## SEPTEMBER KEY POINTS

## TREND ESTIMATES

- The trend estimate for total dwelling units approved has risen throughout the September quarter with increases of 6.1\% in July 2001, 4.3\% in August 2001 \& 2.4\% in September 2001. The series has now risen for 8 consecutive months.
- The trend estimate for private sector houses approved has increased each month since January 2001 with increases of $8.6 \%, 5.8 \%$ and $3.3 \%$ over the September 2001 quarter.

## SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted estimates for total dwellings recorded in the September 2001 quarter are significantly higher than those recorded for the same three months in 2000. The estimate for September 2001 is $41.7 \%$ above the estimate recorded in September 2000.
- The seasonally adjusted estimates for private sector houses in the months of July, August and September 2001 are all in excess of 70\% higher than the same months in 2000.

## ORIGINALESTIMATES

- In original terms the total number of dwelling units approved in the September 2001 quarter was $12.6 \%$ higher than that recorded in the June 2001 quarter. The number of house approvals increased by $25.6 \%$ in the quarter, while the number of other dwellings approved fell $14.5 \%$.
- The total value of building approved rose $1.6 \%$ to $\$ 1,755.5$ million in the September 2001 quarter. Residential building increased $20.5 \%$ to $\$ 1,276.8$ million while non-residential building fell $28.4 \%$ to $\$ 478.7$ million.

## RELEASE DATE

8 February 2002
9 May 2002 2001 edition (see paragraph 26 of the Explanatory Notes).

Special articles that include some State/Territory data have appeared in recent issues of 'Building Approvals, Australia' (ABS Cat. no. 8731.0). The July 2001 article 'Average Floor Area of New Dwellings' showed changes in average floor area in the period 1985-86 to 1999-2000. The August 2001 article 'Functional Classification of Building' discussed the new ABS Functional Classification of Building and included summary data for 2000-2001. Users who are interested in receiving a copy of these articles should contact Roger Mableson on (08) 82377494.

Revisions have been made to total dwelling units in this issue, as a result of receiving updated data and resolving outstanding queries.

## VALUE OF BUILDING APPROVED

VALUE OF TOTAL BUILDING

VALUE OF RESIDENTIAL BUILDING

The trend for the value of total building has risen for the past six months following four months of decline to March 2001.

The trend for the value of residential building has risen for twelve successive months with increases of $5.0 \%$ or more for the past seven months.

VALUE OF NON-RESIDENTIAL BUILDING

The trend estimate of the value of non-residential building approved has increased by less than $2.0 \%$ per month for the past four months following six months of decrease in the series.

## D W ELLINGS APPROVED: 2000-2001

TYPE OF DWELLING

SUMMARY COMMENT

The number of dwelling units approved in Queensland during 2000-2001 is shown in the table below, for each type of dwelling category, together with the distribution of each dwelling category as a percentage of total dwelling units approved for 1999-2000 and 2000-2001

| Type of dwelling | Number of units | $\begin{aligned} & \text { 1999-2000 } \\ & \text { \% of total } \\ & \text { dwellings } \end{aligned}$ | 2000-2001 <br> \% of total dwellings |
| :---: | :---: | :---: | :---: |
| New residential |  |  |  |
| Houses | 15807 | 68.5 | 64.7 |
| Other residential building |  |  |  |
| Semi-detached, row or terrace houses, townhouses etc of: |  |  |  |
| 1 storey | 1359 | 5.3 | 5.6 |
| 2 or more storeys | 2014 | 9.1 | 8.2 |
| Total | 3373 | 14.4 | 13.8 |
| Flats, units, apartments in a building of: |  |  |  |
| 1 or 2 storeys | 1225 | 5.8 | 5.0 |
| 3 storeys | 1287 | 4.2 | 5.3 |
| 4 or more storeys | 2408 | 6.4 | 9.9 |
| Total | 4920 | 16.4 | 20.2 |
| Total other residential building | 8293 | 30.8 | 34.0 |
| Other |  |  |  |
| Alterations and additions to residential building | 163 | 0.1 | 0.7 |
| Conversions | 133 | 0.5 | 0.5 |
| Non-residential building | 18 | 0.2 | 0.1 |
| Total building | 24414 | 100.0 | 100.0 |

In 2000-01 the total number of dwelling units approved was 24,414, a decrease of $31.4 \%$ from 1999-2000. The distribution between houses and other residential dwellings has shifted slightly with new houses making up $64.7 \%$ of total dwellings units in 2000-01, down from $68.5 \%$ in 1999-2000, and new other residential building comprising $34.0 \%$ of all dwellings in 2000-01, up from $30.8 \%$.

## EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

Readers should exercise care when interpreting trend estimates. The last six trend estimates, in particular, are likely to be revised when new seasonally adjusted estimates become available.

## TREND REVISIONS

Generally, the greater the volatility of the original series, the larger the size of the revisions to trend estimates. Analysis of the building approval original series has shown that they can be revised substantially. As a result, some months can elapse before turning points in the trend series are reliably identified.

The graphs and tables which follow present the effect of two possible scenarios on the previous trend estimates: that the October seasonally adjusted estimate is higher than the September estimate by $6 \%$ for the number of private sector houses approved and $7 \%$ for total dwelling units approved; and that the October seasonally adjusted estimate is lower than the September estimate by $6 \%$ for the number of private sector houses approved and $7 \%$ for total dwelling units approved. These percentages were chosen because they represent the average absolute monthly percentage change for these series over the last ten years.

(a) Includes conversions and dwelling units approved as part of the alterations and additions or the construction of non-residential buildings.
(b) Refer to Explanatory Notes paragraph 16.

## EXPLANATORYNOTES

1 This publication presents monthly details of building work approved.

2 Statistics of building work approved are compiled from:

- permits issued by local government authorities and other principal certifying authorities;
- contracts let or day labour work authorised by Commonwealth, State, semi-government and local government authorities;
- major building approvals in areas not subject to normal administrative approval e.g. building on remote mine sites.

3 The scope of the survey comprises the following:

- construction of new buildings;
- alterations and additions to existing buildings;
- approved non-structural renovation and refurbishment work;
- approved installation of integral building fixtures.

4 From July 1990, the statistics include:

- all approved new residential building valued at $\$ 10,000$ or more;
- approved alterations and additions to residential building valued at $\$ 10,000$ or more;
- all approved non-residential building jobs valued at $\$ 50,000$ or more.

5 Excluded from the statistics is construction activity not defined as building (e.g. roads, bridges, railways, earthworks, etc.). Statistics for this activity can be found in Engineering Construction Activity, Australia (Cat. no. 8762.0).

6 Statistics on the value of building work approved are derived by aggregating the estimated 'value of building work when completed' as reported on building approval documents provided to local councils or other building approval authorities. Conceptually these value data should exclude the value of land and landscaping but include site preparation costs. These estimates are usually a reliable indicator of the completed value of 'houses'. However, for 'other residential buildings' and 'non-residential buildings', they can differ significantly from the completed value of the building as final costs and contracts have not been established before council approval is sought and gained.

7 The ABS generally accepts values provided by approving bodies. Every effort is made to ensure data are provided on a consistent basis, however, there may be instances where value reported does not reflect the building completion value. For example, the reported value for most project homes is the contract price, which may include the costs of site preparation and landscaping. In other cases where a builder is contracted to construct a dwelling based on the owner's plans, the value may only be the builder's costs. Some councils do not use the value on approval documents, instead deriving a value based on floor area and type of structure.

8 From July 2000, value data includes the Goods and Services tax (GST) for residential and non-residential building approvals. The ABS has consulted with councils and other approving authorities to ensure that approval values are reported inclusive of the GST. Where it was identified by a council or other approving authority that approvals submitted from its jurisdiction were on a GST-exclusive basis, the ABS has made adjustments to the data to ensure that values were consistent with other data collected and are inclusive of GST.

## EXPLANATORYNOTES

9 Building ownership is classified as either public or private sector and is based on the sector of intended owner of the completed building at the time of approval. Residential buildings constructed by private sector builders under government housing authority schemes are classified as public sector when the authority has contracted, or intends to contract, to purchase the building on or before completion.

10 Building approvals are classified both by the Type of Building (e.g. 'house', 'factory') and by the Type of Work involved (e.g. 'new', 'alterations and additions' and 'conversions'). These classifications are often used in conjunction with each other in this publication and are defined in the Glossary.

11 The Type of Building classification refers to the intended major function of a building. A building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the specific building, not to the function of the group as a whole.

12 An example is the treatment of building work approved for a factory complex For instance, a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while the factory buildings would be classified to Factories.

13 An exception to this rule is the treatment of group accommodation buildings. For example, a student accommodation building on a university campus would be classified to Education.

14 In the case of a large multi-function building, which at the time of approval is intended to have more than one purpose (e.g. a hotel/shops/casino project), the ABS endeavours to split the approval details according to each main function.

15 Where this is not possible because separate details cannot be obtained, the building is classified to the predominant function of the building on the basis of the function which represents the highest proportion of the total value of the project.

16 The Type of Work classification refers to the building activity carried out Conversion jobs are shown separately in tables 5 and 6 . However, in other tables they are included within existing categories, as follows: in tables $1,2,11$ and 12 they are included in the appropriate Type of Building category, and in tables 3, 4, 11 and 12 they are included in the 'Alterations and additions to residential buildings' category.

17 Seasonal adjustment is a means of removing the estimated effects of seasonal variation from the series so that the effects of other influences can be more clearly recognised

18 In the seasonal adjustment of series, account has been taken of both normal seasonal factors and 'trading day' effects arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month. Adjustment has also been made for the influence of Easter which may affect the March and April estimates differently.

19 Seasonal adjustment does not remove from the series the effect of irregular or non-seasonal influences (e.g. the approval of large projects or a change in the administrative arrangements of approving authorities).

20 Some of the component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the adjusted totals.

21 As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. The timing of this review may vary and when appropriate will be notified in the 'Data Notes' section of this publication.

22 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. For monthly series, these trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, see Information Paper: A Guide to Interpreting Time Series-Monitoring 'Trends': an Overview (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 0262526076.

23 While the smoothing techniques described in paragraph 22 enable trend estimates to be produced for the latest few periods, they do result in revisions to the trend estimates as new data becomes available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Revisions to the original data and re-analysis of seasonal factors may also lead to revisions to the trend.

24 The chain volume measures appearing in this publication are annually re-weighted chain Laspeyres indexes referenced to current price values in a chosen reference year. The reference year will be updated annually in the September publication. While current price estimates reflect both price and volume changes, chain volume estimates measure changes in value after the direct effects of price changes have been eliminated and therefore only reflect volume changes. The direct impact of the GST is a price change, and hence is removed from chain volume estimates.

25 Further information on the nature and concepts of chain volume measures is contained in the ABS publication Information Paper: Introduction of Chain Volume Measures in the Australian National Accounts (Cat. no. 5248.0).

26 Area statistics are now being classified to the Australian Standard Geographical Classification (ASGC), 2001 Edition (Cat. no. 1216.0), effective from 1 July 2001, and ASGC terminology has been adopted in the presentation of building statistics.

27 Some Statistical Districts straddle State/Territory boundaries. The Gold Coast-Tweed Statistical District lies partly in Queensland and partly in New South Wales.

28 As well as the statistics included in this and related publications, the ABS may have other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300135070.

## EXPLANATORYNOTES

Alterations and additions
Alterations and additions to
residential buildings residential buildings

Building activity carried out on existing buildings. Includes adding to or diminishing floor area, altering the structural design of a building and affixing rigid components which are integral to the functioning of the building.

Alterations and additions carried out on existing residential buildings, which may result in the creation of new dwelling units. See also Explanatory Notes paragraph 16.

## Building

A building is a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design is the provision for regular access by persons in order to satisfy its intended use.

Conversion
Building activity which converts a non-residential building to a residential building, e.g. conversion of a warehouse to residential apartments. Conversion is considered to be a special type of alteration, and these jobs have been separately identified as such from the July 1996 reference month, though they have only appeared separately in this publication from the May 1998 issue. Prior to that issue, conversions were published as part of the 'Conversions, etc.' category or included elsewhere within a table. Prior to July 1996, table 5 includes the number of Conversions in the 'Alterations and additions to residential buildings' category while table 6 includes the value of Conversions in the 'Alterations and additions to residential buildings, creating dwellings' category. See also Explanatory Notes paragraph 16.

Dwelling unit A dwelling unit is a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. Regardless of whether they are self-contained or not, units within buildings offering institutional care (e.g. hospitals) or temporary accommodation (e.g. motels, hostels and holiday apartments) are not defined as dwelling units. Such units are included in the appropriate category of non-residential building approvals. Dwelling units can be created in one of four ways: through new work to create a residential building; through alteration/addition work to an existing residential building; through either new or alteration/addition work on non-residential building or through conversion of a non-residential building to a residential building.

Educational Includes schools, colleges, kindergartens, libraries, museums and universities.

## Entertainment and

 recreationalFactories
Flats, units or apartments

Health
Hotels, motels and other short term accommodation

House A house is a detached building primarily used for long term residential purposes. It consists of one dwelling unit. For instance, detached 'granny flats' and detached dwelling units (e.g. caretaker's residences) associated with a non-residential building are defined as houses.

## Miscellaneous <br> New building work

## New other residential

 buildingsNew residential

Non-residential building

Other business premises

## Other dwellings

Other residential building

## Religious

## Residential building

Semi-detached, row or terrace houses, townhouses

Shops Includes retail shops, restaurants, taverns and shopping arcades.
