All groups	0.8	3.2
All groups excluding housing	0.8	2.7

JUNE QTR KEY POINTS

THE ALL GROUPS CPI

- rose 0.8% in the June quarter 2000, down from 0.9% in the March quarter 2000.
- rose 3.2% between the June quarters 1999 and 2000.

OVERVIEW OF CPI MOVEMENTS

- contributing most to the overall increase this quarter were rises in the cost of automotive fuel (+3.2%), fresh vegetables (+9.9%), vehicle insurance (+11.6%), overseas holiday travel and accommodation (+4.3%), furniture (+1.6%), privately-owned dwelling rents (+1.0%), beer (+1.8%) and women's outerwear (+2.2%).
- partially offsetting these were falls in the cost of domestic holiday travel and accommodation (-4.3%) and fresh fruit (-3.8%).
- contributing most to the annual increase were rises in the cost of automotive fuel (+21.8%), house purchase (+7.5%), cigarettes and tobacco (+9.4%), vehicle insurance (+33.7%), privately-owned dwelling rents (+3.2%), fresh vegetables (+12.5%) and hospital and medical services (+4.7%). Partially offsetting these increases were falls in the cost of fresh fruit (-17.2%), audio, visual and computing equipment (-15.1%), motor vehicle repair and servicing (-2.7%), overseas holiday travel and accommodation (-3.9%) and communication services (-2.7%).

	The timing of the introduction of the 14th s introduction of The New Tax System. A disc decision is contained in <i>Information Paper</i> (Cat. no. 6425.0), which was released on 3 N	cussion of the issues underpinning this <i>:: Price Indexes and the New Tax System</i>
ROUNDING		of components in this publication are due to vements shown by sub-group or group index espond exactly with those shown by the

Dennis Trewin Australian Statistician

MAIN CONTRIBUTIONS TO CHANGE

TRANSPORTATION: +1.5%	The rise in transportation costs this quarter was mainly due to an increase in automotive fuel prices $(+3.2\%)$. Petrol prices fell in January (-0.1%) , rose in February $(+5.3\%)$ and March $(+8.2\%)$, then fell in April (-6.7%) before rising again in May $(+4.0\%)$ and June $(+1.7\%)$. Adding to the increase in automotive fuel prices in the June quarter was a rise in the cost of vehicle insurance $(+11.6\%)$. The only offset to these increases was a small fall in the cost of motor vehicle parts and accessories (-0.6%) .
	Over the 12 months to June quarter 2000, the cost of transportation rose 7.5%. The main contributors to this increase were automotive fuel (+21.8%), vehicle insurance (+33.7%), other motoring charges (+4.2%) and urban transport fares (+4.8%). Partially offsetting these increases were falls in the cost of motor vehicle repair and servicing (-2.7%) and motor vehicles (-0.5%).
FOOD: +0.9%	The rise in food costs this quarter was largely due to increases in the price of fresh vegetables $(+9.9\%)$, restaurant meals $(+1.2\%)$, milk and cream $(+1.9\%)$ and beef and veal $(+2.5\%)$. Partially offsetting these increases were falls in the price of fresh fruit (-3.8%) , tea, coffee and food drinks (-3.5%) and cakes and biscuits (-1.4%) .
	Over the 12 months to June quarter 2000, food costs increased by 1.9%. The main contributors to this increase fresh vegetables $(+12.5\%)$, restaurant meals $(+4.4\%)$, takeaway and fast foods $(+3.2\%)$, milk and cream $(+6.6\%)$, beef and veal $(+5.8\%)$ and bread $(+3.8\%)$. The only significant falls occurred in fresh fruit (-17.2%) and tea, coffee and food drinks (-3.9%) .
HOUSEHOLD EQUIPMENT AND OPERATION: +1.2%	The rise in household equipment and operation costs this quarter was largely due to increases in the price of furniture $(+1.6\%)$, communication services $(+1.5\%)$, other household supplies $(+1.9\%)$, house contents insurance $(+5.7\%)$ and pet foods, pets and supplies $(+3.1\%)$. There were no significant falls.
	Annually, household equipment and operation costs rose 0.4%. The main contributors to this increase were house contents insurance (+19.8%), other household supplies (+3.0%) and domestic services (+3.8%). These increases were partially offset by falls in communication services (-2.7%), appliances (-1.5%) and pet foods, pets and supplies (-2.0%).
HOUSING: +0.5%	The rise in housing costs was mainly due to increases in privately-owned dwelling rents $(+1.0\%)$, house purchase $(+0.4\%)$ and house insurance $(+7.8\%)$. The only significant offset was a fall in the cost of electricity (-1.1%) , mainly due to the commencement of the Winter Energy Concession for 2000 in Melbourne.
	Annually, housing costs rose 4.8%. The main contributors to this increase were house purchase (+7.5%), privately-owned dwelling rents (+3.2%), house insurance (+32.9%), property rates and charges (+5.2%) and house repairs and maintenance (+2.4%). There were no significant falls.

.....

MAIN CONTRIBUTIONS TO CHANGE continued

ALCOHOL AND TOBACCO: +0.8% This rise was mainly due to an increase of 1.8% in the price of beer and smaller increases in the price of cigarettes and tobacco (+0.3%) and spirits (+0.6%).

> Over the 12 months to June quarter 2000, the cost of alcohol and tobacco rose 4.9%. The main contributors to this increase were cigarettes and tobacco (+9.4%) and beer (+3.1%). There were no falls.

EXPLANATORY NOTES

.

.

BRIEF DESCRIPTION OF THE CPI	1 The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). This 'basket' covers a wide range of goods and services, arranged in the following eight groups:
	food clothing housing household equipment and operation transportation alcohol and tobacco health and personal care and recreation and education.
	2 The capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.
	3 Further information about the CPI is contained in a booklet entitled <i>A Guide to the Consumer Price Index, 13th Series</i> (Cat. No. 6440.0) which is available on the ABS Website at www.abs.gov.au , or from the ABS on request.
PRICES	4 The frequency of price collection by item varies as necessary to obtain reliable price measures. Prices of some items are volatile (i.e. their prices may vary many times each quarter) and for these items frequent price observations are necessary to obtain a reliable measure of the average price for the quarter. Each month prices are collected at regular intervals for goods such as milk, bread, fresh meat and seafood, fresh fruit and vegetables, petrol, alcohol and tobacco and holiday travel and accommodation. For most other items, price volatility is not a problem and prices are collected once a quarter. There are a few items where prices are changed at infrequent intervals, for example education fees where prices are set once a year. In these cases, the frequency of price collection is modified accordingly.
	5 In order to facilitate a more even spread of field collection workload the bulk of the items for which prices are collected quarterly are priced in the first two months of each quarter (i.e. July/August, October/November, January/February, April/May). With a few exceptions items priced in the third month are those subject to price changes at discrete points of time (e.g. electricity and postal charges); in these cases information about any changes in price during the quarter is obtained so that an average price for the whole quarter can be calculated.
WEIGHTING PATTERN	6 There are 101 expenditure classes (that is, groupings of like items) in the thirteenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.
	7 Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises

thirteen series of price indexes which have been linked to form a continuous series.

ANALYSIS OF CPI CHANGES

8 Movements in indexes from one period to another can be expressed either as changes in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods:

All groups CPI: Weighted average of eight capital cities.

	Index numbers:
June Quarter 2000	126.2 (see Table 1)
less March Quarter 2000	125.2 (see Table 1)
Change in index points	1.0
Percentage change =	$\frac{1.0}{125.2} x \ 100 = \qquad 0.8\%$

9 Percentage changes are calculated to illustrate three different kinds of movements in index numbers:

- movements between consecutive financial years (where the index numbers for financial years are simple averages of the quarterly index numbers),
- movements between corresponding quarters of consecutive years, and
- movements between consecutive quarters.

10 Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for groups, sub-groups and expenditure classes. It also shows the contribution which each makes to the total CPI. For instance, the dairy and related products sub-group contributed 1.92 index points to the total All groups index number of 126.2 for June Quarter 2000. The final column shows contributions to the change in All Groups index points by each group, sub-group and expenditure class.

SPECIAL SERIES**11** Various series are presented in Tables 8, 11 and 12 in this publication which are
helpful for analytical purposes. These series are compiled by taking subsets of the CPI
basket. (A complete list of CPI groups, subgroups and expenditure classes is contained in
Tables 6 and 7.)

12 Some of the compiled series are self explanatory, such as 'All groups excluding Food'. Other series and their composition are described below:

All groups, goods component: comprises the Food group (except Restaurant meals), Clothing group (except Clothing services and shoe repair), Household equipment and operation group (except Household services and Postal and communication services), Alcohol and tobacco group, the Utilities sub-group, House purchase, Motor vehicles, Automotive fuel, Motor Vehicle parts and accessories, Personal care products, Books, newspapers, magazines and stationery, Audio, visual and computing equipment, Audio, visual and computing media and services, Sports and recreational equipment and Toys, games and hobbies.

All groups, services component: comprises all items not included in the 'All groups, goods component'.

All groups, tradables component: comprises all items whose prices are largely determined on the world market.

All groups, non-tradables component: comprises all items not included in the 'All groups, tradables component'.

All groups excluding 'volatile items': comprises the All groups CPI excluding Fresh fruit and vegetables and Automotive fuel.

EXPLANATORY NOTES

.

SPECIAL SERIES continued	 <i>Private sector goods and services</i>: in addition to the items excluded from the series "All groups excluding 'volatile items'", also excludes: Government-owned dwelling rents, Utilities, Property rates and charges, Postal and communication services, Other motoring charges, Urban transport fares, Health services, Pharmaceuticals, and Education and child care. 13 A detailed description of 'tradables' and 'non-tradables' is published in the Appendix to
	the September quarter 1999 issue of this publication.
INTERNATIONAL COMPARISONS	14 In analysing price movements in Australia, an important consideration is Australia's performance relative to other countries. However, due to the many differences in the structure of the housing sector in different countries and in the way that housing is treated in their CPIs, a simple comparison of All groups (or headline) CPIs is often inappropriate. To provide a better basis for international comparisons, the Fourteenth International Conference of Labour Statisticians adopted a resolution which called for countries to 'provide for dissemination at the international level of an index which excludes shelter, in addition to the all-items index'.
	15 Table 9 presents indexes for selected countries on a basis consistent with the above resolution and comparable to the Australian series 'All groups excluding Housing'. To facilitate comparisons all indexes in this table have, where necessary, been converted to a quarterly basis and re-referenced to a base of $1989-90 = 100.0$.
	16 In producing Table 9, the ABS is grateful for the assistance of the relevant national statistical agencies which have either directly supplied indexes for all items excluding shelter or data to enable their derivation.
RELATED PUBLICATIONS	17 Current publications produced by the ABS are listed in the <i>Catalogue of Publications and Products, Australia</i> (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a <i>Release Advice</i> (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

APPENDIX

.

TREATMENT OF THE FIRST HOME OWNER GRANT IN THE CPI

.

INTRODUCTION	From the September quarter 2000, the CPI will be affected by the First Home Owner Grant, which is designed to compensate first time purchasers of homes for the price effects of the new tax system.
	This appendix provides an explanation of how this grant will be taken into account in calculating the House purchase expenditure class in the CPI. The grant belongs to a range of concessions (such as stamp duty concessions) that apply to the purchase of houses that are generally taken into account in compiling the CPI.
THE FIRST HOME OWNER GRANT	The major elements of the grant are that it:-
	 begins 1 July 2000; is a one-off payment of \$7,000 to first home buyers buying either a new or an established dwelling; is payable provided the applicants are going to occupy the dwelling as their main place of residence within 12 months of settlement or completion of construction; is not means tested; is paid for the building not the land; and does not replace the current stamp duty concessions that exist in States and Territories.
TREATMENT OF HOUSE PURCHASE IN THE CPI	The CPI is designed specifically to provide a general measure of price inflation for the household sector as a whole. This means that the CPI is concerned only with transactions between households and other institutional units such as businesses and governments. Transactions between households are not relevant because the acquisitions by purchasers are offset by the disposals by sellers.
	In the case of houses, the relevant transactions comprise all newly constructed dwellings (excluding land) purchased by households for owner occupation and alterations and additions to owner occupied dwellings. In concept, purchases of established houses from businesses or governments for owner occupation are also included, however the numbers are insignificant. Purchases of dwellings for other than owner occupation and alterations and additions to other than owner occupied dwellings are not included in the CPI because they are expenditures on income producing assets.
TREATMENT OF THE FIRST HOME OWNER GRANT IN THE CPI	The First Home Owners Grant affects the transaction prices for houses purchased by first home buyers. From July 1, the transaction price for first home buyers for any particular new house is \$7,000 less than the transaction price for those who are not first home buyers. According to the ABS Survey of Income and Housing Costs, approximately one third of new homes are purchased by first home buyers. The price of houses in the House purchase expenditure class will therefore reflect the different transaction prices for different classes of home buyers after 1 July 2000.
	Ignoring any other price movements, the effect of the adjustment for the grant will be to record a fall of \$7,000 in the price of a new house between the June and September quarters 2000 for that proportion of new home buyers who are eligible for the grant. The adjustment amount will continue to be reflected in the December quarter 2000 and in all subsequent quarters until such time as the grant is changed (or removed). The grant does not affect prices paid for alterations and additions to existing owner occupied dwellings which account for approximately 50 percent of the total expenditure on "house purchase".
