## NOTES ON SOME OF THE MORE IMPORTANT FIGURES PRESENTED IN THIS VOLUME.

The practice of printing an abstract of notes on the figures published in each part of the Statistical Register has been found to supply a want, and is therefore continued in the present issue. It will be seen that once more the features of the prevailing conditions and influences during the period covered by these statistics are faithfully reflected in the changes of the figures. Distinct progress is the characteristic of the greater part of them, as might be expected since the advent of peace, and may no doubt still more confidently be hoped for in the future.

### PART I.—POPULATION AND VITAL STATISTICS, 1920.

The Commonwealth having now entered upon more normal conditions, the State once more having adopted a progressive immigration policy, and our soldiers having returned to our shores, it might have been expected that a more marked advance in population would already be experienced than was the case for some time, yet the population for the year ended 31st December, 1920, cannot be said to show an altogether satisfactory state of affairs in this respect, for whilst gaining 4,761 by the excess of births over deaths, it lost, by excess of emigration over immigration, 863 persons, viz., an increase of 70 males against a decrease of 933 females. The total immigration was 18,248 males and 11,682 females, whilst the departures numbered 18,178 males and 12,615 females; 15,317 persons arrived and 13,424 departed by sea, or a gain of 1,893 souls; the migration movement by the Trans-Australian Railway, on the other hand, resulted in a loss of population of 2,264, the figures being arrivals 14,613 and departures 16,877.

A far more satisfactory experience is presented by births, the registrations for the year being 8,149, viz., 4,256 male and 3,893 female births, whilst 248 still-births were registered, which are, however, not included in the above total. The illegitimate births numbered 318; births in public institutions 901; twins 102; and the number of children legitimated was 42. The birth-rate per 1,000 of the mean population for 1920 was 24·4, as against 21·4 for 1919.

The death-rate also shows an improvement on that of the previous year, the 1920 totals being 2,161 male and 1,227 female deaths, whilst those for 1919 were 2,340 male and 1,250 female deaths; a combined decrease therefore of 202, the rate for 1920 being 10·1 as against 11·1 for 1919. The figures relating to deaths of infants under one year are not so satisfactory, the infantile mortality-rate being the highest since 1916, viz., 66·1 for 1920 as against 61·3 for 1919, and 66·2 for 1916. This increase in the infantile deaths is mainly attributable to deaths from diarrhoea, enteritis, and gastro-enteritis (under 2 years of age), which claimed 112 deaths more than for 1919, the total being 234 as against 122. The principal causes of death are as follows:—Pulmonary phthisis, 259; cancer, 269; diarrhoea and enteritis (all ages), 279; pneumonia and broncho-pneumonia, 159; the various diseases of the heart, 332; senility, 315; diseases of early infancy, 221.

The number of marriages registered for 1920, 2,931, was very high, being the record for this State, and an increase on the previous year of 737; the figures were: 1920, 2,931, and 1919, 2,194; the rates were: 8·8 and 6·8 respectively. The marriages celebrated by Ministers and District Registrars respectively were 2,551 and 380.

Naturalisations numbered 63, as against only 27 in 1919, the higher figure including 17 Italians and 10 Spaniards.

### PART II.—PUBLIC FINANCE, 1920-21.

This Part gives in condensed form the leading figures of consolidated revenue and expenditure therefrom for the year 1911-12 and the past five years. The main features of Loan Expenditure are tabulated for the separate five financial years ended 30th June last, as are also the joint totals for all preceding years. A table giving details of the Property Sales Fund is given on a similar basis, showing the total receipts from this source to 30th June, 1921, to have been considerably over a million pounds. The particulars of Public Debt and Sinking Fund are classified under their principal headings, for a similar series of years, and reveal the fact that the average nominal interest payable on the entire Public Debt was, on 30th June, 4·06 per cent., whilst the average interest borne by the Sinking Fund securities was 3·69 per cent. This part of the Register concludes with two Income tax returns, showing the numbers of taxpayers, their total incomes, and the amount paid, classified respectively according to incomes and occupations.

## PART III.—ACCUMULATION, 1920–21.

*Cheque-paying Banks.*

The number of such Banks doing business in this State, during 1920, was 8, the same as in the previous year. The Western Australian Bank increased its activities during the year by opening 10 new branches. The rates of Exchange on Drafts and Bills at Sight on the States of the Commonwealth and New Zealand did not vary from the 1919 quotations. The same remark also applies to London for the first three quarters of the year, but for the fourth quarter the Premium on Drafts was  $1\frac{7}{8}$  per cent. as against  $\frac{1}{2}$  per cent. in 1919, and Exchange on Bills  $\frac{1}{2}$  per cent. Discount to  $\frac{7}{8}$  per cent. Premium, as against 1 per cent. Discount in 1919. At 60 days sight on London Premiums on Draft show for the fourth quarter  $\frac{3}{4}$  per cent. Premium as against  $\frac{3}{8}$  per cent. Discount in 1919, and the Exchange on Bills differs for each quarter of the year from the quotations for 1919. Rates of Discount on Bills are practically similar to those in the previous year, but Interest on Fixed Deposits shows slight increases on the rates quoted in 1919.

The total of the average Liabilities of all Banks on 31st December, 1920, was £12,834,455, and that of the Assets £16,164,572, which figures are in excess of the previous year by £1,610,914 and £742,263 respectively.

The total of the Deposits in Banks on above date, £12,370,820, is £1,567,968 more than on the same date in 1919.

*Savings Banks.*

The transactions of the State Government Savings Bank show that there were on the 30th June, 1921, 137,922 accounts remaining open, and £5,845,243 due to depositors; £6,142,795 were deposited during the year, and £6,223,845 withdrawn. The excess of withdrawals over deposits, amounting to £81,050, was largely due to the Diggers' Loan floated by the Commonwealth in 1921. However, the interest allotted for the year, £187,268, makes the Deposits at the end of the year £106,219 more than for 1920. The Schools Penny Savings Bank, with 35,363 accounts, and £53,089 due to Depositors at the end of 1920–21, shows an excess in the latter amount of £7,579 over the previous year. The amount deposited during the year was £27,310, and the withdrawals £12,106. The interest allotted to Depositors was £1,228.

The Assets of the State Savings Bank for 1920–21 were £5,958,788, of which £4,391,515 was invested in Government Securities; £696,920 in Water Supply and Drainage Debentures; £65,887 in Local Government Debentures, and £43,482 in Mortgages on Freeholds. The Gross Revenue was £255,835, of which £188,496 was allotted to Depositors for interest.

The Commonwealth Savings Bank had, on 30th June, 1921, 53,183 accounts open, and £1,818,192 due to Depositors. The latter amount is in excess of the previous year by £344,891. The amount deposited during the year was £2,482,540, or £373,487 more than the withdrawals, which were £2,109,055. The interest allotted to depositors was £50,404.

*Life Assurance.*

The number of Life Assurance Companies operating in this State during 1920 was 12, one more than in 1919, the Western Australian Insurance Company having commenced business during the year. Four of the above companies also do Industrial business.

The total amount of Assets of all Companies at the end of the financial year, 1920, was £365,550,473, of which £4,083,366 was in this State. The actual Revenue and Expenditure of the ordinary business were £64,038,288 and £51,255,204 respectively, and for the Industrial business £2,103,453 and £1,156,280 respectively.

The ordinary new business transacted during 1920 was:—For Assurances 5,468 policies for £1,595,550 assured, for Endowments 668 policies for £93,717, and for Annuities three policies for £141 per annum. The ordinary business existing in Western Australia at the close of the financial year was:—

Assurances, Policies	35,654, sum assured	...	...	£10,449,128
Endowment, "	3,255, "	...	...	£370,699
Annuity	" 28, total per annum	...	...	£1,367

These figures show increases on the previous year of 2,481 policies or £852,360 in Assurances; 234 policies or £41,991 in Endowments, and £12 per annum in Annuities, although the Annuity Policies decreased by 3.

The new Industrial Business transacted by the four Companies during 1920, was:—For Assurances, 11,720 policies for £496,284 assured; and for Endowments, 289 policies for £14,747. The Industrial Business existing in Western Australia at the close of the Financial Year was:—

Assurance Policies,	61,786, sum assured,	£1,962,666;
Endowment Policies,	2,834, sum assured,	£82,030;

which figures show an advance of 1,259 policies or £93,611 in assurances, and a decrease of 185 policies or £2,299 in endowments on the previous year.

## General Insurance.

The Western Australian business of all Companies for the year 1920 shows that £545,210 was received in Revenue, principally from premiums, and that £399,214 was expended, which amount was fairly equally distributed between losses and expenses of management. The premiums received for the year show the very considerable increase of £138,238 over those for 1919, whilst the percentage of Expenditure to Revenue was much less than in previous years. The margin of Revenue over Expenditure for 1920 was £145,996 as against £78,555 in 1919 and £76,216 in 1918.

*Friendly, Co-operative and Building Societies, and Industrial Unions.*

The number of Friendly Societies in the State in 1920 was 15, with 279 branches and 18,675 benefit members. The Revenue was £104,978, and the Expenditure £91,789, and the Funds amounted to £294,120. Also there were 23 specially authorised Societies, whose Revenue was £14,079, Expenditure £14 009, and amount of Funds £15,188. There were 13 Building Societies with a membership of 4,612 persons and 15,653 shares paid up to £170,066. Loans to the extent of £83,304 were granted during the year, and Repayments of £69,693 were made. The Assets amounted to £209,989, of which £202,636 was invested in Mortgages. There were also 22 Co-operative Societies in existence, with 6,545 members and Share Capital paid up to £31,537. The total sales during the year amounted to £310,424, and the Assets to £78,709, of which £48,246 was invested in Mortgages, etc.

The number of Industrial and Trade Unions and Associations in 1920 was 185, with 40,444 members. The income for the year was £75,219 and the Expenditure £71,772.

## PART IV.—INTERCHANGE, 1920-21—TRADE AND TRANSPORT STATISTICS.

This Part deals principally with the records of Trade, Transport, Customs, and Excise Statistics for the year ended 30th June, 1920. Being the first complete year after the signing of the Armistice, it was too soon to expect a return to the ante-war conditions of commerce. The freights, the rate of exchange, the super-normal value of gold, the unrest in the commercial and industrial world, and the consequent fluctuations in the value of commodities are the legacies of the war, and it is only the lapse of time that will adjust affairs to a state of normality.

It is as present difficult therefore to decide if a fair comparison can be drawn between the data of even two consecutive years. A comparison of the Import returns for the years ended 30th June, 1919, and 1920, reveals the fact that the increase during the latter year was 54 per cent., and as the difference in population, though favourable to 1919-20, is really negligible, the abnormal increase in value is probably partially accounted for as being largely the result of the aforementioned conditions of trade, and the strength of the local market to meet the enhanced value of commodities, and further, probably, of heavier stocking. Turning to the Export returns, it is most satisfactory to note an almost proportionate increase (47 per cent), which, however, is not necessarily the result of increased values, as a more normal supply of shipping has provided for the transport of larger consignments of the State's products. The figures dealing with these two interesting years are as follows:—

The principal increases in value were :—Wool, £1,987,965 ; Timber, £132,754 ; Hides and Skins, £351,078 ; Pearls and Shell, £255,700 ; Sandalwood, £123,507 ; Wheat, £2,141,712 ; Flour, £1,232,138 ; Fruit, £93,066.

*Customs and Excise.*—Collections on 30th June, 1920, show a satisfactory increase over the previous year, on the former item £254,687 and on Excise £125,072.

#### Shipping.

It is here interesting to note the gradual disappearance from the coast of the man-of-war and troop transport, and it may be accepted with slight reservation that the tonnage of 1919–20 represents the mercantile marine, the strength of which is now approaching that of pre-war days. Several other tables explicitly set out the transactions of the Fremantle Harbour Trust, Bunbury Harbour Board, Government Shipping Offices, Wrecks, Casualties, etc.

The balance of this Part is devoted to tables dealing with the Railways and Tramways, both Government and Private, and the records of the Post and Telegraph Department within the State.

PART V.—LAND SETTLEMENT, AGRICULTURE, LIVE STOCK, AND METEOROLOGICAL STATISTICS, 1920-21.

*Land Settlement.*—On the 31st December, 1920, the area of land absolutely alienated was 8,952,580 acres ; in process of alienation, 14,722,197 acres, and Leases and Licenses in force, 262,235,407 acres; leaving a balance of unoccupied land in the State of 338,678,613 acres. These figures show increases on the previous year for the first three items of 270,473, 1,131,915, and 8,580,460 acres respectively.

During the year ended 31st December, 1920, 270,375 acres were absolutely, and 1,774,023 acres conditionally alienated.

The transactions under the Land Purchase Act show that 318,934 acres were occupied under selection on 31st December, 1920, leaving a balance then still available for the same purpose of 9,923 acres.

Statistical returns were collected from 15,412 holdings held as "alienated lands and lands in process of alienation," the total area of which was 16,903,757 acres, and from 995 holders of "Crown lands under lease or license," with an area of 169,350,463 acres. These acreages were in advance of the previous year by 697,415 and 4,168,892 acres respectively.

The total area under crop, 1,804,986 acres, was 176,823 acres in excess of the previous year's figures, whilst land prepared for next season's cropping, 211,685 acres, and land in fallow, 762,249 acres, were higher than the previous season's figures by 55,550 acres and 85,978 acres respectively. The total acreage of land cropped or prepared for cropping, cleared, ringbarked, etc., 7,583,272 acres, was above that of the previous year by 257,753 acres.

The value of buildings and implements and machinery, both on privately owned land and Crown lands, and also the numbers of wells and dams, show in most cases satisfactory increases as compared with 1919-20.

*Agriculture.*—During the season 1920-21 the production of the principal crop, wheat, 12,248,080 bushels, exceeded the previous season's crop by 1,025,130 bushels, whilst maize 240 bushels, rye 4,369 bushels, and potatoes 13,368 tons, also showed some progress. Barley (malting and other) 111,405 bushels, was a slightly decreased crop, and peas and beans 2,480 bushels, onions 472 tons, and hay 264,244 tons, showed a considerable falling off. The latter product, which is 114,781 tons less than for the previous season, largely owes that fact to the over production of its crop during 1919-20.

The wine production during 1921, 152,979 gallons, shows a falling off on the previous year of 9,418 gallons ; but great advances are still being made in the production of dried fruits, the increases in the quantities of raisins, sultanas, and currants made during the season, being very considerable, as shown by the following figures :—

				Raisins.	Sultanas.	Currants.
				cwts.	cwts.	cwts.
1921	...	...	...	6,441	867	5,856
1920	...	...	...	3,522	401	5,090

The total acreage under fruit trees, 19,421 acres, was 268 acres less than the year before, but the acreage of productive trees increased by 413 acres. The total acreage under vines, 3,209 acres, was 234 acres more than previously, the increase being accounted for by the larger areas under wine and drying grapes. The acreage of the latter kind more than doubled itself during the year, whilst that of table grapes had slightly fallen off.

The production of pears, apricots, peaches, nectarines, plums, quinces, and figs shows in every instance an increase on the preceding season ; but oranges, mandarins, lemons, apples, and bananas and plantains, show a falling off, the decrease in apples being particularly heavy, the production 400,885 bushels, being less by 228,872 bushels.

The production of table grapes, 41,756cwts., is also behind that of the previous year, the difference being 1,468cwts. ; but wine grapes, 45,562cwts., and drying grapes, 49,814 cwts., showed substantial rises, viz., 14,461 and 21,555 cwts., respectively. The acreage of small fruits, 148 acres, produced to the value of £7,149.

Two new tables are this year included in this publication, giving the value, and average value per acre of production, one for each kind of crop for several years past, and the other for each kind of crop in each statistical district for the season under review.

In the dairying industry, the quantity of butter made, 2,212,311lbs., still shows a progressive tendency, the advance on the previous year being 232,038lb. ; but bacon, 1,604,467lbs., and ham, 135,554lbs., show considerable decreases, viz., 253,818lbs. and 56,008lbs. respectively. The milk produced, 10,233,558 gallons, is in excess of the preceding year by 625,881 gallons.

The value of production of poultry and eggs, £189,658, fell short of that in 1919 by £1,630, whilst the quantity of honey produced, 149,226lbs., shows the considerable falling off of 186,980lbs. on the previous year.

The total number of persons employed on farms and stations during 1920 was 23,324 males and 7,914 females, of whom the majority were employed in farming. The nationalities of those employed were : White Races, 20,722 males, 6,404 females ; Asiatics 565 males, 10 females ; and Aborigines 2,037 males, and 1,500 females.

The value of articles imported, such as might be produced here from the soil, is still on the increase, £2,842,978 worth being so recorded during 1920-21, as against £2,732,270 in 1919-20.

This issue contains also two further new tables showing the transactions of the Industries Assistance Board from its inception.

*Live Stock, 1920.*—Horses, 178,664, were 3,745 more than the previous year; cattle, 849,803, showed a decrease of 30,841; sheep, 6,532,965, a decrease of 164,986; pigs, 60,581, an increase of 2,426; camels, 5,995, a decrease of 132; mules, 1,091, a decrease of 18; donkeys, 6,472, an increase of 693, and goats, 31,097, a decrease of 900.

The increase in horses is largely in the South-Western portion of the State; cattle show a similar feature in this part, in spite of the general decrease, which is traceable to the North and North-West, that portion also principally accounting for the decrease in sheep. Breeding stock vary very slightly from those of the previous year. Lambing and calving show fair increases, but in foaling there was a slight decrease. As regards live stock slaughtered for consumption, in the cases of cattle and sheep the figures were higher than the previous year, the increase being 13,010 head of cattle and 39,914 head of sheep; but there was a decrease in pigs, amounting to 17,089 head.

The wool clip, 39,525,440lbs., was slightly higher than the previous season, the difference being 311,104lbs. In addition, 4,189,190lbs. of wool on skins were exported during 1920, which is a decrease on the quantity exported similarly during the previous year, amounting to 2,895,855lbs.

*Meteorological Statistics.*—The opening months of 1920 were characterised by very dry conditions over the greater part of the State. In the tropics the deficiency in the usual monsoonal rains was very marked. Until the middle of April, most of the rainfall was confined to the Kimberley, and only in a few instances, where the totals were swelled by chance thunderstorms, were excesses over the monthly averages met with. In Southern areas the first two months were productive only of isolated thunderstorms and one down-pour of Southern origin, which was restricted to lower Great Southern localities.

In March monsoonal activities were pronounced, but in the tropics, where rain was badly needed, the results were again disappointing. One disturbance passed through the interior on the 3rd, benefiting the Coolgardie Goldfield, while two others, on the 12th and at the end of the month respectively, brought general downpours. As a result, the whole State, from Onslow southward, received far more rain than usual for March. Another inland rain occurred on the 8th April, but was heavy only on the North Coolgardie Fields, the rest of the sub-tropical areas experiencing a decidedly dry month. On the 15th a big rainstorm developed in the tropics, phenomenal totals for the month of April being recorded during the next five days. The inland Kimberley districts, however, did not participate.

The agricultural districts experienced their first winter rains early in May, but they were not repeated until the closing days of the month. Another fine interval marked the opening week of June, but on the 10th general rains recommenced and lasted for four weeks with little intermission. After July 7th a decided falling off in the activity of the systems was noted, the showers being mostly coastal for the rest of the month; but they revived in August, which was very wet until the 22nd. A good fall marked the close of the month, but nearly a fortnight elapsed before the next important agricultural rain, which proved to be the last of a general character for the season, although one or two subsequent disturbances benefited the Great Southern districts.

The winter rains, therefore, commenced on the 8th May, and finished on the 12th September. They were decidedly heavier than usual in May, June and August, but somewhat deficient in July, while September, 1920, ranks amongst the driest on record. On the 30th June, and on several dates in August, they were associated with snow, which fell over a large area in the lower Great Southern country, and at one or two Southern Goldfields localities. Most of the rainstorms were defective in penetrating quality. Few of them reached the Goldfields, where the best gaugings for the winter period occurred in connection with a belated summertype system on the 5th and 6th June, which also brought a very welcome fall to the Ashburton country.

Very little rain fell in the tropics from mid-May until the end of November, although light showers occurred in September, which is usually very dry. Thunderstorms were fairly general in the last week of November, and excesses were reported from all Kimberley and inland North-West stations. Patchy inland rains visited Southern areas from the 22nd to 26th of that month, resulting in the averages being exceeded at a larger number of stations, including the central parts of the wheat belt. This rainfall was the only one of any great extent to occur south of the Tropic after the middle of September. Thunderstorms were frequent both in the Kimberley and DeGrey in early December, the greatest excesses being noted on the West Kimberley Coast.

Taking the year as a whole, with the exception of the districts between Derby and Broome and around Marble Bar, defects varying from one to over 10 inches were noted in the tropics. Over the greater part of the South-West Coastal and agricultural districts a surplus was shown, but the goldfields and Gascoyne country showed, with few exceptions, somewhat large deficiencies.

## PART VI.—INDUSTRIAL ESTABLISHMENTS, 1920 (EXCLUSIVE OF MINES).

A good test of activity in industrial enterprises is the number of persons employed therein, and measured by this standard the advance locally commenced in the year previous to 1920 has been well maintained. There were 17,977 persons employed in the factories of this State, the increase in males being both absolutely and relatively larger than that in the females, which may perhaps be considered another gratifying feature. The number of establishments was still under 1,000, but it is known that several large factories will be in the immediate future adding considerably to the total of persons employed, as will be shown in the 1921 Statistics.

In the total number of workshops, nine out of ten were situated in the South-Western portion of the State, and it seems as if this centralisation of industries is likely to continue. Several that have been carried on outside Perth in the past years have now been moved to the Metropolitan Area. The cheap service of electric power available from the Government Supply Works may be a factor in producing this result.

The total horse-power of electric engines in use in the industrial establishments of this State was 9,492, as against 7,866 in 1919. Oil also is again being used freely for motive power, the horse power of engines with this fuel amounting to 1,872 in 1920.

In Table No. 5 a comparison of salaries paid, fuel consumed, etc., shows the margin for employers' profit and expenses to be still dwindling. Of course in the case of establishments which are growing larger, a smaller percentage of profit does not necessarily mean worse results, as the reduced percentage is made up for by the larger turnover. The total "added value" (gross output *minus* material and fuel) was £4,854,075 as against £3,822,569 in the year 1919.

Amongst other items manufactured during the twelve months were:—1,259,456 lbs. of leather, 31,988,086 bricks (not sand), 137,933,595 super feet of timber (sawn or hewn), 2,718,963 lbs. of confectionery, 120,125 tons of flour (with their by-products of bran and pollard), 5,735,671 gallons of beer and stout, 205,469 pairs of boots, shoes, and slippers, and 33,335,435 electric units produced.

The Pearl Shell fisheries show an increase of total labour to 2,504, there being still an overwhelming preponderance of Asiatic labour, although there was a slight increase in both the numbers of whites and aboriginals in the crews employed.

In the "Manufacturing" Establishments very few coloured people were employed, viz., 73 out of 18,606 tabulated. There were on the other hand, 187 Italians and 68 Greeks, the majority of whom were in sawmilling establishments. A perusal of tables 26 and 27 will show that during the twelve months preceding 30th June, 1921, the employees in most of the industries in the State received rises in wages, many of them substantial ones. In some cases advances had been granted during the first half of 1920 or earlier, and thus no further increases in 1920-21 were asked for or obtained.

No firewood yards are now included with the industrial establishments.

## PART VII.—MINERAL STATISTICS AND WATER CONSERVATION, 1920-21.

*Mineral Statistics.*—In reviewing the statistics relative to the *production* of gold and other minerals, it should be noted that in certain tables the production *as reported to the Mines Department* is given, whereas in others under the term "production" the amount *exported* is shown whenever the exports constitute practically the whole production. In the case of gold, the export is added to the amount of bullion received at the Royal Mint during the year. The latter method of arriving at the gold production has been adopted for statistical purposes.

The production of gold (617,842 fine ounces) again showed a decline in 1920, but not as great a one as in the previous year. On the other hand the production of copper (ore, ingot, and matte) rose from 459 to 1,648 tons; of Coal (as reported to the Mines Department) from 401,713 to 462,021 tons; of lead and silver-lead ore, etc., from 248 tons to 3,427 tons; of pyritic ore from 4,136 tons to 6,020 tons; and the *value* of asbestos reported from £1,443 to £7,286. The total production to the end of 1920 of gold in this State was 33,748,391 fine ozs.

The number of gold mining leases in force during 1920 rose to 1,347, from 819 in the previous year, and prospecting areas, from 51,511 acres in 1919, to 64,420 acres. Mineral leases advanced from 40,783 acres to 41,438 acres.

During the financial year 1920-21 £2,512,743 of coin was produced at the Royal Mint, making the total value of production of that institution since inception £89,139,680.

Dividends amounting to £384,083 were paid by gold-mining companies during 1920 (an increase of £45,839 over the year preceding.)

In the State Batteries, the tonnage treated in milling plants was 46,604, and in tailings and slimes 26,962.

It will be seen from the figures already given that the gold-mining industry was, in 1920, still far from the decay predicted by some, and it is worthy of note that in a few districts (notably Pilbara, Broad Arrow, and Coolgardie) there were even slight increases. In addition, the enhanced value of gold during late years has to a certain extent counterbalanced what falling off there has been in production.

*Water Conservation.*—The Goldfields Water Supply Works cost, up to 30th June, 1921, the sum of £3,427,300. Under the scheme 1,130 millions of gallons were consumed in 1920-21, and a revenue obtained of £187,010. The length of water mains remained practically stationary

during the year. Under the *Metropolitan Water Supply, etc., Scheme*, the number of gallons consumed rose from 2,256 to 2,327 millions during the period under review, and the number of houses supplied from 34,677 to 35,666.

The revenue from the last-mentioned scheme was £113,439 for water supply and £61,961 for sewerage and drainage.

An extra source of supply was tapped during the twelve months, a bore at Osborne Park having supplied 45 millions of the total number of gallons used.

There has been little or no change in the facilities for mines and towns outside the metropolitan area. Twelve bores were sunk on the Goldfields, and in three cases fresh water was tapped. Under the Agricultural Water Supply Scheme, however, 54 bores were sunk and four tanks were made, fresh water being obtained in the case of the former in 14 instances. The deep bores which have been sunk at Carnarvon now number 24, with a known daily flow of 14 million gallons when uncontrolled.

#### PART VIII.—LAW, CRIME, ETC., 1920-21.

This Part of the Annual Statistical Register contains figures of the Transactions of the Land Titles and Deeds Office up to the 30th June last; of Supreme Court business to 31st December, 1920; to the latter date, also, figures relative to cases that came before Magistrates' and Higher Courts, besides the general business of Local Courts, Wardens' Courts, Licensing Courts, and Coroners' Courts; and finally an abstract of the latest Gaol and Prisoners Returns.

The activity in the transactions of the Land Titles Office, as exhibited by the previous year's figures, has, in the main, been fully maintained during the past financial year. The principal changes noticeable were in values rather than in the number of transactions. Thus, whilst the number of applications to bring Freehold land under the operations of the Transfer of Land Act varied comparatively slightly from those of the previous year (48 in 1919-20 and 40 in 1920-21) the declared value increased from £35,959 to £81,331. Transfers registered, however, declined from 13,198 to 11,965, which, whilst less than the year before, was still a considerable increase on the figures for the three years 1916-17 to 1918-19, viz., 6,784, 6,315, and 7,303, respectively. The consideration expressed declined from £8,264,152 in 1919-20 to £5,918,924 in 1920-21. Mortgages increased from 7,699 to 8,424, but the principal moneys accrued thereby fell from £7,159,524 to £5,063,900. Though Transfers and Mortgages showed decreases in the values expressed, the amounts were still largely in excess of those of the years of the war, the lowest ebb during that period being:—Transfers £1,530,071 in 1916-17, and Mortgages £1,113,815 in 1917-18. Other transactions exhibited a tendency to increase, those for last year being the highest in the majority of cases. With normal receipts and a somewhat increased expenditure, the Net Revenue declined from £17,000 in 1919-20 to £11,450 in 1920-21, which was, however, a greater amount than for any of the three years from 1916-17 to 1918-19.

In the Supreme Court transactions for 1920 the figures for Actions under Common Law, though mostly in excess of those for the year 1919, in number and amount involved, were in the main greater in numbers but less in amounts than those for the years 1917 and 1918. The writs commencing Actions, and the amounts, were:—1917: 453, £296,764; 1918: 386, £124,939; 1919: 420, £43,455, and 1920: 577, £93,047.

Probates and Letters of Administration declined, the figures for 1920 approximating more closely to those of the years 1916 and 1917, whilst the years 1918 and 1919 were in some respects above the normal. During 1920 the Probates granted numbered 618, and the amount involved was £1,377,037; Letters of Administration issued, 330, and amount £230,165. The 1919 figures were Probates 961, £54,453; and Letters of Administration 392, £774,083.

The Transactions under the Bankruptcy Act in 1920 were more or less an approximation to those of the earlier years. In 1918 the values of Assets and Liabilities had been abnormally low, whilst the 1919 records disclosed a gradual return towards normal figures. The Assets and Liabilities for 1920 were £41,875 and £46,381 respectively in comparison with £4,010 and £9,559 in 1918, and £21,190 and £23,958 in 1919.

A considerable increase is noticeable in the Local Companies registered during the year, their number being 131 with Capitals aggregating £5,119,279, as against 64 with Capitals aggregating £1,993,400, in 1919, whilst the figures in 1916 had been as low as 26, with aggregate Capitals amounting to £218,770.

In the Crime figures there was a further decrease in the total of distinct persons brought before the Courts of Justice as compared with the previous years, and whilst in 1916 a total of 12,950 appeared to answer charges, only 8,440 were so called in 1920. In comparison with the year 1919, the records show a slight increase in the number of males, with a greater compensating decrease in that of the females. For the 10,430 offences charged against these persons during 1920 (excluding aborigines) 9,281 convictions, 9,198 in the Lower and 83 in the Higher Courts, were recorded, of which (exclusive of drunkenness itself) 1,611 were attributable to drink. Whilst there was a less number of persons who committed offences, there was a slight increase in the number of offences committed, when compared with the year 1919. Those against the Person, Property, and Currency remained about normal. The offences against Good Order, which for some six years previously had been steadily decreasing, showed an increase in 1920, the figures being 6,821 offences, with 6,488 convictions, as against 5,989 and 5,719 respectively in 1919. As, however, for the year 1914 there were 11,342 offences and 10,898 convictions recorded, it will be seen that the latest returns compare very favourably with these. The principal increase on the 1919 figures was in that of drunkenness, the 1919 figures being 2,898 cases, 2,881 convictions, and those for 1920, 3,481 cases and 3,444 convictions. The total

convictions (excluding neglected children and lunacy cases) in all Courts numbered 9,434, or 2.88 per cent. of the mean population; the corresponding figures for the year 1916 showed 13,944 convictions, or 4.46 per cent. of the mean population.

The peremptory commitments to prison were 885 in the Lower and 51 in the Higher Courts, whilst also 79 Aborigines were committed to prison. The percentage of all commitments to all convictions was 10.64.

The offences by juveniles were less than in 1919, principally due to a decreased number of cases of stealing. The figures for offenders under 16 years were 371 for the year 1919, and for the year 1920, 211.

A considerable reduction is also noticeable in the number of neglected and destitute children, which receded from 460 in 1919, to 330 in 1920.

In the Local and Wardens' Courts figures, only slight increases are recorded for 1920.

The total number of liquor licenses granted during 1920, whilst in excess of those in 1919, showed a continuation of the decline in the more permanent forms of licenses, which has manifested itself practically throughout the course of several years.

PART IX.—HOSPITALS, CHARITABLE INSTITUTIONS, ETC, 1920-21.

The Government Hospitals in the State during the year 1920 numbered 23, and during the year the patients admitted for indoor treatment were 5,771; those remaining from the previous year numbered 488, making a grand total of 6,259 persons treated. The deaths amounted to 455, whilst 5,297 were discharged, as either cured, relieved, or unrelieved. 507 persons still remained in these hospitals for further treatment. The average daily number resident in the above institutions was 482.9 with an average residence for treatment of 28.2 days per patient.

Assisted Hospitals, for the same period, number 29; 9,056 patients were admitted for indoor treatment; 449 patients remained from the previous year, making a grand total of 9,505 persons treated. Deaths numbered 803, whilst 8,237 persons were discharged as either cured, relieved, or unrelieved, and 465 persons remained in these hospitals for further treatment. The average daily number resident in the Assisted Hospitals was 543.8, with an average residence for treatment of 20.8 days for each patient.

The most important diseases treated in both Government and Assisted Hospitals respectively were:—

The number of patients in the Hospital for the Insane on the 31st December, 1920, was 1,161 an increase from the previous year of 13; 98 patients died in the institution.

The inmates in the Home for Aged and Infirm Men numbered 561, as against 659 in the previous year. Those in the Home for Aged and Infirm Women at Fremantle numbered 74, as against 88 for 1919.

The number of children in Orphanages and Industrial Schools was 903, as against 869 for the previous year.

The State supported children numbered 809 as against 769 for 1919.

The number of aborigines and half-caste aborigines in Native Institutions was 548, as against 384 previously, two new Missions being shown for the year.

## PART X.—EDUCATION, SCIENCE AND ART, 1920-21.

The Expenditure from *Consolidated Revenue* for the year 1920-21 on the Education Department was £431,512 for Salaries, etc.; Contingencies, £56,041; Other, £19,231; totalling £506,784. The cost per head, including administration of schools open at the end of 1920, and taking as a basis the *average attendance* of children, was £8 2s. 7d.

The total number of teachers in the employ of the Department on the 31st December, 1920, was 1,710, viz., 481 males and 1,229 females. Included in the total were 209 monitors, probationers and sewing mistresses.

The total number of children attending Government Primary and Private Schools at the end of 1920 was 60,050. In addition there were 530 students attending the Government Secondary Schools.

Special religious instruction was imparted to 25,935 scholars in 390 distinct schools.

There were 164 prosecutions in 1920 for breaches of the compulsory provisions of the Education Act, and only five of these were dismissed or withdrawn, fines or costs being imposed in 138 instances.

A number of scholarships granted to the children of fallen soldiers were awarded by the Government during the year 1920. The total number of all scholarships (not bursaries) entitling the holders to instruction at secondary and other schools (including those granted on recommendation of the District Inspectors) was 113.

"Continuation" students averaged 2,873, and technical scholars 3,612 during the 12 months. In addition, classes for manual training and household management throughout the State were largely availed of, and at the Kalgoorlie School of Mines an average attendance of 230 individual students was maintained.

On the last school day in 1920, 572 children were receiving instruction in orphanages, etc.

The number of matriculated and non-matriculated students attending lectures at the University was 332, of whom 210 were males. Certificates were granted by the University Authorities for examinations as follows:—Junior, 393; Leaving, 147; Practice of Music, 150; Theory of Music, 135—Total, 825.

The various scientific boards and Educational Societies are now once again in working order, after in some cases being in recess or almost inactive during the war period.

The Royal Life Saving Society in particular has made its benefits felt by the community, a large number of young people having been trained so as to qualify for awards, numbering 2,372 in 1920-21, a record number in the Empire, it is understood, for any one year.

The Public Library and other libraries throughout the State are increasingly carrying on their educational and social activities. In addition to the 261 agricultural halls, mechanics' and miners' institutes, etc., in operation, jointly containing volumes to the number of 146,657, the travelling libraries branch of the Western Australian Library had at the disposal of 169 institutes 14,830 books. The number of books in the Perth reference branch of this institution was 112,442 on the 30th June, 1921.

A total number of 85,842 visitors attended the W.A. Museum and Art Gallery during the twelve months.

## PART XI.—LOCAL GOVERNMENT, 1920.

*Municipalities.*—The number of Municipalities was the same on the 31st October, 1920, as on the same date in 1919. The total recorded population was 15,048 higher than that for the previous year, the Municipal Population, as disclosed by the Census of the 4th April, being 166,623, as against 151,575, the estimated population in 1919.

The number of dwelling houses, 35,483 (Census figures), shows an increase of 1,857 on the preceding year.

The capital value of ratable property, including improvements (£26,280,406), was £107,971 in advance of the previous year; the Annual Value, £1,550,134, had similarly increased by £43,443. The total revenue, £663,172, was an increase on the previous year of £104,748. The figures for 1920 include loans raised during the year, £58,533, as against £7,073 for 1919. The expenditure, £665,823, exceeded that for the preceding year by £107,103.

The amount of loans current on 31st October, 1920, £1,745,908, was in advance of that for 1919 by £7,340, whilst the Accrued Sinking Funds for the redemption of loans had increased by £13,524.

The total length of Roads and Streets in existence on 31st October, 1920 (1,134 miles 35 chains), was 16 miles 17 chains more than in the previous year.

*Road Districts.*—There had been no alteration in the number of Road Boards since the last returns.

Some of the Boards rate on the Annual Valuation and some otherwise, so that no really satisfactory comparison of the figures can be made with previous years.

The total revenue, £257,780, was £58,196 above that for 1919, but the figures for 1920 include loans raised during the year, £22,150, as against only £12,650 for 1919. The expenditure, £243,365, showed an increase of £39,253.

The amount of Loans current on 30th June, 1920, £140,185, exceeded that for the earlier period by £19,298, and the Accrued Sinking Fund for the redemption of Loans, £13,138, was higher also, the difference amounting to £3,535

The total length of cleared, formed, and metalled or otherwise constructed roads (34,631 miles 51 chains) was greater than the year before by 962 miles 26 chains, and the following numbers: Bridges 960, Culverts 8,355, Wells, Dams, and Tanks 1,266, and Constructed Fords 1,612; show increases respectively of 23, 293, 142, and 113. These figures are exclusive of those relating to one Road Board, the particulars for roads, bridges, culverts, etc., for which have not been supplied.

*Local Boards of Health.*—There were 23 Municipal and 101 other Boards of Health in existence in 1919–20, eleven of the latter being inactive during the year. The combined Revenue (£123,645) was larger than its annual predecessor by £23,690, and the Expenditure (£122,575) showed a similar excess of £11,215. The increase in receipts and expenditure was largely due to the Influenza outbreak.

*Fire Brigades.*—The number of Fire Brigades (42) was one more than in the previous year, and the number of permanent firemen (110) was four more, whilst the number of volunteer firemen on the roll (555) had risen by 19.

#### PART XII.—MISCELLANEOUS, 1920–21.

The first subject dealt with in this small publication is that of Parliamentary Rolls and Elections, etc., giving the figures, to 30th June, 1921, for the State Government and for that of the Commonwealth as far as this State is concerned. Information relative to the first Local Option Poll in this State, held on 30th April, 1921, and details of the voting in each Licensing District, including that on the question of State Control of Licenses, are given. It will be noticed that the names on the State Rolls had increased during the previous twelve months by 18,764 in the case of the Assembly, and by 1,158 in that of the Council Rolls. The data of the Commonwealth Rolls disclose an increase in the number of Electors on the Roll from 163,544 at the end of 1919 to 167,076 in June 1921. A summary of the Senate Elections and Referenda from 1903 to 1919, and the details of the 1919 Referendum, are included.

The Workers' Homes figures are given in a combined return for the eight years ended 30th June, 1921. The total cost of the Approved Applications during the period was £683,507, being an addition of £40,795 to the accumulated total of 1920.

Newspaper publications in Western Australia in 1920 numbered 95, an increase of four on the previous year. Four were dailies, 50 weeklies, and 28 monthlies.

The State Labour Bureau's Return shows that during the year ended 30th June, 1921, a total of 5,717 men and 3,694 women applied for employment, and for 3,943 of the former engagements were found, whilst 2,249 engagements in the aggregate were provided for the latter, including 1,566 laundress-charwomen. The engagements for men were principally those of 697 bushmen, 847 farm hands, 672 labourers, 471 lads for farms, and 562 saw-mill hands. A table detailing the assistance rendered to applicants shows that, during its seven years' operations, the Bureau has advanced 11,763 fares, totalling in value £14,883, of which £11,633 has been refunded. In addition, assistance to 105 goldfields lads and 150 men and women had been given, the respective total amounts being £166 and £167, drawn from the funds of the Scheme for placing goldfields lads on farms and the Employers' Rail Trust Fund respectively. The rates of wages for the various engagements secured at the Bureau conclude this Part of the Statistical Register.

#### STATISTICAL VIEW OF NINETY-TWO YEARS' PROGRESS IN WESTERN AUSTRALIA, 1829 TO 1920–21.

The subjects represented in this publication are in the main those constituting the more important departments of statistical compilation, and in these a selection has been made of what may be termed leading figures. They are: Population, Migration, Vital Statistics, Posts and Telegraphs, Consolidated Revenue and Expenditure therefrom, Loan Expenditure, Public Debt, Lands, Agriculture and Live Stock, Gold and Coal Production, Railways, State Savings Bank, Shipping, Totals of Imports and Exports, and Export of Wool, Raw Gold, and other articles the produce of the State.

The combined figures are intended to give a clear and rapid survey of the history of the State from its foundation in 1829 to our days, as presented by the growth of the numbers expressing its progress.

## TOTAL PRODUCTION.

As no statement of the total production of the State is shown in any part of the Statistical Register, the following table is here appended:—

\* The mean population for the year is obtained as follows.—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two. † Owing to the temporary closing of the Public Offices during July, the Vital Statistics figures, and consequently also those of the Population, show an undue increase for August, at the expense of the preceding month.

\* Owing to the Commonwealth Government having discontinued the distinction between the State production and that of the other States of the Commonwealth, it is now impossible to show the oversea destination of locally produced exports in this table, as shown previous to the year 1911. In the case of the Interstate Transfers, however, the value of local produce exported to each State of the Commonwealth is shown in the summary of Table No. 6, page 94.

No. 2.—Value of Imports and Exports of Merchandise, Western Australia, from 1911 to the 30th June 1920, showing the value per head of mean population, estimated on the basis of the 1911 census.

## No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1920.

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1902" (Edwd. VII., No. 14).

NOTE A.—On all British and Foreign Imports 10 per cent has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

## TRADE CLASSIFICATION.

Owing to the grouping of the Import and Export Items into Classes, in lieu of the alphabetical system followed prior to 1918-19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

### No. 6.—EXPORTS of Merchandise from the State of Western Australia during the Year ended 30th June, 1920.

NOTE.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles exported.

#### TRADE CLASSIFICATION.

Owing to the grouping of the Import and Export Items into classes, in lieu of the alphabetical system followed prior to 1818-19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed Index of the items in alphabetical order.

No. 32.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

NOTE.—In addition to the above figures the following particulars were also obtained:—Acreage of Planted Forest Trees, 2,091 acres; Lands farmed on the "Share System", For Cultivation, 15,495 acres and dairying, 3,700 acres. \* The reason why Returns relative to certain alienated and leased lands are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree in the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

NOTES.—1. The rectangular areas adopted, which are shown on the map attached to this part of the *Statistical Register*, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes, the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 937½ square miles each, and the sub-area numbers marked A, B, C, or D, as the case may be, represent areas of 25¼ square miles each. 2. Areas in parentheses and marked with an asterisk (\*) are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are unoccupied as regards the headings shown. Areas marked (†) are portions of areas only.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia in the past decade of such products of the soil and of live stock as might in the future be produced within the State, but are at present introduced to supply the deficiency in local production. It serves, in some respects, as a basis for calculations as to the market reasonably to be expected therein for home-grown products.
