## HOUSING FINANCE FOR OWNER OCCUPATION, AUSTRALIA FEBRUARY 1993

## MAIN FEATURES

## SECURED HOUSING FINANCE - TOTAL DWELLINGS - NUMBER

ALL LENDERS - AUSTRALIA

The provisional trend estimate of the number of dwelling units for owner occupation for which finance was committed to individuals in February 1993 was 35,768, a decrease of 114 dwelling units ( $0.3 \%$ ) over January 1993 but up 4,298 dwelling units ( $13.7 \%$ ) on February 1992. This continues the downward trend which began in September 1992. The downward trend appears to be levelling out however, and even a decrease in the seasonally adjusted series for March 1993, providing it was no more than 1.8 per cent, would see the downward trend arrested. The average monthly percentage change in the seasonally adjusted series, without regard to sign, is about 5 per cent.
It should be noted that trend data for the most recent months are subject to revision as additional observations become available.

While the provisional trend estimates for the number of dwelling units financed under the category 'Construction of Dwellings' increased in February 1993 by 0.5 per cent, the trend estimates for the two other categories fell, with the category 'Purchase of Newly Erected Dwellings', down 2.1 per cent and 'Purchase of Established Dwellings' down 0.4 per cent.

Seasonally adjusted, finance was committed to individuals to finance $\mathbf{3 6 , 1 8 4}$ dwelling units for owner occupation in February 1993, 691 dwelling units ( $1.9 \%$ ) less than in January 1993, but $\mathbf{4 , 2 6 3}$ dwelling units ( $\mathbf{1 3 . 4 \%}$ ) more than in February 1992.
The value of secured housing finance commitments for owner occupied dwellings, in seasonally adjusted terms (excluding alterations and additions), totalled $\$ 2,983.6$ million in February 1993, down $\$ 12.3$ million ( $0.4 \%$ ) on January 1993 but up $\$ 563.1$ million ( $23.3 \%$ ) on February 1992.
In original terms, there were $\mathbf{3 6 , 9 4 0}$ dwelling units financed during the month of February 1993, 6,971 dwelling units ( $23.3 \%$ ) more than in January 1993 and 4,424 dwelling units ( $\mathbf{1 3 . 6 \%}$ ) more than in February 1992.
Of the total number of dwellings being financed in February 1993, 4,450 dwelling units ( $12.0 \%$ ) were being refinanced. Dwellings refinanced accounted for 18.9 per cent of the total number of established dwellings being financed.

## ANALYTICAL NOTES

## PART 1: Comment on Major Aggregates

The provisional trend estimate for February 1993 for the total number of dwellings financed continues the downward movement since the peak in August 1992. This downward trend is not common across all purpose of loan categories however with the provisional trend estimate for 'purchase of newly erected dwellings' and 'purchase of established dwellings' maintaining their downward direc-
tion while the trend estimate of the category 'construction of dwellings' continues to rise. Trend estimates for the most recent months are subject to revision. For a detailed explanation of the reliability of trend estimates refer to Part 2 of these analytical notes (page 4) entitled 'Reliability of Contemporary Trend Estimates'.

The trend estimate of the number of dwelling units for which commitments of finance were made to individuals for the construction of dwellings in February 1993 was up 0.5 per cent on January 1993 continuing the upward trend which began in November 1991. Seasonally adjusted, fi-
nance was committed to individuals for the construction of 7,408 dwelling units in February 1993, 480 dwelling units (6.1\%) less than in January 1993 but 1,227 dwelling units (19.9\%) more than in February 1992.

The trend estimate for commitments to individuals for the purchase of newly erected dwellings was 1,506 dwelling units in February 1993, down 2.1 per cent on January 1993. To reverse this downward trend next month, the seasonally adjusted estimate for March 1993 would have to increase by at least 11 per cent. Seasonally adjusted, the
number of newly erected dwelling units for which finance was committed for the purchase by individuals in February 1993 was $1,463,192$ dwelling units ( $11.6 \%$ ) less than in January 1993 and 212 dwelling units (12.7\%) less than in February 1992.

The trend estimate for commitments to individuals for the purchase of established dwellings totalled 26,737 dwelling units in February 1993, down 0.4 per cent on January 1993, continuing the downward trend since the peak in August 1992. This downward trend appears to be levelling out however, and even a decrease in the seasonally ad-
justed series for March 1993, providing it was no more than 2.3 per cent, would see the downward trend arrested. Seasonally adjusted, the number of established dwellings for which finance was committed for purchase in February 1993 was 27,313, 0.1 per cent less than in January 1993 but 13.5 per cent more than in February 1992.

## PART 2: Reliability of Contemporary Trend Estimates

The trend estimates in this publication have been derived by applying a 13 term Henderson-weighted moving average to all except the last six months of the seasonally adjusted series. The last six monthly trend estimates have been obtained by applying surrogates of the Hendersonweighted averages to the seasonally adjusted series. (Further details concerning trend estimates in general, including more information on the Henderson methodology and the 'end point' problem, can be obtained in the information paper A Guide to Smoothing Time Series Estimates of Trend (1316.0).)

While this procedure enables trend data for the latest period to be produced, it also results in revisions in later bulletins to the trend estimates for the most recent months as additional observations become available. Generally, the size of revisions to the trend estimates tends to be larger the greater the volatility of the original series. Revisions of trend estimates will also occur with revisions to original data and re-estimation of seasonal adjustment factors.

Analysis of housing finance series has shown that the original series can be volatile and that the initial estimates of a month's trend value can be revised substantially. In particular, some months can elapse before a turning point in the trend series is identified reliably.

A number of ways of indicating the reliability of trend estimates have been under consideration. The following paragraphs outline an approach that illustrates the potential for revision of contemporary trend estimates.

The table below presents trend estimates of the number of dwelling units for which finance was committed for the six months September 1992 to February 1993. To illustrate the possible impact of future months observations on the trend estimates for the latest months, the table shows the revisions to the trend estimates that will result if the seasonally adjusted estimate for next month (March 1993) is five per cent higher or lower than that for this month. Five per cent was chosen because analysis of monthly movements over the last ten years in the seasonally adjusted series for both number of dwellings and value of commitments, showed that the average monthly percentage change, without regard to sign, has been about five per cent.

If the seasonally adjusted estimate for the number of dwelling units financed were to increase in March 1993 by 5 per cent, to 37,993 , the trend movement for that month will be +1.0 per cent. The movements in the trend estimates for December 1992, January and February 1993 which are currently estimated to be -0.6 per cent, -0.3 percent and -0.3 per cent respectively, would be revised to -0.2 per cent, +0.3 per cent and +0.6 per cent. On the other hand, a 5 per cent seasonally adjusted decline in the number of dwellings financed in March 1993 to 34,375, will produce a trend movement of -0.5 per cent for March and the movements in the trend estimates for December 1992, January and February 1993 will be revised to -0.9 per cent, -0.7 per cent and -0.7 per cent respectively.

(a) Prior to July 1991, Refinancing was included in Purchase of established dwellings.

## EXPLANATORY NOTES

## Introduction

This publication presents statistics of secured housing finance commitments made by significant lenders to individuals for the construction or purchase of dwellings for owner occupation. For detailed information on the scope and coverage of these statistics and definitions of data items, refer to the July 1992 issue of this publication.
2. While the statistics are described as being for calendar months, it should be noted that:
(i) in the case of some of the larger banks, the data relate to a month ending on the last Wednesday; and
(ii) in the case of other lenders, some have accounting periods which do not correspond exactly to a calendar month and their figures are used without adjustment.

## Seasonally adjusted and trend estimates

3. In the seasonal adjustment of these series, account has been taken not only of normal seasonal factors, but also of 'trading day' effects (arising from the varying reporting practices of the lenders) and the influence of Easter which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these series are available on request.
4. Seasonal adjustment procedures do not aim to remove the irregular or 'non-seasonal' influences which may be present in any particular month. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after seasonal adjustment.
5. Smoothing seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. For explanation of how the trend estimates presented in this publication are derived please refer to the Analytical Notes at the beginning of the publication.

## Unpublished data

6. More detailed dissections of the data in this publication may be made available on request. Generally
a charge is made for providing this information. Inquiries should be made to the officer named in the Phone Inquiries section of the inquiries box at the front of this publication or by writing to Financial Surveys Section, ABS, P.O. Box 10, Belconnen, A.C.T. 2616.

## Revisions

7. Revisions to previously published statistics are included in issues of this publication as they occur.

## Commitments not advanced at end of period

8. In principle, 'commitments not advanced at end of period' presented in Table 4 are derivable by adding total new housing commitments plus alterations and additions less cancellations of commitments less commitments advanced during the period to the balance of commitments at the end of the previous period. In practice, however, revisions and other adjustments may mean that such a derivation is inexact.

## Related publications

9. Users may also wish to refer to the following publications which are available on request:
Personal Finance, Australia (5642.0)-issued monthly
Commercial Finance, Australia (5643.0)-issued monthly
Lease Finance, Australia (5644.0)-issued monthly
10. Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

11. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available at all ABS Offices (see below for contact details).

## Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

## Electronic Data Services

A wide range of $A B S$ data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on Discovery (Key *656\#). The ABS PC Telestats service delivers major economic indicator publications ready to download into personal computers on the day of release. The PC AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

## Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008020608 Australia wide).
