## SECTION XV.

## COMMERCE.

## § 1. Introductory.

Note.-From the 1st July, 1914, the Trade Year, which was formerly the Calendar Year, was altered to coincide with the Fiscal Year (July to June).

1. Constitutional Powers of the Commonwealth in regard to Commerce.-The powers vested in the Commonwealth Parliament by the Commonwealth Constitution,Act with respect to oversea trade and commerce will be found on page 21 (sub-section 51 (i)) and pp. 27 and 28 (sub-sections 86-95) of this volume.

## § 2. Commonwealth Legislation affecting Foreign Trade.

1. Customs Act 1901 (No. 6 of 1901).-" An Act relating to the Customs," assented to on the 3rd October, 1901, came into operation by proclamation on the 4th October, 1901. This provided for the establishment of the necessary administrative machinery for all matters pertaining to the Customs, and prescribed, inter alia, the manner in which Customs duties shall be computed and paid. It did not, however, determine the rates thereof.

During the interval between the inception of the Commonwealth, viz., on lst January, 1901, and the coming into operation of the Customs Act 1901, the Customs Acts of the several States were administered by the Executive Government of the Commonwealth, under section 86 of the Constitution.
2. Customs Tariff Act 1902 (No. 14 of 1902).-The first Commonwealth Customs Tariff imposing uniform rates of Customs duty in all the States was introduced in the House of Representatives on the 8th October, 1901. "An Act relating to Duties of Customs," assented to on the 16th September, 1902, made provision that uniform duties of Customs specified in the tariff schedule should be imposed from the 8th October, 1901. From this date trade between the States became free, with, however, the exception, under section 95 of the Constitution Act, of the right of Western Australia to levy duty on the goods from other States for five years. [Repealed by the Customs Tariff Act 1908 (No. 7 of 1908).]
3. Sea Carriage of Goods Act (No. 14 of 1904).-" An Act relating to the Sea Carriage of Goods," assented to on the 15th December, 1904, to commence on the lst January, 1305, defines the responsibility of shipowners, charterers, masters, or agents in regard to goods carried.
4. Secret Commissions Act 1905 (No. 10 of 1905).-"An Act relating to Secret Commissions, Rebates, and Profits," assented to on the 16th November, 1905, provides that "Any person who, without the full knowledge and consent of the principals directly or indirectly ( $a$ ) being an agent of the principal, accepts or obtains, or agrees or offers to accept or obtain, from any person, for himself, or for any person other than the principal; or (b) gives or agrees to give or offers to the agent of a principal, or to any person at the request of an agent of the principal, any gift or consideration as an inducement or reward for any act done or to be done, or any forbearance observed or to be observed, or
any favour o: disfarour shewn or to be shewn in relation to the principal's affairs or business or on the principal's behalf, or for obtaining or having obtained, or aiding or having aided to obtain for any person an agency or contract for or with the principal, shall be guilty of an indictable offence."
5. Commerce (Trade Descriptions) Act 1905 (No. 16 of 1905)._-"An Act relating to Commerce with other Countries," assented to on the 8th December, 1905, and brought into operation by proclamation on the 8th June, 1906, gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same. being imports or exports of the Commonwealth.
6. Australian Industries Preservation Act 1906 (No. 9 of 1906).-"An Act for the Preservation of Australian Industries and for the Repression of Destructive Monopolies," assented to 24th September, 1906, provides that any person or any corporation making or engaging or continuing in any combination " with intent to restrain trade or commerce to the detriment of the public or with intent to destroy or injure by means of unfair competition any Australian industry the preservation of which is advantageous to the Commonwealth, having due regard to the interests of producers, workers, or consumers," or any person or corporation monopolising or attempting or conspiring to monopolise any part of the trade of the Commonwealth with intent to control, to the detriment of the public, the supply or price of any service, merchandise, or commodity, is guilty of an offence. (Amended, see Acts No. 5 _ of 1908, No. 26 of 1909, and No. 29 of 1910.)
7. Customs Tariff 1906 (No. 14 of 1906).-"An Act relating to Duties of Customs" amended the Customs Tariff of 1902 in relation to the duties on harvesters and agricultural implements and machinery and prescribed the prices which were not to be exceeded of Australian harvesters and drills delivered to the purchaser at the railway station or port nearest to the factory where they are made. [Repealed by Customs Tariff Act 1908 (No. 7 of 1908).]
8. Customs Tariff (South African Preference) 1906 (No. 17 of 1906).—"An Act relating to Preferential Duties of Customs on certain goods the produce or manufacture of the British Colonies or Protectorates in South Africa which are included within the South African Customs Union," assented to 12th October, 1906, to operate from Ist October, 1906, provides for special preferential rates of duty on certain goods imported from and being the produce of any of the Colonies or Protectorates included within the South African Customs Union.
9. Australian Industries Preservation Act 1907 (No. 5 of 1908).-_"An Act to amend the Australian Industries Preservation Act 1907," assented to 14th April, 1908, provides additional machinery for procuring evidence of offences against the principal Act.
10. Customs Tariff 1908 (No. 7 of 1908)._-"An Act relating to Duties of Customs," assented to 3rd June, 1908, repeals section 5 of the Customs Tariff 1902 (No. 14 of 1902) and the schedule of that Act and the whole of the Customs Tariff 1906 (No. 14 of 1906) as from 8th August, 1907, and imposes new rates of Customs duties. This Act provides preference rates of Customs duties on certain "goods the produce or manufacture of the United Kingdom."
11. Customs Tariff Amendment Act 1908 (No. 13 of 1908).-" An Act to amend the Tariff Act of 1908," assented to loth June, 1908. The purpose of this Act is merely to remove possible doubt as to the intention of the original Acts.
12. Australian Industries Preservation Act 1909 (No. 26 of 1909).-"An Act to amend the Australian Industries Preservation Acts 1906-1907" formally repeals sections 5 and 8 of the parent Act, which were declared by the High Court to be ultra vires. It also provides that, in relation to trade and commerce with other countries or among the States, the payment of rebates, or the refusal to sell, "either absolutely or except upon disadvantageous conditions," with the purpose of promoting exclusive dealing, shall be an offence.
13. Customs (Interstate Accounts) Act 1910 (No. 9 of 1910).-Repeals Sections 272 and 273 of the Customs Act 1901. These sections relate to the passing of dutiable goods from one State to another State of the Commonwealth, and their repeal was consequent on the termination of the book-keeping system of accounts between the Commonwealth Government and the Governments of the States, in favour of a system of payments based on population.
14. Australian Industries Preservation Act 1910 (No. 29 of 1910).-"An Act to amend the Australian Industries Preservation Act 1906-1909." This Act removes from the principal Act the obligation to prove intent to restrain trade and detriment to the public.
15. Customs Act 1910 (No. 36 of 1910).-" An Act to amend the Customs Act 1901 " gives the Customs control of all goods for export, the exportation of which is subject to compliance with any condition or restriction under any Act or regulation, extends the machinery provisions for the prevention of the importation or exportation of goods which are prohibited imports or exports respectively, amends the provisions for the payment of duty under protest, gives the Governor-General power to prescribe the nature, size, and material of the coverings for packages, and the maximum or minimum weight or quantity to be contained in any one package of goods imported or exported, or transported coastwise from one State to another ; the condition of preparation or manufacture for export of any articles used for, or in the manufacture of, food or drink by man; the conditions as to purity, soundness, and freedom from disease to be conformed to by the goods for export.
16. Customs Tariff 1910 (No. 39 of 1910).--" An Act relating to Duties of Customs," amends the Customs Tariff of 1903 by more explicit definition of certain tariff items, and by alteration of some rates of duty.
17. Customs Tariff 1911 (No. 19 of 1911).—"An Act relating to Duties of Customs," amends the Customs Tariff 1908-10 by alteration of some rates of duty.
18. Interstate Commission Act 1912 (No. 33 of 1912).-In accordance with the provisions of the Commonwealth Constitution Act-sections 101 to 104 (see page 29 ante)-an Act relating to the Interstate Commission was assented to on the 24th December, 1912. This Act provides for the appointment of the Commission, and cognate matters.
19. Trading with the Enemy Act 1914 (No. 9 of 1914).-" An Act relating to the control of trade during the war with Germany and Austria-Hungary." This Act was amended by Act No. 17 of 1914.

昷
20. Customs Act 1914 (No. 19 of 1914).—Amends the Customs Act 1901-10 by extending the powers of the Governor-General to prohibit the exportation of goods in time of war.
21. The Income Tax Assessment Act 1915 (No. 34 of 1915) and Amendment thereto (No. 47 of 1915).-Provide that "In the case of a person selling goods in Australia on account of a person not resident in Australia, or on account of a company not registered in Australia, the principal shall be deemed to have derived from such sale a taxable income equal to five pounds per cent. upon the price at which the goods were sold. The person selling the goods shall be assessable on the taxable income as the agent for the principal, and shall be personally liable for the payment of the tax to the extent of the tax payable on goods sold by him after the 30th June, 1915. Goods shall be deemed to be sold in Australia on account of a person not resident in Australia, if any person in Australia receives a commission in respect of the sale of the goods or is paid a salary for obtaining orders for or for influencing the sale of the goods."
22. Customs Tariff Validation Act (No. 6 of 1917).—" An Act to provide for the validation of-(1) Collections of Customs duties under tariff proposals introduced into the House of Representatives on the 3rd December, 1914 ; (2) the remission of Customs duty on wheat as from the 12th December, 1914 ; (3) the remission of Customs duty on oats as from the 27th February, 1915; and (4) the restoration of the Customs duties on wheat and oats from the 12 th November, 1915."
23. Apple Bounty Act (No. 21 of 1918).-This Act appropriates from the Consolidated Revenue Fund the sum of $£ 12,000$, for the payment, to the grower, of a bounty of $\frac{7}{10} \mathrm{~d}$. per pound upon the export of apples grown and evaporated in Australia under certain prescribed conditions, and sold to the Imperial Government for delivery between the 1st April and 31st August, 1918.
24. Customs Tariff Validation Act (No. 17 of 1919).-Provides for the validation of collections of Duties of Customs under Tariff proposals introduced into the House of Representatives on the following dates, namely :-10th August, 1917; 26th September, 1917; and 25th September, 1918.
25. Customs Tarifi of 1920.-The Tariff Schedule which was submitted to Parliament on the 25th March, 1920, provides a British Preferential Tariff, an Intermediate Tariff, and a General Tariff. The Tariff Act will provide that the Preferential Tariff or the Intermediate Tariff may, under reciprocal arrangements, be extended to other British Dominions, and that the Intermediate Tariff may in certain circumstances apply to foreign countries.

## § 3. Regulation of Trade during the War.

In Official Year Book number 11 (page 559) a statement was given shewing the authority for the regulation of trade during the war. Reference was also made to the appointment of a Luxuries Board to control the imports of goods of a luxurious nature, and to the establishment of the Commonwealth Board of Trade.

## § 4. Method of Recording Imports and Exports.

1. Value of Imports.-The recorded value of goods imported from countries beyond the Commonwealth represents the amount on which duty is payable or would be payable if the duty were charged ad valorem. The value of goods is taken to be 10 per cent.* in advance of the fair market value in the principal markets of the country whence the goods were exported, the increase being intended to represent roughly the insurance, freight and other charges to the place of landing.
2. Value of Exports.-The recorded value of goods exported is taken to represent the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term. Some modification of this practice has, however, been necessary in respect of products affected by the policy of price-fixing arising from the war.
3. Records of Past Years.-In the years preceding federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is, necessarily, the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports were not on uniform lines, admitting of the preparation of a record for Australia as a whole. On the introduction of the Customs Act 1901, the methods of recording values were made uniform throughout the States, but it was not until September, 1903, that a fundamental defect in the system of recording transhipped goods was remedied. Up to this date goods arriving in any Australian port for transhipment to a port in another Australian State were recorded at the latter port only, where they were ordinarily recorded as from the transhipping State, and not as an import from the oversea country.

In recording exports an analogous defect also existed in most of the States, since goods despatched from one Australian State for transhipment in another State to an oversea country were simply recorded in the former as an export to the transhipping State; thus no proper record of the export oversea was made. Owing to this defect the oversea trade prior to September 1903 is understated by an amount which it is impossible to estimate accurately, since it varies with the development of the shipping facilities of the States concerned. To discover the direction of the transhipped trade is not possible. The figures presented in the tables hereinafter are therefore the values as recorded, and must be taken as subject to the defects explained.

Prior to 1905 the value of ships imported or exported was not included in the returns of trade.

[^0]4. Ships' Stores.-Prior to 1906 goods shipped in Australian ports on board oversea ships as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and omitted from the return of exports.

The value of these stores shipped each year, distinguishing bunker coal, is shewn below:-

Value of stores shipped in australian ports by oversea vessels.

|  | Period. |  | Bunker Coal. | All Stores (including Coal). | Perio 1. | Bunker Coal. | All Stores (including Coal). |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\pm$ | , |  | £ | £ |
| 1906 | $\cdots$ | . | 575,471 | 875,966 | 1914 ) |  |  |
| 1907 | . | $\cdots$ | 663,724 | 998,897 | (1st six months) ! | 533,288 | 771,581 |
| 1908 |  | $\cdots$ | 867,707 | 1,196,106 | 1914-15 | 829,875 | 1,587,757 |
| 1909 | $\cdots$ |  | 781,113 | 1,071,677 | 1915-16 | 719,510 | 1,544,872 |

| 1912 | - |  | 1,008,259 | 1,431,985 | 1918-19 | 857,507 | 1,765,367 |
| 1913 | . | $\ldots$ | 1,018,595 | 1,458,702 |  |  |  |

## § 5. Oversea Trade.

1. Total Oversea Trade.-The following table shews the total trade of the Commonwealth with oversea countries from the earliest date for which records are available.* In consequence of the defects of record referred to in the preceding section, the results can be only approximate to the actual figures. The very marked rise and sudden fall in the value of imports during the period 1837 to 1842 were contemporaneous with heavy land speculation and a subsequent severe financial crisis. The great increase of trade in the early fifties was due to the discovery of gold. In the State of Victoria the value of imports from oversea countries increased from $£ 500,000$ in 1851 to nearly $£ 11,000,000$ in 1853, and to $£ 13,000,000$ in 1854 ; while in New South Wales similar imports rose from $£ 1,390,000$ in 1851 to $£ 5,500,000$ in 1854, when the total imports into the Commonwealth reached the sum of $£ 3413 \mathrm{~s} .10 \mathrm{~d}$. per head, and the total trade $£ 563 \mathrm{~s} .10 \mathrm{~d}$. per head of the population. The rapid influx of persons anxious to share the good fortunes of these times, however, soon reduced the value of the trade per head, till, in 1858, it had declined to $£ 31$ 19s. 6d. per head. The period $1867-1872$ shewed a marked reduction in the value of trade per head. For some years prior to this period New South Wales had experienced a succession of indifferent seasons, and Victoria was suffering from a congested labour market consequent on the decline of alluvial gold-mining in that State. This congestion of the labour market during the years 1862 to 1866 gave rise to the agitation for a protective tariff to provide employment in manufactures, and in April 1866, the Tariff Act, which expressed the protective policy thenceforward adhered to in Victoria, was assented to.

OVERSEA TRADE OF THE COMMONWEALTH, 1826 TO 1919-20.

| Period. | Recorded Value. |  |  | Value per Inhabitant. $\dagger$ |  |  | Percentage of Exports on Imports. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Imports. | Exports. | Total. | Imports. | Exports. | Total. |  |
|  | £1,000. | £1,000. | 11,000. |  |  |  | \% |
| 1826-30 | 638 | 153 | 791 | $10 \quad 12 \quad 5$ |  | $\begin{array}{lll}13 & 3 & 4\end{array}$ | 23.9 |

* Reekoned on mean population of the year. † Preliminary figures subject to alteration.

The graphs illustrating the movement of the oversea trade of Australia (see pages 611 and 612) shew that periods of depressed trade have been recurrent at more or less regular intervals of from seven to nine years, and, measured by population, each succeeding depression since 1855 carried the trade per head lower than the preceding one, until the lowest point was reached in 1894.

The year 1892 marked the beginning of a period of acute financial stress, culminating in the commercial crisis of 1893. The collapse of these years is plainly reflected in the trade records of that period, the trade of 1894 falling to $£ 54,028,227$, a decline of no less than 26.75 per cent. in three years. In 1895 there was a slight recovery, and a continuous upward movement until 1901, when the trade reached $£ 92,130,183$, or $£ 246 \mathrm{~s}$. ld. per head. A decline, due to drought, in the exports of agricultural, pastoral, and dairy produce, reduced the trade of 1902 to $£ 84,591,037$, but although in the next year there was a further shrinkage in the exports of agricultural produce, the increase in the value of the exports of metals, specie, butter, and wool was so large as to effect an increase in the total trade. From 1902 the increase in the value of trade continued, till in 1907 it reached the amount of $£ 124,633,280$, equal to $£ 304 \mathrm{~s}$. 5 d . per inhabitant.

The imports during 1907 were, doubtless, to some extent inflated by the importation of goods in anticipation of the tariff revision of that year. The trade of 1908 shews a dectine of $£ 10,523,000$ as compared with 1907 , of which $£ 8,513,000$ was in the value of exports, notwithstanding an increase of $£ 3,447,767$ in the export of gold and specie. This decline in the value of exports was largely due to reduced prices ruling for wool and metals in consequence of the financial crisis in the United States during the previous year, and in lesser degree to the smaller exports of agricultural and pastoral produce, due to the unfavourable season experienced in some of the States.

The trade of 1909 per head of population was slightly more than in 1908, notwithstanding that the gold exports were less by $£ 5,193,587$. In 1910 the value of imports per head was higher than in any year since 1885, and the value of exports was-excepting in the years 1906 and 1907-the highest since 1857. The high value of exports is particularly striking when considered in conjunction with the exceptionally small exports of gold. The exports of gold, already much reduced in 1909 as compared with 1908, were in 1910 still further reduced by $£ 4,264,368$ to $£ 4,108,783$, the smallest recorded since 1892. During 1911 the exports of gold bullion and specie again increased to $£ 11,540,782$. The continued increase in the value of imports during 1912 and 1913, while the value of exports remained stationary, is referred to on the next page.

The trade of 1914-15, and subsequent years, was seriously disturbed by conditions arising from the war such as the dislocation of shipping and increased prices. The shortage of shipping was particularly marked in 1917-18, when, in order to conserve space for more essential requirements, the importation of goods which were considered to be in the nature of luxuries was prohibited or restricted.

The effect of prices on the value of exports is shewn in the "Price Levels" given on page 604, from which it will.be seen that on the basis of uniform prices the exports during the years 1914-15 to 1918-19 were less than for the years immediately preceding the war. The exports of 1919-20 (for which preliminary figures only are available), notwithstanding that they include accumulations of wool and wheat, which could not be shipped earlier, represent a volume or quantitative mass only about $13 \frac{1}{2}$ per cent. greater than those of 1913; the recorded values are 89 per cent. higher.

The variations in the composition of the trade will be seen from the tables in § $\mathbf{8}$ following.
2. Alteration of Trade Year.-The desirability had long been felt of bringing the trade year into conformity with the seasons for the export of agricultural and pastoral products, but a disinclination to break the continuity of records had, hitherto, prevented the change. As it was obvious that trade itself, and not merely the records, would be seriously disturbed by the war, the time appeared to be peculiarly opportune for making the alteration. The trade returns were, therefore, closed as on the 30th June, 1914, and the new year started from the 1st July. The year 1914-15 thus includes nearly eleven months under war conditions.
C.6644.-18
3. Ratio between Exports and Imports.-The foregoing table shews the percentage of exports on imports for each year. $\dagger$ From this it will be seen that, with few exceptions, due to temporary dislocations of trade, prior to 1892 the balance of trade has been on the side of imports, but from 1891 to 1912 the reverse has been the case. The excess of imports in the earlier years represents the introduction of capital in the form of Government loans and for investment in private undertakings, and the excess of exports represents mainly the interest and profit on the earlier investments, repayment of loans to foreign bondholders, and also freight on trade, which is carried mainly by ships of the United Kingdom and foreign countries. As the introduction of new capital and the payments for interest on existing investments and for shipping and other services are continually operating in opposite directions at the same time in the statistics of trade, it follows that it is the balance only of these transactions which is reflected in the excess of imports or exports.

The marked diminution of the excess of exports is a striking feature of the trade returns for 1912. The decline in the ratio of exports to imports has been due, mainly, to loans raised in London by the Governments of the various States of the Commonwealth. The proceeds of these loans, of course, swell the import returns, but, as no immediate payment beyond an instalment of interest has to be made in return, the export figures are affected to a very minor degree, until such time as the principal of the debt is repaid. The larger number of immigrants had, also, to some extent affected the balance of trade by the introduction of capital. The following table presents the balance of trade of the Commonwealth as shewn by the records of imports and exports for each year from 1902, and, also, the modification of these figures as affected by loans raised in London by the Governments of the States and the Commonwealth :-

## EFFECT OF LOANS ON THE RECORDED BALANCE OF COMMONWEALTH TRADE, 1902 TO 1919-20.

[^1]The trade balances would be further modified by the loans of local governing bodies, by the imports of capital for private enterprises, and by the addition to or absorption of bank balances held in London on Australian account. Particulars of such transactions are, however, not available.

Since the outbreak of war the trade balances for single years have been completely upset by the difficulties of transport. Consequently, it is necessary for proper observation to take the total transactions during the six years from the 1st July, 1914, to the 30th June, 1920.

The following table shews that during the decade 1902-1911 an annual excess of exports of about $£ 16,000,000$ was required to meet the obligations of this community on account of interest and for services performed for it by persons outside the Commonwealth. Loans since raised in London by the States and the loans and advances made by the Imperial Government to the Commonwealth Government have increased this annual liability by about $£ 6,000,000$ in 1919-20; the average increase on account of each of the six years being about $£ 3,720,000$, which, added to the pre-war liability, represents an annual liability throughout the war period of about $£ 20,000,000$, whereas the results of these six years, as shewn in the preceding table, will give an average excess of exports, as modified by new loans, of $£ 21,666,000$.

The foregoing figures are based on the values of imports and exports as recorded by the Department of Trade and Customs, and take no account of any profit which may have accrued from the re-sale of Australian wool originally purchased by the Imperial Government.

The general relationship between the balance of trade of the Commonwealth and the borrowing of money abroad is demonstrated by the following figures :-

## COMMONWEALTH BALANCE OF TRADE AND PUBLIC DEBT, 1867 TO 1920.

## § 6. Direction of Trade.

1. Country of Shipment and Country of Origin.-The following table shews, for the years 1900 and 1918-19, the value of imports recorded as direct from the principal countries, and also the disposition of the value of imports against the countries where they were produced or manufactured. A similar comparison for earlier years will be found in provious issues of this work.

- The imports shewn as from enemy countries during 1918-19 were on board German ships interned in Sonth Africa and elsewhere and were subsequently forwarded to Australia.

The only country from which the value of direct imports exceeds by any large amount the value of the imports of goods which were manufactured or produced therein, that is to say, the only country which shews a balance of any magnitude as a distributor of the goods of other countries to Australia, is the United Kingdom. The records of imports therefrom during the year 1918-19 shew that while the total direct imports from that country amounted to $£ 37,971,346$, the value of the manufactures or produce of the United Kingdom itself, imported from all countries whatsoever during the same year, was $£ 34,584,611$. From the foregoing figures it appears that goods to the value of at least £3,386,735 were received from other countries through the United Kingdom.

Other countries which prior to tho war shewed balances as distributors to Australia, though absolutely of much less amount, were Belgium, Canada, Hong Kong, New Zealand, Straits Settlements, and Ceylon. The countries mentioned were, of course,
not the only countries through which goods were indirectly imported into Australia, for the direct imports from other oountries included considerable values which were not the produce of those countrics. Prior to the wai large quantities of goods not manufactured in France or Germany were shipped to Australia from those countries. Such transactions were, however, more than balanced by French and German goods received through the United Kingdom and other countries.
2. Direct Imports according to Country of Shipment.-The following table shews the average yearly value of imports from each of the principal countries during each succeeding quinquennial period from 1899 to 1919 , and for the year 1918-19. The countries mentioned in this table are those in which the goods were shipped or whence they were directly consigned to Australia.

## IMPORTS INTO THE COMMONWEALTH FROM. VARIOUS COUNTRIES, 1899 TO 1918-19.

3. Imports from the United Kingdom.--The foregoing table shews broadly the extent to which the export trade of the United Kingdom to this country has been affected by the concentration of British industry on the war, and it also shews the increased value of imports from the United States of America and from Japan. The
diversion of Australian trade from Great Britain is more fully dealt with in paragraph 12 of this section. The values of the principal imports of United Kingdom origin during the year 1918-19 are as follows :-

Ale and beer, $£ 51,612$; apparel and textiles-apparel-blouses, skirts, \&c., £189,198, boots and shoes, $£ 89,634$, corsets, $£ 164,286$, gloves, $£ 115,320$, hats and caps, $£ 90,074$, shirts, collars, etc., $£ 151,125$, socks and stockings, $£ 701,439$, trimmings, $£ 150,522$, other apparel, $£ 665,986$, textiles-piece goods-canvas and duck, $£ 492,668$, cotton-grey, unbleached, $£ 460,240$, white, bleached, $£ 2,917,911$, dyed or printed n.e.i., $£ 6,577,031$, lace for attire, $£ 411,688$, linen n.e.i., $£ 338,753$, silk, $£ 187,412$, velvets, $£ 363,917$, woollens,
 textiles, $£ 1,394,048$; arms, ammunition, and explosives, $\mathfrak{£} 369,996$; bags, baskets, etc., £39,692; books and periodicals, $£ 558,920$; brushware, $£ 51,134$; cocoa and chocolate, £11,283; cordage, $£ 172,548$; drugs and chemicals-alkalis (soda), $£ 351,729$, cyanide of potassium, $£ 111,490$, dyes, $£ 140,506$, insecticides, etc., $£ 107,175$, medicines, $£ 155,794$, other drugs, etc., $£ 663,310$; earthenware, $£ 211,558$; electrical materials, $£ 190,382$; fancy goods, $£ 95,321$; fish, fresh and preserved, $£ 9,427$; glass, etc., $£ 131,964$; glue, gelatine, £52,892 ; indiarubber and manufactures, $£ 299,040$; instruments-musical, $£ 26,152$; surgical and dental, $£ 82,818$; jewellery and precious stones, $£ 125,072$; leather and manufactures, $£ 198,756$; machines and machinery-electrical, $£ 208,452$; machine tools, £179,471, motive power, $£ 196,354$, other, $£ 553,524$, metals, manufactures of-cutlery, $\mathfrak{£ 2 5 1 , 3 3 6}$, electrical and gas appliances, $£ 131,452$, iron and steel-pig iron, $£ 7,198$, bar, hoop, ingot, etc., $£ 253,223$, girders, beams, etc., $£ 15,812$, plate and sheet-corrugated, galvanized, $£ 154,816$, galvanized, not corrugated, $£ 136,539$, plain, not galvanized, $£ 174,461$, pipes and tubes, $£ 456,206$, rails, fishplates, etc., $£ 4,444$, tinned plates, plain, $£ 2,108,754$, tools of trade, $£ 291,082$, wire, $£ 40,257$, wire rope, hawsers, etc., $£ 171,942$, vehiclesbicycles, $£ 78,304$, motors, $£ 20,287$, other vehicles, $£ 148,769$, other metal manufactures, $£ 1,002,962$; mustard, $£ 30,364$; oils (not essential), $£ 12,775$; paints and varnishes, £185,966; paper, £543,799; photographic materials, £29,447; pickles, sauces, etc., £95,448; pipes, smoking, $£ 74,727$; soap, $£ 30,825$; spirits, $£ 904,164$; stationery, $£ 190,536$; tobacco, $£ 60,155$; wax matches, $£ 104,691$; yarns, $£ 1,081,786$.
4. Imports shipped from British Possessions.-The growth of the value of imports from other British possessions during the past twenty years has been such as to increase the proportion to total imports from 12.12 per cent. in the years 1899-1903 to 22.15 per cent. in 1918-19, the actual values being respectively $£ 4,766,160$ in the earlier period and $£ 22,657,617$ in 1918-19. Of the total imports from British possessions during 1918-19, 10.68 per cent., or 2.37 per cent. of all imports, was from New Zealand ; 33.36 per cent., or 7.39 per cent. of all imports, from India; 10.08 per cent., or 2.23 per cent. of all imports, from Canada; and 7.19 per cent., or 1.59 per cent. of all imports, from Ceylon. The imports from Canada shew an increase of $£ 1,125,145$, or 97.09 per cent. over those of 1913 , and an increase of $£ 1,426,845$, or 166.47 per cent., over the average of the period 1909-13. The relatively large imports from the South African Union during 1918-19 were due to a shipment of gold $(£ 4,943,296)$ to Western Australia to be minted.
5. Principal Imports, the Produce of British Possessions, 1918-19.-These are as follows :-
(i) Canada. Apparel and textiles-corsets, $£ 53,491$, other, $£ 61,003$; boots and shoes, $£ 30,212$; carbide of calcium, $£ 7,048$; cutlery, $£ 14,681$; fish, $£ 189,438$; indiarubber and manufactures, $£ 185,162$; iron and steel-bar, rod, \&c., $£ 44,610$; agricultural implements and machinery, $£ 334,929$; other machines and machinery, $£ 26,064$; metal manufactures, $£ 99,642$; musical instruments, $£ 10,881$; paints and varnishes, $£ 25,990$; paper-printing, $£ 548,380$, wrapping, $£ 98,559$, other paper, $£ 93,240$; pipes and tubes, wrought, $£ 126,866$; timber, $£ 50,576$; motor chassis, $£ 387,165$; other vehicles, $£ 39,348$; whisky, $£ 127,165$; wire, $£ 88,765$.
(ii) Ceylon. Cocoa and chocolate, $£ 45,116$; coir fibre, $£ 6,607$; nuts, $£ 39,787$; rubber and manufactures, $£ 23,068$; tea, $£ 1,227,650$. The large increase in the imports from Ceylon-from an average of $£ 481,627$ per year during the years $1899-1903$, to $£ 1,628,939$ in 1918-19-is due to the displacement of China teas in the Australian markets by those of India and Ceylon. Of the total imports of tea during the year 1918-19, 62.49 per cent. of the value was the produce of Ceylon.
(iii) Egypt. Apparel, $£ 54,523$; biscuits, $£ 57,355$; butter, $£ 52,240$; copper, ingots, £65,950 ; lead, pig, $£ 41,970$; meats-frozen, $£ 1,638,368$, other, $£ 865,162$; milk and cream, £158,756; fruits, preserved, £39,265; grain-wheat, £2,838,490; flour, £1,464,141; leather and manufactures thereof, $£ 16,160$; tallow, $£ 61,558$; tobacco and cigarettes, £29,753; wool, $£ 613,814$.
(iv) Fiji. Bananas, $£ 78,796$; copra, $£ 23,220$; sugar-produce of cane, $£ 47,862$; molasses, $£ 12,636$; crude rubber, $£ 5,272$.
(v) Hong Kong. Bacon and hams, £11,471; biscuits, £10,245; butter, £28,618; coal, $£ 6,079$; flour, $£ 226,971$; lead, pig, $£ 77,426$; leather, $£ 31,754$; sandalwood, £92,518; soap, $£ 5,686$; tin, ingots, $£ 18,188$.
(vi) India. Bags and sacks, $£ 3,930,043$; hessians, $£ 675,262$; cameos, precious stones unset, $£ 24,562$; carpets, mats, \&c., £53,374; coal, £51,012 ; coffee and chicory, $£ 45,266$; cordage and twine, $£ 105,270$; cotton, raw, $£ 10,085$; jute, $£ 30,388$; other unmanufactured fibres, $£ 77,216$; gums and resins, $£ 37,502$; gold bullion, $\mathfrak{f 1 , 4 9 8 , 0 7 4 \text { ; grain-beans }}$ and peas, $£ 8,369$; linseed, $£ 505,599$; oils-castor, $£ 4,285$, linseed, $£ 61,704$; rice, $£ 33,950$; skins and hides, $£ 241,745$; spices, $£ 17,963$; tea, $£ 313,967$; wax, paraffin, $£ 85,447$; yarns, £39,761.
(vii) New Zealand. Apparel and textiles, £5, 885 ; animals-horses, £20,647, sheep, $£ 4,657$; beans and peas, $£ 18,320$; coal, $£ 19,280$; flax and hemp fibre, $£ 173,314$; fish, $£ 21,048$; gold bullion, matte, and ore, $£ 514,694$; implements and machinery (agricultural), £2,199 ; machines and machinery, £7,534; meats, $£ 11,503$; milk and cream, £30,269; seeds, $£ 84,809$; silver-bar, ingot, $£ 74,864$; skins and hides, $£ 354,264$; timber, £634,091 ; twine, reaper and binder, $£ 19,141$.
(viii) Papua. Copra, £118,801; gold bullion, £26,535; fibres, flax and hemp, $£ 8,816$; copper ore, $£ 9,510$; india-rubber, $\mathfrak{£ 2 7 , 7 0 4}$.
(ix) South African Union. Bark, tanning, $£ 39,874$; brandy, $£ 6,258$; coal, $£ 27,773$; explosives, $£ 92,407$; gold-bullion, $£ 4,943,296$, contained in matte, $£ 394,550$; maize, £69,127; precious stones, £236,138.
(x) Straits Settlements. Bamboo, clouded, $£ 7,045$; copra, $£ 6,063$; rubber and rubber manufactures, $£ 187,681$; spices, $£ 32,004$; sago and tapioca, $£ 63,268$.
6. Imports Shipped from Foreign Countries.-The imports direct from foreign countries during the year $1918-19$ represented 40.75 per cent. of the total imports, as compared with 29.12 per cent. during the years 1899-1903. Of the total imports into Australia shipped from foreign countries during 1918-19, 66.97 per cent.- 27.29 per cent. of all imports-was from the United States, and 19.86 per cent.- 8.09 per cent. of all imports-was from Japan. Further reference to the increased trade with the United States and Japan will be found hereinafter.
7. Principal Imports the Produce of Foreign Countries, 1918-19.-(i) Austria. Trade with Austria was suspended on the outbreak of war, and has not since been resumed.
(ii) Belgium. Apparel, £196; textiles, $£ 670$; cameos and precious stones, $£ 196$; drugs and chemicals, $£ 236$; glass and glassware, $£ 809$; paper, $£ 2,423$.
(iii) Brazil. Cocoa beans, $£ 4,088$; india-rubber, $£ 153,646$; nuts, $£ 6,216$; tobacco, £3,382; waxes, £3,232.
(iv) Chile. Soda nitrate, $£ 30,704$.
(v) China. Alcoholic liquors, £12,710; apparel and textiles, $£ 341,349$; bamboo, cane, etc.. $£ 9,633$; cotton, raw, $£ 15,025$; drugs and chemicals, $£ 23,314$; fireworks, $\mathfrak{£}, 432$; fish, $£ 21,125$; fruit, $£ 17,230$; ginger, $£ 24,741$; grass straw for hats, $£ 21,218$; rice, $£ 67,862$; nuts, $£ 29,414$; oils, $£ 35,867$; tea, $£ 61,061$; tobacco, $£ 24,895$.

The decline in the value of imports from China during the past twenty years is due to the loss of the tea trade, which now draws its supplies mainly from India and Ceylon.
(vi) Denmark. Ale and beer and spirits, £1,314; rennet, $£ 3,848$; whiting, £1,597.
(vii) France. Apparel and textiles, £912,808; cream of tartar, £162,651; tartaric acid, $£ 16,678$; other drugs and chemicals, $£ 74,348$; fancy goods, $£ 42,780$; jewellery, £19,232 ; liquorice, $£ 830$; musical instruments, $£ 10,746$; oils, essential, $£ 30,901$; pipes, smoking, etc., $£ 76,761$; paper and stationery, $£ 57,196$; perfumery, $£ 13,388$; perfumed spirits and bay rum,' $£ 18,042$; rubber tyres, $£ 84,899$; leather, $£ 952$; machinery and manufactures of metal, $£ 12,200$; musical instruments, $£ 10,746$; seeds, $£ 6,519$; spirits, £46,816; wine, $£ 19,081$.
(vii) Germany.-Trade with Germany was suspended on the outbreak of war, and has not since been resumed.
(ix) Italy. Apparel and textiles-buttons, buckles, \&c., £13,212, gloves, £49,424, hats and caps, $£ 18,259$, piece goods-silk, $£ 164,510$, other, $£ 9,252$, other apparel and textiles, $£ 16,358$; flax and hemp, £14,759; marble and stone, $£ 17,909$; oils-essential, $£ 25,920$; nuts, $£ 28,076$; rubber tyres, $£ 31,464$; cream of tartar, $£ 33,683$; tartaric acid, £95,592 ; wines, $£ 3,291$.
(x) Japan. Apparel-hats and caps, £62,324, gloves, $£ 72,446$, socks and stockings, £105,545, shirts, collars, $£ 91,411$, other, $£ 228,885$, textiles-carpets, matting, $£ 119,205$, piece goods-canvas and duck, $£ 328,315$, cotton and linen, $£ 1,535,770$, silk, $£ 1,861,866$, quilts, etc., $£ 73,941$, other textiles, $£ 306,413$; bags, baskets, etc., $£ 44,663$; brushware, £ 97,551 ; cable and wire, covered, $£ 292,669$; carbide of calcium, $£ 136,161$; chinaware, £207,297 ; earthenware, $£ 60,663$; fancy goods, $£ 235,239$; fibres-cotton waste, $£ 92,019$; fish, $£ 13,957$; furniture, $£ 6,035$, glass and glassware, $£ 207,589$; grass straw for hats, $\mathfrak{£ 6 6 , 9 2 5}$; ores and metal manufactures-electrical appliances, $£ 70,666$, enamelled ware, $£ 47,945$, wire rope, hawsers, $£ 50,385$, other, $£ 377,337$; matches, $£ 226,116$; nuts, $£ 4,833$; oils and waxes, $£ 120,315$; paper, $£ 126,225$; stationery, $£ 51,646$; rice, $£ 459$; spices, $£ 5,072$; sulphate of copper, $£ 25,646$; sulphur, $£ 238,787$; tea, $£ 2,767$; wood and wicker, etc., $£ 119,627$; yarns, $£ 79,884$; tobacco, $£ 15,177$.

Further reference is made in a later page to the imports from Japan.
(xi) Netherlands. Cocoa and chocolate, $£ 1,461$; cameos and precious stones, $£ 59,733$; drugs and chemicals, $£ 7,317$; electrical appliances, $£ 139,820$; paper, $£ 3,681$; spirits, £40,354.
(xii) Netherlands East Indies. Bananas, $£ 10,478$; coffee, raw, £30,256; drugs and chemicals, $£ 22,434$; flax and hemp, $£ 3,308$; hides, cattle, $£ 45,403$; kapok, $£ 184,632$; manganese ore, $£ 7,052$; oils and waxes-China oil, $£ 18,224$, kerosene, $£ 50,520$, paraffin wax, $£ 39,232$, petroleum, $£ 985,017$, residual oil, $£ 77,681$, turpentine substitutes, $£ 22,453$; rubber, crude, $£ 95,927$; rice, $£ 287$; sago and tapioca, $£ 14,521$; seeds, $£ 9,410$; tobacco, £18,442; tea, $£ 341,004$; sugar, $£ 858,881$; spices, unground, $£ 50,728$.
(xiii) New Caledonia. Copra, £11,325; cotton, raw, £10,802; maize, $£ 2,859$; meats, preserved in tins, $£ 10,263$; manganese ore, $£ 7,556$; skins, $£ 29,840$; tallow, $£ 5,712$.
(xiv) Norway. Drugs and chemicals, £27,241; machinery and manufactures of metals, $£ 6,038$; matches, $£ 26,286$; paper, $£ 566,763$; wood pulp, $£ 24,936$.
(xv) Peru. Imports from Peru during 1918-19 amounted to only $£ 1,093$.
(xvi) Philippine Islands. Flax and hemp, £80,165; cigars, £24,501; tobacco, anmanufactured, \&5,813.
(xvii) Russia. Drugs and chemicals, £1,512; furs, £6,958; seeds, $£ 3,287$.
(xviii) Spain. Corks, etc., $£ 43,703$; nuts, $\mathfrak{f 5 4 5}$; olive oil, $£ 9,864$; quicksilver, £3,600; wine, $£ 4,626$.
(xix) Sweden. Cream separators, $£ 153,241$; other machines and machinery, $£ 21,482$; horseshoe nails, $£ 65,167$; primus stoves, $£ 7,757$; manufactures of metals, $£ 25,019$; matches and vestas, $£ 20,625$; timber, $£ 9,900$; paper, $£ 179,615$; wood manufactures, £8,362; wood pulp, £9,129 ; rennet, £11,893.
(xx) Switzerland. Apparel and textiles-trimmings, £536,073, piece goods-silk, £74,796, lace for attire, $£ 189,394$, other, $£ 111,858$; drugs and chemicals, $£ 27,149$; grass straw for hats, $£ 41,584$; machinery and metal manufactures, $\mathbf{£ 6 1 , 8 2 3 \text { ; surgical instru- }}$ ments, $£ 36,674$; talking machines, $£ 4,562$; watches, $£ 150,820$.
(xxi) United States of America. Apparel-boots, shoes, etc., £75,373, corsets, £197,129, furs, dressed, $£ 51,927$, gloves, $£ 198,498$, hats and caps, $£ 68,026$, hosiery and knitted articles, $£ 138,900_{i}$ shirts, collars, etc., $£ 75,877$, socks and stockings, $£ 963,949$; trimmings, $£ 97,937$, other apparel, $£ 164,993$; textiles-floor coverings, $£ 165,120$, piece goods-canvas and duck, $£ 165,032$, cotton and linen, $£ 1,215,444$, other, $£ 324,816$, sewing silks, $£ 139,220$, other textiles, $£ 52,562$; arms, $£ 62,003$; ammunition and explosives, $£ 293,955$; bags, baskets, etc., $£ 40,333$; brushware, $£ 39,415$; cameras, $£ 56,008$; caramel, $£ 86,227$; clocks and watches, $£ 130,205$; cocoa and chocolate, $£ 77,310$; drugs and chemicals, cream of tartar-£290,839, drugs and medicinal preparations, $£ 75,750$, dyes, $£ 54,790$, medicines, $£ 105,974$, other, $£ 461,959$; electrical materials-accumulators, $£ 107,331$, are lamps and carbons, $£ 116,120$, cable and wire, covered, $£ 123,423$; fancy goods, $£ 79,161$; fish, $£ 106,790$; fruit, $£ 69,091$; furniture, $£ 39,447$; glass and glassware, $\mathfrak{f 4 7 7 , 0 2 9}$; india-rubber manufactures, $£ 550,431$; jewellery and precious stones, $£ 57,244$; kinematograph films, £152,042; leather, $£ 458,971$; meats, $£ 97,107$; machines and machinery-agricultural, £284,757, engines, $£ 156,583$, electrical, $£ 374,169$, machine tools, $£ 115,577$, sewing, $£ 294,067$, typewriters, $£ 121,068$, other, $£ 872,123$; metals and manufactures-bolts, nuts, $£ 89,907$, copper, plate and sheet, etc., $£ 116,743$, cutlery, £75,310, iron and steel-bars, ingots, hoops, etc., £256,911, girders, beams, $£ 46,254$, plate and sheet-corrugated, galvanized, $£ 654,250$, galvanized, not corrugated, $£ 350,130$, plain, not galvanized, $£ 439,503$, lampware, $£ 108,403$, nails, $£ 183,113$, pipes and tubes, $£ 270,996$, telephones, $£ 69,596$, tools of trade, $£ 488,505$, wire, $£ 524,785$, other, $£ 1,300,819$; musical instruments, $£ 305,887$; oils, fats, and waxes-benzine and gasoline, $£ 806,387$, kerosene, $£ 658,818$, lubricating oils and greases, $£ 777,562$, waxes, £86,958, turpentine, $£ 115,362$; paints and varnishes, $£ 326,615$; paper-printing, £811,113, wrapping, $£ 1,193,797$, writing and typewriting, $£ 613,067$, other, $£ 503,929$; perfumery, $£ 114,373$; resin, $£ 120,639$; soda-carbonate, $£ 149,676$, caustic, $£ 31,131$, stationery, $£ 320,427$; surgical and dental instruments, $£ 98,637$; talking machines, £87,395; timber, $£ 1,056,108$; tobacco, cigars, etc., $£ 1,527,937$; vehicles-motors and parts, $£ 1,159,554$, other vehicles and parts, $£ 412,780$; vessels, $£ 417,399$; wood and wicker manufactures, $£ 113,620$.

The imports from America are again referred to in a later page.
8. Direction of Exports.-The following tables shew that, prior to the war, a constantly decreasing proportion of Australian exports was being consigned to the United Kingdom. This was not entirely due to the relatively smaller purchases of Australian produce by the United Kingdom, but was in some measure the effect of an increasing tendency towards direct shipment of wool, skins, etc., to the consuming countriesnotably to Belgium, France, and Germany-instead of distributing the trade through London as formerly. The figures given below, however, do not, even for the later prewar years, denote the total purchases by European countries of Australian produce, as large quantities were still distributed from London. It should be noted, too, that the exports to India and Ceylon consisted largely of gold shipped on London account, and which was, therefore, virtually an export to the United Kingdom. The reservation to the United Kingdom of the first call on our primary products increased the proportion
of our exports which was shipped to that country during the war period, and, to a greater extent, the proportion shipped to other parts of the Empire, notably to Egypt and to India.

TRADE OF THE COMMONWEALTH WITH VARIOUS COUNTRIES, 1899 T0 1918-19.
Exports (including Bullion and Specie).

## § 10. Effects of Prices on the Values of Exports.

1. Significance of Price in Totals.-In comparing the value of exports from, and also imports into, any country for a series of years, the question naturally arises as to how much any variation in the aggregate value is due to fluctuations in prices, and how much to increase or decrease of actual quantities, for, in aggregates expressed only in valuethe only possible method when the commodities differ-the two sources of variation are confused.

The scheme of comparison adopted has been to take an annual average, for an extended period, of the quantities of all such articles of export as are recorded by quantity, and to apply to the average quantities so obtained the average prices in each year. The quantities used to produce the following results are the averages for $19 \frac{1}{2}$ years, viz., from 1st January, 1897, to 30th June, 1916, which it is considered may be taken as representing
the general quantitative composition or norm of the exports from the Commonwealth. The results published in issues of this work prior to No. 12, 1919, were ascertained by applying to the quantities exported during each year the average price per unit ruling in some year arbitrarily taken for the purposes of comparison as the basic year. The advantage of the method now adopted is that the results are comparable throughout, whereas under the method previously followed each year was comparable with the basic year only.
2. Effect of Prices.-The following table shews the values of exports as actually recorded in each year, together with the values computed on the assumption that the prices of 1901 were maintained. The table also shews the yearly "price-levels" based upon the results so ascertained.

This table obviously furnishes a measure of the influence of prices on the value of exports of each year since 1901. Column IV.-values computed on 1901 pricesrepresents the volume of exports (less specie and gold bullion), expressed in the common denomination of value, and from the figures therein it will be seen that, had the prices of 1901 remained constant, the value of the exports of merchandise during the year 1918-19 for example, would have been $£ 52,489,805$ only, instead of $£ 106,711,774$ - the value actually recorded. The difference between these amounts ( $£ 54,221,969$ ) results from a rise of 103.3 per cent. (i.e., from 1,000 to 2,033 ) in the price of commodities for the period intervening between 1901 and 1918-19.

It will be seen from the column of "Price-Levels" that prices as indicated by the Commonwealth exports rose steadily from the beginning of the decade to the year 1907. The financial crisis in the United States of America caused a pronounced fall in the prices of 1908. Owing to the large proportion of the aggregate value of exports represented by wool and wheat, any change in the price of these commodities has a marked effect on the index-numbers for the total group of exports, and it is to their influence that the fall of prices in 1911 is mainly due.

## EFFECT OF PRICES ON THE VALUE OF COMMONWEALTH EXPORTS, AND EXPORT PRICE LEVELS FOR THE PERIOD 1901 TO 1919-20.

| Year. | Exports of Specie and Gold Bullion. | Other Exports. |  | Total Exports (including Specie and Gold Eullion). |  | PriceLevels.* Year 1901 $=1,000$. |

| 1916-17 | . | 1,726 | 2,131 | 1,690 | 1,650 | 1,357 | 1,965 |
| 1917-18 | $\cdots$ | 1,954 | 2,250 | 1,624 | 1,760 | 1,401 | 2,084 |
| 1918-19 | . | 1,864 | 2,166 | 1,855 | 1,692 | 1,775 | 2,033 |

The high index-numbers for mineral produce during 1906 and 1907 reflect the world's prices for that period, when prices registered for all the principal industrial metals touched a point higher than any previously recorded for many years.

The lower index for agricultural produce exported during 1916-17 is due to the lower price registered for wheat, viz., 4 s . 10 d . per bushel as against 5 s .6 d . per bushel for 1915-16.

## § 11. External Trade of Australia and other Countries.

1. Essentials of Comparisons.-Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the scheme of record, are sensibly identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance, and charges may be added thereto. Or again, the values of imports and exports in the one may be declared by merchants, whereas in the other they may be the official prices, fixed from time to time by a commission constituted for the purpose. The figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. Including bullion and specie, the transit trade of Belgium, for example, represented, prior to the war, approximately 40 per cent. of the gross trade recorded; of Switzerland, 45 per cent.; of France, 20 per cent.; and of the United Kingdom, 15 per cent.; whereas in Australia the same element represents, normally, about 4 per cent., and in New Zealand even less.
2. "Special Trade" of Various Countries.-Special trade may be defined, agreeably to the practice of the British Board of Trade, as ( $a$ ) imports entered for consumption in the country (as distinguished from imports for transhipment or re-export) and (b) exports of domestic products.

## TRADE OF VARIOUS COUNTRIES (IMPORTS FOR HOME CONSUMPTION AND EXPORTS OF DOMESTIC PRODUCTS, INCLUDING BULLION AND SPECIE) FOR LATEST AVAILABLE YEAR.

(a) Excluding Bullion and Specie.

In the above table the figures relate, as nearly as is possible, to imports entered for consumption in the various countries quoted, and to exports of their domestio products. It is to be noted, however, that these figures do not unequivocally denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production, and further, the statistical records of many countries do not distinguish between bullion and specie imported for the use of the particular country (home consumption) and the amount in transit, nor between the exports of that produced within the country and that re-exported. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest.
3. External Trade as a Measure of Prosperity.-External trade is not necessarily a measure of the prosperity of a country. It is, for example, obvious that the external trade of a community depends not only upon the aggregate of its requirements, but also upon the extent to which it fails to supply requirements from its own resources. A community largely self-contained, for example, may have but a small external trade per head, and yet, by virtue of its capacity to produce and manufacture its own raw material, may
actually enjoy greater prosperity and a higher standard of living than another country whose external trade per head is much greater. The same observation applies equally to comparisons of the trade of the same country at different periods. A young country, the industries and export trade of which are mainly connected with raw or natural products, may, for example, through internal development, find the growth of its external trade diminishing per head of population without necessarily suffering any real diminution in the well-being of its people. In this regard it is interesting to contrast the trade per head of say, Belgium, New Zealand, and the United States of America. Prior to the war trade per unit of population for any year was greatest in Belgium ( $£ 48$ 18s. 1d. in 1912), with New Zealand next ( $£ 41 \mathrm{l} 4 \mathrm{~s} .3 \mathrm{~d}$. ), whereas for the United States the trade was only $£ 90$ s. 8d. per inhabitant. Belgium and New Zealand represent conditions almost directly opposite to one another in the scheme of industrial development, yet the trade per head of each was abnormally high in comparison with that of most other countries. The large trade of Belgium was attained by the export of the products of highly organised manufacturing industries, based on the supplies of coal and iron within the country, in exchange for the raw materials for those industries and for food. In New Zealand the circumstances are reversed, inasmuch as in that country the energies of the people are mainly applied to primary industries, the produce of which, being largely in excess of local requirements, is exported in exchange for manufactured goods. The relatively small trade per head of population of the United States, as compared with Belgium or New Zealand, does not indicate that the people of the United States are in an inferior condition, but rather that their industries are more nearly balanced, with the result that a large proportion of the requirements of the nation is supplied from within its own territory, and consequently a smaller foreign trade is sufficient to supply the fewer remaining wants of the people, or, in other words, it indicates that as a nation the United States is more nearly self-contained.

The small foreign trade per inhabitant of Japan, Spain, and Portugal is, undoubtedly, due in some measure to a lower standard of living, but to what extent this factor is responsible, and how much is due to the oapacity to supply all kinds of material wants from their own resources, could be ascertained only from a consideration of the general social and industrial conditions prevailing in each country. It is further obvious that circumstances may arise when enlargement of both imports and exports is actually a consequence of temporary economic difficulties. For example, in 1903, owing to shortage in the local supply, it became necessary to import wheat and flour into Australia to the value of $£ 2,556,968$, and to meet the charges for this by equivalent exports, the effect, considered per se, being to enlarge both. In this case the increase is not an evidence of prosperity. Even more pronounced instances of the same nature are furnished by the post-war trade figures for the United Kingdom and some European countries as shewn in the foregoing table. The depletion of stocks during the war period made it necessary to import larger quantities of essential goods. The effect of the larger imports was accentuated by the higher prices due to the combined effects of the scarcity of goods and inflated currency. The resultant large increases in the recorded value of the trade cannot, under such circumstances, be taken as an indication of greater prosperity.

## § 12. Trade of the United Kingdom with Australia, compared with Competing Countries.

1. Proportion of Trade from United Kingdom and Competing Countries.-The failure of the United Kingdom to maintain the position formerly held in the import trade of Australia has been a matter of more than ordinary interest for some years. Since 1908, a permanent resident Commissioner, appointed by the British Board of Trade, has been established in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From the 8th August, 1907, the Commonwealth Customs Tariff have provided special rates in
favour of goods from the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market. The percentages given in the following table shew the proportions of the imports into Australia from the United Kingdom, and from other countries mentioned, during each of the years 1886 to 1918-19:-

## PROPORTION OF COMMONWEALTH IMPORT TRADE FROM VARIOUS COUNTRIES, 1886 T0 1918-19.

In order to draw accurate conclusions from the above table, however, special attention must be given to the nature of imports from the United States, since the imports from that country have in some years been increased by imports of breadstuffs, a trade in which the United Kingdom could not participate. The years affected by the imports of breadstuffs were 1886, 1889, 1896, 1897, 1903 and 1914-15. Increased imports of such items as kerosene oil and timber also tend to increase the proportion of imports from the United States without any prejudicial effect on the trade of the United Kingdom. Similar modification is not necessary in regard to Germany, as the nature of the imports from that country was substantially the same as from the United Kingdom. The inclusion of specie and bullion, which have been received mainly from New Zealand and other British possessions, also obscures to some extent the essential facts. Nevertheless the figures presented indicate general tendencies. It will be noticed that although in the earlier years under review the proportion of imports which were shipped from the United Kingdom declined in a very marked degree from 73.37 per cent. in 1886 to 61.85 per cent. in 1899 , from the latter year to the outbreak of war the proportion has been well sustained at about 60 per cent. of the whole.

It has already been pointed out in this chapter that, prior to the year 1905, imports into the Commonwealth were recorded only against the country whence they were directly imported. Although the values of dircet imports do not afford satisfactory data, it is necessary for any comparison extending further back than 1905 to use such figures. These figures are unsatisfactory on account of the varying proportions of indirect trade.

In order to furnish a comparison free from such trade as, from its nature, is not open to the United Kingdom, the following table, shewing the direct imports during the years 1886, 1906, 1913, and 1918-19 of the principal classes of goods which enter largely into the trade of the countries named, has been prepared. It may be mentioned that the imports for the year 1886 were extracted from the "Statistical Registers" of the several States for a comparison-published in a previous issue-with the year 1906, and as their compilation involved a large amount of labour they are again utilised for comparison with the later years.

PRINCIPAL DIRECT IMPORTS INTO THE COMMONWEALTH FROM THE UNITED KINGDOM, GERMANY, AND THE UNITED STATES, 1886, 1906, 1913, AND 1918-19.

The foregoing table shews that the share of the United Kingdom, as indicated by the records according to "Country of Shipment," in the trade of those classes of goods enumerated-representing about 90 per cent. of the total imports from that country-has declined from 89.31 per cent. of the whole in 1886 to 48.60 per cent. in 1918-19. The value of these imports from the United Kingdom has increased from $£ 20,489,153$ in 1886 to

GRAPH SHEWING VALUES OF TOTAL TRADE, EXPORTS, AND IMPORTS OF COMMONW EALTH, 1826 TO 1918-19.

(See pages $5 \overline{7}$ and $5: 3$. )
Explanation of Graph.- The base of each square represents an interval of five years, and the rertical height five million pounds sterling for Imports and Exports, and ten million pounds sterling for Total Trade.

GRAPH SHEWING THE VALUES PER HEAD OF POPULATION OF TOTALTRADE, EXPORTS, AND IMPORTS OF COMMONWEALTH, 1826 TO 1918-19.

(See pages 577 and 578 .)
Explanation of Graph.-The base pf each square represents an interval of five years, and the vertical height five pounds per head of the population.
only $£ 34,631,891$ in $1918-19$, or by 69.03 per cent., while the total value of similar imports had increased from $£ 22,937,818$ to $£ 71,265,376$, or by 210.69 per cent. The figures for the last five years, however, are of little value for comparison with earlier periods, as it was not to be expected that, under the circumstances, the manufacturers of the United Kingdom would maintain their pre-war share of the Australian trade during the war period.

The following table gives an analysis of the imports from 1908-12 to 1918-19, according to the countries of origin of the goods.
IMPORTS INTO THE COMMONWEALTH OF PRODUCTS OR MANUFACTURES OF the united kingdom, france, germany, Japan, and the united STATES OF AMERICA DURING THE YEARS 1908-12 T0 1918-19.

As already stated in connexion with the preceding table, the imports from the United Kingdom during the last few years were, obviously, so affected by the war that the trade of that period affords no indication of what the tendencies will be when international trade again finds its readiest channels.

Apart from the decline of imports from the United Kingdom and the collapse of the trade with Belgium and Germany in consequence of the war, the most striking feature of the figures given above, perhaps, is the increased proportion of the trade which has fallen to the United States and to Japan. It may be mentioned here that the value of the imports from the United States and from Japan during the later year are somewhat understated, inasmuch as the values have been converted from the currencies of those countries on the basis of a par of exchange, whereas the actual exchange rates were considerably in their favour. This method of conversion, which is applied to values for Customs duty also, is an advantage to Japan and to the United States in the Australian market. In the latest pre-war year (1913), the share of the United States in the "competitive" groups was $£ 5,946,441$, or 10.99 per cent., whereas in $1918-19$ it was $£ 18,818,527$, or 26.41 per cent. The following are some of the principal lines in which United States' sales to Australia during 1918-19 were increased over those of 1913, and the amount of such increases :-Cocoa and chocolate, and confectionery, £132,386; potable spirits, £13,005; apparel and textiles, £3,480,540; mixed metals-brass, bronze, \&c., $£ 27,167$; iron and steel unmanufactured or partly manufactured, $£ 151,757$; manufactured metals and machinery (including vehicles), £4,828,172; glass and glassware, $£ 443,383$; indiarubber and manufactures thereof,
 and stationery, $£ 2,038,654$; fancy goods, $£ 93,791$; jewellery, $£ 48,916$; drugs and chemicals, $£ 1,079,369$; ammunition and explosives, $£ 242,022$; brushware, $£ 27,034$; electrical materials, $£ 315,086$; pianos and parts thereof, $£ 246,448$; paints and varnishes, $£ 245,629$; ships, $£ 417,399$; talking machines, $£ 86,457$; yarns, $£ 36,493$.

Although the value of the imports of competitive goods from Japan is much less than from America, the rate of increase has been far greater-from $£ 683,437$ in 1913 to $£ 6,833,712$ in 1918-19, equal to 900 per cent. The classes of goods chiefly responsible for this increase and the amount of the increase due to each are as follows:-Apparel and textiles, $£ 4,311,318$; metal manufactures and machinery, $£ 538,732$; china and porcelain ware, £197,396; earthenware, £57,895; glass and glassware, £199,324; paper, $£ 122,893$; stationery, $£ 44,622$; fancy goods, $£ 221,264$; optical, surgical, and scientific instruments, $£ 26,418$; sulphur, $£ 158,174$; brushware, $£ 79,175$; matches, $£ 225,746$; electric cable and wire, covered, $£ 292,669$; cotton waste, $£ 85,705$; oils in bulk, $£ 64,375$; leather and rubber manufactures, $£ 20,506$; yarns, wool, $£ 78,884$.
2. Preferential Tariff.-The Tariff Act of 1908 provided preferential tariff rates in favour of goods produced or manufactured in the United Kingdom. Subsequent amendments of the Tariff have extended the list of articles to which the preferential rates apply. In the schedule submitted to Parliament on the 3rd December, 1914, the extension of the number of preferential rates was very material, and was accompanied in many instances by an increase of the margin in favour of the United Kingdom.

This favorable treatment of the United Kingdom was again extended in both direc. tions by the Tariff of the 25 th March, 1920, which also included a new feature of Australian Tariffs in the form of an Intermediate Tariff. In submitting the schedule to Parliament, the Minister for Trade and Customs made the following statement of the object of the Intermediate Tariff :--" "
the Minister is empowered under the Bill to enter into reciprocal arrangements with other Dominions of the British Crown. The Minister will be able, if we can arrange a satisfactory reciprocal agreement, to extend to other Dominions on individual items the British preference rate, or the intermediate rate, or, it may be, the general rate. Such agreements will be subject to the ratification of Parliament. The provision simply means that if any of our sister self-governing Dominions desires to enter into reciprocal trade relationships with us, the Minister, with the British Preference Tariff, the Intermediate Tariff, and the General Tariff before him, may bargain with the sister Dominion and come to an agreement, which, as I say, must subsequently be ratified by Parliament.

There is a provision of a somewhat similar character in regard to other countries than the Dominions, the only difference being that the Minister is empowered to extend to countries other than the Dominions only the Intermediate Tariff; that is to say, in entering into such negotiations, he is precluded from offering to those countries what we might term, for the purposes of this Bill, the Empire rate. He is confined in his negotiations with these other countries to the Intermediate Tariff."

Eitheite the Uüūn of Sulith Africa has been the oniy British Dominion with which the Commonwealth has had a reciprocal tariff arrangement. The Commonwealth

Customs Tariff (South African Preference) Act, No. 17 of 1906, and subsequent amending Acts have provided preferential rates of duty to be applied to certain imported goods "when those goods are imported from and are the produce or manufacture of any of the British South African Colonies or Protectorates which are included within the South African Customs Union."

On the introduction of the preferential treatment of British goods, it was required that British material or labour should represent not less than one-fourth the value of such goods. From the lst September, 1911, it has been required, in regard to goods only partially manufactured in the United Kingdom, that the final process or processes of manufacture shall have been performed in the United Kingdom, and that the expenditure in material of British production and/or British labour shall have been not less than one-fourth of the factory or works' cost of the goods in the finished state.

Number 8 and previous editions of this Year Book contained exhaustive analyses of the imports into the Commonwealth, for the purpose of measuring the effect of the preferential treatment of British goods. The method adopted was to contrast the relative proportion of the trade supplied by the United Kingdom in respect to goods subject to Preferential Tariff rates with the proportion of goods of the same class supplied in unrestricted competition under the General Tariff. The most satisfactory data for the purpose were furnished by two classes of goods, viz., "Apparel and Textiles" and "Machinery and Manufactures of Metals." Under the existing Tariff, preferential treatment has been so extended as to cover practically all goods of these classes, and consequently the basis of comparison no longer exists. Prior to the Tariff of 1914, just about one-half of all imports and about 60 per cent. of imports from the United Kingdom were affected by the Preferential Tariff, whereas under the Tariff of 1914 nearly 80 per cent. of all imports, and about 90 per cent. of imports of United Kingdom origin were affected by the Preferential Tariff.
3. Preferential Tariffs of the British Empire.-In the Official Year Book No. 11, pages 601-3, will be found an outline of the systems of Preferential Tariffs within the British Empire and the Tariff arrangements between British Dominions or Colonies and Foreign Countries, together with a list of countries with whom Great Britain had concluded commercial treaties for "Most-Favoured-Nation" treatment.

## § 13. Rates of Duty in Australia and other Countries.

The following table shews the proportion of the total imports of merchandise entered for "home consumption" free of duty, in the undermentioned countries, and also the equivalent ad valorem rates of duty charged :-

PROPORTION OF FREE GOODS AND RATES OF IMPORT DUTY.

| Particulars. | Australia. |  |  | Canada. <br> (a) | New <br> Zealand. | U.S. of America. |

| Total merchandise dutiable and free | 17.59 | 16.42 | 12.80 | 17.20 | 14.92 | 6.30 |
| Customs duty per head | $\begin{array}{ccc} £ & g . & d . \\ 1 & 15 & 10 \end{array}$ | $\begin{array}{ccc} \text { £ } & 8 . & d . \\ 2 & 12 & 8 \end{array}$ | $\begin{array}{ccc} \mathfrak{f} & 8 . & d . \\ 2 & 6 & 8 \end{array}$ | $\begin{array}{ccc} £ & 8 . & d . \\ 3 & 13 & 6 \end{array}$ | $\begin{array}{ccc}£ & 8 . & d . \\ 3 & 0 & 7\end{array}$ | $\begin{array}{llll} \mathbf{E} & 8 . & d . \\ 0 & 6 & 11 \end{array}$ |

[^11]imports are free of duty, whereas in the Commonwealth, about 38 per cent. only of the total imports were exempt from taxation during the year 1918-19. A considerable restriction of the free list in this country was necessary to raise the revenue required by the exigencies of the war, though even prior to the war (in 1913) free goods represented only 42.30 per cent. of the total imports, while in New Zealand they comprised 52 per cent.

The comparatively large percentage of free goods in the imports of 1913 was not entirely the effect of Tariff changes, but was in some measure due to the inclusion in the free imports of that year of warships to the value of $£ 2,495,000$ and of mercantile ships to the value of $£ 1,500,000$. Imports of ships to such a value in any one year are, of course, unusual.

The relatively low average ad valorem rate of duty collected in 1918-19 was due to higher prices of goods subject to specific rates. For instance, in 1913 a duty of 14s. per gallon represented an ad valorem equivalent of 215 per cent. on a gallon of bulk whisky valued at 6 s . 6 d . per gallon, whereas in 1918-19 the higher duty of 25 s . per gallon represented only 108 per cent. on a cost of 23 s . 4 d . per gal.

VALUE OF GOODS (EXCLUDING BULLION AND SPECIE) ENTERED FOR CONSUMPTION IN THE COMMONWEALTH, AND DUTY COLLECTED THEREON, 1918-19.

| Classification of Imports. | Value Entered for Consumptiou. |  |  | Duty Collected, less Refunds. | Equivalent ad ralorem Rate per cent. on- |  |

[^0]:    * Although cost of freight and insurance has risen materially in consequence of the war, no further addition has been made to the value of imports, and cognisance should be taken of this fact in regard to imports during 1914-15 and subsequent years referred to throughout this section.

[^1]:    * Prior to June, 1914, the figures relating to debt were six months in advance of the trade figures; since that date the periods to which the figures relate are identical.
    + For individual years 1826 to 1865 see Official Year Book, No. 7, and previous issues.
    I See note to the following table.
    \& Complete information relating to loans raised or redeemed in London during 1919-20 is not available, but it is known that the amount of new loans was not sufficient to make any material modification of the excess of exports as recorded. The trade figures for 1919-20 are subject to slight alteration.

[^2]:    - Subsequent to 1897 these figures relate to moneys raised outside of Australia only. Prior to 1893 the amounts raised locally were insignificant, but it is probable that the amount of new debt raised during $1892-6$ is somewhat overstated. Loans raised by Local Government Bodies are not included. Loans for redemption purposes are not Included, nor are loans from the Imperial Government for war
    

[^3]:    * Norway and Sweden combined for these years.

[^4]:    - Norway and Sweden combined for these years. † Includes Egypt, which prior to 1914-15 was included with " Other Foreign Countries.

[^5]:    * Annual average for the quinquennial period.

[^6]:    * Annual average for the quinquennial period.

[^7]:    * Includes gold rontained in matte.
    + Includes gold contained in matte up to the year 1906. The value of gold contained in matte exported during 1907 was $£ 350,601 ; 1908$, £761,100; 1909-13, £477,906; and 1914-15-1918-19, £11£,850. $\ddagger$ Iacludes silver contained in matte. The value of silver contained in matte exported during 1904-1908 was $£ 267,638$; 1909-1913, £281,740 ; and 1914-15-1918-19, £214,278.

[^8]:    * These are index-numbers for the total group of exports, excluding specie and gold bullion.
    $\dagger$ Preliminary tigures, subject to alteration.

[^9]:    * Mainly pig iron and bar and rod iron. Gold and silver bullion not included.

[^10]:    * Mainly pig iron and bar and rod iron. Gold and silver bullion not included.

    Note.-Figures for the years 1905-10 will be found in previous issues.

[^11]:    (a) Including war tax, $£ 9,190,532$. (b) Unmanufactured tobacco is admitted to Canada free of duty. (c) Exclusive of Maoris, and residents of Cook and other Pacific lslands. (d) Tobacco is admitted free of Customs duty from the Philippine Islands.

    The figures given for the year ended 30th June, 1906, represent the results of the last full year of operation of the tariff of 1902.

    From the results given in the above table, it will be seen that the scheme of taxation, by means of import duties, varies materially between the countries named. In Australia and Canada, taxation is spread more widely over imported commodities than in New Zealand or the United States of America. In the latter country, 73.91 per cent. of all
