 For further information about these and related statistics, contact Nigel Gibson on Hobart 03 6222 5939, or any ABS office shown on the back cover of this publication.

## NOTES

This publication contains final estimates for the main commodities collected in the Agricultural Commodity Survey (ACS). These include broadacre crops, fruit and vegetables as well as livestock.

Release in electronic form is expected to occur in September, through the Integrated Regional Data Base (IRDB). State data will be available on the IRDB. In the interim, users requiring data in electronic form should approach Nigel Gibson on Hobart 03 6222 5939.

A National compendium publication, *Agriculture, Australia* (Cat. no 7113.0) will be released in October. State compendium publications will no longer be released. For further information about the release of statistics from the ACS, please contact Nigel Gibson on Hobart 03 6222 5939.

# SUMMARY OF FINDINGS

INDUSTRY STRUCTURE	The number of establishments with agricultural activity having an Estimated Value of Agricultural Operations (EVAO) of \$5,000 or more, fell slightly from 145,100 to 144,900 in the 12 months to 31 March 1998. This fall was significantly less than the fall of 1,500 reported for the previous 12 months. New South Wales and Tasmania experienced the largest drop in percentage terms, each down 1% to 42,500 and 4,480 respectively.
Industry composition	The beef cattle farming industry remained the largest in terms of farm numbers, accounting for 22% (31,800) of total establishments with agricultural activity, despite experiencing declines in all States.
	The mixed farming sector, grain-sheep/beef cattle farming, remained the second largest industry in terms of numbers, accounting for 13% (19,200) of total establishments, followed by the grain growing industry, which accounted for 11% (15,300) of total establishments.
	The number of establishments classified to these three largest industries fell by 3%, 6% and 7% respectively, from the levels of the previous year.
	Industries experiencing growth, in terms of numbers of establishments, included the poultry farming (meat) industry and the sheep industry which rose by 13% and 6% respectively (despite a fall in the number of sheep). The number of establishments in the grape growing industry also increased by 6% while the number of establishments classified to the sugar industry rose by 3%.
Industry analysis	The agricultural industry represents an extremely diverse industry, in terms of type and size of operations.
	Major industries consisting mainly of smaller producers include the beef cattle farming and sheep farming industries where 86% and 62% of operations respectively have an EVAO of less than \$100,000. The grape growing industry also comprised a significant number of small farms, with 62% having an EVAO of less than \$100,000.
	Approximately 8% of establishments with agricultural activity have an EVAO greater than \$500,000. Industries consisting predominantly of larger farms include the cotton growing industry and the poultry farming (meat) industry with 82% and 47% respectively of establishments having an EVAO greater than \$500,000.
	In terms of farm area, farms with an area of less than 100 hectares represented 32% (46,300) of total establishments with agricultural activity, the largest group being beef cattle farms (9,500). Industries involved in horticulture consist mainly of small farms with 91% of plant nurseries, 89% of grape growers, and 91% of establishments classified to stone fruit growing operating farms of less than 100 hectares.
	Farms with an area of 2,500 hectares or more represented only 9% (13,700) of total establishments with agricultural activity, and consisted predominantly of larger scale grazing and cropping operations.

# SUMMARY OF FINDINGS continued

CROPS	Within the cropping sector, production of wheat and barley declined whilst production of oats held steady.
Wheat	The total area of wheat sown dropped 5% to 10.4 million hectares in 1997–98. New South Wales, Victoria and South Australia all recorded decreases in the area planted to wheat. Western Australia was the State with the largest area planted with 4.2 million hectares (40% of the total area of wheat in Australia).
	The total production of wheat for grain declined in 1997–98, by 16%, to 19.2 million tonnes, after the record levels of 1996–97. A reduction in yield in the eastern States reflected less favourable growing conditions than in 1996–97. Production in Victoria, Queensland and New South Wales decreased significantly by 34%, 30% and 29% respectively. Western Australia was the only major wheat producing State to record an increase in production, up 3% to 7.7 million tonnes, which accounted for 40% of the Australian wheat harvest.
Barley	The area sown to barley increased by 5% to 3.5 million hectares, but lower yields in the eastern States resulted in a decrease in total production of 3% to 6.5 million tonnes. The majority of the barley crop was sown and produced in Western Australia and South Australia, with just over 1 million hectares sown in each. Both States recorded increases in production of 18% and 5% respectively.
Oats	Although the area sown to oats fell by 11% to 937,000 hectares, increased yields resulted in a production of 1.6 million tonnes, similar to the previous year. New South Wales was the State with the largest area sown to oats (325,000 hectares) but due to better yields Western Australia produced the most oats (596,000 tonnes).
Rice	The area of rice sown was 147,000 hectares in 1997–98, which produced 1.3 million tonnes at a yield of 9 tonnes per hectare.
LIVESTOCK	Meat cattle numbers remained static while a 4% increase in the number of dairy cattle resulted in an overall increase in total cattle and calves to 26.8 million. The total sheep flock decreased again, continuing the decade long trend.
Meat cattle	At 31 March 1998, there were 23.8 million beef cattle and calves, a similar number to the previous year. Queensland was the only State to record a significant increase in the number of beef cattle, up 4% to 10.5 million, which represented 44% of the national total.
	The number of establishments reporting beef cattle continued to fall, with a 6% decrease from 81,900 at 31 March 1997 to 77,300 at 31 March 1998.
Dairy cattle	The number of dairy cattle at 31 March 1998 increased by 4% to 3.1 million. The dairy herd accounted for 11% of all cattle and calves. The Victorian dairy herd, the country's largest, grew 3% from the previous year to 1.8 million. The dairy herds in New South Wales and Queensland increased by 9% and 4% respectively.
	The number of establishments reporting dairy cattle increased slightly to 15,500 at 31 March 1998.

# SUMMARY OF FINDINGS continued

Sheep and lambs	The estimated size of the sheep and lamb flock at 31 March 1998 decreased 2% to 117 million. The flocks in Victoria and New South Wales decreased by 5% and 4% respectively. Queensland recorded an increase in sheep and lamb numbers of 4%. The New South Wales flock accounted for 35% of the national total.
	The number of ewes mated during 1997-98 remained steady at 51.3 million. The number of lambs marked decreased marginally to 40.1 million, while the proportion of lambs marked to ewes mated was 78%, compared with 79% in 1996–97.
Pigs	At 31 March 1998, there were 2.8 million pigs, an 8% increase on the number at 31 March 1997. New South Wales, with 849,000, recorded the largest pig herd in Australia followed by Queensland (648,000) and Victoria (518,000).
HORTICULTURE	Of Australia's four most valuable fruit crops, production of grapes and bananas rose while production of apples and oranges fell.
Fruit	GRAPES
	The 1997–98 grape harvest was a record 1.1 million tonnes, an increase of 18% on the 1996–97 harvest, and 2% above the previous production high recorded in 1995–96. The area planted to grapes (both bearing and non-bearing) in 1997–98 was 98,600 hectares, 10% higher than the 89,800 hectares reported in 1996–97. Production of wine grapes increased by 17% to 871,000 tonnes.
	APPLES
	Australian apple production fell 13% to 309,000 tonnes in 1997–98, due to a return to lower pre-1996–97 yields. In the largest apple growing State, Victoria, the decrease in yield contributed to the production falling 21% to 94,300 tonnes.
	ORANGES
	In 1997–98 orange production fell 4% to 500,000 tonnes. New South Wales, which accounted for 44% of the total Australian production, was the main contributor to the drop with production falling 6% to 218,000 tonnes.
	BANANAS
	Significant increases in the area planted to bananas in Queensland (up 14% to 6,800 hectares) and production (up 15% to 166,000 tonnes) have been reflected in a 12% increase, to 223,000 tonnes, in the total Australian production of bananas.
Vegetables	POTATOES
	An area of 42,600 hectares planted to potatoes produced 1.4 million tonnes. Tasmania was the largest producer of potatoes and accounted for 27% of the Australian production with 374,000 tonnes.

. . . . . .

### CARROTS

.

Victoria produced 36% (95,600 tonnes) of the total carrot production of 267,000 tonnes. A national yield of 37 tonnes per hectare was achieved from 7,200 hectares planted. Tasmania with 53.2 t/ha achieved the highest yield while Queensland with 27.8 t/ha had the lowest yield.

....

.......

### ONIONS

The Australian production of onions was 219,000 tonnes, with South Australia producing 34% (74,200) of the total.

(a) The Beekeeping collection was conducted as a census and as such standard errors are not applicable.

(b) Hives from which honey is taken.

## EXPLANATORY NOTES

INTRODUCTION	<b>1</b> This publication contains detailed statistics on crops, livestock and characteristics of farms.
SCOPE AND COVERAGE	<b>2</b> Estimates in this publication are based on information obtained from the Agricultural Commodity Survey (ACS) conducted at 31 March 1998.
	<b>3</b> The scope of the 1997–98 Survey is establishments undertaking agricultural activity having an estimated value of agricultural operations (EVAO) of \$5,000 or more. This is the same as the scope for Agricultural Censuses from 1993–1994 to 1996–1997. Prior to 1993–1994 scope has varied. Details are available on request.
GENERAL	<b>4</b> The estimates for earlier years shown in this publication have been revised where necessary.
	<b>5</b> Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
AGRICULTURAL ESTABLISHMENTS	<b>6</b> The establishment is the smallest accounting unit of a business within a State or Territory, controlling its productive activities and maintaining a specified range of detailed data including data enabling value added to be calculated. In general an establishment covers all operations at a physical location, but may consist of a group of locations provided they are within the same State or Territory. The majority of establishments operate at one location only.
INDUSTRY AND SIZE CLASSIFICATION	<b>7</b> Units in the ACS have been classified according to the methodology described in <i>Australian and New Zealand Standard Industrial Classification (ANZSIC)</i> (Cat. no. 1292.0).
SAMPLE ERROR	<b>8</b> The estimates are based on information obtained from a sample drawn from the total farm population in scope of the collection, and are subject to sampling variability; that is, they may differ from the figures that would have been produced if all farms had been included in the ACS. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of farm businesses was included. There are about two chances in three that a sample estimate will differ by less than one SE from the figure that would have been obtained if all farm businesses had been included, and about 19 chances in 20 that the difference will be less than two SEs. In this publication the relative SE is shown as a percentage of the estimate to which it refers.
CROPS, PASTURES AND HORTICULTURE	<b>9</b> Statistics of area and production of crops relate, in the main, to crops sown during the year ended 31 March. Statistics of perennial crops relate to the position as at 31 March and the production during the year ended on that date, or of fruit set by that date. For example, particulars of area, production and yield per hectare of wheat in Australia refer to wheat sown during the period from April to September and harvested between October and the following February, i.e. the 1997–98 season relates to the harvesting period October 1997 to February 1998. Statistics of other crops which in some States were harvested after 31 March 1998 (e.g. maize, potatoes, apples and pears) were collected by supplementary returns and are included in this publication.

# EXPLANATORY NOTES continued

UNPUBLISHED STATISTICS	<b>10</b> Unpublished statistics and customised output are available as a special data service and can be obtained by contacting Nigel Gibson on (03) 6222 5939 or Information Services in any ABS office.
GENERAL ACKNOWLEDGMENT	<b>11</b> ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the <i>Census and Statistics Act 1905</i> .
RELATED PUBLICATIONS	<ul> <li>12 A range of agricultural publications is produced by the ABS, including:</li> <li><i>Agriculture Australia</i>, (Cat. no. 7113.0)</li> <li><i>Agricultural Industries, Financial Statistics, Australia, Preliminary</i> <i>Estimates</i> (Cat. no. 7506.0)</li> <li><i>Apparent Consumption of Selected Foodstuffs, Australia, Preliminary</i> (Cat. no. 4315.0)</li> <li><i>Livestock Products, Australia</i> (Cat. no. 7215.0)</li> <li><i>Principal Agricultural Commodities, Australia, Preliminary</i> (Cat. no. 7111.0)</li> <li><i>Value of Principal Agricultural Commodities Produced, Australia,</i> <i>Preliminary</i> (Cat. no. 7501.0)</li> </ul>
	<b>13</b> Current publications produced by the ABS are listed in the <i>Catalogue of Publications and Products</i> (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a <i>Release Advice</i> (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.
