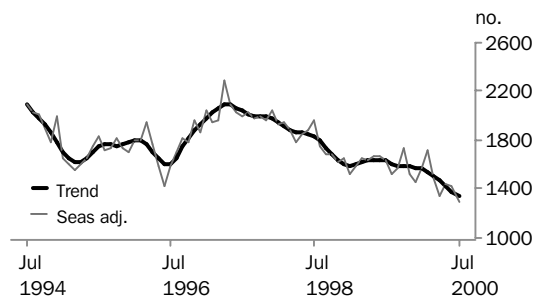

CONSTRUCTION OF DWELLINGS

The seasonally adjusted number of construction finance commitments continued to decline in July, falling 3.8% to 4 100 commitments. The July result follows a seasonally adjusted fall in June 2000 of 17.2% with the series continuing to be at its lowest level since August 1987. The trend series continued its deepening decline (down 7.7%) in July 2000, with the picture now one of continuous trend decline since December 1999.

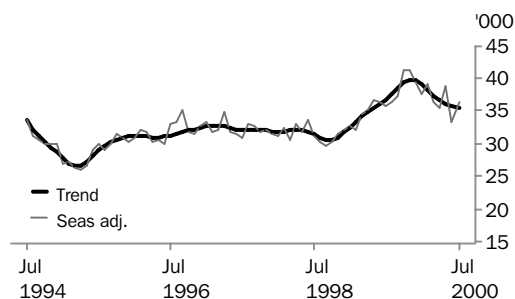

PURCHASE OF NEW DWELLINGS

The seasonally adjusted series for commitments to purchase newly erected dwellings fell significantly in July 2000 (down 9.8%). The magnitude of the fall in the adjusted series has caused the decline in the trend series to deepen (down 3.3%) with downward revisions in the trend series back to January 2000.

PURCHASE OF ESTABLISHED DWELLINGS

Commitments to purchase established dwellings increased by 9.5% in seasonally adjusted terms in July 2000, after a decrease of 14.3% in the previous month. However, the trend series decline has slowed, falling by just 0.7% in July 2000.

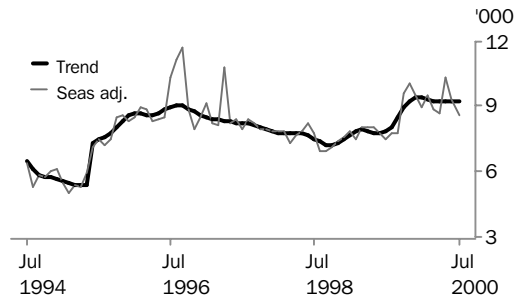

HOUSING FINANCE: Summary of findings

PURPOSE OF FINANCE *continued*

REFINANCING

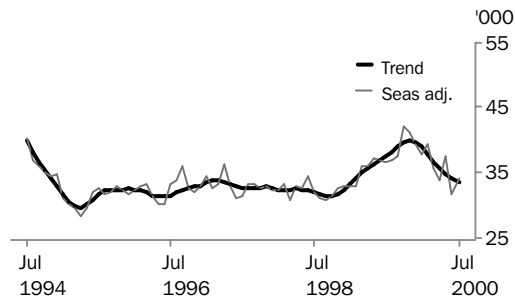

The seasonally adjusted series for the number of commitments to refinance existing dwellings declined by 8.5% in July 2000, contrasting with the increase of 12.4% observed for total commitments excluding refinancing. This contrast is partly explained by the surge in first home buyer commitments (up 3 863 in original terms), while non-first home buyer commitments fell (down 4 361). The two successive months of decline wiped out the 19.2% increase of May 2000. The trend series weakened, falling by 0.3% in July 2000 and has been mostly flat during 2000.

TYPE OF LENDER

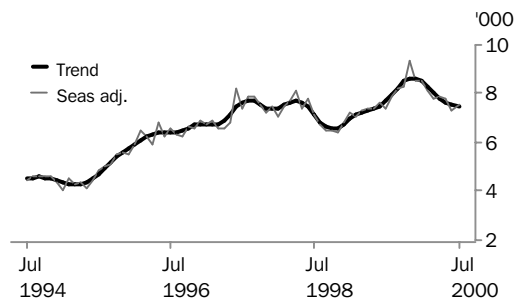

BANKS

The seasonally adjusted series for Bank commitments has continued its recent pattern of volatility, rising 8.5% in July after falling 16.0% in June 2000. The trend series continued its eighth month of negative growth, down 1.6% in July.

NON-BANKS

Similarly to Bank commitments, the seasonally adjusted estimate for Non-Bank lending rose by a milder 2.5% in July, although this follows a decline of 5.8% in the previous month. The seasonally adjusted series for Permanent Building Societies rose significantly (up 37.5%). The trend series for Non-Bank lending fell 1.4% in July, the seventh successive month of decline.

(a) Excludes alterations and additions.

(b) Excludes refinancing.

EXPLANATORY NOTES

INTRODUCTION	<p>1 This publication presents statistics of secured housing finance commitments made by significant lenders to individuals. The commitments are for the construction or purchase of owner-occupied dwellings. Commitments for the purchase of land, or for the construction or purchase of dwellings for rental or resale, are excluded and shown in <i>Lending Finance</i> (Cat. no. 5671.0).</p>
SCOPE	<p>2 The following types of lenders are included:</p> <ul style="list-style-type: none">▪ Banks▪ Permanent building societies▪ Credit unions/co-operative credit societies▪ Life or general insurance companies▪ General government enterprises▪ Superannuation funds▪ Organisations raising funds through the secondary mortgage market for approved home buyers under State government housing schemes▪ Other financial corporations registered under the <i>Financial Corporations Act 1974</i>▪ Other providers of consumer finance registered with State credit tribunals, including mortgage managers.
COVERAGE	<p>3 The statistics cover significant lenders only. Significant lenders are the largest lenders to individuals for the construction and purchase of owner-occupied dwellings. They account in aggregate for at least 95% of the Australian total and at least 90% of each State total of finance commitments for owner-occupied housing.</p> <p>4 An annual collection is conducted to maintain coverage of significant lenders. New lenders are included as their lending for owner-occupied housing becomes significant.</p> <p>5 All banks and permanent building societies qualify as significant lenders and are therefore covered by these statistics. The category 'other lenders' includes a large number of small lenders that do not qualify as significant lenders and therefore are excluded from the survey. Although their omission does not have a serious impact on the overall coverage of lending activity, the statistics for 'other lenders' are affected to a greater extent by this coverage constraint.</p> <p>6 Changes in the classification of lenders (for example, the conversion of a permanent building society to a bank) are reflected in the 'type of lender' statistics from the month of such changes. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly <i>Bulletin</i> in the section on Technical Notes to Tables.</p>
REVISIONS	<p>7 Revisions to previously published statistics are included in the publication as they occur.</p>
REFINANCING	<p>8 Data on refinancing has been collected separately since July 1991. The seasonally adjusted estimates should be considered preliminary until additional observations are available to produce more reliable seasonal estimates. Refinancing excludes an institution's refinancing of its own loans over the same dwelling (refer to glossary).</p>

EXPLANATORY NOTES

MORTGAGE MANAGERS

9 Commitments for housing finance by mortgage managers are included in 'other lenders' and 'total lenders' when not separately identified. Data for mortgage managers are only available separately from July 1995. Prior to July 1995, the more significant mortgage managers were included with 'other lenders'. Seasonally adjusted data for mortgage managers will not be available until a sufficient number of observations are available to estimate seasonal patterns.

10 Care should be exercised in the interpretation of these statistics as:

- only those mortgage managers identified as significant lenders are included;
- only those commitments funded by securitisers are included. Commitments made by mortgage managers acting as agents or brokers for other financial institutions are reported by those lending institutions providing the finance, and are included in the lender type category relating to those institutions;
- commitments by mortgage managers for investment housing are excluded.

The value of those commitments is included in Commercial Finance estimates.

SEASONAL ADJUSTMENT

11 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects' (arising from the varying amounts of activity on different days of the week and the varying reporting practices of the lenders). Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (for example, a change in interest rates) from the series.

12 Over the period from early 1990 to April 1995, each of the four major banks changed from reporting for the 4 or 5 weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data takes account of this change in pattern.

13 Two other developments in recent years may induce some change in the trading day and seasonal patterns of housing finance data. These comprise the changes in the classification of some major financial institutions (in particular, the conversion of building societies into banks) and the recent expansion of activity by mortgage managers. Estimation of seasonal adjustment and trading day factors that reflect the full effect of all these changes will not be possible until a sufficient number of years of data have been collected. Accordingly, the trend estimate data provide the most reliable indicator of underlying movement in housing finance commitments.

14 State component series have been seasonally adjusted independently of the Australian series. The sum of the States components is therefore unlikely to equal the corresponding Australian total series. The State component series are also affected by the changes mentioned in paragraphs 12 and 13.

TREND ESTIMATES

15 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the respective seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *A Guide to Interpreting Time Series—Monitoring 'Trends': an Overview* (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on 02 6252 6345.

EXPLANATORY NOTES

TREND ESTIMATES *continued*

16 While the smoothing technique described in paragraph 15 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.

17 Volatility in the refinancing series means that the most recent trend estimates may be subjected to greater revision than usual. Users are advised to exercise care when interpreting movements affected by this volatility.

RELATED RELEASES

18 Estimates for months prior to those shown in this publication are available. Users may wish to refer to more detailed commitment series for Personal, Commercial and Lease Finance that are available by purpose, type of facility and industry. There may be a charge for this information, depending on the volume of data requested.

19 Users may also wish to refer to the following releases:

- *Lending Finance, Australia* (Cat. no. 5671.0)
Provides monthly data on the value of finance commitments for individuals for housing and other personal finance commitments, commercial finance commitments to businesses under fixed and revolving credit facilities and value of goods under lease finance commitments.
- *Assets and Liabilities of Australian Securitizers* (Cat. no. 5232.0.40.001)
Provides quarterly information on the assets and liabilities of securitizers. These financial institutions issue short and/or long term securities (known as asset-backed securities) against specifically matched assets (e.g. mortgages, credit cards receivables).
- *Annual Statistics for Financial Institutions* (Cat. no. 5661.0.40.001)
The statistics cover type and amount of assets and liabilities, source of income, type of expenditure and appropriation of profits for each institution type registered under the *Financial Corporations Act 1974*.
- *Reserve Bank of Australia Bulletin* (Reserve Bank of Australia)
Contains feature articles on current issues in the financial markets and monthly financial information for banks and other financial institutions registered under the *Financial Corporations Act 1974*. Statistics on the financial markets (e.g. interest rates and share prices indices) and relevant aggregates of the Commonwealth Government, National Accounts and Balance of Payments are also published.
- *Buildings Approvals, Australia* (Cat. no. 8731.0)
Provides monthly data on the number dwelling units and value of residential buildings approved for private and public sector, value of alterations and additions and value of non-residential buildings by class of building.
- *Building Activity Australia, Dwelling Unit Commencements* (Cat. no. 8750.0)
Contains preliminary quarterly estimates of the number of dwelling units commenced for private and public sector.

GLOSSARY

Alterations and additions	Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.
Average borrowing	Average borrowing is calculated as follows: $\frac{\text{Total value of lending commitments per month}}{\text{Total number of dwellings financed per month}}$ Average borrowing does not necessarily represent the average loan size per dwelling. For instance, average borrowing separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.
Commitment	A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.
Commitments not advanced	Commitments not advanced at the end of the period are calculated as follows: $\begin{array}{r} \text{Balance of unadvanced commitments at the end of the previous period} \\ + \text{ Total new housing commitments (including refinancing)} \\ + \text{ Alterations and additions} \\ \hline = \text{ Total commitments} \\ - \text{ Cancellations of commitments} \\ - \text{ Commitments advanced during the period} \\ \hline = \text{ Commitments not advanced at the end of the period} \end{array}$
Commitment value	The commitment value for a contract of sale is the dwelling's sale value less any deposit.
Construction of dwellings	Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner-occupied dwellings.
Dwelling	A dwelling is either a house or other dwelling. A house is a single self-contained place of residence detached from other buildings. An other dwelling is a single self-contained place of residence other than a house. Examples of other dwellings are individual flats, home units, town houses, terrace house, etc.
Dwelling units	Dwelling units refer to the number of houses and other dwellings for which commitments have been made, either on the security of first mortgage or on contract of sale.
Established dwelling	An established dwelling is one which has been completed for more than twelve months prior to the lodgement of a loan application, or which has been previously occupied.
First home buyers	First home buyers are persons entering the home ownership market for the first time.

GLOSSARY

Fixed rate loan	Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.
Mortgage Managers	Mortgage Managers obtain funds from financial institutions and through securitisation to lend for housing finance. In general, they manage the loans that they originate on behalf of the wholesale lenders. To avoid double counting, only those mortgage manager commitments funded by securitisers are included in the housing finance statistics. Those commitments made by mortgage managers acting as agents/brokers for other financial institutions are reported by those institutions.
Newly erected dwelling	A new dwelling that has been completed within twelve months of the lodgement of a loan application, and the borrower will be the first occupant.
Refinancing	Refinancing represents a commitment to refinance an existing loan where the refinancing lender is not the lender who made the original loan. Excluded are an institution's refinancing of its own loans and the refinancing of loans to fund a change of residence. The latter is treated as a new lending commitment.
Secured housing finance	This is all secured commitments to individuals for the construction or purchase of houses and other dwellings for owner occupation, regardless of type of security. Commitments for housing that will be occupied by persons other than the owner(s) are excluded.
Self-contained	The dwelling includes bathing and cooking facilities.
Significant lenders	Significant lenders include, but are not restricted to, those lenders who committed funds of more than \$187 million Australia-wide during the calendar year 1999. Additional lenders are included in the survey where necessary to meet the coverage constraints as described in Explanatory Note 3.
