DOMESTIC AUSTRALIAN TABLE WINE SALES TREND

TOTAL WHITE AND RED/ROSÉ TABLE WINE

The trend for total sales of white table wine has shown slow but steady growth over the last twelve months. The trend for total red and rosé wine sales has increased for the last four months, after five months of decrease.

TOTAL WHITE AND RED/ROSÉ TABLE WINE: Trend

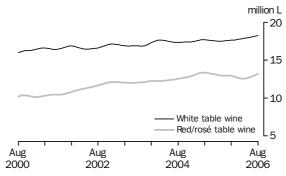

TABLE WINE,
GLASS CONTAINER
LESS THAN 2 LITRES

The trend estimate for sales of white table wine in glass containers of less than 2 litres increased 0.7% on July 2006, the sixth consecutive month of increase. The trend estimate for red and rosé wine sales in glass containers of less than 2 litres increased 2.7% in August 2006.

TABLE WINE, Glass container less than 2 litres: Trend

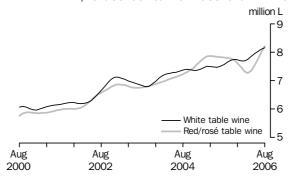

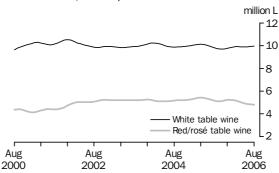

TABLE WINE,
SOFT PACK CONTAINERS

The trend estimate for domestic sales of white table wine in soft packs increased 0.3% on July 2006. The trend estimate for red and rosé wine sales in soft packs has fallen for the past seven months, with a decrease of 0.8% in August 2006.

EXPORTS OF AUSTRALIAN PRODUCED WINE

ANNUAL EXPORTS OF AUSTRALIAN PRODUCED WINE

The graph below shows that there has been steady growth in the quantity of exports of Australian produced wine over the last fifteen years. In 1990-91, 54.2 million litres of wine were exported. Exports grew rapidly to over 100 million litres in 1992–93 and between 1998–99 and 1999–2000 grew 41.8% to reach 284.9 million litres. Over the next three years there were rises of 18.7%, 23.7% and 24.0% respectively. Wine exports increased 12.7% in 2003–04 to 584.3 million litres and then rose 14.6% in 2004–05 to 669.7 million litres. Wine exports continued to rise in 2005–06, reaching 722.0 million litres, a 7.8% increase on 2004-05.

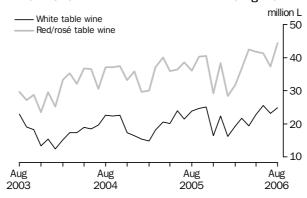

EXPORTS OF AUSTRALIAN PRODUCED WINE, Annual totals: Original

EXPORTS OF WHITE AND RED/ROSÉ TABLE WINE

In original terms, 71.5 million litres of Australian produced wine were exported in August 2006, an increase of 15.3% on July 2006, and 17.1% on August 2005. In August 2006, 24.8 million litres of Australian produced white table wine were exported, an increase of 7.2% on July 2006, and 4.3% on August 2005. Australia exported 44.4 million litres of Australian produced red and rosé table wine in August 2006, an increase of 19.0% on July 2006 and 23.2% on August 2005.

UNIT VALUE OF WINE EXPORTS

In original terms, 71.5 million litres of wine valued at \$257.1m were exported in August 2006, an increase of 15.3% in quantity and 15.5% in value on July 2006. The average value of Australian wine exported in August 2006 was \$3.60 per litre, down from \$3.92 per litre in August 2005, but up from \$3.59 per litre in July 2006.

UNIT VALUE OF WINE EXPORTS: Original

DIFFERENCES BETWEEN
ABS AND AWBC WINE
EXPORT FIGURES

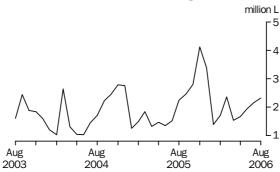

The value of wine exports reported in this publication is derived by the Australian Bureau of Statistics (ABS) from customs export records and the ABS converts the value on the day of shipment, at the daily conversion rate (see paragraph 10 of the Explanatory Notes for more detail). The Australian Wine and Brandy Corporation (AWBC) also report the value of exports and the exporter makes the conversion when submitting wine for export approval. With the AWBC method, it is expected that some of the conversions will occur at hedged rates. This does not occur with the ABS method. For August, the value reported by the ABS was \$257.1m, while the AWBC value was \$246.1m. When the Australian exchange rate is moving significantly the alternative methods will result in diverging valuations.

IMPORTS AND DISPOSALS OF AUSTRALIAN PRODUCED WINE

WINE IMPORTS CLEARED FOR HOME CONSUMPTION

In original terms, 2.3 million litres of wine, valued at \$22.7 million were imported in August 2006, an increase of 7.5% in quantity and 24.2% in value on July 2006. The average value of wine imports cleared for home consumption in August 2006 was \$9.76 per litre, up from \$8.93 per litre in August 2005.

DISPOSALS OF
AUSTRALIAN PRODUCED
WINE AND WINE
AVAILABLE FOR
CONSUMPTION IN
AUSTRALIA

The original data for the June quarter 2006 shows that wine available for consumption in Australia decreased 1.4% on the same quarter in 2005. Domestic sales of Australian wine decreased 2.4%, but wine imports increased 24.2%. Total disposals of Australian produced wine increased by 5.2% on the same quarter in 2005 with exports increasing by 9.7%.

⁽a) Imports cleared for home consumption. See paragraph 5 of the Explanatory Notes.

⁽b) Includes "Other table wine'.

⁽c) See paragraph 9 of the Explanatory Notes

EXPLANATORY NOTES

INTRODUCTION

1 The information shown in this publication for the domestic sales of Australian produced wine is obtained directly from winemakers by means of a mail collection. The brandy sales figures shown represent quantities on which excise duty was paid, i.e. the quantity of brandy released for sale. Statistics relating to import clearances and exports are based on information provided to the Australian Customs Service by importers, exporters and their agents.

SCOPE AND COVERAGE

- **2** The information on domestic sales of Australian produced wine is obtained from winemaking enterprises with sales of 250,000 litres or more in either of the previous two financial years. These account for approximately 94% of total wine sales. All sales data are collected on an Australia-wide basis only and state figures are therefore not available.
- **3** Tables 1–3 include all sales by winemakers (within the scope of the collection) with the exception of exports, sales for ships' stores, sales of imported wine and brandy and inter-winery sales, the last exclusion being necessary to avoid duplication in the published figures. From July 1998 the definition for table wine in the glass container categories changed from '1 litre and under' to 'less than 2 litres'. This series has been retained as the contribution of the over 1 litre but under 2 litres containers (such as table wine in magnum sized bottles) is believed to have been less than 1%. There is an expectation this contribution will increase in the future. This has a consequential effect for the 'other containers' category which includes glass containers 2 litres and over from July 1998 (prior to this it was glass over 1 litre). This series will also be retained.
- **4** From July 2000, the category 'Flavoured wine' has been changed to 'Other wine products'. This change reflects the inclusion of de-alcoholised, low and reduced alcohol wines in the category. These wine types were previously included in 'Table wine'. While it is expected that the effect on the 'Table wine' series resulting from this change will be insignificant, care should be taken in comparing 'Flavoured wine' with 'Other wine products'.

IMPORTS AND EXPORTS

- **5** Figures relating to international trade in wine and brandy are presented in tables 4–9 to provide a basis for assessing the overall wine market. ABS procedures are designed to ensure that sufficient editing is undertaken to guarantee the quality and integrity of trade statistics to at least the six-digit Harmonized Commodity Description and Coding System (HS) level. After the release of monthly trade statistics, the ABS may receive a number of client requests to investigate cases of possible misreporting. Most relate to potential errors at the more detailed levels of the commodity classification. Client requests for data investigations of this type will be undertaken free of charge if data at the six-digit level of the HS are affected. Otherwise investigations will only be considered if the value of the aggregate data queried exceeds \$250,000 in each month queried, and the cost of the investigation is met by the client.
- **6** Imports cleared for home consumption (including re-imports, that is, goods originating in Australia that have been exported but then returned to source) comprise those goods entered for home consumption, together with goods cleared from Customs warehouses. Exports of Australian produce are defined as exports of goods, materials or articles which have been produced, manufactured or partly manufactured in Australia. Due to a change in the Customs Tariff codes implemented in July 1999 and July 2000, the wine type categories are not necessarily comparable with earlier data.
- **7** In order to retain stability in the time-series of data, the selection of countries for which exports and imports data has been presented has been based upon the level of annual imports or exports from the previous financial year.

EXPLANATORY NOTES continued

IMPORTS AND EXPORTS continued

- **8** The value of exports is the free on board (f.o.b.) transactions value of the goods expressed in Australian dollars. The ABS converts foreign currency f.o.b. values to Australian dollars using the exchange rate prevailing on the date of departure shown on the export manifest.
- **9** The value of imports is the Australian customs value. Goods are valued at the point of containerisation (in most cases) or the port of shipment, or at the customs frontier of the exporting country, whichever comes first.
- **10** For details of currency conversion procedures for wine export values, please refer to 2.34 and 2.35 of *International Merchandise Trade, Australia; Concepts, Sources and Methods, 2001* (cat. no. 5489.0). Goods invoiced in one of six major foreign currencies are converted to Australian dollars by the Australian Bureau of Statistics. Sales in other foreign currencies are converted by the exporter to Australian dollars.

SEASONALLY ADJUSTED AND TREND ESTIMATES

- **11** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised. Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather and industrial disputes).
- **12** The seasonally adjusted estimates in this publication have been produced using a concurrent methodology whereby the seasonal factors are revised each month to take into account the seasonality exhibited by the latest observation. A more detailed review is conducted annually.
- 13 The overall degree of revision to the seasonally adjusted estimates is expected to be less on average than would be the case with annual reanalysis only. However, the nature of the seasonal adjustment process is such that the magnitude of some revisions resulting from each adjustment may be quite significant, especially towards the end of the series. For this reason additional care should be exercised when interpreting movements in seasonally adjusted data for recent months.
- 14 The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates of wine sales have been derived by applying a 13-term Henderson weighted moving average to the seasonally adjusted series.
- **15** For further information, see *Information Paper: A Guide to Interpreting Time Series Monitoring Trends* (cat. no. 1349.0) or contact the Director, Time Series Analysis on Canberra (02) 6252 5132.

ACKNOWLEDGMENT

16 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED PUBLICATIONS

- **17** Another ABS publication which may be of interest is the *Australian Wine and Grape Industry* (cat. no. 1329.0). This is a statistical compendium of Australia's wine and grape industries containing information on: area of vines and production of grapes by region; wine production and grapes crushed by region; structure of the wine manufacturing industries; stocks of wine held by winemakers at 30 June; domestic wine sales; exports and imports of wine; price indexes of grapes and wine; consumption of wine and world comparisons.
- **18** Current publications and other products by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The Catalogue is available from any ABS office or the ABS web site http://www.abs.gov.au. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

GLOSSARY

Carbonated wine Wine which has dissolved carbon dioxide and the carbon dioxide is added artificially to

the wine.

Domestic sales All sales of Australian produced wine by winemakers within the scope of the survey

> whether they be wholesale or retail sales, or bulk sales to other wineries outside of the scope of the survey. Excluded are inter-winery sales, sales to ships' stores and the volume of imported wine blended with Australian wine and sold domestically.

Exports of wine to overseas ports including sales made by exporters and wine producers. **Exports**

Fortified wine Wine to which grape spirit, brandy or both has been added, thereby adding alcoholic

strength and precluding further fermentation. Fortified wine must contain at least 150 millilitres/litre and not more than 200 millilitres/litre of ethanol at 20° Centigrade.

Grape spirit Spirit obtained from the distillation of wine or by-products of winemaking or the

fermented liquor of a mash of dried grapes and contains methanol in a proportion not

exceeding 3 grams per litre at 20° Centigrade of the ethanol content.

Imports cleared for home Imported goods brought into the country for consumption or further processing, but consumption

excluding goods imported with the reasonable expectation of re-export within a limited

time.

Other containers All other wine packaging except glass bottles containing less than 2 litres and soft packs.

Included in this category are glass containers greater than 2 litres, cans and bulk wine in

tankers or other such containers.

Other wine products Products such as flavoured wine, cocktails, marsala, aperitif and tonic wines.

De-alcoholised, low and reduced alcohol wines are also included.

A container type including all collapsible packs whether plastic or of other material. Soft packs

Sparkling A product consisting of wine that by complete or partial fermentation of contained

sugars has become surcharged with carbon dioxide.

Table wine A product of the complete or partial fermentation of fresh grapes or products derived

solely from fresh grapes.

Total other wine Includes fortified wines such as sherry, port, muscat, madiera, tokay and white port etc.,

> sparkling wines both bottle and bulk fermentated, carbonated wine, vermouth and other wine products such as flavoured wine, cocktails, marsala, aperitif and tonic wines,

de-alcoholised and low or reduced alcohol wines.

INFORMATION F O R MORE

www.abs.gov.au the ABS web site is the best place for INTERNET

data from our publications and information about the ABS.

LIBRARY A range of ABS publications are available from public and

tertiary libraries Australia wide. Contact your nearest library to determine whether it has the ABS statistics you

require, or visit our web site for a list of libraries.

INFORMATION AND REFERRAL SERVICE

Our consultants can help you access the full range of information published by the ABS that is available free of charge from our web site, or purchase a hard copy publication. Information tailored to your needs can also be requested as a 'user pays' service. Specialists are on hand to help you with analytical or methodological advice.
