NOTES

ABOUT THIS PUBLICATION

This publication contains final estimates for the main commodities collected in the 2000–01 Agricultural Census. It contains detailed statistics on crops, livestock and livestock products, land management and characteristics of farms. Also included are detailed statistics on the value of agricultural commodities produced (VACP).

Some of the 2000–01 Agricultural Census data in this publication have undergone significant change since the release of preliminary estimates on 30 October 2001. Analysis has indicated that the early estimates were high due to problems with the survey selection frame. It will be necessary to revise Agricultural Survey estimates for previous years. Technical Notes beginning on page 36 of this publication provide details of the problems experienced and the actions taken to address the related issues.

CHANGES IN THIS ISSUE

This publication contains estimates for 2000–01 only. The reasons for not including data from the two previous collection periods are outlined in the Technical Notes on page 36.

Dennis Trewin
Australian Statistician

LIST OF TABLES

Page

STRUCTURE OF AGRICULTURAL INDUSTRY

1	Establishments with agricultural activity, by state	5
2	Establishments with agricultural activity, by EVAO	6
3	Establishments with agricultural activity, by area	7

CROPS AND PASTURES

4	Principal crops, production	8
---	-----------------------------	---

HORTICULTURE

5	Fruit and nuts, production	10
6	Vegetables, production	12
7	Grapes, production	14

LIVESTOCK AND LIVESTOCK PRODUCTS

8	Livestock slaughterings and products	15
9	Cattle	16
10	Chickens	16
11	Sheep	17
12	Pigs	17
13	Beekeeping	18

VALUE OF AGRICULTURAL COMMODITIES PRODUCED

14	Value of agricultural production	18
15	Gross value of agricultural production	19
16	Principal crops, values	20
17	Fruit and nuts, values	22
18	Vegetables, values	24
19	Livestock slaughterings and other disposals, values	26
20	Livestock products, values	27

LAND MANAGEMENT

21	Land use, area	28
22	Area of crops and pastures irrigated	28
23	Use of fertilisers and soil conditioners	29
24	Ground preparation methods	30
25	Fencing built to protect areas from grazing	30
26	Trees and shrubs planted as seedlings	31

1

ESTABLISHMENTS WITH AGRICULTURAL ACTIVITY, By state—As at 30 June 2001

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains final estimates for the main commodities collected in the Agricultural Census. It contains detailed statistics on crops, livestock and livestock products, land management and characteristics of farms. Also included are detailed statistics on the value of agricultural commodities produced (VACP).

SCOPE AND COVERAGE

2 Estimates of farm production are based on information obtained from the Agricultural Census conducted at 30 June 2001. Prior to 2000 information was obtained for the period ending 31 March. The ABS has changed the collection period to 30 June to better align with other ABS surveys. A study of respondent data indicated that there should be no significant difference in estimates collected between the reference periods. VACP quantity data are collected from the Agricultural Census and other Australian Bureau of Statistics (ABS) collections with some information from external sources (e.g. Australian Dairy Corporation). Most price information is obtained from non-ABS sources such as marketing boards, marketing reports, wholesalers, brokers and auctioneers.

3 The scope of the 2000–01 Agricultural Census is establishments undertaking agricultural activity with an estimated value of agricultural operations (EVAO) of \$5,000 or more. This is the same as the scope for Agricultural Censuses from 1993–94 to 1996–97 and the 1997–98, 1998–99 and 1999–2000 Agricultural Commodity Surveys (ACS). Prior to 1993–94 scope has varied and these details are available on request.

AGRICULTURAL ESTABLISHMENTS

4 For the Agricultural Census, the concept of an establishment is the same as that used by the ABS for all industry statistics collections. The establishment is the smallest accounting unit of business within a state or territory, controlling its productive activities and maintaining a specified range of detailed data enabling value added to be calculated. In general an establishment covers all operations at a physical location, but may consist of a group of locations provided they are within the same state or territory. The majority of establishments operate at one location only.

INDUSTRY CLASSIFICATION

5 Since 1991–92, units in the Agricultural Census, Agricultural Commodity Survey and the AFS have been classified according to the methodology described in *Australian and New Zealand Standard Industrial Classification (ANZSIC)* (cat. no. 1292.0). Prior to 1991–92, establishments were classified according to the methodology described in the 1983 edition of the *Australian Standard Industrial Classification (ASIC), Volume 1 — The Classification* (cat. no. 1201.0). Therefore, care should be taken when making comparisons between years where different classifications have been used.

EXPLANATORY NOTES *continued*

SAMPLE ERROR

6 The estimates in this publication are based on information obtained from respondents to the 2000–01 Agricultural Census. Since not all selected units responded, the estimates may differ from those that would have been produced if all farms had responded. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might vary by chance when not all units have responded, i.e. when a 'sample' of responses only is obtained. There are about two chances in three that a 'sample' estimate will differ by less than one SE from the figure that would have been obtained if all farms had responded, and about nineteen chances in twenty that the difference will be less than two SEs.

7 In this publication, 'sampling' variability of the estimates is measured by the relative standard error (RSE) which is obtained by expressing the SE as a percentage of the estimate to which it refers.

8 Most published estimates have RSEs less than 5%. For some states with limited production of certain commodities, RSEs are greater than 25%. If an estimate is identified by a single asterisk (e.g. *) the RSE lies between 25% and 50%. If an estimate is identified by a double asterisk (e.g. **) the RSE is above 50% and is not published. Separate indication of the RSEs of all estimates is available on request.

RELATIVE STANDARD ERROR OF SELECTED COMMODITIES—As at 30 June 2001

CROPS, PASTURES AND HORTICULTURE

9 Statistics on area and production of crops relate in the main, to crops sown during the year ended 30 June. Statistics of perennial crops relate to the position as at 30 June and the production during the year ended on that date, or of fruit set by that date. Statistics for apples and pears, which in some states are harvested after 30 June, are collected by supplementary collection forms and are included in this publication.

EXPLANATORY NOTES *continued*

LIVESTOCK SLAUGHTERING AND LIVESTOCK PRODUCTS

10 The statistics on livestock slaughtering and meat production are based on data collected from abattoirs and other major slaughtering establishments and include estimates of animals slaughtered on farms and by country butchers and other small slaughtering establishments. Care should be taken when using this information as the figures only relate to slaughtering for human consumption and do not include animals condemned or those killed for boiling down. Definitions of livestock categories may differ between states and within states, particularly with regard to calves.

WOOL

11 Wool production statistics contained in this publication are derived from the quarterly ABS Wool Brokers and Dealers Receipts Collection.

12 Wool receipts statistics show the amount of taxable wool received by brokers and dealers from wool producers. It excludes wool received by brokers on which wool tax has already been paid by other dealers (private buyers) or brokers.

MILK

13 Milk statistics have been collected and provided to the ABS by the Australian Dairy Corporation.

POULTRY

14 Poultry slaughtering statistics have been compiled from returns supplied by commercial poultry slaughtering establishments. Producers in Tasmania, the Northern Territory and the Australian Capital Territory are not included in the aggregates derived from the Poultry and Game Birds Slaughtered collection. However, the statistics represent a high level of coverage.

ABS DATA AVAILABLE ON REQUEST

15 As well as the statistics included in this and related publications, the ABS may have other relevant data available on request. Inquiries should be made to either Jackie Saarinen on Hobart 03 6222 5948 or the National Information and Referral Service on 1300 135 070.

GENERAL ACKNOWLEDGMENT

16 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED PUBLICATIONS

17 A range of agricultural publications is produced by the ABS, including:

Agriculture, Australia, cat. no. 7113.0

Livestock and Meat, Australia, cat. no. 7218.0

Livestock Products, Australia, cat. no. 7215.0

Principal Agricultural Commodities, Australia, Preliminary, cat. no. 7111.0

Value of Principal Agricultural Commodities Produced, Australia, Preliminary, cat. no. 7501.0

EXPLANATORY NOTES *continued*

18 For comparisons of the agriculture industry with other industries, users are referred to:

Australian National Accounts: National Income, Expenditure and Product,
cat. no. 5206.0

Australian National Accounts: State Accounts, cat. no. 5220.0

Business Operations and Industry Performance, Australia, cat. no. 8140.0

19 Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The Catalogue is available from any ABS office or the ABS web site <<http://www.abs.gov.au>>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

ABBREVIATIONS AND SYMBOLS

20 The following abbreviations and symbols have been used in this publication:

ABR	Australian Business Register
ABS	Australian Bureau of Statistics
ACS	Agricultural Commodity Survey
ACT	Australian Capital Territory
ANZSIC	Australian and New Zealand Standard Industrial Classification
ASIC	Australian Standard Industrial Classification
ATO	Australian Taxation Office
Aust.	Australia
c	cents
EVAO	estimated value of agricultural operations
GUV	gross unit value
ha	hectares
kg	kilograms
L	litres
ML	million litres
n.e.c.	not elsewhere classified
n.e.i.	not elsewhere included
n.p.	not available for publication but included in totals where applicable
NSW	New South Wales
NT	Northern Territory
Qld	Queensland
RSE	relative standard error
SA	South Australia
SE	standard error
t	tonnes
Tas.	Tasmania
VACP	value of agricultural commodities produced
Vic.	Victoria
WA	Western Australia
wt	weight
—	nil or rounded to zero (including null cells)
*	data subject to sampling variability between 25% and 50%
**	data subject to sampling variability greater than 50%, estimate is not published
..	not applicable
'000	thousands
\$m	dollars, millions

21 Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

TECHNICAL NOTES

1 Some of the data items in this publication have undergone significant change since the release of preliminary estimates on 30 October 2001. Analysis has indicated that the early estimates were high due to problems with the survey selection frame.

2 This issue has arisen due to difficulties being experienced in tracking information about the transfer of ownership and operation of farms. Information made available by the Australian Taxation Office (ATO) through the Australian Business Register (ABR) provides an authoritative source of information about new businesses, but there is no equivalent comprehensive source of information about businesses which discontinue operations. This has led to under estimation of the number of out-of-scope and no-longer-operating units on the selection frame, an inflated estimate of operating establishments, and associated over estimation of some commodity information.

3 The problem can be illustrated by looking at the published total number of farm establishments over the last ten years. In the graph below the number of units is seen to gradually rise as the frame becomes degraded over the period from 1997–98. The dip in the graph in 2000–01 shows the effect when a full census of farm businesses was undertaken in 2000–01, and full response information became known for final results.

NUMBER OF LIVE AGRICULTURAL ESTABLISHMENTS

4 Analysis of the non-responding population from the census indicated that the intervening sample surveys were not identifying the true extent of out-of-scope or no-longer-operating units on the frame. As a result, an investigation of samples of census non-responding units was undertaken to determine the likely extent of these units among the other non-responding units. This was used to derive an adjustment factor to apply to the responding data to account for the difference between the proportion of out-of-scope or no-longer-operating units in the 'responding' population, and the proportion of out-of-scope or no-longer-operating units in the 'non-responding' population. This adjustment factor was applied to produce the estimates presented in this publication.

TECHNICAL NOTES *continued*

REVISION OF 2000–01 PRELIMINARY DATA

- 5** The impact of the revision process is indicated in the table below. Preliminary estimates were produced when response was at the 65% level and before the problems with the frame were identified and measured.
- 6** If no adjustment had been made to the census frame, estimates of the level shown in the 'unadjusted final estimate' column would have applied. This illustrates that some level of change would have occurred from the preliminary estimates with more complete response, whether or not the frame adjustments had been necessary.
- 7** The final column provides the 'adjusted final estimate' after taking into account the full effects of the analysis of out-of scope and no-longer-operating units.
- 8** The size of the change varies by 'commodity'. This reflects the varying impact of the adjustments on different survey strata arising from the investigation of samples of census non-responding units.

COMPARISON BETWEEN PRELIMINARY, UNADJUSTED FINAL AND ADJUSTED FINAL ESTIMATES FROM 2000–01 AGRICULTURAL CENSUS

<i>Commodity</i>	<i>Preliminary estimate</i>	<i>Unadjusted final estimate</i>	<i>Adjusted final estimate</i>
No. of agricultural establishments	n.a.	148 309	140 516
Area of agricultural land ('000 ha)	n.a.	461 837	455 723
Barley for grain, production ('000 t)	7 196	6 900	6 743
Grain sorghum, production ('000 t)	2 109	1 977	1 935
Oats for grain, production ('000 t)	1 131	1 080	1 050
Wheat for grain, production ('000 t)	23 766	22 587	22 108
Lupins for grain, production ('000 t)	1 140	1 076	1 055
Cereals for hay, production ('000 t)	1 717	1 701	1 657
Canola, production ('000 t)	1 905	1 813	1 775
Sugar cane cut for crushing, production ('000 t)	30 427	29 205	28 117
Cotton lint, production ('000 t)	696	678	666
Milk cattle ('000)	3 396	3 333	3 217
Meat cattle ('000)	25 372	25 047	24 504
Sheep and lambs ('000)	119 890	113 872	110 928
Pigs ('000)	2 763	2 797	2 748

REVISION OF PREVIOUS SURVEY DATA

- 9** This publication provides results for the 2000–01 Agricultural Census without the usual time series (three years of data). Analysis is being undertaken on the non-responding population for the previous survey years to determine a truer estimate of live populations for those years. Adjusted estimates for previous years will be published in a forthcoming issue of *Agriculture, Australia* (cat. no. 7113.0).

FOR MORE INFORMATION...

- INTERNET* **www.abs.gov.au** the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.
- LIBRARY* A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.
- CPI INFOLINE* For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).
- DIAL-A-STATISTIC* For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
