MARCH QTR KEY FIGURES

	% change Dec Qtr 2000 to Mar Qtr 2001	% change Mar Qtr 2000 to Mar Qtr 2001
Weighted average of six State capital cities	0.3	0.3
Sydney	0.6	0.0
Melbourne	0.3	1.0
Brisbane	0.1	-0.3
Adelaide	0.0	0.4
Perth	0.3	0.2
Hobart	0.9	0.8

MARCH QTR KEY POINTS

WEIGHTED AVERAGE INDEX

- The small increase in the index was mainly due to price increases for structural steel, reinforcing steel bar and non ferrous pipes and fittings.
- The increase was partly offset by price decreases for elevators, escalators and travelators, and ready mixed concrete.

FINAL ISSUE
See page 2
for details.

CAPITAL CITIES INDEXES

- Prices for structural steel increased in Sydney, Melbourne and Brisbane with all other cities showing no change.
- Reinforcing steel bar prices increased in all cities except Adelaide which recorded a decrease and Hobart which showed no change.
- Prices for non ferrous pipes and fittings increased in all cities except Brisbane where they decreased.
- Elevator, escalator and travelator prices decreased in all cities except Perth which showed an increase.
- Prices for ready mixed concrete decreased in all cities except Hobart where they increased.

NOTES

FINAL ISSUE

This issue will be the last of this publication. The ABS has reviewed its publication strategy for producer price indexes with a view to integrating its range of publications. From June quarter 2001 the key series will be published in a new publication— *Producer Price Indexes, Australia* (Cat. no. 6427.0). Subscribers of this publication will be sent details of the new publication and information on arrangements for ensuring that they will continue to receive the series that they are interested in. Others who are interested in receiving details of the new publication should contact Lee Taylor on 1800 155 106.

R.W. Edwards
Acting Australian Statistician

(a) Base of each index: 1989-90 = 100.0

EXPLANATORY NOTES

- 1** This publication presents index numbers measuring changes in prices of selected materials used in the construction of buildings other than houses—the *Price Index of Materials Used in Building Other than House Building*. It is calculated on the reference base 1989–90 = 100.0 for the six State capital cities.
- 2** The index includes 63 items which are combined into 10 industry of origin groups and an ‘All groups’ total. Table 1 presents ‘All groups’ index numbers for the weighted average of the six State capital cities, for each of the cities separately. Although many of the selected materials are also used in house building, in building repair, maintenance and alteration work and in engineering construction work (e.g. projects such as roads, dams, bridges and the like), the weighting pattern of the index is not applicable to these other activities of the construction industry. In addition, since the weights are based on an average materials usage over a range of types of building within the defined area (building other than house building), the index is not necessarily applicable to any specific building or type of building.
- 3** For the weighted average of the six State capital cities the selected materials have been combined into broad groups on an industry of origin basis. Table 4 presents index numbers for groups defined in terms of the Groups (3 digit level) of the 1993 *Australian and New Zealand Standard Industrial Classification* (ANZSIC); the percentage contributions for individual materials and groups are shown in table A1 of the Appendix of the October 1993 issue of this publication. The ‘industry of origin’ is not necessarily identical to the industry which supplies the materials to builders. The ‘industry of origin’ is the industry in which the material is *primarily produced*, determined in accordance with the classification rules of the ANZSIC. For instance, many of the materials are classified to the appropriate producing industries, rather than the wholesale trading industries. Some materials used in constructing buildings in Australia are imported. Imported materials are allocated to the similar industry of origin as Australian produced materials.
- 4** The index is a fixed weights index. The items were selected and allocated weights in accordance with the estimated average values of materials used in the construction of buildings other than houses completed in each of the seven capital cities in the five years ended June 1992. This same weighting pattern is used for each of the six capital cities. The weighting pattern for the ‘All groups’ index is set out in Appendix A of the October 1993 issue of this publication.
- 5** Prices relate to specific standards of each material and are obtained from representative suppliers of materials used in building. In general, the point of pricing is ‘delivered on site’ but in some cases it has been necessary to use the nearest realistic price available e.g. ‘delivered to electrical contractor’s store’. Local prices are used in the indexes for each capital city.
- 6** As far as possible, actual transactions prices are used in this index—that is, prices actually paid by building contractors or subcontractors to suppliers for materials delivered on building sites. The actual price paid for anything can be described in various ways. Instead of being described as a single price (as usually happens in retail shops) a price for a building material may be described in terms of the components which make up the price—for instance ‘suppliers’ price plus freight’, ‘basic price less (particular types of) discount’ and so on. It is these *net* prices that buyers pay to sellers for materials that the ABS aims to use in compiling this index. Rebateable indirect taxes such as the GST are excluded from the prices used to compile the index.

EXPLANATORY NOTES

PRICE MEASUREMENT *continued*

7 The ABS asks respondent businesses to report details of the discounts they offer so that actual transaction prices can be calculated. However, as building material suppliers offer many different types of discounts to buyers (e.g. trade discounts, settlement discounts, quantity discounts, competitive discounts), the identification of the discounts and the way in which they are applied by sellers pose considerable problems for the ABS. To the extent that discounts are identified and measured, their effects are taken into account in calculating the index. Sometimes new discounts, or changes in the way discounts are applied by sellers, are identified only after index numbers for a particular period have been published. In such cases, or in any other case where it is discovered that incorrect prices have been used in compiling the indexes, revisions to index numbers may occur in subsequent issues of this publication.

8 To minimise the incidence of revisions, the ABS has stringent procedures to verify that prices reported in its mail collections are transactions prices net of discounts.

INDEX NUMBERS

9 Index numbers for financial years are averages of quarterly index numbers.

SELECTED MATERIALS

10 Table 5 contains index numbers for selected materials used in constructing buildings other than houses for the weighted average of the six State capital cities. In general these indexes relate to either single items or combinations of items as shown in the weighting pattern published in table A1 of the Appendix to the October 1993 issue of this publication. Tables 6 to 9 contain index numbers for selected major materials for each State capital city.

SPECIAL COMBINATIONS OF MATERIALS

11 Tables 10 to 12 contain index numbers for the following special combinations of materials, for the weighted average of the six State capital cities and each State capital city:

- All groups excluding electrical materials and mechanical service components
- Electrical materials
- Mechanical services components
- Plumbing materials

REVISIONS

12 In cases where more complete information is obtained after index numbers for a period have been published, or it is discovered that incorrect prices have been used in compiling the indexes, revisions to index numbers may occur in subsequent issues of this publication.

ANALYSIS OF INDEX CHANGES

13 Care should be exercised when interpreting quarter-to-quarter movements in the indexes as short-term movements do not necessarily indicate changes in trend.

14 The separate city indexes measure price movements over time in each capital city individually. They do not measure differences in price levels between cities.

EXPLANATORY NOTES

ANALYSIS OF INDEX CHANGES

continued

15 Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

Weighted average of six State
capital cities index numbers —

March Quarter 2001 116.7 (see Table 1)

less March Quarter 2000 116.4 (see Table 1)

Change in index points 0.3

Percentage change $\frac{0.3}{116.4} \times 100 = 0.3$

16 Table 3 provides an analysis of the contribution which selected major building materials make to the All groups index for the weighted average of the six State capital cities. For example, Ready mixed concrete contributed 9.40 index points to the All groups index number of 116.7 for March Quarter 2001 and -0.13 index points to the net change of 0.4 index points.

FURTHER INFORMATION

17 Further information on recent price index developments in the ABS is presented in the following publications:

- *Information Paper: An Analytical Framework for Price Indexes in Australia* (Cat. no. 6421.0)
- *Information Paper: Producer Price Index Developments* (Cat. no. 6422.0) (Comprises detailed discussion of Stage of Production concept and detail of selected Service Industries indexes.)
- *Information Paper: Review of the Import Price Index and Export Price Index, Australia* (Cat. no. 6424.0)
- *Information Paper: Price Indexes and The New Tax System 2000* (Cat. no. 6425.0).

RELATED PUBLICATIONS

18 Users may also wish to refer to the following Producer Price Index publications which are available from ABS Bookshops:

- *Export Price Index, Australia* (Cat. no. 6405.0)
- *Import Price Index, Australia* (Cat. no. 6414)
- *Price Index of Materials Used in House Building, Six State Capital Cities* (Cat. no. 6408.0)
- *Price Indexes of Copper Materials, Australia* (Cat. no. 6410.0)
- *Price Indexes of Materials Used in Manufacturing Industries, Australia* (Cat. no. 6411.0)
- *Price Indexes of Articles Produced by Manufacturing Industry, Australia* (Cat. no. 6412.0)
- *Price Indexes of Materials Used in Coal Mining, Australia* (Cat. no. 6415.0)
- *Producer Price Indexes for Selected Service Industries, Australia* (Cat. no. 6423.0).
- *Stage of Production Producer Price Indexes, Australia* (Cat. no. 6426.0)
