JUNE QTR KEY POINTS

THE ALL GROUPS CPI

- was flat in the June quarter 2003, compared with an increase of 1.3% in the March quarter 2003. This was the lowest quarterly movement since the March quarter 1999.
- rose 2.7% between the June quarters 2002 and 2003.

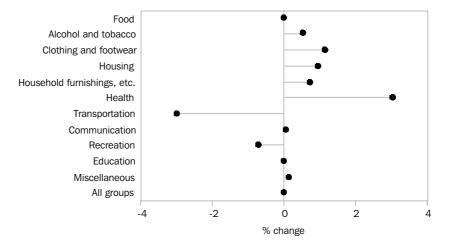

OVERVIEW OF CPI MOVEMENTS

- the major increases this quarter were rises in the cost of house purchase (+2.0%), hospital and medical services (+5.2%), furniture (+2.1%), overseas holiday travel and accommodation (+1.6%), take away and fast foods (+0.9%), tobacco (+1.1%), women's outerwear (+2.0%), rents (+0.6%) and house repairs and maintenance (+1.2%).
- the major offsetting decreases this quarter were falls in automotive fuel (-9.6%), domestic holiday travel and accommodation (-3.8%), vegetables (-6.2%), motor vehicles (-0.9%), audio, visual and computing equipment (-6.0%), fruit (-3.7%) and electricity (-1.5%).
- contributing most to the annual increases were rises in the cost of house purchase (+5.3%), hospital and medical services (+10.3%), vegetables (+23.9%), take away and fast foods (+3.4%), electricity (+5.7%) and tobacco (+4.0%). Partially offsetting these increases were falls in audio, visual and computing equipment (-17.5%), motor vehicles (-1.4%) and fruit (-6.1%).

CPI GROUPS, WEIGHTED AVERAGE OF EIGHT CAPITAL CITIES: PERCENTAGE CHANGE FROM PREVIOUS QUARTER

MAIN CONTRIBUTORS TO CHANGE

.

The discussion of the CPI groups below is ordered in terms of their significance to the change in All groups index points (see Tables 6 and 7).

TRANSPORTATION (-3.0%)	The fall in transportation costs this quarter was due to decreases in automotive fuel (-9.6%) and motor vehicles (-0.9%) . Automotive fuel prices rose in January $(+5.7\%)$, February $(+4.7\%)$ and March $(+3.7\%)$ but fell in April (-9.4%) , May (-5.6%) and June (-0.7%) . Partially offsetting these decreases were small rises in motor vehicle repair and servicing $(+0.5\%)$ and motor vehicle parts and accessories $(+1.2\%)$.
	The coverage of automotive fuel in the CPI has been expanded in the June quarter 2003 to include prices of liquified petroleum gas (LPG) and diesel in addition to the previously priced unleaded and lead replacement petrol. These changes in coverage were introduced in a manner that did not affect the level of the index. Also, the price of automotive fuel is now observed seven days a week instead of week days only.
	Over the twelve months to June quarter 2003, transportation costs rose 0.1%.
HOUSING (+1.0%)	The rise in housing costs this quarter was mainly due to increases in house purchase $(+2.0\%)$, house repairs and maintenance $(+1.2\%)$ and rents $(+0.6\%)$. Partially offsetting these increases was a fall in the price of electricity (-1.5%) in Melbourne and Adelaide. Over the twelve months to June quarter 2003, housing costs rose 4.1%.
HEALTH (+3.1%)	The rise in health costs this quarter was mainly due to an increase in hospital and medical services $(+5.2\%)$, in particular, the cost of private health insurance. Partially offsetting this increase was a fall in pharmaceuticals (-0.7%) .
	Over the twelve months to June quarter 2003, health costs rose 7.5%.

.

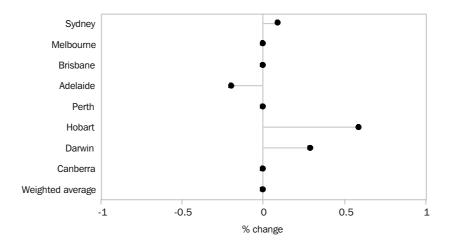

MAIN CONTRIBUTORS TO CHANGE continued

.

RECREATION (-0.7%)	The fall in recreation costs was mainly due to decreases in domestic holiday travel and accommodation (-3.8%), audio, visual and computing equipment (-6.0%) and pets, pet foods and supplies (-2.0%). These decreases were partially offset by increases in overseas holiday travel and accommodation ($+1.6\%$) and other recreational activities ($+1.2\%$).
	Over the twelve months to June quarter 2003, recreation costs rose 0.3%.
HOUSEHOLD FURNISHINGS, SUPPLIES AND SERVICES (+0.8%)	The rise in the cost of household furnishings, supplies and services was mainly due to increases in furniture $(+2.1\%)$, floor and window coverings $(+2.1\%)$ and glassware, tableware and household utensils $(+3.4\%)$. These increases were partially offset by a fall in other household supplies (-1.2%) .
	Over the twelve months to June quarter 2003, household furnishings, supplies and services costs rose 0.9%.
CLOTHING AND FOOTWEAR (+1.2%)	The rise in the cost of clothing and footwear was mainly due to increases in women's outerwear ($+2.0\%$), women's underwear, nightwear and hosiery ($+0.4\%$), children's and infants' clothing ($+1.6\%$) and women's footwear ($+1.6\%$). There were no significant price falls.
	Over the twelve months to June quarter 2003, clothing and footwear costs were unchanged.
ALCOHOL AND TOBACCO (+0.6%)	The rise in the cost of alcohol and tobacco was due to increases in tobacco $(+1.1\%)$, beer $(+0.4\%)$ and spirits $(+1.0\%)$. The price of wine fell by 0.2%.
	Over the twelve months to June quarter 2003, alcohol and tobacco costs rose 3.0%.
FOOD (0.0%)	The overall cost of food was unchanged in the June quarter. Significant decreases in the price of vegetables (-6.2%) and fruit (-3.7%) were offset by increases in a number of items, most notably, take away and fast foods (+0.9%), other cereal products (+6.2%), beef and veal (+2.6%), restaurant meals (+1.2%), bread (+1.6%), lamb and mutton (+4.9%) and soft drinks, waters and juices (+1.0%).
	Over the twelve months to June quarter 2003, food costs rose 4.4%.

CAPITAL CITIES COMPARISON

.

ALL GROUPS: PERCENTAGE CHANGE FROM PREVIOUS QUARTER

At the All groups level, the June quarter CPI rose in Hobart (+0.6%), Darwin (+0.3%) and Sydney (+0.1%), was unchanged in Melbourne, Brisbane, Perth and Canberra and fell in Adelaide (-0.2%).

Over the twelve months to June quarter 2003, the All groups CPI rose in each capital city. The increases ranged from 2.1% in Perth and Darwin to 3.7% in Adelaide.

ABS • CONSUMER PRICE INDEX • 6401.0 • JUNE QUARTER 2003 25

EXPLANATORY NOTES

•••••	•••••••••••••••••••••••••••••••••••••••
BRIEF DESCRIPTION OF THE CPI	 1 The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). This 'basket' covers a wide range of goods and services, arranged in the following eleven groups: food alcohol and tobacco clothing and footwear housing household furnishings, supplies and services health transportation communication recreation education miscellaneous.
	2 The capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.3 Further information about the CPI is contained in <i>Australian Consumer Price Index:</i>
	<i>Concepts, Sources and Methods</i> (cat. no. 6461.0) which is available on the ABS web site <http: www.abs.gov.au="">.</http:>
PRICES	4 The frequency of price collection by item varies as necessary to obtain reliable price measures. Prices of some items are volatile (i.e. their prices may vary many times each quarter) and for these items frequent price observations are necessary to obtain a reliable measure of the average price for the quarter. Each month prices are collected at regular intervals for goods such as milk, bread, fresh meat and seafood, fresh fruit and vegetables, petrol, alcohol and tobacco and holiday travel and accommodation. For most other items, price volatility is not a problem and prices are collected once a quarter. There are a few items where prices are changed at infrequent intervals, for example education fees where prices are set once a year. In these cases, the frequency of price collection is modified accordingly.
	5 In order to facilitate a more even spread of field collection workload the bulk of the items for which prices are collected quarterly are priced in the first two months of each quarter (i.e. July/August, October/November, January/February, April/May). With a few exceptions items priced in the third month are those subject to price changes at discrete points of time (e.g. electricity and postal charges); in these cases information about any changes in price during the quarter is obtained so that an average price for the whole quarter can be calculated.
WEIGHTING PATTERN	6 There are 89 expenditure classes (that is, groupings of like items) in the fourteenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.
	7 Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises fourteen series of price indexes which have been linked to form a continuous series. The current weighting pattern for the CPI is given in <i>A Guide to the Consumer Price Index</i> , <i>14th Series</i> (cat. no. 6440.0).

ANALYSIS OF CPI CHANGES

SPECIAL SERIES

8 Movements in indexes from one period to another can be expressed either as changes in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods:

All groups CPI: Weighted average of eight capital cities.

	Index numbers:
June Quarter 2003	141.3 (see Table 1)
less March Quarter 2003	141.3 (see Table 1)
Change in index points	0.0
D 1	0.0
Percentage change =	

9 Percentage changes are calculated to illustrate three different kinds of movements in index numbers:

- movements between consecutive financial years (where the index numbers for financial years are simple averages of the quarterly index numbers),
- movements between corresponding quarters of consecutive years, and
- movements between consecutive quarters.

10 Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for groups, sub-groups and expenditure classes. It also shows the contribution which each makes to the total CPI. For instance, the dairy and related products sub-group contributed 2.09 index points to the total All groups index number of 141.3 for June Quarter 2003. The final column shows contributions to the change in All Groups index points by each group, sub-group and expenditure class.

11 Various series are presented in Tables 8, 9 and 10 in this publication which are helpful for analytical purposes. These series are compiled by taking subsets of the CPI basket.(A complete list of CPI groups, subgroups and expenditure classes is contained in Tables 6 and 7.)

12 Some of the compiled series are self explanatory, such as 'All groups excluding Food'. Other series and their composition are described below:

All groups, goods component: comprises the Food group (except Restaurant meals), Alcohol and tobacco group, Clothing and footwear group (except Clothing services and shoe repair) and Household furnishings, supplies and services group (except Household services); the Utilities, Audio, visual and computing and Books, newspapers and magazines sub-groups; and the House purchase, Pharmaceuticals, Motor vehicles, Automotive fuel, Motor vehicle parts and accessories, Sports and recreational equipment, Toys, games and hobbies, Pets, pet foods and supplies and Toiletries and personal care products expenditure classes.

All groups, services component: comprises all items not included in the 'All groups, goods component'.

All groups, tradables component: comprises all items whose prices are largely determined on the world market.

All groups, non-tradables component: comprises all items not included in the 'All groups, tradables component'.

All groups excluding 'volatile items': comprises the All groups CPI excluding Fruit and vegetables and Automotive fuel.

EXPLANATORY NOTES

• • • • • • • • • • • • • • • • •

SPECIAL SERIES continued	from the rates and	<i>boods and services excluding 'volatile items</i> ': in addition to the items excluded series "All groups excluding 'volatile items'", also excludes: Utilities, Property I charges, Health, Other motoring charges, Urban transport fares, Postal, n and Child care.			
	to the Se (cat. no. specifyin goods an	tailed description of the special and analytical series was published in Appendix 1 ptember quarter 2000 issue of <i>Consumer Price Index, Australia</i> 6401.0). The ABS is grateful for the assistance of the Reserve Bank of Australia for g the items included in the "All groups excluding 'volatile items'" and "Market ad services excluding 'volatile items'". The Reserve Bank of Australia does not ny special policy status to these series.			
INTERNATIONAL COMPARISONS	14 In analysing price movements in Australia, an important consideration is Australia's performance relative to other countries. However, due to the many differences in the structure of the housing sector in different countries and in the way that housing is treated in their CPIs, a simple comparison of All groups (or headline) CPIs is often inappropriate. To provide a better basis for international comparisons, the Fourteenth International Conference of Labour Statisticians adopted a resolution which called for countries to 'provide for dissemination at the international level of an index which excludes shelter, in addition to the all-items index'.				
	resolutio To facilit	e 11 presents indexes for selected countries on a basis consistent with the above n and broadly comparable to the Australian series 'All groups excluding Housing'. ate comparisons all indexes in this table have been converted, where necessary, terly basis and re-referenced to a base of $1989-90 = 100.0$.			
	statistica	roducing Table 11, the ABS is grateful for the assistance of the relevant national l agencies which have either directly supplied indexes for all items excluding r data to enable their derivation.			
RELATED PUBLICATIONS	17 Current publications and other products by the ABS are listed in the Catalogue of Publications and Products (cat. no. 1101.0). The Catalogue is available from any ABS office or the ABS web site <http: www.abs.gov.au="">. The ABS also issues a daily Release Advice on this web site which details products to be released in the week ahead.</http:>
