

## POPULATION.

Population of  
Victoria, 1836  
to 1913.

According to manuscript notes made by Captain Lonsdale (afterwards the first Colonial Secretary of Victoria), the first enumeration of the people of this State, was made within a year after the arrival of Batman (29th May, 1835) by an officer from Sydney, George Stewart, Esq., who came in the revenue cutter *Prince George*, with orders from His Excellency Sir Richard Bourke to report upon the state of things in the new district. It was then found (25th May, 1836) that the band of first arrivals consisted of 142 males and 35 females, or, in all, 177 residents of European origin. This was the first official census of what was at that time known as Port Phillip. The settlers came from Tasmania and New South Wales. The second enumeration was made on the 8th November of the same year (1836) by order of Captain Lonsdale, who on the 29th of the previous September arrived in H.M.S. *Rattlesnake* (Captain Hobson), which anchored in that part of the port now called Hobson's Bay. Captain Lonsdale had been appointed police magistrate, with instructions to take general charge of the district. On the 5th October the *Stirlingshire* (brig) arrived with the remainder of the Government establishment, consisting of a detachment of Captain Lonsdale's regiment (the 4th), a principal officer of Customs, three surveyors, an officer in charge of commissariat stores, a small number of Crown prisoners for public service, and three constables. Notwithstanding these additions to the population, the census of the following month showed an increase of 47 persons only—making a total of 224 persons (186 males and 38 females). The third census was taken nearly two years after, in September, 1838, when it was ascertained that the number of inhabitants had increased to 3,511, and at the end of 1840 it was estimated that the Port Phillip district contained 10,291 persons. During each of the years 1840 and 1841 the population doubled itself owing principally to the number of assisted immigrants who arrived in the district, and good progress continued to be made to the end of 1850, when the community numbered 76,162 persons. The discovery of gold in 1851, however, was the greatest factor in populating Victoria. When the discoveries were announced diggers came in thousands from New South Wales, South Australia, and Tasmania, and later on crowds of emigrants from the United Kingdom and other European countries joined in the rush. America contributed its quota, too, even Californians leaving their own gold-bearing country to try their fortunes in Australia. Some idea of this influx may be gathered from the official figures, which show that the population numbered 463,135 at the end of 1857, or more than six times that of 1850. During the decade 1861

to 1870, the population increased by 188,752, all but 39,000 of which was due to the excess of births over deaths. In the next decennial period, 1871 to 1880, there was an increase of 133,468, but this would have been nearly 13,000 greater if the arrivals in had equalled the departures from the colony. Between 1881 and 1890 an addition of 273,000 was made to the population, about 112,000 being due to immigration. The latter portion of this decennium is known as the "boom period," when land values were highly inflated, wages and prices were exceptionally high, and expenditure by the Government and the people generally, was conducted in a most lavish manner. The inevitable reaction followed, and this is reflected in the records, the net migration from the State during the ten years following 1890 amounting to 109,000 persons, the increase of 64,000 in the total population being accounted for by the fact that the births exceeded the deaths by 173,000. Most of these emigrants left for Western Australia, where gold had been discovered in large quantities. In 1902-3 a year of unexampled drought was experienced, which was felt severely by this as well as all the other Eastern States. Since then good seasons have followed one another, with the result that employment has been plentiful, and that the State has not only been able to retain its own people but also to attract others from outside in increasing numbers. The subjoined table gives a statement of the population in various years from 1836 to 1913:—

## ESTIMATED POPULATION OF VICTORIA, 1836 TO 1913.

Year.	Estimated Population, 31st December.			Estimated Mean Population.
	Males.	Females.	Total.	
1836 (25th May) ...	142	35	177	200
1836 (St. Novr.) ...	186	38	224	
1840 ...	7,254	3,037	10,291

1870 ...	398,755	327,844	726,599	713,195
1880 ...	451,456	408,611	860,067	850,343
1890 ...	596,064	537,202	1,133,266	1,118,500
1900 ...	602,487	594,719	1,197,206	1,193,338
1901 ...	610,005	602,608	1,212,613	1,204,909
1902 ...	609,246	606,594	1,215,840	1,214,226
1903 ...	607,092	608,110	1,215,202	1,215,521
1904 ...	607,285	611,323	1,218,608	1,216,905
1905 ...	612,488	616,497	1,228,985	1,223,796
1906 ...	620,125	624,349	1,244,474	1,236,729
1907 ...	627,631	632,837	1,260,468	1,252,471
1908 ...	633,104	637,993	1,271,097	1,265,782
1909 ...	643,642	647,377	1,291,019	1,281,058
1910 ...	652,285	655,826	1,308,111	1,299,565
1911 ...	668,759	670,343	1,339,102	1,320,374
1912 ...	689,825	690,736	1,380,561	1,356,387
1913 ...	706,948	705,171	1,412,119	1,393,180

The figures of population and migration from the date of the census in 1911 have been revised, and the estimates published by the Commonwealth Statistician and State Statistician are now in agreement. The particulars relating to overland migration for 1911 and 1912 have been recast by the Commonwealth Statistician, and from the beginning of 1913 satisfactory arrangements have been made to count the passengers who travel by rail between the States of Victoria, New South Wales, Queensland, and South Australia.

The increase in the population in 1913, viz., 31,558, was smaller than in the preceding year, but larger than in any year since 1888. The rates of increase in different years are given on page 209.

**Population, 1913.** The elements of increase in the population of Victoria during 1913 are shown in the following table :—

**ESTIMATED POPULATION OF VICTORIA, 31st DECEMBER, 1913.**

**Increase of  
Population,  
1891-1913.**

The population of Victoria on 5th April, 1891, when the census of that year was taken, was 1,140,405. The following table shows the increase of population by excess of births over deaths, and the loss by emigration since that date :—

**INCREASE OF POPULATION BY EXCESS OF BIRTHS OVER DEATHS, AND LOSS BY EMIGRATION, 1891 TO 1913.**

Year.	Natural Increase (i.e., Excess of Births over Deaths).	Loss by Emigration.	Net Increase.
1891 (from 5th April, Census) ..	15,859	+ 1,414	17,273
1892 .. .. .	21,980	11,058	10,922

1913 .. .. .	20,496	+ 11,062	31,558
Total (22½ years) .. ..	382,158	110,444	271,714

NOTE.—The plus sign (+) indicates that the arrivals in exceeded the departures from the State by the number against which it is placed.

It will be seen that Victoria has since 1891 suffered a serious loss by emigration. Naturally, Western Australia has been by far the greatest gainer. The following table shows to what a large extent that State gained from Victoria from 1891 (the year when gold was first discovered there in large quantities) to the close of 1913. The total gain recorded to the Western State is 85,541.

**RECORDED MIGRATION TO AND FROM WESTERN  
AUSTRALIA, 1891 TO 1913.**

Year.	Arrivals from.	Departures to.	Excess of Departures.
1891 .. ..	344	2,304	1,960

1913 .. ..	9,176	9,263	87
Total .. ..	215,355	300,896	85,541

The arrivals and departures cannot all be taken to represent Victorians, as passengers from the Eastern States calling at Victorian ports on the way to the Western State were, up to 31st December, 1902, included. A very large number of Victorians must, however, have emigrated to Western Australia, as the census returns of that State on 2nd April, 1911, disclosed the fact that there were then no fewer than 54,613 natives of Victoria living there. Victoria had a greater gold-mining population to draw upon than any of the other States, and it so happened that the mining industry in this State was dull at the very time when that of Western Australia was flourishing. There was some compensation to Victoria for this exodus to Western Australia, as the fathers and sons who went there, and earned good wages, remitted considerable sums of money for the support of their dependents in Victoria.

There was a large migration between South Africa and Victoria for some years, which, during the period 1895-1903, resulted in a loss to Victoria of 10,002 of her population. During the five years ended 1908 and in 1913 this State gained from South Africa, but in the four years 1909 to 1912 there was a loss to that colony. Details of migration to and from South Africa are given in the *Year-Book* for 1910-11.

The following table shows the total migration by sea to and from Victoria during the three years 1911 to 1913:—

RECORDED IMMIGRATION AND EMIGRATION BY SEA,  
1911 TO 1913.

Year.	Immigrants.	Emigrants.	Excess of Immigrants.
1911 .. ..	106,349	93,246	13,103
1912 .. ..	124,527	99,933	24,594
1913 .. ..	114,586	101,718	12,868

Arrivals and  
departures by  
rail, 1911 to  
1913.

The Inter-State railway passenger traffic is also taken into account in framing estimates of population, and the effect of this traffic during the past three years is shown in the following return:—

RECORDED MIGRATION BY RAIL, 1911 TO 1913.

Year.	Arrivals.			Departures.			Excess of Arrivals.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1911 ..	97,955	47,027	144,982	90,935	45,160	136,095	7,020	1,867	8,887
1912 ..	100,153	52,036	152,189	100,326	52,042	152,368	- 173	- 6	- 179
1913 ..	132,718	53,778	186,496	130,536	55,486	186,022	2,182	- 1,708	474
Total	330,826	152,841	483,667	321,797	152,688	474,485	9,029	153	9,182

In 1913 Victoria gained by rail 296 persons from New South Wales, and 178 from South Australia.

Gain by  
immigration  
from various  
countries and  
vice versa.

The net result of the recorded immigration and emigration by sea between Victoria and the neighbouring States, the United Kingdom, and foreign countries during each of the three years ended 1913 is shown in the following table. Where a minus sign (—) appears, it indicates that the

In 1913 the nominated immigrants numbered 5,007, and the assisted 7,139. Of the former 1,632, and of the latter 1,452, were married persons. The sex distribution of the State-assisted immigrants was—males 7,269, and females 4,877.

On making application to the Superintendent of Immigration in the office of the Agent-General for Victoria in London, approved persons may obtain reduced third-class passages to Victoria as follows:—Domestic servants, £3; experienced farm labourers, £8; British lads for farm training, £7; inexperienced farm labourers (limited number), £10; other approved persons, £14, per adult fare. Assisted passages at £14 are granted to persons who have been nominated by friends or relatives in Victoria. Where the nominees in the latter class of passages are the wife and children of the nominator, the net fare payable by a nominator is £4 per adult for females and £8 per adult for males—children under twelve, male or female, £2 each. In cases where the nominated passengers are not so related to the nominator, the net fare payable by nominator is £10 per adult and a proportionate amount for children.

#### SETTLERS FOR IRRIGATION DISTRICTS.

The Government of Victoria has for some time been endeavouring to induce settlers to take up blocks in the irrigation districts served by the works belonging to the State. Seeing that a large deficit was accruing annually from these irrigation works, and in view of the fact that no proper agricultural development was taking place in the irrigation districts, the State Government resolved that an organized effort should be made to obtain settlers from abroad, who would be prepared to occupy and develop to its utmost possibility the land in these areas. The encouragement of immigration from the United Kingdom and America has aided in the settlement of the areas by oversea people, and has greatly stimulated the demand by Victorians for irrigation farms.

In May, 1910, the Hon. Hugh McKenzie, Minister of Lands, and Mr. Elwood Mead, Chairman of the State Rivers and Water Supply Commission, left Melbourne as a Government delegation to Europe

and America, there to endeavour to turn the attention of intense cultivators to the opportunities existing for competent men in the irrigation lands of this State. Their efforts were entirely successful, and since their return the results of the mission have been evidenced in the relatively very large increase in the number of persons coming from other countries to make their homes in Victoria.

From America there has been an increasing—though at first small—number of immigrants who have been attracted chiefly by the opportunities for settlement in the irrigation areas of the State. To further enlighten American and Canadian home-seekers, an officer has been appointed and stationed in America by the Government. The appointee, Mr. F. T. A. Fricke, took over his duties in July, 1912, when he left Australia for Vancouver, and his head office is now at 687 Market-street, San Francisco. As Land Settlement Agent in America for Victoria, Mr. Fricke corresponds with and interviews inquirers in America and Canada with a view of authoritatively informing them regarding this State. In Vancouver, B.C., Mr. Fricke has appointed a resident agent in Mr. B. J. Hansen, with offices at 442 Richards-street, Vancouver, B.C. More recently the Government, realizing the immense task imposed on one officer to cover the area controlled by Mr. Fricke, appointed a lecturer for a term of seven months in America. Mr. J. W. Arthur Kelly, of Echuca, accordingly left Victoria on the 8th March, 1913, to take up his appointment in those parts. Mr. Kelly returned to Victoria in December, 1913, and a number of land-seekers took advantage of the special excursion which was at that time arranged to visit the various irrigation settlements of the State. Several families settled on blocks, and others are expected to follow as settlers in the irrigation areas. A steady and increasing flow of immigration from America is expected as a result of this policy.

The object of these delegations has in a large measure already been attained. The northern irrigation areas now present a spectacle of busy settlement, and the complete development of these lands appears to be a matter of only a very short time. This development means that, not only will the actually settled country benefit, but the cities and towns will feel the pulse of prosperity beating throughout the State, and the increased production and trade will amply justify the action of the Government.

Though the settlement of what has hitherto been only partially used lands has been the mainspring of the assisted immigration movement, other minor channels for helping those desirous of immigrating hither have been opened. The immigration of lads from the United Kingdom for farm training is encouraged by the Government, and during the calendar year 1913 such lads, to the number of 2,300, were placed in suitable farming homes throughout the State. This movement has proved most satisfactory—farmers having indicated their appreciation of these lads in unmistakable terms. Farm labourers and domestic servants may obtain reduced rates for their passages to Victoria, whilst workmen in any trades where there is an evident shortage of skilled labour are also given the benefit of reduced fares from the United Kingdom.

The system of nomination by persons resident in Victoria of their oversea friends and relatives has been extended, so that intended immigrants may now be nominated for passages from America, and reduced fares have been arranged for these.

The total expenditure on assisted immigration during 1912-13 amounted to £159,677. Of this amount the Government contributed £122,901, and the balance consisted of fares which were paid by immigrants or, in the case of nominated passengers, by their friends. The disbursements under various headings during the past three years are as under:—

EXPENDITURE ON ASSISTED IMMIGRATION, 1910-11 TO 1912-13.

NOTE.—Full-blooded aborigines, to the number of 271 in 1901, are included in the foregoing statement, but those enumerated in 1911, viz., 196, are excluded.

Decreases of population are shown in 16 of the 37 counties during the ten years 1901-1911. The largest of these are in the counties of Talbot, Grenville, Bendigo, Dalhousie, Bogong, and Gladstone, where the mining industry has not been so prosperous as in former years. The north-eastern county of Moira, which is principally dependent on agriculture, also shows a decline of about 8 per cent. The county of Bourke, which includes the metropolis, contained nearly 100,000 more people at the later census than at the earlier one. There have also been large increases in the counties of Mornington and Buln Buln, and in the mallee county of Karkaroc.

**Ages of the people.**

The following table shows the ages of the people in the three census years 1891, 1901, and 1911:—

### AGES OF THE PEOPLE AT CENSUSES, 1891, 1901, AND 1911.

Age Group (Years).	1891.		1901.		1911.

Specified Ages	100·00	100·00	100·00	100·00	100·00	100·00

Persons at  
dependent  
and  
supporting  
ages.

By adopting larger groups a clearer idea is obtained of the age distribution of the population at the three census periods. The subjoined table shows the numbers and proportions of males and females at ages 0-15, 15-45, 45-65, and 65 and upwards. Persons of unspecified ages have been omitted :—

## NUMBER OF PERSONS AT DEPENDENT AND SUPPORTING AGES IN VICTORIA AT THREE CENSUS ENUMERATIONS.

Census Year.	Number of Persons at—							
	Dependent Ages (Under 15 years).		Supporting Ages.				Old Age (65 years and up- wards).	
			15 to 45 years.		45 to 65 years.			
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
1891	198,754	194,284	286,383	262,141	86,909	67,836	23,470	15,659
1901	206,248	202,312	285,434	295,278	72,815	68,860	36,822	29,249
1911	202,262	196,844	310,402	324,310	106,201	100,670	33,467	34,356
Proportions per cent.								
1891	33·37	35·98	48·09	48·56	14·60	12·56	3·94	2·90
1901	34·30	33·96	47·47	49·57	12·11	11·56	6·12	4·91
1911	31·00	30·00	47·59	49·42	16·28	15·34	5·13	5·24

The features which are most noticeable in the age distribution of the population in 1911, as compared with that of ten years previously, are the decrease in the proportion of dependents (*i.e.*, persons under the age of 15 years), and the increase in the proportionate number at the supporting ages from 45 to 65 years. The proportion of old persons in the community was slightly less in 1911 than in 1901.

Australian  
born  
and other  
population  
in State.

Of the Victorian population at the last census date, 85 per cent. were Australian born. There were only 20,630 persons living in the State who had been resident in Australia for less than five years. The following table shows the length of residence in Australia of the population in the metropolis and in the remainder of the State.

POPULATION OF VICTORIA AT THE CENSUS OF 2ND APRIL, 1911, CLASSIFIED ACCORDING TO LENGTH OF RESIDENCE IN AUSTRALIA.

(Exclusive of Full-blooded Aborigines.)

**Married persons.**

According to this tabulation there were, on 2nd April, 1911, 428,215 persons, or  $32\frac{1}{2}$  per cent. of the population, in the marriage state. The wives exceeded the husbands by 4,715.

The single males of 20 years and upwards, and the single females of 17 years and upwards, or, in other words, the bachelors and spinsters, numbered respectively 152,753 and 171,514. If to these be added the widowers, widows, and divorcees, it will be found that the whole marriageable population at the census was 173,148 males and 219,694 females, the latter thus exceeding the former by 46,546.

**Proportion of marriageable females.**

At the census, therefore, the marriageable females were in the proportion of 127 to every 100 marriageable males. In 1901 the proportion of females was 117; in 1891, 88; in 1881, 89; and in 1871 only 52.

**Married persons under 21 years of age.**

It will be noticed that 569 youths (of whom 2 had lost their wives) had become husbands, and 3,334 girls (of whom 25 had lost their husbands) had become wives, before they reached the age of 21. One male aged 14 years,

4 males aged 16 years, 6 females aged 14 years, and 13 females (one of whom was widowed) aged 15 years were the youngest married persons in the State.

There were 18 persons—8 males and 10 females—aged 100 years and upwards in Victoria when the census was taken. Of the men 5, and of the women 9, were widowed.

Population  
in different  
dwellings,  
1911.

Particulars of the materials of which houses were composed and the population living therein were ascertained when the census was taken in 1911. A majority of the people (63 per cent.) occupy wooden houses, and about 30 per cent. reside in brick structures. The following is a summary of the information collected :—

### INMATES OF PRIVATE AND OTHER DWELLINGS IN THE STATE OF VICTORIA AT THE CENSUS OF 1911.

In the following return the persons and dwellings to the square mile, persons and rooms to a dwelling, and persons to a room, are shown for the six census years 1861-1911 :—

### DENSITY OF POPULATION.—RETURN FOR SIX CENSUS YEARS.

Year of Census.	Persons to the Square Mile (exclusive of Persons in Ships).	Inhabited Dwellings to the Square Mile.	Persons to the Inhabited Dwelling (exclusive of Persons in Ships).	Rooms to a Dwelling (Inhabited and Uninhabited).	Persons to a Room.
1861 ..	6·126	1·470	4·16	2·96	1·35
1871 ..	8·298	1·714	4·84	3·89	1·18
1881 ..	9·791	1·935	5·06	4·44	1·08
1891 ..	12·948	2·549	5·08	5·10	·92
1901 ..	13·643	2·747	4·97	5·25	·90
1911 ..	14·915	3·112	4·79	..	..

The population returned at the census of 1911 furnishes a proportion of 14·9 persons to the square mile. In 1901 the proportion was 13·6; in 1891, 12·9; in 1881, 9·8; in 1871, 8·3; and in 1861, 6·1. There were 479 persons to every 100 inhabited dwellings in 1911, a smaller number than in the four preceding census years, but greater than in 1861.

Universal obligation to military service is imposed on all males in Australia aged 18 to 60 years, the order of their being called upon to serve being fixed by age and conjugal condition. There are five classes, and the following table shows the number of persons in each of these who were living in Victoria at the date of the last census in 1911, also the number at the preceding census in 1901. The proportions of widowers of military ages with and without children cannot be stated exactly, but it is believed that the numbers which have been allocated to the various age groups approximate closely to the actual facts.

NUMBER OF MALES AGED 18 TO 60 YEARS IN VICTORIA AT  
THE CENSUSES OF 1901 AND 1911.

Class.	Age.	Conjugal Condition.	Number of Males enumerated at the Census of—	
			1901.	1911.
I.	18 and under 35 years	Unmarried, or widowers without children	116,909	130,729
II.	35 and under 45 years	Unmarried, or widowers without children	21,248	22,329
III.	18 and under 35 years	Married, or widowers with children	46,035	54,162
IV.	35 and under 45 years	Married, or widowers with children	61,371	60,614
V.	45 and under 60 years	Married or unmarried	56,627	91,521
Total	...	...	302,190	359,355

The number of males in the State at the military ages increased by 57,165, or by nearly 19 per cent., in the decennial period 1901–11, while the general population increased by only about 10 per cent. in the same time. The population thus became stronger from a defence point of view during the period mentioned.

**Birthplaces  
of the  
people, 1911.**

The census of 1911 gives the principal birthplaces of the people as follows:—

### BIRTHPLACES OF THE PEOPLE OF VICTORIA, 1911.

<b>Grand Total ... ..</b>	<b>655,591</b>	<b>659,960</b>	<b>1,315,551</b>

**Victorian  
born.**

Persons of Victorian birth were in the proportion of 77 to every 100 persons in 1911, as compared with 73 in 1901. These, combined with the natives of the other Australian States and New Zealand, amounted to 85 per cent. of the total population of Victoria.

**Decrease of  
natives of  
the United  
Kingdom.**

The decrease of natives of all parts of the United Kingdom resident in Victoria during the ten years ended 1911 was considerable, amounting to 56,935. This decrease is equivalent to 24 per cent. of the natives of England and Wales, 26 per cent. of the natives of Scotland, and 33 per cent. of the natives of Ireland, who were resident in the State in 1901.

**Foreign born.** The number of persons in the State in 1911 who were born in countries outside the British dominions was 21,252, or 1·6 per cent. of the population. This is a decrease as compared with 1901, when they numbered 25,582, or 2·1 per cent. of the population.

**Chinese.** In the interval between the censuses of 1901 and 1911 natives of China decreased from 6,230 to 4,302. These figures, however, do not represent all the Chinese in the State, as there are persons of this race born in places outside of China resident in Victoria. The total number of the Chinese race in Victoria was 7,349 in 1901 and 5,601 in 1911.

**Victorians in each Australian State and New Zealand.** Persons of Victorian birth living in other Australian States and New Zealand numbered 191,892 at the census of 1911, as compared with 136,638 at the previous census in 1901, thus showing an increase of 55,254.

### VICTORIANS LIVING IN EACH AUSTRALIAN STATE AND NEW ZEALAND, 1911.

Queensland .. ..	1,954	2,448	4,402
South Australia .. ..	11,400	12,127	23,527
Western Australia .. ..	2,244	2,292	4,536
Tasmania .. ..	8,615	10,415	19,030
New Zealand .. ..	4,968	5,099	10,067
Australasia (State not given) .. ..	8,673	9,848	18,521
Total .. ..	51,127	57,648	108,775

Comparing these two tables, it is seen that the number of persons of Victorian birth in the other States and New Zealand exceeded the number of persons born in those places who were living in Victoria in 1911 by 83,117.

The enumerated population at each of the last six censuses and the decennial increases, numerical and centesimal, are as under :—

POPULATION OF VICTORIA (INCLUDING ABORIGINES) AT SIX CENSUS PERIODS.

Year of Census or Estimate.	Both Sexes.			Males.			Females.		
	Population.	Increase since last Census.		Population.	Increase since last Census.		Population.	Increase since last Census.	
		Numerical.	Centesimal.		Numerical.	Centesimal.		Numerical.	Centesimal.
1861	540,322	129,556	31·54	328,651	64,317	24·33	211,671	65,239	44·55
1871	731,528	191,206	35·39	401,050	72,399	22·03	330,478	118,807	56·13
1881	862,346	130,818	17·88	452,083	51,033	12·72	410,263	79,785	24·14
1891	1,140,405	278,059	32·24	598,414	146,331	32·37	541,991	131,728	32·11
1901	1,201,341	60,936	5·34	603,883	5,469	·91	597,458	55,467	10·23
1911	1,315,747	114,406	9·52	655,694	51,811	8·58	660,053	62,595	10·48

Between the censuses of 1901 and 1911 the increase in population (114,406) was smaller than in any intercensal period since 1851, with the exception of the decennium 1891-1901, when it was only 60,936 persons. The increases in other periods were 278,059 between 1881 and 1891, and 130,818 and 191,206 respectively in the two decennial periods prior to 1881.

Proportions of sexes, Victoria.

The proportions of sexes at the six census enumerations were :—

Year.						Females to 100 Males.
1861	..	..	..	..	..	64·41
1871	..	..	..	..	..	82·40
1881	..	..	..	..	..	90·75
1891	..	..	..	..	..	90·57
1901	..	..	..	..	..	98·41
1911	..	..	..	..	..	100·61

The numbers of the sexes are more on an equality in Victoria than in any of the other States. This will be apparent from the following figures, which show that while in Western Australia there are only 77 females, and in Queensland 85, to every 100 males, in Victoria the proportion is about equal.

### PROPORTION OF THE SEXES IN AUSTRALIA AND NEW ZEALAND, 1913.

	Females to 100 Males.		Females to 100 Males.
Victoria ... ..	99·75	Western Australia ...	77·42
New South Wales ...	90·40	Tasmania ... ..	93·03
Federal Capital Territory ...	81·88		
Queensland ... ..	85·12	Australia ... ..	92·07
South Australia ... ..	98·57	New Zealand ... ..	90·58
Northern Territory ...	22·60		

The following table shows the area in acres, the enumerated population, and the number of persons to the acre at the census of 1911; also the estimated population at the end of 1913, of the various municipalities in Greater Melbourne:—

### POPULATION, ETC., OF GREATER MELBOURNE, 1913.

Total, including Shipping ...	163,480	593,237	3·6	651,000

\* Northcote was declared a city on 30th March, 1914.

† Caulfield was proclaimed a city on 28th May, 1913.

‡ Camberwell declared a city 20th April, 1914.

**Density of metropolitan population.**

Fitzroy is the most thickly populated municipality, with about 37 persons to the acre; Collingwood has 30; Richmond, 28; Prahran and South Melbourne about 20; and Melbourne City 13 persons. There are large areas devoted to parks, gardens, and other reserves in many of the municipalities, so that the population is really living closer together than these figures indicate. Melbourne City contains 1,994 acres of such reserves; Kew, 634; South Melbourne, 494; Williamstown, 460; St. Kilda, 303; Caulfield, 266; Richmond, 206; and Brighton, 157 acres. There are smaller areas in other districts, but they do not appreciably affect the question of density of population. The total area of all the reserves is 5,604 acres, and if these be excluded, the number of persons to the acre in the places named will be as follows:—Richmond, 33; South Melbourne, 25; Melbourne City, 18; St. Kilda, 15; Williamstown, 7; and Kew, 4; in Brighton and Caulfield the proportions will remain about the same.

**Urban and rural population, 1913.**

In the following return Victoria is divided into three divisions, the first being the Metropolitan (Greater Melbourne) District, or the area extending in all directions for a distance of 10 miles from the centre of the city; the second, the other urban districts, including the total space embraced in cities, towns, and boroughs (present or former) outside the limits of Greater Melbourne; and the third, rural districts, including the remaining portions of the State. The population of each of those divisions at the end of 1913, the ratio of its population to that of the whole State, and the number of persons to the square mile were as follows:—

**URBAN AND RURAL POPULATION, 1913.**

Divisions.	Estimated Area in Square Miles.	Estimated Population, 31st Dec., 1913.		
		Total.	Proportion per cent.	Persons to the Sq. Mile.
Metropolitan ... ..	255	651,000	46·10	2,553
Other Urban ... ..	376	221,000	15·65	588
Total Urban ... ..	631	872,000	61·75	1,383
Rural ... ..	87,253	540,119	38·25	6·2
Total State ... ..	87,884	1,412,119	100·00	16·1

**Proportion of metropolitan population.**

The urban is greater than the rural population, and the population of the metropolis alone is equal to 46 per cent. of that of the whole State.

**PROPORTION OF POPULATION OF GREATER MELBOURNE TO THAT OF THE WHOLE OF VICTORIA.**

Year.	Per cent.	Year.	Per cent.
1909 ... ..	43·3	1912 ... ..	45·7
1910 ... ..	44·4	1913 ... ..	46·1
1911 ... ..	45·1		

**Greater Melbourne—  
increase of  
population.** The next return gives the populations of the municipal districts in Greater Melbourne in 1891, 1901, and 1911, the totals for these three years being 490,896, 496,079, and 593,237 respectively. There was a falling off in the cities of Melbourne, Fitzroy, Collingwood, Richmond, Footscray, and South Melbourne between 1891 and 1901, but a recovery between the latter year and 1911. North Melbourne and Flemington and Kensington were annexed by Melbourne during 1905, and the figures for that city in 1891 and 1901 have been adjusted to include those districts. In Prahran, St. Kilda, Brunswick, Essendon, and Hawthorn, there has been a continued increase. Of the towns, Port Melbourne and Williamstown fell away up to 1901, but slightly recovered between that year and 1911. There has been a continued increase in Northcote, Brighton, Malvern, Caulfield, Camberwell, and Kew. In the borough of Oakleigh the increase has been continuous. The same remark applies to Coburg, which was a shire in 1891 and 1901, but became a borough in 1905 and a town in 1912. In the shire of Preston there has been an increase in each period. In the parts of shires included in the Greater Melbourne area, the population was 14,217 in 1891; 15,445 in 1901; and 24,873 in 1911.

### RETURN SHOWING THE POPULATION OF GREATER MELBOURNE IN 1891, 1901, AND 1911.

\* Constituted a town, 9th September, 1912.

Outside Melbourne and suburbs, the most important towns in Victoria are Ballarat, comprising three municipalities; Bendigo, two; Geelong, three; Castlemaine, two; Warrnambool, Maryborough, Hamilton, Mildura, and Stawell, one each. The populations of these, with their immediate suburbs, according to the census of 1911 and as estimated in 1913, were as follows:—

POPULATION OF CHIEF TOWNS IN VICTORIA, 1911 AND 1913.

Name of Town.					1911 (Census).	1913 (Estimated).
Ballarat	...	...	...	...	42,403	42,093
Bendigo	...	...	...	...	39,417	38,706
Geelong	...	...	...	...	30,273	33,847
Warrnambool	...	...	...	...	7,010	7,400
Castlemaine	...	...	...	...	7,020	7,337
Maryborough	...	...	...	...	5,675	5,500
Hamilton	...	...	...	...	4,900	5,000
Mildura	...	...	...	...	4,608	4,850
Stawell	...	...	...	...	4,410	4,600

There are many other important towns in Victoria, and the following is a list of those which contained a population of 3,000 persons or over in 1913:—

Town.	Estimated Population in 1913.	Town.	Estimated Population in 1913.
Ararat	4,500	Camperdown	3,500
Colac	4,100	Beechworth	3,450
St. Arnaud	4,035	Bairnsdale	3,450
Daylesford	3,900	Sale	3,420
Echuca	3,750	Kyneton	3,200
Wangaratta	3,600	Shepparton	3,150
Horsham	3,500	Maldon	3,120
Wonthaggi	3,500		

Rates of  
increase of  
population.

The average annual rates at which the population has increased (1) in the whole State, (2) in Melbourne and Suburbs, and (3) in remainder of the State, are shown hereunder :—

**AVERAGE ANNUAL RATE OF INCREASE OF POPULATION IN THE WHOLE STATE, IN MELBOURNE AND SUBURBS, AND IN REMAINDER OF STATE, 1850 TO 1913.**

Period.	In Victoria.		In Melbourne and Suburbs.		In Remainder of State.

\* Not available.

† Average 1862-1870.

It will be observed that the rate of natural increase (excess of births over deaths) has at all periods except last year been less in Melbourne than in other portions of the State, while the rate of total increase has usually been greater. It would appear from this that the metropolis has been gaining population at the expense of the country districts. The higher rate of natural increase in extra-metropolitan areas is due principally to the low death rates there prevailing, and this favorable mortality can only be partially accounted for by the migration from country

to town of persons in indifferent health. The greater vitality in country districts shows the advantage to be derived from a large increase in the population of these portions of the State.

The following table shows the population of each Australian State and New Zealand at each census from 1851 to 1911:—

POPULATION OF THE SIX STATES OF AUSTRALIA AND NEW ZEALAND, 1851-1911.

State.	1851.	1861.	1871.	1881.	1891.	1901.	1911.

Some very interesting results are disclosed by this table. During the ten years 1901-11 Australia gained 56,657 persons by immigration—there being increases from this source in Western Australia, New

South Wales, and Queensland, and decreases through excess of emigration over immigration in the other States, Victoria losing no less than 42,340 persons. Over the whole period of 60 years the excess of births over deaths contributed  $65\frac{1}{2}$  per cent. to the total increase of population, excess of immigration over emigration being responsible for the remaining  $34\frac{1}{2}$  per cent. Tasmania is the only State which has suffered a loss of population by migration over the whole period since 1851, the departures since that date having exceeded the arrivals by 9,022 persons.

Effective  
strength of  
population in  
Australasia.

The subjoined tabulation shows, according to the census of 1911, the number of persons at the supporting and dependent ages, in each of the Australian States and in New Zealand, in every 10,000 of the population :—

### STRENGTH OF AUSTRALASIAN POPULATION, 1911.

State, Dominion, or Territory.	Numbers in every 10,000 Persons living.		
	At Supporting Ages (15 to 65 Years).	At Dependent Ages.	
		Under 15 Years.	65 Years and upwards.
Western Australia ... ..	6,639	3,124	237
Victoria ... ..	6,432	3,050	518
South Australia ... ..	6,414	3,119	467
New Zealand ... ..	6,395	3,131	474
New South Wales ... ..	6,383	3,212	405
Queensland ... ..	6,312	3,313	375
Tasmania ... ..	6,084	3,504	412
Northern Territory ... ..	8,197	1,470	333
Federal Capital Territory ...	6,272	3,227	501

Leaving out of account the Northern Territory, where the conditions are abnormal, and the Federal Capital Territory, Western Australia stands, as might be expected, far ahead of all the States in the relative strength of its population, and this is undoubtedly due to the development of gold mining there in recent years, and the consequent large immigration of adult males from all the adjoining States. Victoria, which in 1901 had fallen to the fifth place on the list, now occupies the position next to Western Australia. Tasmania has relatively the weakest population of any of the States.

Victoria has the largest proportion of old people in its population, viz., 518 per 10,000, and is followed by New Zealand with 474, South Australia with 467, Tasmania with 412, and New South Wales with 405. In Queensland and Western Australia the proportions are much lower.

Old persons in  
Australasia.

**Population of Australasian capital cities, 1861-1913.**

The enumerated populations of Australasian capital cities during the past 52 years are shown in the following table. Melbourne during that time has made good progress, more especially in the decennial period, 1881-91, when the increase was 73 per cent. Between 1891 and 1901 the population remained almost stationary, but in the intercensal period 1901 to 1911 there was an increase of 97,158. Sydney, which since 1902 has been the most populous city in Australasia, had 725,400 inhabitants in 1913. These two cities contain 28 per cent. of the population of the Commonwealth.

### POPULATION OF AUSTRALASIAN CAPITAL CITIES, 1861 TO 1913.

Capital City (with Suburbs).	Enumerated Population at the Census of—						Estimated Population, 31st Dec., 1913	Persons to the Acre, 1913.

\* Not available.

**Density of population in capital cities.**

It will be noticed that the population of Sydney is more concentrated than that of any other metropolitan city, and that the population of Melbourne is spread over nearly double the area. In Adelaide and Perth there is only about one person, and in Brisbane less than one person, to the acre.

**Populations of principal towns in Australia and New Zealand.**

The populations of the principal towns in Australia and New Zealand are given in the following statement. In the case of the capital cities, and of several of the larger towns mentioned, the suburbs are included :—

### POPULATION OF PRINCIPAL TOWNS IN AUSTRALIA AND NEW ZEALAND, 1913.

1891	1,140,405	598,414	541,991	9,377	8,772	605	565	325	240
1901	1,201,341	603,883	597,458	7,349	6,740	609	652	367	285
1911	1,315,551	655,591	659,960	5,601	4,956	645	643	340	303

Chinese first began to arrive in Victoria in 1853, and at the census of 1854, 2,000 were enumerated. In 1857, when the next census was taken, they had increased to 25,424; and at the end of 1859 it was estimated that they numbered no less than 42,000. Soon after this an exodus of Chinese took place, chiefly to New South Wales, it being estimated that besides those who departed

by sea, as many as 11,000 went over the frontier to work at the Lambing Flat diggings in that colony. In consequence of this the census of 1861 showed the number of Chinese remaining in Victoria to be only 24,732, or 692 less than in 1857. Since 1861 there has been a continuous decrease in the Chinese population. At the census of 1901 they reached a total of 7,349, and at the census of 1911 they numbered only 5,601 (including 894 half-castes). The Chinese Immigration Restriction Act passed in December, 1888 (afterwards *Chinese Restriction Act* 1890), was largely instrumental in later years in limiting the number of immigrants. This Act provided that no vessel should enter any portion of the State having on board more than one Chinese to every 500 tons of her burden, and that in the event of any vessel bringing more than this proportion, her owner, master, or charterer would be liable to a penalty of £500 for every one by which it should be exceeded; also that any Chinese who should enter Victoria by land should obtain a permit in writing from an officer duly appointed to grant it, and failing to do so should be liable to a penalty ranging from £5 to £20. Under the Immigration Restriction Act of the Commonwealth, the practice is not to permit the landing of Chinese unless they pass the prescribed dictation test, or hold permits dispensing with that condition.

At the first colonization of Victoria the Aborigines were officially estimated to number about 5,000, but according to other and apparently more reliable estimates they numbered at that time not less than 15,000. When the colony was separated from New South Wales, the number was officially stated to be 2,693. At the 1911 census there were enumerated 643 Aborigines, consisting of 196 of pure blood and 447 half-castes. These figures indicate that the race is gradually but surely dying out, for, although the half-castes increased by 66 between 1901 and 1911, the pure race showed a decrease of 75 in the ten years. From the report of the Aborigines Board, dated 12th November, 1912, it would appear that a fair proportion of the pure race and half-castes is under the care of that body, in the following mission stations:—

**NUMBER OF ABORIGINES UNDER CARE AT MISSION STATIONS IN VICTORIA, 1911-12.**

Station.	Area of Reserves.	Total Number under care.
	Acres.	
Coranderrk .. .. .	2,400	66
Lake Condah .. .. .	2,050	61
Lake Tyers .. .. .	4,000	89
Framlingham .. .. .	548	18
Colac and Lake Moodemere .. .. .	41	6
Depôts .. .. .	..	29
Total .. .. .	9,039	269

Of the Aborigines not enumerated in the table, some are residing elsewhere than at the mission stations, but receive supplies of food and clothing when they call; while others prefer to lead a wandering life, and but rarely come under the notice of the Board.

During the year 1911-12 seven deaths occurred—one at Lake Condah, and six at Depôts. There were seven births—two at Coranderrk, two at Lake Condah, one at Lake Tyers, and two at Depôts. One marriage took place at Lake Tyers.

The amount expended on the maintenance of Aborigines during the year was £4,020. The following statement contains particulars of the net cost of Aborigines in Victoria (including cost of administration) from 1851 to 1912 :—

Amount expended .. .. .	£374,704
Revenue from stations paid into the Consolidated Revenue ..	13,152
Net cost .. .. .	361,552

**Arrivals and  
departures of  
Chinese.**

During the year 1910 a greater number of Chinese entered than left Victoria, but in the remaining years of the past quinquennium the reverse was the case. The net decrease in the Chinese population in the period mentioned by excess of emigration over immigration was 161. The figures for each year are :—

#### CHINESE IMMIGRATION AND EMIGRATION, 1909 TO 1913.

Year.	Immigrants.	Emigrants.	Excess of— Arrivals (+). Departures (-).
1909 ... ..	523	556	- 33
1910 ... ..	424	418	+ 6
1911 ... ..	435	454	- 19
1912 ... ..	545	556	- 11
1913 ... ..	475	579	- 104
Total ... ..	2,402	2,563	- 161

**Immigration  
and emigration  
of coloured  
persons,  
1901 to 1913.**

With a view to restricting the immigration of Asiatics and other coloured persons, the Commonwealth Parliament passed the Immigration Restriction Act in 1901, which provides that any person, who, when asked to do so by a public officer, fails to write out from dictation and sign in the presence of the officer, a passage of fifty words in any prescribed language, is prohibited from landing in Australia. Certificates of exemption are granted in certain cases, and members of the military and naval forces, as well as the master and crew of any public vessel of any government, are excepted. The Act appears to have achieved its purpose, judging by the small number of coloured persons who have been admitted to the Commonwealth since it commenced to operate.

The following are the numbers of coloured persons, other than Chinese, who have entered or left Victoria since 1st April, 1901 :—

**IMMIGRATION AND EMIGRATION OF COLOURED PERSONS  
(OTHER THAN CHINESE) FROM 1st APRIL, 1901, TO 31st  
DECEMBER, 1913.**

Year.	Immigrants.	Emigrants.	Excess of— Arrivals (+) Departures (—).
From 1st April, 1901, to 31st Dec., 1901	609	483	+ 126
1902 .. .. .	307	525	— 218
1903 .. .. .	96	92	+ 4
1904 .. .. .	48	75	— 27
1905 .. .. .	58	136	— 78
1906 .. .. .	71	129	— 58
1907 .. .. .	41	79	— 38
1908 .. .. .	64	62	+ 2
1909 .. .. .	69	69	..
1910 .. .. .	137	156	— 19
1911 .. .. .	104	77	+ 27
1912 .. .. .	133	74	+ 59
1913 .. .. .	117	91	+ 26
Total .. ..	1,854	2,048	— 194

The number of coloured persons in Victoria was ascertained at the census of 1911. Chinese were found to number 5,601, and other coloured persons 1,583—a total of 7,184, as compared with 8,622 at the previous census in 1901.

**NUMBER OF PERSONS OF COLOURED RACES (EXCLUSIVE OF  
ABORIGINES) IN VICTORIA AT THE CENSUS OF 1911.**

**Coloured persons in Australia.**

Persons of non-European race (exclusive of Aborigines) in Australia were found to number 42,230 in 1911. If to this be added 19,939 full-blooded aborigines and 10,113 half-castes, the total of the enumerated coloured persons in the Commonwealth as at the date mentioned will be 72,282. The following table shows the numbers belonging to the different races, those of full blood being distinguished from half-castes, and males being separated from females :—

**NUMBER OF PERSONS OF COLOURED RACES (EXCLUSIVE OF ABORIGINES) IN THE COMMONWEALTH OF AUSTRALIA AT THE CENSUS OF 1911.**

Under the "Commonwealth Naturalization Act No. 11 of 1903," the right to issue certificates of naturalization was taken from the States, and vested in the Commonwealth. This Act came into force on 1st January, 1904. All persons who, prior to that date, had been granted letters or certificates of naturalization in the various States are to be deemed naturalized. To obtain a certificate a person, not being an aboriginal native of Asia, Africa, or any of the islands of the Pacific (excepting New Zealand), must have resided in Australia continuously for the two years immediately preceding the application, and must produce, in support of his application, a statutory declaration stating his name, age, birthplace, occupation,

and residence, the length of his residence in Australia, and that he intends to settle in the Commonwealth, in addition to a certificate of good character signed by a justice of the peace, postmaster, State school teacher, or police officer. If a person has been naturalized in the United Kingdom, he must produce the certificate, also a declaration that he is the person named in it, that he obtained it without any fraud or misstatement, and that he intends to settle in the Commonwealth. An alien woman who marries a British subject becomes naturalized thereby. Children of naturalized parents, who have at any time resided in Australia with their father or mother, have all the rights, powers, and privileges of naturalized persons, and this provision also applies to the children of an alien mother married to a natural-born British subject, or to a person who has obtained a certificate of naturalization. Under the State Act Chinese were allowed to take out letters of naturalization, but owing to the large increase in such applications, 1,178 of which were granted in 1885, it was decided in 1886 to issue no more "unless a sufficient reason was assigned," with the result that only 173 were issued in 1886, and 16 in 1887. None have been granted since the latter date. The following are the native countries of persons naturalized in Victoria from 1871 to 1913, from which it will be seen that about 32 per cent. of the total were Germans, and 23 per cent. Chinese :—

## NATURALIZATION, 1871 TO 1913.

Native Places.	Numbers Naturalized in each Year.					Total Naturalized, 1871 to 1913.

With regard to Australia as a whole, it may here be mentioned that, according to the statistics for the Commonwealth prepared in connexion with the Immigration Restriction Act, the number of persons of coloured races who arrived in Australia in 1913 was 4,222, and of those who departed 4,250, giving a departure balance of 28. Most of the coloured persons who left Australia were Chinese, Japanese, and Malays, and of those who arrived, the greater number were formerly domiciled in the Commonwealth.

Decrease of  
aliens in  
Australia.

Chinese and  
Aborigines in  
Australasia.

The following is a statement of the number of Chinese and Aborigines in each State and Territory of the Commonwealth and in the Dominion of New Zealand at the census of 1911 :—

### CHINESE AND ABORIGINES IN AUSTRALIA AND NEW ZEALAND, 1911.

States and Territories.	Chinese.		Aborigines.			
	Males.	Females.	Full Blood.		Half-caste.	
			Males.	Females.	Males.	Females.
States—						
Victoria .. ..	4,956	645	103	93	237	210
New South Wales ..	8,500	855	1,152	860	2,335	2,177
Queensland .. ..	6,138	576	5,145	3,542	1,361	1,147
South Australia ..	291	68	802	637	346	346
Western Australia ..	1,808	64	3,433	2,936	760	715

Territories—						
Northern Territory ..	1,228	111	743	480	117	127
Federal Capital Territory ..	3	..	5	5	4	4
Australia .. ..	23,374	2,398	11,385	8,554	5,283	4,830
New Zealand .. ..	2,542	88	24,184	21,479	2,291	1,890

Decrease of  
Chinese in  
Australia.

There are more Chinese in New South Wales and Queensland than in the other States, but they appear to be steadily diminishing in Australia as a whole. In each State except Western Australia the number enumerated in 1911 was smaller than in 1901—the total decrease in Australia in the decade amounting to 7,785 persons. In Western Australia they increased from 1,569 to 1,872 in the same period.

Aborigines in  
Australia.

The enumeration of Aborigines, owing to their nomadic habits, was incomplete. The numbers given represent only those who were in the employ of whites at the date of the census, or were living in a civilized or semi-civilized condition in the vicinity of settlements of whites at that time. No attempt was made to count those who were living in a purely wild state. The Maoris enumerated at the census of 1911 in New Zealand show an increase of 2,113 over those returned in 1906, and this increase the authorities in New Zealand state may be taken as a fair index of the position.
