## NOTES

### FORTHCOMING ISSUES

#### ISSUE

September 1999

#### RELEASE DATE

15 October 1999

### ABOUT THIS PUBLICATION

This publication, prepared by the Australian Bureau of Statistics on behalf of the Western Australian Department of Conservation and Land Management and the Forest Industries Federation (WA) Inc, presents index numbers measuring changes in prices of Western Australian sawn hardwood timber.

The Price Index of Western Australian Produced Hardwoods (WAPHI) measures the change in prices of Western Australian sawn hardwoods. Individual price indexes are also published for each of the major hardwood timbers produced and sold by the Western Australian timber industry, namely:

- Green jarrah
- Green karri
- Dry jarrah

### SYMBOLS AND OTHER USAGES

# SUMMARY OF FINDINGS

## KEY FIGURES

### PRICE INDEX NUMBERS

	Mar qtr 99	June qtr 99	March qtr 99 to June qtr 99
	Index number	Index number	% change
WA Produced Hardwoods	105.7	105.5	-0.2
Green Jarrah Produced	100.5	100.5	0.0
Green Karri Produced	94.8	94.3	-0.5
Dry Jarrah Produced	116.8	116.6	-0.2

## PRICE INDEXES

### PRICE INDEX OF WESTERN AUSTRALIAN PRODUCED HARDWOODS

The Western Australian Produced Hardwoods Index (WAPHI) decreased by 0.2% between the March quarter 1999 and June quarter 1999. For the year ending June quarter 1999, the index decreased 0.3%.

Price index of WAPHI

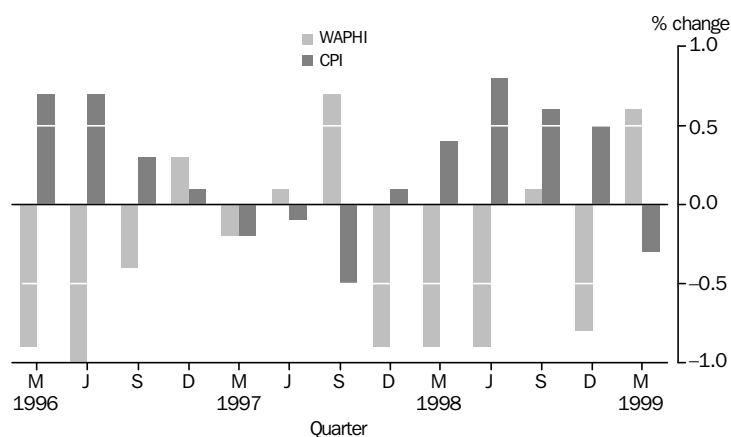

## SUMMARY OF FINDINGS *continued*

The WAPHI does not always display the same trend as the Consumer Price Index (CPI). By way of example, the CPI for Perth, All Groups decreased by 0.3% from the December quarter 1998 to the March quarter 1999. The WAPHI for the same period increased by 0.6%.

The graph below shows a comparison between the percentage changes for the CPI All Groups for Perth and the WAPHI since March quarter 1996.

Comparison of WAPHI with CPI

## PRICE INDEXES OF GREEN JARRAH AND GREEN KARRI PRODUCED

From the March quarter 1999 to the June quarter 1999, the index for green jarrah remained unchanged and the index for green karri decreased by 0.5%. Over the twelve months ended June quarter 1999 the indexes for green jarrah and green karri have decreased by 2.6% and 2.1% respectively. The reduced activity in the residential building industry since September 1994 has continued to impact on prices for green jarrah and green karri as the major market for these timbers is for roofing of residential buildings. Steel and pine are also competing against hardwoods for a share of the roof frame market.

The index of new residential approvals for the Perth Statistical Division, decreased 2.3% between the December 1998 and March quarter 1999, following a 5.6% increase the previous quarter.

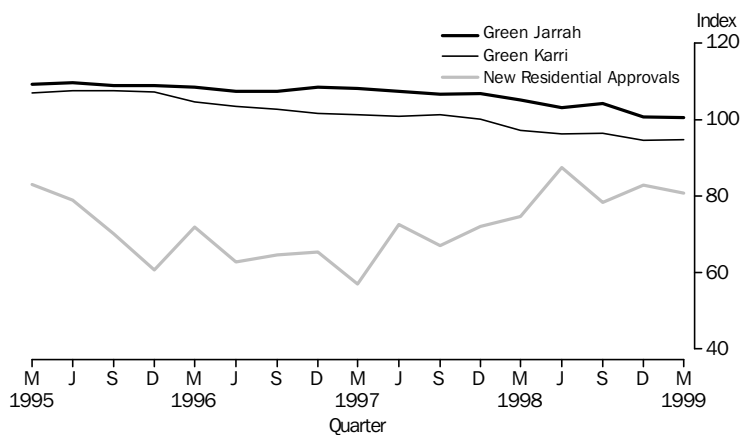

## SUMMARY OF FINDINGS *continued*

Below is a graph comparing the movement in new residential building approvals with green jarrah and karri price movements. It should be recognised, however, that building approvals data may not reflect the timing or level of actual building activity.

Another significant use of green hardwoods is for railway sleepers and crossing timber.

Generally, suppliers revise the prices of jarrah and karri to the local market at the same time, usually applying a uniform percentage price change to the same size, length and stress grade of hardwood timber, irrespective of variety. Prices for interstate sales and exports of green jarrah and green karri, however, are sometimes independently determined and this can affect the price movements of the two species in the index.

Comparison of timber indexes with new residential approvals Mar quarter 1995 to Mar 1999

### PRICE INDEX OF DRY JARRAH PRODUCED

The index for dry jarrah decreased by 0.2% between March quarter 1999 and June quarter 1999 following an increase of 1.0% the previous quarter. In the twelve months to March quarter 1999, prices have increased 2.0%.

### PRICE INDEX OF DRY KARRI PRODUCED

Although an index of dry karri is compiled by the ABS and the price movements are included in the compilation of the Price Index of Western Australian Produced Hardwoods, because of the limited number of producers and the small volumes sold, the ABS does not release the index numbers.

(a) Base Index 1992-93 = 100.0

# EXPLANATORY NOTES

## INTRODUCTION

**1** This publication presents index numbers measuring changes in prices for sawn timber produced from Western Australian produced hardwoods. They are calculated on the reference base 1992–93 = 100.0

## SCOPE

**2** The scope of the index is Western Australian produced sawn hardwood timber sold by Western Australian mills and merchants within Western Australia, interstate and overseas. Timber used for veneer, woodchips, particle board and posts and poles is not included.

## ITEMS AND WEIGHTS

**3** The indexes are fixed weight indexes. For the period prior to March quarter 1997, the items included in the index were selected and allocated value weights on the basis of sawn timber sold during 1992–93 to final users in Western Australia and merchants interstate and overseas. From March quarter 1997, the items included in the index and their value weights were based on sawn timber sold during 1995–96 valued at December 1996 prices.

**4** Many of the selected items carry not only the weight of directly priced timbers, but also the weight of other timbers whose prices are considered to move similarly to those of the directly priced timbers.

## COMPOSITION AND WEIGHTING IN REFERENCE YEAR 1995–96

<i>Item</i>	<i>Contribution</i>
	%
Green jarrah	27
Green karri	27
Dry jarrah	44
Dry karri	2
<b>Total</b>	100

## PRICE MEASUREMENT

**5** Most prices used in these indexes related to the mid-point of each month of the quarter up until the June quarter 1997. From the September quarter 1997 prices relate to the mid-point of the quarter. Prices are obtained from a representative sample of sawmillers and timber merchants (including exporters). The point of pricing is the last sale before final use; handling and delivery costs are included for local sales, if incorporated in the merchant's or sawmiller's price. For example, the price of timber sold to builders is the delivered on site price. Interstate sales are normally priced ex-mill and for exports, the price is generally free on board (fob).

**6** As far as possible, actual transaction prices are used in the indexes. These are the prices *actually* paid by builders, joinery workshops, furniture manufacturers and other purchasers of the timber. The actual price paid can be described in various ways. For example, a price for a sawmiller's or merchant's product may be described in terms of the components that make up the price, such as 'list price less (particular types of) discount'. It is these *net* prices that buyers pay to sellers that the ABS aims to use in compiling these price indexes.

**7** Price series relate to goods of fixed specifications with the aim of incorporating in the index, price changes for representative articles of constant

## EXPLANATORY NOTES *continued*

quality (eg. size, dimensions, stress grade). Consistent with this approach, prices in general relate to a standard representative set of transactions (in terms of quantity, delivery arrangements, destination, etc.) in order to avoid variations in price that are attributable solely to a changing mix of transactions over time.

### INDEX NUMBERS

**8** The index numbers for financial years are simple averages of the relevant quarterly index numbers.

### REVISIONS

**9** Index numbers for the current quarter and the previous quarter are preliminary and subject to revision. From time to time, index numbers for earlier periods may also be revised. This will occur whenever the ABS obtains more complete information or discovers that incorrect prices have been used.

### ANALYSIS OF INDEX CHANGE

**10** Care should be exercised when interpreting quarter-to-quarter movements in the indexes as short term movements do not necessarily indicate changes in trend.

**11** Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods.

DRY  
JARRAH

	June quarter 1999	116.6
<i>minus</i>	June quarter 1998	<u>114.3</u>
<i>equals</i>	<b>Change in index points</b>	2.3

	Change in index points x 100	<u>2.3 x 100</u>
<i>divided by</i>	June quarter 1998	114.3
<i>equals</i>	<b>Percentage change</b>	2.0

### RELATED PUBLICATIONS

**12** Users may also wish to refer to the following publications which are available from ABS Bookshops.

- Consumer Price Index, Eight Capital Cities (6401.0)
- House Price Index (6416.0)
- Building Approvals, Western Australia (8731.5)
- Building Activity, Western Australia (8752.5)

**13** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, twice weekly, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The catalogue and release advice are available from ABS offices.

### UNPUBLISHED STATISTICS

**14** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to (08) 9360 5147 or to any ABS office.
