## DECEMBER QTR KEY POINTS

## THE ALL GROUPS CPI

- rose $0.6 \%$ in the December quarter 1999, down from $0.9 \%$ in the September quarter 1999.
- rose $1.8 \%$ between the December quarters 1998 and 1999.

## OVERVIEW OF CPI MOVEMENTS

- contributing most to the overall increase this quarter were rises in the cost of house purchase $(+3.2 \%)$, domestic holiday travel and accommodation $(+5.7 \%)$, cigarettes and tobacco $(+4.1 \%)$, take away and fast foods $(+1.3 \%)$, restaurant meals $(+1.3 \%)$, vehicle insurance ( $+5.2 \%$ ) and privately-owned dwelling rents $(+0.6 \%)$.
- partially offsetting the above were falls in fresh fruit ( $-6.5 \%$ ), motor vehicle repair and servicing $(-3.5 \%)$, audio, visual and computing equipment ( $-7.7 \%$ ), motor vehicles $(-1.6 \%)$, pharmaceuticals ( $-4.0 \%$ ) and women's outerwear ( $-1.6 \%$ ).
- contributing most to the annual increase were rises in the cost of house purchase $(+7.9 \%)$, automotive fuel $(+12.2 \%)$, cigarettes and tobacco $(+7.4 \%)$, overseas holiday travel and accommodation ( $+9.2 \%$ ), privately-owned dwelling rents $(+2.6 \%)$, take away and fast foods (4.5\%) and domestic holiday travel and accommodation $(+4.3 \%)$. Partially offsetting these increases were falls in the cost of hospital and medical services ( $-15.0 \%$ ), audio, visual and computing equipment $(-18.3 \%)$, fresh vegetables ( $-14.3 \%$ ), communication services ( $-7.6 \%$ ) and motor vehicles ( $-1.8 \%$ ).

## NOTES

issue
March 2000
June 2000

RELEASE DATE
28 April 2000
26 July 2000

CHANGES IN THIS ISSUE The series 'All groups excluding Housing' for Hong Kong, shown in the International Comparisons Tables 9 and 10, has been revised. Following a recommendation from the Census and Statistics Department of Hong Kong, the series, which was previously based on a CPI relating to about $50 \%$ of households in Hong Kong, has been replaced in this issue with a series based on a CPI which relates to about $90 \%$ of all households.

Any discrepancies between totals and sums of components in this publication are due to rounding. For similar reasons quarterly movements shown by sub-group or group index numbers in Table 7 do not necessarily correspond exactly with those shown by the relevant index points

Dennis Trewin<br>Acting Australian Statistician

## ANALYSESAND COMMENTS

## MAIN CONTRIBUTIONS TO CHANGE

HOUSING: +1.5\%

ALCOHOL AND TOBACCO: $+2.0 \%$ This rise was mainly due to increases in the cost of cigarettes and tobacco $(+4.1 \%)$ and beer $(+1.2 \%)$. The increase in the cost of cigarettes and tobacco resulted mainly from the introduction of the per-stick rate of duty on tobacco products (Australian Customs Notice No. 99/67) from 1 November 1999.

On an annual basis, cigarettes and tobacco ( $+7.4 \%$ ), beer $(+2.0 \%)$, spirits $(+1.3 \%)$ and wine $(+0.7 \%)$ all increased in price.

RECREATION AND EDUCATION: +0.5\%

FOOD: $+0.3 \%$

TRANSPORTATION: -0.4\%

The quarterly increase in the Housing group was mainly due to increases in the cost of house purchase ( $+3.2 \%$ ), privately-owned dwelling rents ( $+0.6 \%$ ), electricity ( $+1.2 \%$ ) and house insurance $(+8.8 \%)$. There were no significant offsets.

Annually, the housing index rose $4.3 \%$. This was mainly due to increases in house purchase $(+7.9 \%)$, privately-owned dwelling rents $(+2.6 \%)$, property rates and charges $(+5.2 \%)$ and house insurance $(+13.5 \%)$.

The increase in recreation and education costs this quarter was mainly attributable to the seasonal increase in domestic holiday travel and accommodation (+5.7\%) and an increase in the cost of sports participation $(+1.6 \%)$. Partially offsetting these increases were falls in the cost of audio, visual and computing equipment ( $-7.7 \%$ ) and toys, games and hobbies ( $-4.3 \%$ ).

On an annual basis, the cost of recreation and education rose 1.9\%. Increases in overseas holiday travel and accommodation ( $+9.2 \%$ ), domestic holiday travel and accommodation ( $+4.3 \%$ ), other recreational activities $(+4.8 \%)$, education ( $+4.4 \%$ ) and sports participation $(+5.1 \%)$ were partially offset by a significant fall in audio, visual and computing equipment ( $-18.3 \%$ ).

The rise in food prices this quarter was due to increases in the cost of take away and fast foods $(+1.3 \%)$, restaurant meals $(+1.3 \%)$, milk and cream $(+2.4 \%)$, fresh vegetables $(+2.0 \%)$ and fish and other seafood $(+3.3 \%)$. The only significant offset was a fall in the cost of fresh fruit ( $-6.5 \%$ ).

Over the 12 months to December quarter 1999, food prices increased by $2.3 \%$. This was largely due to increases in the price of take away and fast foods ( $+4.5 \%$ ), restaurant meals $(+3.7 \%)$, bread $(+6.4 \%)$, milk and cream $(+4.9 \%)$ and fresh fruit $(+3.8 \%)$. The only significant offset was a fall in the cost of fresh vegetables ( $-14.3 \%$ ).

The fall in transportation prices this quarter was due to decreases in the cost of motor vehicle repair and servicing ( $-3.5 \%$ ) and motor vehicles ( $-1.6 \%$ ). Partially offsetting these falls were increases in the cost of vehicle insurance $(+5.2 \%)$, automotive fuel $(+0.6 \%)$ and urban transport fares $(+1.7 \%)$. Petrol prices rose $7.3 \%, 5.3 \%$ and $1.3 \%$ in July, August and September respectively, fell in October ( $-2.8 \%$ ) and rose in November $(+0.6 \%)$ and December ( $+1.7 \%$ ).

Over the 12 months to December quarter 1999, the cost of transportation rose $3.7 \%$. This was mainly due to increases in the price of petrol $(+12.2 \%)$, vehicle insurance $(+9.8 \%)$ and urban transport fares $(+5.2 \%)$. Partially offsetting these increases were falls in the cost of motor vehicles ( $-1.8 \%$ ) and motor vehicle repair and servicing (-1.9\%).

## ANALYSES AND COMMENTS

## MAIN CONTRIBUTIONS TO CHANGE continued

CLOTHING: -0.9\%
The decrease in clothing prices this quarter was mainly attributable to falls in the cost of women's outerwear ( $-1.6 \%$ ) and clothing accessories ( $-3.2 \%$ ). Most other clothing prices recorded small falls.

Over the 12 months to December quarter 1999, clothing prices decreased 1.6\%. This was mainly due to falls in the cost of women's outerwear ( $-2.8 \%$ ), men's outerwear $(-0.7 \%)$, clothing accessories $(-2.0 \%)$ and women's footwear $(-2.4 \%)$. There were no significant offsets.

## EXPLANATORY NOTES

BRIEF DESCRIPTION OF THE CPI

PRICES

WEIGHTING PATTERN

1 The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). This 'basket' covers a wide range of goods and services, arranged in the following eight groups:
food
clothing
housing
household equipment and operation
transportation
alcohol and tobacco
health and personal care and
recreation and education.

The inclusion in the CPI of a ninth group, financial services, has been announced, and it is expected to be introduced into the CPI during 2000.

2 The capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.

3 Further information about the CPI is contained in a booklet entitled A Guide to the Consumer Price Index, 13th Series (Cat. No. 6440.0) which is available on the ABS Website at www.abs.gov.au, or from the ABS on request

4 The frequency of price collection by item varies as necessary to obtain reliable price measures. Prices of some items are volatile (i.e. their prices may vary many times each quarter) and for these items frequent price observations are necessary to obtain a reliable measure of the average price for the quarter. Each month prices are collected at regular intervals for goods such as milk, bread, fresh meat and seafood, fresh fruit and vegetables, petrol, alcohol and tobacco and holiday travel and accommodation. For most other items, price volatility is not a problem and prices are collected once a quarter. There are a few items where prices are changed at infrequent intervals, for example education fees where prices are set once a year. In these cases, the frequency of price collection is modified accordingly.

5 In order to facilitate a more even spread of field collection workload the bulk of the items for which prices are collected quarterly are priced in the first two months of each quarter (i.e. July/August, October/November, January/February, April/May). With a few exceptions items priced in the third month are those subject to price changes at discrete points of time (e.g. electricity and postal charges); in these cases information about any changes in price during the quarter is obtained so that an average price for the whole quarter can be calculated.

6 There are 101 expenditure classes (that is, groupings of like items) in the thirteenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.

7 Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises thirteen series of price indexes which have been linked to form a continuous series.

## EXPLANATORYNOTES

8 Movements in indexes from one period to another can be expressed either as changes in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods:

All groups CPI: Weighted average of eight capital cities.
Index numbers:

| December Quarter 1999 | 124.1 | $($ see Table 1) |
| :--- | :--- | :--- | :--- |
| less September Quarter 1999 | 123.4 | (see Table 1) |
| Change in index points | 0.7 |  |
| Percentage change $=$ | $\frac{0.7}{123.4} \times 100=$ | $0.6 \%$ |

9 Percentage changes are calculated to illustrate three different kinds of movements in index numbers:

- movements between consecutive financial years (where the index numbers for financial years are simple averages of the quarterly index numbers),
- movements between corresponding quarters of consecutive years, and
- movements between consecutive quarters.

10 Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for groups, sub-groups and expenditure classes. It also shows the contribution which each makes to the total CPI. For instance, the dairy and related products sub-group contributed 1.87 index points to the total All groups index number of 124.1 for December Quarter 1999. The final column shows contributions to the change in All Groups index points by each group, sub-group and expenditure class.

11 Various series are presented in Tables 8, 11 and 12 in this publication which are helpful for analytical purposes. These series are compiled by taking subsets of the CPI basket. (A complete list of CPI groups, subgroups and expenditure classes is contained in Tables 6 and 7.)

12 Some of the compiled series are self explanatory, such as 'All groups excluding Food'. Other series and their composition are described below:

All groups, goods component: comprises the Food group (except Restaurant meals), Clothing group (except Clothing services and shoe repair), Household equipment and operation group (except Household services and Postal and communication services), Alcohol and tobacco group, the Utilities sub-group, House purchase, Motor vehicles, Automotive fuel, Motor Vehicle parts and accessories, Personal care products, Books, newspapers, magazines and stationery, Audio, visual and computing equipment, Audio, visual and computing media and services, Sports and recreational equipment and Toys, games and hobbies.

All groups, services component: comprises all items not included in the 'All groups, goods component'.
All groups, tradables component: comprises all items whose prices are largely determined on the world market.

All groups, non-tradables component: comprises all items not included in the 'All groups, tradables component'.

All groups excluding 'volatile items': comprises the All groups CPI excluding Fresh fruit and vegetables and Automotive fuel.

## EXPLANATORYNOTES

Private sector goods and services: in addition to the items excluded from the series "All groups excluding 'volatile items'", also excludes: Government-owned dwelling rents, Utilities, Property rates and charges, Postal and communication services, Other motoring charges, Urban transport fares, Health services, Pharmaceuticals, and Education and child care.

13 A detailed description of 'tradables' and 'non-tradables' is published in the Appendix to this publication.

14 In analysing price movements in Australia, an important consideration is Australia's performance relative to other countries. However, due to the many differences in the structure of the housing sector in different countries and in the way that housing is treated in their CPIs, a simple comparison of All groups (or headline) CPIs is often inappropriate. To provide a better basis for international comparisons, the Fourteenth International Conference of Labour Statisticians adopted a resolution which called for countries to 'provide for dissemination at the international level of an index which excludes shelter, in addition to the all-items index'.

15 Table 9 presents indexes for selected countries on a basis consistent with the above resolution and comparable to the Australian series 'All groups excluding Housing'. To facilitate comparisons all indexes in this table have, where necessary, been converted to a quarterly basis and re-referenced to a base of $1989-90=100.0$.

16 In producing Table 9, the ABS is grateful for the assistance of the relevant national statistical agencies which have either directly supplied indexes for all items excluding shelter or data to enable their derivation.

17 Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a Release Advice (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

18 Users may also wish to refer to the following publications:

- A Guide to the Consumer Price Index, 13th Series (Cat. no. 6440.0)
- Average Retail Prices of Selected Items, Eight Capital Cities (Cat. no. 6403.0)
- House Price Indexes: Eight Capital Cities (Cat. no. 6416.0)
- Information Paper: Issues to be Considered During the 13th Series Australian Consumer Price Index Review (Cat. no. 6451.0)
- Information Paper: Outcome of the 13th Series Australian Consumer Price Index Review (Cat. no. 6453.0)
- Information Paper : Introduction of the 13th Series Australian Consumer Price Index (Cat. no. 6454.0)

19 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Steve Whennan on 0262526251 or to any ABS office.
