KEY POINTS

TREND ESTIMATES

- The trend estimate for beef production for December quarter 2003 increased marginally to 489,000 tonnes, the first quarterly increase after four consecutive decreases.
- In December quarter 2003, the trend estimate for the number of sheep slaughtered fell by 5% to 2.2 million, the fifth consecutive quarterly decrease.
- The trend estimate for mutton produced in December quarter 2003 fell marginally to 47,800 tonnes, the lowest quarterly estimate since June quarter 1984.
- The trend estimate for the number of pigs slaughtered for December quarter 2003 fell by 2% to 1.4 million, the third consecutive quarterly decrease after a long period of sustained growth.

INQUIRIES

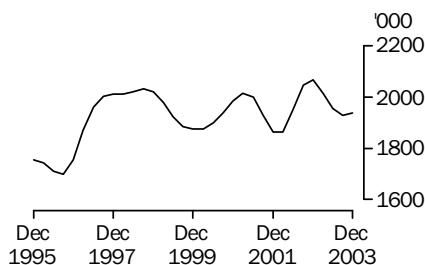

- For further information about these and related statistics, contact Frank Costin on Hobart (03) 6222 5838 or the National Information and Referral Service on 1300 135 070.

NOTES

Dennis Trewin
Australian Statistician

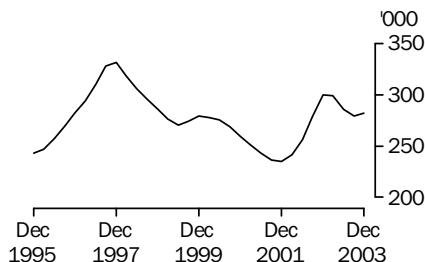

LIVESTOCK SLAUGHTERED TREND

CATTLE (EXCLUDING CALVES)

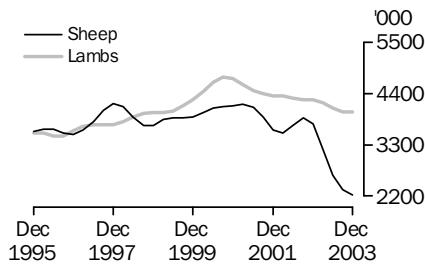

The trend estimate for the number of cattle slaughtered in December quarter 2003 rose by 1% to 1.9 million due mainly to increased turnoff in Queensland where conditions remained dry.

CALVES

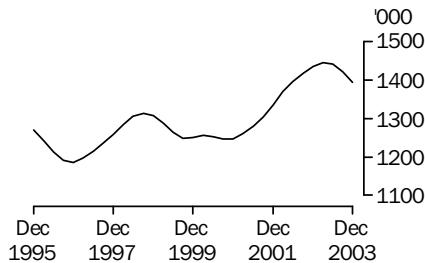

The trend estimate for the number of calves slaughtered in December quarter 2003 rose by 1% to 282,000.

SHEEP AND LAMBS

The trend estimate for sheep slaughtered in December quarter 2003 fell by 5% to 2.2 million reflecting the national shortage of sheep and improved grazing conditions in some areas. The number of lambs slaughtered remained steady at 4.0 million.

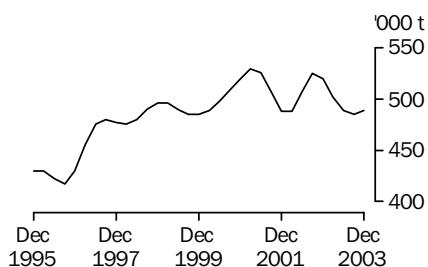

PIGS

The trend estimate for the number of pigs slaughtered fell by 2% to 1.4 million in December quarter 2003, with high levels of imports competing for the domestic market.

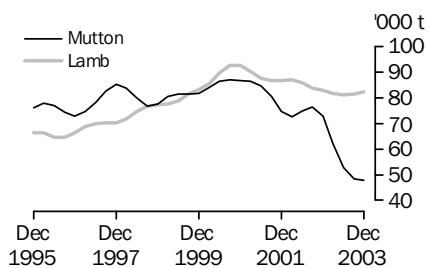

MEAT PRODUCTION TREND

BEEF

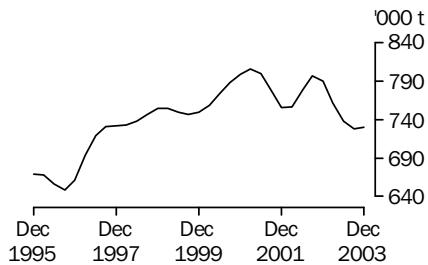

The trend estimate for beef production rose by 1% to 489,000 tonnes in December quarter 2003, in line with the increase in slaughter numbers.

MUTTON AND LAMB

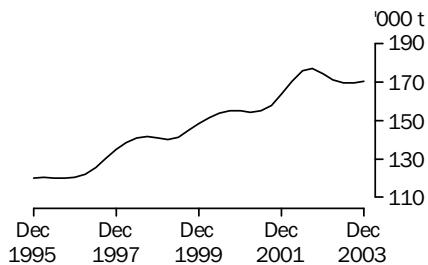

The trend estimate for mutton production in December quarter 2003 fell by 1% to 47,800 tonnes. The trend estimate for lamb production rose by 1% to 82,500 tonnes. The easing of drought conditions saw heavier slaughter weights for both sheep and lambs.

TOTAL RED MEAT

The trend estimate for red meat production remained steady at 730,000 tonnes in December quarter 2003. Increases in beef and lamb production were offset by falls in pig meat and mutton production.

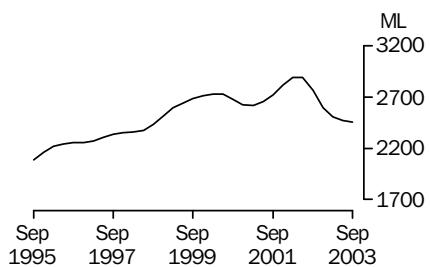

CHICKEN MEAT

The trend estimate for chicken meat production in December quarter 2003 increased slightly to 170,000 tonnes.

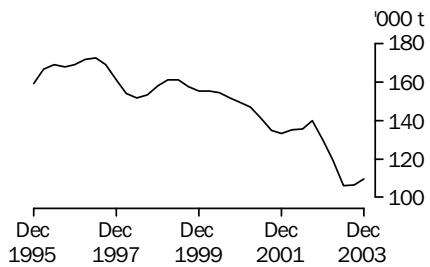

LIVESTOCK PRODUCTS TREND

WHOLE MILK INTAKE BY FACTORIES

The trend estimate for whole milk intake by factories fell by 1% to 2.5 billion litres in September quarter 2003 as the effects of the drought continued.

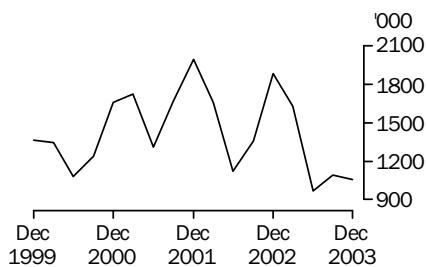

BROKERS AND DEALERS RECEIVALS OF TAXABLE WOOL

The trend estimate for wool receivals by brokers and dealers for December quarter 2003 fell by 3% to 110,000 tonnes.

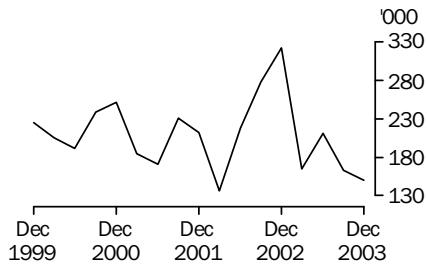

LIVESTOCK EXPORTS ORIGINAL

EXPORTS OF LIVE SHEEP

Live sheep exports fell by 4% to 1.1 million in December quarter 2003. Gross value of live sheep exports fell by 8% to \$73.2 million. Unit value fell by 4% to \$69.51. The strengthening Australian dollar has seen Australia's competitiveness reduced in this market.

EXPORTS OF LIVE CATTLE

Live cattle exports fell by 8% to 150,000 in December quarter 2003. An 11% increase in unit value (to \$553.46) saw gross value increase by 2% to \$83.1 million. The strengthening Australian dollar saw demand fall in key Asian markets.

WHAT IF...? REVISIONS TO TREND ESTIMATES

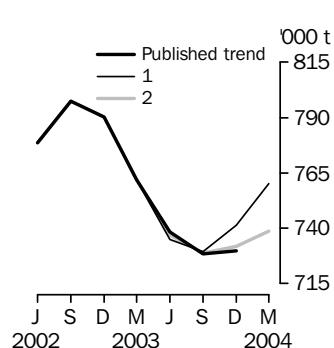

EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

TREND REVISIONS

Recent seasonally adjusted and trend estimates are likely to be revised when original estimates for subsequent quarters become available. The approximate effects of possible scenarios on trend estimates are presented below. These illustrate the impact on trend estimates if next quarter's seasonally adjusted estimate either rises or falls by a certain percentage (based on the historical average of movements in seasonally adjusted estimates).

For further information, see paragraphs 20 and 21 of the Explanatory Notes.

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication contains information on livestock slaughterings, meat production, exports of live sheep and live cattle, exports of fresh, frozen and processed meat, and whole milk intake by factories, market milk sales by factories and receivals of taxable wool by wool brokers and dealers.
- 2** The figures shown in this publication have been revised where necessary and as a consequence may not agree with similar data shown in previous publications.
- 3** Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
- 4** Unless indicated otherwise, Australian totals include data for all states and both territories.

LIVESTOCK SLAUGHTERINGS AND MEAT PRODUCTION

- 5** The statistics on slaughterings for red meat production are based on a monthly collection from abattoirs and other major slaughtering establishments and include estimates of animals slaughtered on farms and by country butchers and other small slaughtering establishments.
- 6** Red meat is shown in carcass weight and excludes offal.
- 7** Care should be taken when using this information as the figures only relate to slaughterings for human consumption and do not include animals condemned, slaughtered for pet food or those killed for boiling down.
- 8** Poultry slaughterings and meat produced statistics have been compiled from quarterly returns supplied by commercial poultry slaughtering establishments and comprise boilers, fryers and roasters. Many small producers are excluded from the collection; however, the statistics represent a high level of coverage. Tasmanian, Northern Territory and Australian Capital Territory data are excluded from the Australian total.
- 9** Chicken meat is shown in dressed weight of whole birds, pieces and giblets. Some slaughterings and meat production statistics for 'Ducks and Drakes' and 'Other Fowls and Turkeys' are available by contacting the ABS on Hobart 03 6222 5974 or by writing to GPO Box 66, Hobart Tasmania 7001 (Attention: Agriculture Section).

EXPORTS OF FRESH, FROZEN AND PROCESSED MEAT

- 10** Table 20 shows exports of fresh, frozen and processed meat, excluding offal. International trade statistics are compiled by the ABS from information submitted by exporters and importers or their agents to the Australian Customs Service. Factors can be applied to beef, veal, mutton and lamb bone-out figures to derive bone-in carcass weight which, when added to bone-in figures, shows total exports in carcass weight. The factor for beef and veal is 1.5 and for mutton and lamb, 2.0. This information is sourced from Department of Agriculture, Fisheries and Forestry—Australia.
- 11** Beef also includes buffalo meat. Bacon and ham shown is the cured carcass weight of smoked or cooked bacon and ham. It also includes the stated net weight of packs of canned bacon and ham. Canned meat is shown as the canned weight and excludes canned bacon and ham.

LIVE SHEEP AND CATTLE EXPORTS

- 12** Table 21 contains statistics of the number of live sheep and cattle exported, the gross weight, gross value and unit value. The unit value is obtained by dividing the gross value by the number of animals exported. Sheep and cattle exported for breeding are excluded.

MILK

- 13** Tables 2, 22, 23 and 25 contain statistics collected by Dairy Australia. Whole milk intake by factories includes the whole milk equivalent of farm cream intake. Market milk sales includes white, flavoured, high and low fat milk and UHT milk. Interstate transfers of UHT milk have been included in their state of destination.

EXPLANATORY NOTES *continued*

WOOL RECEIVALS

14 The statistics in tables 2, 24 and 25 show the amount of taxable wool received by brokers and purchased by dealers from wool producers. It excludes wool received by brokers on which tax has already been paid by other dealers (private buyers) or brokers.

15 The information shown is on the basis of the state in which wool has actually been received and does not necessarily reflect the production of wool in that state.

SEASONAL ADJUSTMENT

16 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.

17 In the seasonal adjustment of the livestock estimates, account has been taken of both normal seasonal factors and 'trading-day' effects, where significant, (arising from the varying length of each quarter and the varying numbers of Sundays, Mondays, Tuesdays etc. in the quarter). Adjustments are also made for the effects of change in the date of Easter holidays, again, where significant. Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes).

18 The state component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the Australian group totals.

19 As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data.

TREND ESTIMATES

20 A trend estimate is obtained by reducing the irregular component from the seasonally adjusted series. In this publication trend estimates are generally derived by applying a seven term Henderson moving average to the seasonally adjusted series. The seven term Henderson, (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. Unlike the weights of the standard seven term Henderson moving average, the weights employed here have been tailored to suit the particular characteristics of individual series. While the asymmetric weights enable the trend to be calculated for recent quarters, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. Revisions of trend estimates will also occur with revisions to the original data and re-estimation of seasonal factors.

21 Sensitivity analysis indicates the potential magnitude and direction of revisions created to the last three estimates. It aims to show how a specified movement in the seasonally adjusted data in the next period will affect the trend path of the time series. By showing how sensitive the trend estimates are to the addition of new data, the analysis provides information which can be used in the assessment of the trend's stability.

22 For further information, see *Information Paper: A Guide to Interpreting Time Series — Monitoring 'Trends', an Overview* (cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 02 6252 6345.

RELATED PUBLICATIONS

23 Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The Catalogue is available from any ABS office or the ABS web site <<http://www.abs.gov.au>>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

GENERAL ACKNOWLEDGMENT

24 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated. Without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

FOR MORE INFORMATION . . .

INTERNET

www.abs.gov.au the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.

LIBRARY

A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.

CPI INFOLINE
