CHAPTER XVI.

PASTORAL PRODUCTION.

§ 1. Initiation and Growth of Pastoral Industry.

1. Early Statistics.—The live stock which Captain Phillip brought with him when establishing the first settlement in January, 1788, is stated to have comprised seven horses, six cattle, twenty-nine sheep, twelve pigs and a few goats. Later in the same year in a letter from Captain Phillip to Lord Sydney, then Secretary of State for the Colonies, an enclosure sets forth the number of each kind of live stock in the colony on 1st May, 1788. These details together with those of later enumerations are shown in the following table:—

LIVE STOCK: AUSTRALIA.

Date.	Horses.	Cattle.	Sheep.	Pigs.	Goats.
1st May, 1788 1oth November, 1791 1st July, 1794 15th June, 1795 1st September, 1796 15th August, 1800	 7 4 (b) 20 (c) 49 57 203	7 18 40 176 227 1,044	29 57 576 832 1,531 6,124	74 37 (a) (a) 1,869 4,026	19 (a) 522 985 1,427 2,182

(a) Not stated.

(b) Excluding three asses.

(c) Excluding seven asses.

The return for the year 1788 includes, in addition to poultry, five rabbits.

- 2. Subsequent Statistics.—The statistical returns of live stock in Australia subsequent to the year 1800 referred mainly to those in possession of the Government, omitting those owned by individuals. Doubtless the growth of population, the expansion of the area settled and the increase of private ownership made it difficult in those early times to secure accurate returns. The figures continued to be somewhat defective up to 1860, but from that year onwards fairly complete information is available for most of the States. At the present time statistics of live stock are collected annually in all the States principally through the agency of the police, but in the years 1885 to 1888 inclusive, and 1893 to 1895 inclusive, these particulars were not collected in South Australia, and similar gaps occur in the Victorian records for the periods 1895 to 1899 inclusive and 1901 to 1903. In order to obtain totals for Australia for these years the missing numbers have been supplied by interpolation. The results so obtained probably differ only slightly from the actual numbers for the respective years.
- 3. Increase in Live Stock.—Particulars concerning the numbers of each of the principal kinds of live stock in Australia at decennial intervals from 1860 to 1930, and from 1931 onwards in single years are given in the following table, and are shown continuously on the graph on page 418.

During the seventy-nine years covered by the table the live stock of Australia increased considerably, horses, 294 per cent.; cattle, 230 per cent.; sheep, 493 per cent.; and pigs, 314 per cent. The average annual increases which these aggregates represent are as follows:—Horses, 1.75 per cent.; cattle, 1.52 per cent.; sheep, 2.28 per cent.; and pigs, 1.82 per cent.

LIVE STOCK: AUSTRALIA.

	31st Dec	ember—		Horses.	Cattle.	Sheep.	Pigs.

1937	• •	• •		1,746,513	13,078,356	113,372,518	1,100,082
1938				1,724,056	12,861,781	111,057,832	1,155,591
1939				1,698,797	13,080,180	119,305,391	1,455,341

4. Fluctuations.—The increases referred to, however, have not been continuous marked fluctuations having taken place during the period, mainly on account of droughts which have from time to time left their impress on the pastoral history of Australia. These occurred in 1868, 1877, 1883-4, 1892, 1893, 1895, 1901-2, 1912, 1914, 1918, 1919, 1922-23, 1925-26, 1927-28, 1929-30 and 1940-41.

The years in which the number of live stock attained their maxima are as follows:—Horses, 1918, 2,527,149; cattle, 1921, 14,441,309; sheep, 1939, 119,305,391; and pigs, 1939, 1,455,341.

5. Live Stock in Relation to Population.—The number of each kind of live stock per head of the population of Australia has varied during the past seventy-nine years as shown in the following table:—

LIVE STOCK PER HEAD OF POPULATION: AUSTRALIA.

Year.	Horses.	Cattle.	Sheep.	Pigs.	Yea	r.	Horses.	Cattle.	Sheep.	Pigs.
1860 . 1870 . 1880 . 1890 . 1900 .	0.43 0.48 0.48 0.43 0.49	3.45 2.60 3.37 3.17 2.29 2.65 2.49	17.58 25.24 27.87 31.06 18.75 22.16 15.11	0.31 0.33 0.37 0.28 0.25 0.23 0.14	1930 1934 1935 1936 1937 1938		0.28 0.27 0.26 0.26 0.26 0.25 0.24	1.81 2.11 2.06 1.98 1.91 1.87	17.07 16.97 16.13 16.20 16.59 16.11	0.17 0.17 0.19 0.18 0.16 0.16

6. Live Stock in Retation to Area.—The number of live stock per square mile in the several States and Territories of Australia are given in the following table:—

LIVE STOCK PER SQUARE MILE, 1939.

St	ate or T	erritory.			Horses.	Cattle.	Sheep.	Pigs.
New South Wales			•••	•••	1.73	8.93	175.72	1.46

Australia-				• •.	0.57	4.40	40.11	0.49

^{7.} Minor Classes of Live Stock.—Excluding Victoria, where the details are not available, the number of minor classes of live stock returned for 1939, were as follows:—Goats, 85.458; camels, 2,334; and mules and donkeys, 11,275. Of these, goats were most numerous in Queensland, and camels, mules and donkeys in Western Australia. In the raising of goats, some attention has been devoted to the angora goat and its product (mohair), and 5,498 angora goats are included in the number of goats shown above. Of these, 1,794 were in New South Wales, 1,000 in Queensland, 2,443 in South Australia, and 261 in Tasmania.

8. Net Exports of Principal Pastoral Products.—The quantities by which the exports of the principal pastoral products of Australia exceeded the imports for the years 1935-36 to 1939-40 were as follows:—

NET EXPORTS OF PASTORAL PRODUCTS: AUSTRALIA.

9. Value of Pastoral Production.—(i) General. Particulars of the gross, local and net values of pastoral production for each State are shown in the following table for 1939-40. Fuller details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXVII. "Miscellaneous". Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

NOTE.—The minus sign (-) signifies net imports.

10. Consumption of Meats.—Particulars of the per capita consumption of meat in Australia are shown in the following table, together with details for certain other countries. The figures have in each case been obtained from official sources, but it is uncertain whether they have been compiled on the same basis.

The average consumption in Australia is slightly lower than that of New Zealand. but it is greatly in excess of that of Canada, Great Britain and the United States of America. Compared with Australia the consumption of beef, mutton and lamb in these countries is relatively small, but pork consumption is greatly in excess of the average recorded for both Australia and New Zealand.

The world's supply of beef, mutton and lamb is obtained chiefly from countries situated in the Southern Hemisphere of which Argentine Republic, Australia, New Zealand and Uruguay are the main contributors. Argentine Republic furnishes the largest export of beef and New Zealand that of mutton and lamb, while Australia occupies second place in both commodities. Supplies of pork and pork products are largely drawn from countries in the Northern Hemisphere. It is to be expected, therefore, that the per capita consumption of beef, mutton and lamb will be greatest in the southern producing countries, and pig meat in the northern.

ESTIMATED PER CAPITA CONSUMPTION OF MEAT: AUSTRALIA AND OTHER COUNTRIES.

§ 2. Horses.

- 1. Suitability of Australia for Horse-breeding.—From the earliest times the suitability of the climate and pastures of Australia for the production of serviceable breeds of horses has been fully recognized. By the importation of high-class sires, and the careful selection of breeding mares, these natural advantages have been utilized to the fullest extent in breeding all classes of horses. As a consequence of this combination of advantages, the Australian horse, whether of the heavy draught, medium weight, or light saddle variety, compares more than favourably with the product of other lands. The Australian horse is highly regarded by the military authorities in India and considerable numbers are purchased each year for remount purposes. Owing to the mechanization of the Army the demand is not so great as in former years.
- 2. Distribution throughout Australia.—The States of New South Wales, Queensland and Victoria together depasture more than 76 per cent. of the total number of horses in Australia. In the following table figures are given for each State and Territory during each of the last five years:—

HORSES: NUMBER.

318t Dec.—	N.S.W. (a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T. (a)	Total.
1935 1936 1937 1938 1939	545,829	359,106 343,828	440,568 445,916 444,521		155,177 151,067 143,674	30,626 30,971 31,578 30,458 29,605	35,152 31,056 31,662 33,191 32,721		1,764,430 1,762,750 1,746,513 1,724,056 1,698,797

The number of horses attained its maximum in Australia during 1918, when a total of 2,527,149 was recorded; in the same year the United States of America made its highest recording, and Canada reported likewise in 1921. The number in Australia has declined considerably since 1918 as the result of the development in motor transportation and the increasing use of petrol-driven cultivating and other machinery on farms.

During the past five years, however, the rate of decline has slackened slightly and, with the introduction of rationing of motor spirit as a war-time measure, it is expected

that this decline will be further arrested during this restriction.

The number of horses in Australia from 1860 onwards may be obtained from the graph on page 418.

3. Proportions in the Several States and Territories.—The percentages of the number of horses in the several States and Territories on the total for Australia for 1939 were:—New South Wales, 31.49; Victoria, 19.20; Queensland, 26.19; South Australia, 11.19; Western Australia, 8.19; Tasmania, 1.74; Northern Territory, 1.93; and Australian Capital Territory, 0.07 per cent.

The percentages in the various States have remained fairly constant during the last quinquennium.

- 4. Relation to Population.—In proportion to population, horses are much more numerous in the Northern Territory than in any other of the principal divisions of Australia. Queensland is next in order, while the Australian Capital Territory has the smallest number of horses per head. The number per head of population has declined in all the statistical divisions since 1927. For the year 1939 the relative numbers were:—New South Wales, 0.20; Victoria, 0.17; Queensland, 0.44; South Australia, 0.32; Western Australia, 0.30; Tasmania, 0.12; Northern Territory, 5.60; Australian Capital Territory, 0.11; and Australia, 0.25.
- 5. Comparison with other Countries.—The latest particulars of the number of horses in the leading horse-breeding countries of the world are as follows:—

HORSES: NUMBER IN PRINCIPAL COUNTRIES.

Country.	Year.	Number of Horses (,000 omitted).	Country.	Year.	Number of Horses (,000 omitted).
U.S.S.R. (Russia) U.S.A. Argentine Republic Brazil China Poland Germany Canada France India (British and Native) Rumania Mexico Manchuria Australia Japan Yugoslavia United Kingdom Colombia Hungary Italy Union of South Africa Czechoslovakia Dutch East Indies	1938 1938 1937 1935 1935 1938 1938 1938 1936 1937 1936 1938 1938 1938 1938 1938 1938 1938 1938	17,500 10,800 8,527 6,052 4,080 3,886 3,443 2,821 2,692 2,380 2,167 1,888 1,840 1,699 1,432 1,265 1,100 972 814 791 778 704 671	Turkey Uruguay Sweden Cuba Spain Denmark Lithuania Bulgaria Chile Eire Peru Haiti Latvia Bolivia Thailand Greece Netherlands New Zealand Belgium Austria Estonia French Morocco Paraguay	1938 1930 1938 1934 1938 1938 1936 1936 1936 1938 1937 1938 1937 1938 1938 1938 1938 1938 1938 1938 1938	651 623 617 569 568 555 558 532 528 442 432 400 400 390 386 380 372 312 278 246 219 192 186

- 6. Oversea Trade in Horses.—(i) Exports. Australia's export trade in horses is far below that of earlier years. During the period 1901-5 the average number exported was over 18,000, whereas during the last five years the figure was 3,442. The total number of horses exported during the latter period amounted to 17,208, valued at £640,083, equal to an annual average of 3,442 valued at £128,017. The average export price was £37 3s. 10d. The horses exported to India, where they are largely used for army remounts, numbered 2,607 or 76 per cent. of the average exports for the quinquennium.
- (ii) Imports. The number of horses imported into Australia is comparatively small, consisting mainly of valuable stud animals from the United Kingdom and racehorses from New Zealand. The average value per head of the horses imported during the last five years was £A494. The average number imported per annum was, however, only 281, and the average annual value, £138,825. The following table gives the imports, exports and net exports of horses during each of the years from 1935-36 to 1939-40:—

HORSES: IMPORTS AND EXPORTS, AUSTRALIA.

ŀ		Imp	orts.	Exp	orts.	Net Exports.	
Year.		No.	Value.	No.	Value.	No.	Value. (α)
1935-36 1936-37 1937-38 1938-39		35 ² 35 ² 273 238 190	£ 132,645 180,686 154,912 125,192 100,688	4,135 5,026 3,822 2,532 1,693	£ 136,118 171,301 138,636 113,934 80,094	3,783 4,674 3,549 2,294 1,503	£ 3,473 — 9,385 — 16,276 — 11,258 — 20,594

(a) Australian currency values.NOTE.—The minus sign (—) signifies net imports.

§ 3. Cattle.

- 1. Purposes for which Raised.—Cattle-raising is carried out in all the States the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in Victoria, New South Wales and Southern Queensland in particular, the portion of Australia in the temperate zone being the best adapted to this industry. On the other hand, beef-producing cattle are mainly raised in the tropical districts, i.e., in the northern parts of Queensland, in the Northern Territory, and in the Kimberley district in the north of Western Australia.
- 2. Distribution throughout Australia.—Until 1880, New South Wales was the priscipal cattle-raising State, but in that year Queensland occupied the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,311,617 head were depastured. From 1895 onwards, however, the effects of droughts and the ravages of tick fever reduced the number to 7,062,742 in 1902. Following the disastrous drought which terminated in the latter year the herds were gradually built up, and, despite recurring droughts, they continued to increase until the maximum number of 14,441,300 cattle was attained in 1921. After that year the number dropped continuously to 1929, largely owing to the decline in the oversea demand for frozen beef. They recovered with the expansion of dairying during the depression years, but a decline of nearly 1,000,000 occurred since 1934. In 1939, an upward movement is shown in all States excepting New South Wales and Tasmania. A graph showing the number of cattle in Australia from 1860 appears on page 418.

The numbers of cattle, beef and dairy, in the several States and Territories during each of the last five years are as follows:—

CATTLE: NUMBER.

31st Dec	N.S.W. (a)	Vic. (a)	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aus. Cap. Terr. (a)	Total.
1935 1936 1937 1938 1939	3,388,538 3,288,169 3,019,581 2,811,884 2,762,653	2,091,246 2,005,759 1,880,429 1,697,295 1,787,597	6,033,004 5,950,572 5,959,165 6,097,089 6,198,798	335,354 328,013 324,163 318,897 351,013	740,241 767,680	270,035 261,597 254,812 262,407 252,484	900,535 855,398 891,640 899,472 922,581	9,856 8,325 7,057	13,911,659 13,491,872 13,078,356 12,861,781 13,080,180

(a) March, year following.

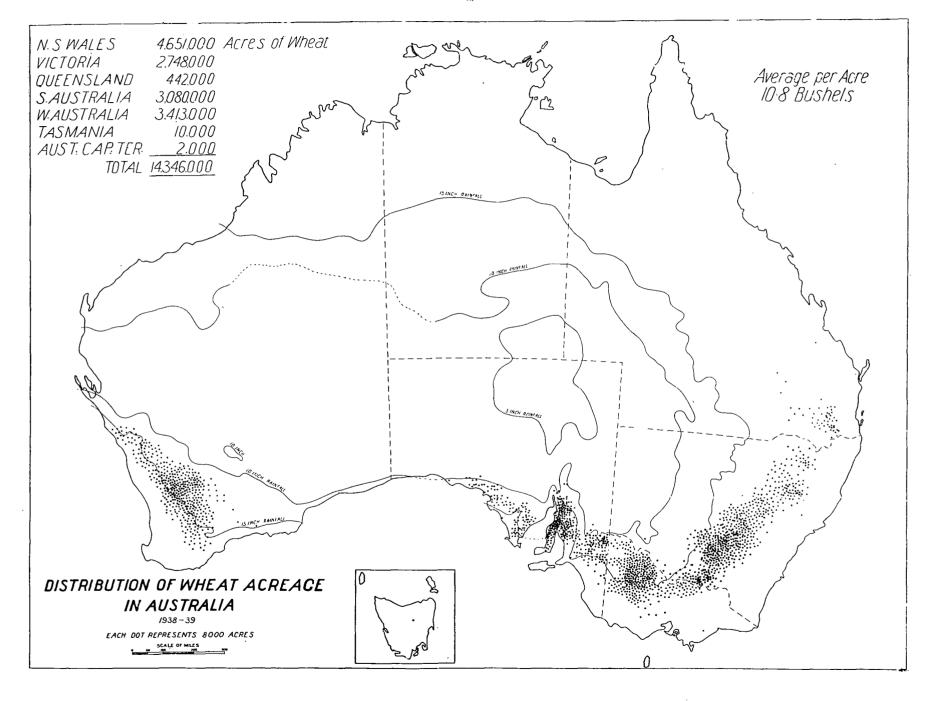

Although the proportion is not as high as it has been in the past, Queensland was carrying 47.40 per cent. of the cattle in Australia in 1939. The percentage in each State and Territory during 1939 was:—New South Wales, 21.12; Victoria, 13.67; Queensland, 47.40; South Australia, 2.68; Western Australia. 6.11; Tasmania, 1.93; Northern Territory, 7.05; Australian Capital Territory, 0.04.

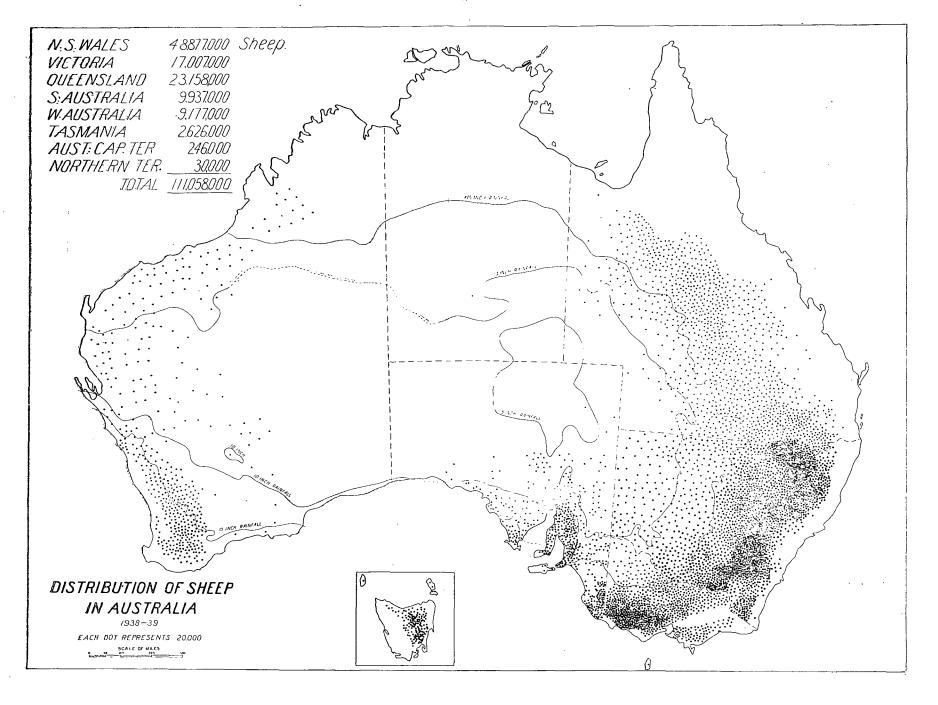

A graph showing the distribution of cattle in Australia during 1938-39 appears on page 453. A similar graph showing the distribution during 1924-25 is shown in Official Year Book No. 22, p. 660.

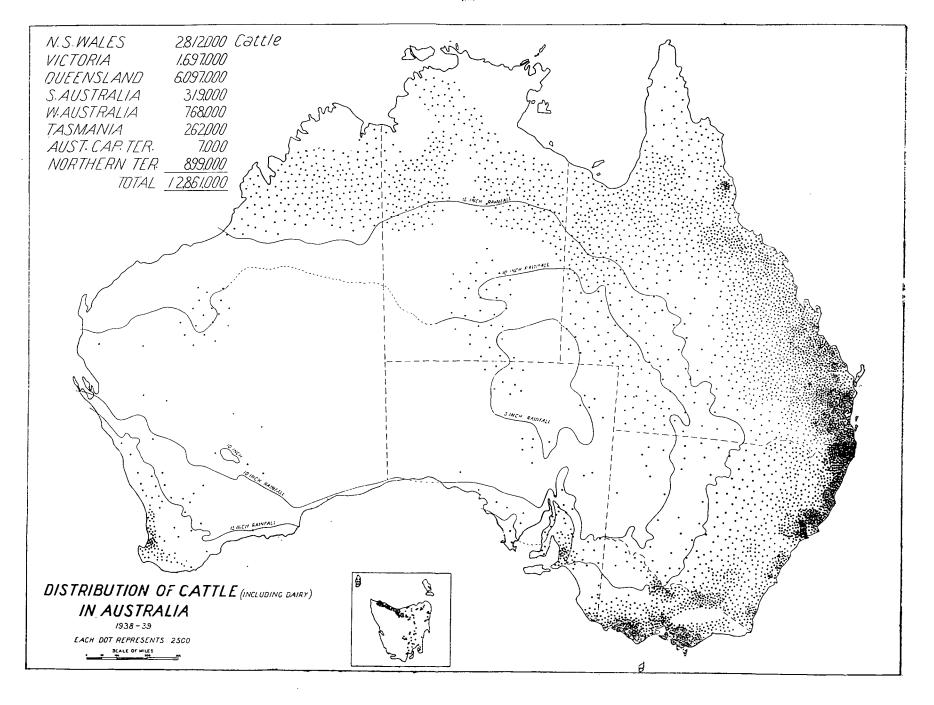

3. Comparison with other Countries.—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world at the latest available date:—

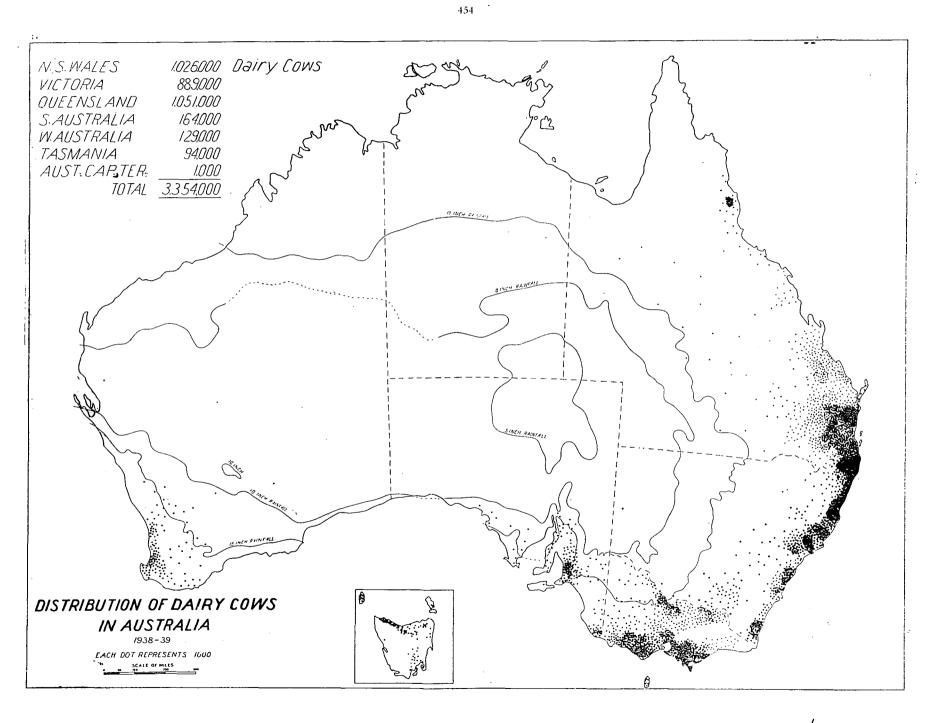

CATTLE: NUMBER IN VARIOUS COUNTRIES.

Country.	Year.	Number of Cattle (,000 omitted).	Country.	Year.	Number of Cattle (,000 omitted).
India (British and Native) U.S.A	1936 1938	119,437 66,821	Czechoslovakia Cuba New Zealand	1937 1935 1938	4,938 4,651 4,506
U.S.S.R. (Russia) Brazil	1938 1935 1937	63,200 40,514 33,101	Dutch East Indies Yugoslavia Rumania	1937 1938 1937	4,414 4,268 4,184

Thailand Kenya Tanganyika Territory Madagascar	1938 1932 1937 1937	5,712 5,214 5,035 4,947	Austria	1936 1938 1937 1931	2,596 2,582 2,460 2,064

4. Imports and Exports of Cattle.—The products of the cattle-raising industry figure largely in the export trade of Australia, although the export of live cattle has never been large. The number of cattle imported is also small, consisting, as in the case of horses, mainly of valuable animals for stud purposes. Details are as follows:—

CATTLE: IMPORTS AND EXPORTS, AUSTRALIA.

Year.		Imports.		Expe	orts.	Net Exports.		
		No.	Value.	No.	Value.	No.	Value.	
		_	£		£		£	
1935–36		164	33,527	240	3,283	76	- 30,244	
1936-37		946	32,276	281	7,355	 6 65	- 24,921	
1937–38		164	16,913	348	5,782	184	- 11,131	
1938-39		42	9,431	447	9,573	405	142	
1939-40		48	5,555	419	7,666	371	2,111	

(a) Australian currency values.

NOTE.—The minus sign (—) signifies net imports.

The average value of the cattle imported during the last five years was £71 128. 7d. per head, while the average value of the cattle exported during the same period was £19 8s. As previously stated, the imported cattle were required principally for stud purposes.

5. Cattle Slaughtered.—The number of cattle slaughtered during each of the years 1935 to 1939 is given hereunder:—

CATTLE (INCLUDING CALVES) SLAUGHTERED.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Terr.	A.C.T. (a)	Total.
1936 1937 1938	1,100,472 1,186,476 1,223,320 1,136,024 1,122,956	904,889 971,338 811,703	1,040,980 1,266,412 1,284,465	167,451 160,044	120,123 124,214 145,375 126,580 118,648	39,588 46,718 48,451 50,397 48,428	4,814 2,456	2,339 2,693 2,609	3,057,825 3,476,898 3,827,496 3,580,92, 3,444,072

(a) For year ended 30th June of year following.

- 6. Production and Consumption of Beef.—The production of beef in Australia during 1938-39 was estimated at 1,252,631,000 lb The local market absorbed 969,495,000 lb. or approximately 77 per cent., leaving a balance of 283.136,000 lb. or 23 per cent., which was exported as frozen, chilled or canned beef. (See also § 1 par. 10.) Particulars for 1939-40 are not available for publication.
- 7. Exports of Frozen Beef.—The export of frozen meat from Australia dates from about 1881, and since that year the trade had grown considerably, the quantities and values exported during each of the five years ended 1938-39 were as follows:—1934-35, 212,099,109 lb., £2,559,605; 1935-36, 196,823,248 lb., £2,481,896; 1936-37, 233,854,189 lb., £3,036,239; 1937-38, 293,803,532 lb., £4,367,064. and 1938-39, 271,963,829 lb., £4,323,680. Particulars of quantities exported during 1939-40 are not available for publication, but the value was £4,825,237. Since 1932-33 chilled beef to the extent mentioned hereunder has been included in the foregoing. (See table in § 1 par. 8.) The largest purchaser of Australian beef is the United Kingdom, which during 1938-39 took £3,901,691, or about 90.2 per cent. of the total shipments. Other countries importing Australian beef were in order of importance Egypt, Malaya (British), Malta, Philippine Islands and Hong Kong; these countries, together with the United Kingdom, accounted for 98.6 per cent. of the total value of export.

In view of the preference for chilled beef overseas the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to United Kingdom in a chilled condition. Trial shipments of 254,000 lb. in 1932-33 and 1,515,000 lb. in 1933-34 were made, and the exports in subsequent years increased as follows:—1934-35, 21,570,928 lb., £322,239; 1935-36, 23,193,737 lb., £348,047; 1936-37, 41,869,695 lb., £608,175; 1937-38, 58,690,559 lb., £972,341; and 1938-39, 58,963,009 lb., £988,148. In 1939-40 the value exported was £206,353, but the quantity is not available for publication.

- 8. War-time Contract.—The Government of the United Kingdom has contracted to purchase Australian beef. Fuller particulars will be found in Chapter XXVII. "Miscellaneous".
- 9. Agreements Regarding Meat at the Ottawa Conference.—A stimulus to the Australian meat industry was provided by the agreement at the Imperial Economic Conference at Ottawa in August, 1932, under the terms of which the Government of the United Kingdom undertook to regulate importations of foreign meat from 1st January, 1932.
- 10. Imports of Chilled and Frozen Beef into the United Kingdom.—The following statement shows the quantities and values of chilled and frozen beef imported into the United Kingdom during each of the five years 1935 to 1939. Later details are not available for publication.

§ 4. Sheep.

- r. Initiation of the Pastoral Industry.—Fortunately for Australia, the suitability of its climate and general conditions for the production of a high class of wool were, at an early date in the history of its settlement, surmised and tested by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales. To the energy of this enterprising pastoralist is due in large measure the rapid and extremely satisfactory development of Australia as a producer of fine wool, and, while it would appear that the introduction of the merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the pastoral industry in Australia must certainly be his.
- 2. Distribution throughout Australia.—With the exception of a short period in the early sixties, when the flocks of Victoria outnumbered those of the mother State, New South Wales has occupied the premier position in sheep-raising, and practically one-half of the sheep of Australia are in this State.

A graph showing the distribution of sheep in Australia during 1938-39 appears on p. 452. A similar graph showing the distribution of sheep during 1924-25 was published in Official Year Book No. 22, p. 659.

Fluctuations in the number of sheep recorded for each year in Australia from 1860 onwards may be seen from the graph on page 418. Five marked periods of decline depleted the numbers at successive intervals, but these losses were made up rapidly. In every year since 1925 the sheep flocks have exceeded 100 millions, reaching 119,305,391 in 1939, the greatest number recorded in Australia. At no previous period have such large numbers been depastured continuously, and the development has taken place notwithstanding an average annual slaughter of approximately nineteen million sheep and lambs for the mutton and lamb trade. The estimate for 1940 indicates a record number of over 122 million.

The number of sheep in the several States and Territories for each year from 1935 to 1939, together with an estimate of the number at 31st December, 1940, are shown in the table hereunder:—

SHEEP: NUMBER.

318t Dec.	N.S.W. (a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N.T.	A.C.T. (a)	Total.

⁽a) March year following.

⁽b) Estimated.

- 3. Proportion in the Several States and Territories.—Apart from the effect of drought the relative number of sheep depastured in the different States remains fairly constant. The percentage distribution in 1939 was:—New South Wales, 45.57; Victoria, 15.30; Queensland, 20.28; South Australia, 8.33; Western Australia, 8.03; Tasmania, 2.24; Northern Territory, 0.03; Australian Capital Territory, 0.22 per cent.
- 4. Comparison with other Countries.—As regards the size of its flocks and the quantity and quality of wool produced, Australia has long occupied a leading position amongst the sheep-raising countries of the world. The following figures taken mainly from the Year Book of the International Institute of Agriculture represent the latest returns available in regard to the number of sheep in the principal wool-producing countries. The leading position is held by Australia, with III million, followed by the U.S.S.R. (Russia) with 85 million, the United States of America with 54 million, the Argentine Republic with 44 million and India (British and Native), 42 million. On account of drought the number of sheep in the Union of South Africa declined from 46 million in 1933 to 36 million in 1935, but the number had increased to 41 million in 1938. In the Argentine Republic sheep flocks also declined from 44.4 million in 1930 to 38 million in 1935, but the number recorded in 1937 was 44 million. During the years 1925 to 1929 the sheep flocks of the U.S.S.R. exceeded those of Australia. maximum number recorded was 130 million in 1928, but after that year a remarkable decline took place and the number depastured in 1934 was only 46,848,000. It was proposed under the second Five Year Plan to increase the number to 85 million by 1937, but this number was only approximately reached by 1938. Russian sheep are mainly coarse-woolled, and the wool is of inferior quality, but the Soviet Government is making efforts to improve it. In a classification of the wool production in 1934, 10 per cent. was classed as fine wool, 16 per cent. as semi-fine quality, and 74 per cent. as coarse wool. In 1938 the production of fine wool had increased to 14 per cent. and semi-fine to 39 per cent., while the proportion of coarse wool had declined to 47 per cent Production of wool in the U.S.S.R. amounted to about 303 million lb. during 1938. representing an average weight of fleece shorn of more than 3 lb.

Sheep. 459

5. Oversea Imports and Exports of Sheep.—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively little importance. During the last five years the principal consignments of ordinary sheep have been made to Malaya (British) from Western Australia. On 27th November, 1929, the export of stud sheep was prohibited, except with the approval of the Minister for Trade and Customs. Stud sheep, however, are being exported in increasing numbers, and shipments in 1939-40 amounted to 23,329 sheep valued at £79,955 compared with 12,235 valued at £45,744 in the previous year. The chief countries to which these sheep are consigned are New Zealand, South Africa, Japan and Korea. The ordinary flock sheep exported from Australia were, for the most part, consigned to Malaya and the Pacific Islands. The following table shows the imports and exports of stud and flock sheep for the years 1935-36 to 1939-40:—

SHEEP: IMPORTS AND EXPORTS, AUSTRALIA.

- 7. Production and Consumption of Mutton and Lamb.—The production of mutton and lamb during 1938-39 amounted to 717,454,000 lb., of which 527,241,000 lb. or 73 per cent. was consumed locally, leaving a balance of 190,213,000 lb. or 27 per cent. for exportation. (See also § 1 par. 10.) Information for 1939-40 is not available for publication.
- 8. Exports of Frozen Mutton and Lamb.—The export trade in mutton and lamb preserved by cold process expanded rapidly to 1913 when 205 million lb. was shipped. Progress was interrupted during the War of 1914-19, and probably owing to high woo prices the exports of mutton and lamb for a number of years after that war wer considerably less than earlier shipments. Exports commenced to rise again in 1929-30, and from that year onwards they have continued to expand almost uninterruptedly. Formerly the shipments consisted largely of frozen mutton, but in 1923-24 lamb supplanted mutton, and the exports of lamb have been responsible for the increase in shipments of mutton and lamb during the past ten years.

The quantity and value of the shipments of mutton and lamb during each of the five years ended 1938-39 were as follows:—Lamb, 1934-35, 135,879,651 lb., £3,515.230; 1935-36, 151,377,838 lb., £4,020,163; 1936-37, 162,885,887 lb., £4,466,801; 1937-38,

159,556,221 lb., £4,645,624; 1938-39, 158,332,714 lb., £4,393,773. Mutton, 1934-35, 60,314,351 lb., £960,479; 1935-36, 26,629,544 lb., £445,589; 1936-37, 45,572,359 lb., £766,851; 1937-38, 42,246,245 lb., £694,357; 1938-39, 28,155,757 lb., £413,693.

During 1939-40, lamb valued at £5,353,874 and mutton valued at £728,510 was exported; details of quantities are not available for publication.

As with beef, the principal customer in this trade is the United Kingdom, which absorbed 97 per cent. of the total quantity exported from Australia during 1938-39.

- 9. War-time Contract.—The Government of the United Kingdom has contracted to purchase Australian mutton and lamb. Further particulars will be found in Chapter XXVII. "Miscellaneous".
- 10. Resolutions at Ottawa Conference.—Reference has already been made to the agreement reached at the Imperial Economic Conference at Ottawa regarding the regulation of imports of meat into the United Kingdom. (See § 3 par. 9.)
- 11. Imports of Frozen Mutton and Lamb into the United Kingdom.—The quantities and values of frozen mutton and lamb imported into the United Kingdom from various countries for the five years ended 1939 are given in the following table. Particulars for later years are not available.

§ 5. Wool.

^{1.} General.—Australia is the leading wool-growing country in the world. With less than one-sixth of the world's sheep Australia produces one-quarter of the world's supply. Moreover, half of the world's production of fine-quality merino wool is produced in Australia. The bulk of the production is exported, but with the greater activity of Australian woollen mills the quantity used locally is increasing; the amount so used represented 8 per cent. of the total production in 1939-40.

The important position held by Australia among the principal sheep and wool producing countries of the world is more clearly shown in the following table:—

Country.	-	Year.	No. of Sheep (in millions).	Wool Production (in millions of lb., greasy).
Australia United States of America Argentine Republic New Zealand U.S.S.R. (Russia) Union of South Africa		1938-39 1938-39 1937-38 1938-39 1938-39	111.1 53.7 43.7 32.4 84.5 41.2	984 458 389 329 303 264

2. Greasy and Scoured Wool.—Whether the weight of the wool clip should be stated as "in the grease" or as "scoured and washed" is a matter which seriously affects comparisons between the clips of different seasons and of different countries. The quantity of grease and other extraneous matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep. There is, moreover, no clearly defined standard in regard to the cleanliness of wool described as scoured and washed.

A committee of experts in a report to the Central Wool Committee estimated in 1940 that the clean scoured wool content of the total production of Australia averaged between 51 and 53 per cent. of its greasy weight.

Wool scoured in Australia by wool-scouring works, however, yields only about 46 per cent. because the grade of greasy wool treated locally for export as scoured includes a large proportion of dirty and low-grade wool.

The quantity of scoured and washed Australian wool exported during the five years ended 1938-39 was approximately 15 per cent. of the total wool exports regarded as "greasy".

3. Production.—The bulk of the Australian wool production is shorn from live sheep. Approximately 6 per cent. is obtained by fellmongering and about 5 per cent. is on skins exported. Statistics of wool production are compiled from data received from growers, fellmongers, etc. The following table gives the production for each of the last five seasons, but the figures shown for 1940-41 are preliminary only, and are subject to revision. Particulars of the gross value of wool produced in Australia are also shown; these values are based upon the average price of greasy wool realized at auction in the principal markets of Australia. The gross value for 1939-40 is based upon the average appraised value plus certain adjustments as computed by the State Statisticians. The value shown for 1940-41 is a preliminary estimate.

WOOL: TOTAL PRODUCTION.

⁽a) Preliminary; subject to revision. (b) Including Australian Capital Territory. (c) For year ended December. (d) Approximate.

- 4. Care Needed in Comparing Clips.—In comparing successive clips allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.
- 5. World's Wool Production.—The following table gives details of the world's wool production at the latest available date and shows the importance of Australia as a wool-producing country. Of a total production of 3,991 million lb. in 1938-39, Australia produced 984 million lb., or 24.7 per cent. It is also interesting to note that the share of the British Empire in world production during the same year was estimated at 1,849 million lb., or 46.3 per cent.

WOOL: WORLD'S PRODUCTION.

(a) Estimated.

6. War-time Contracts.—(i) Wool. After the outbreak of war in September, 1939, negotiations were concluded between the Governments of the Commonwealth and of the United Kingdom whereby the latter contracted to purchase the entire wool clip of Australia for the duration of the War and one full clip thereafter. The price per lb. at store in Australia was fixed at 10\frac{1}{2}d. sterling, or 13.4375d. in Australian currency, and provision was made for an equal division between the two Governments of any profits derived from

the sale of the wool for use outside the United Kingdom. In addition, an amount not exceeding \(\frac{3}{4} \)d. sterling or \(\frac{3}{4} \)d. (Aust.) will be paid by the United Kingdom Government to cover all costs from store at port of oversea shipment to ship. The agreement provides that sufficient quantities of wool shall be retained in Australia for domestic use. The administration of the scheme in Australia is controlled by the Central Wool Committee assisted by a Committee in each State. These Committees consist of representatives of growers, brokers, buyers and manufacturers.

Separate agreements have been negotiated by the Governments of the United Kingdom, Union of South Africa and New Zealand.

(ii) Sheepskins. Under the contract negotiated in April, 1940 between the Governments of the Commonwealth and of the United Kingdom, the latter agreed to purchase the exportable surplus of Australian sheepskins. The scheme, which is for the same period as the wool contract, is administered by the Central Wool Committee.

The production of Australia approximates 20 million skins annually and these are bought in open competition by fellmongers and export packing houses. Similar conditions apply under the contract scheme excepting that the skins purchased by export packers are acquired by the Central Wool Committee on behalf of the United Kingdom Government and appraised according to the sheepskin table of limits. The quantity so appraised during the period of operation for the season 1939-40 amounted to 1,604,631 skins with an appraised value of £352,592.

In the case of fellmongers, wool taken from skins is appraised under the wool table of limits but the disposal of the pelt is left to the fellmonger.

Arrangements have been made to fellmonger in Australia large quantities of appraised sheepskins and the wool obtained will be appraised on behalf of the United Kingdom Government. It will not be included with the ordinary wool appraisements, but, with the pelts will be dealt with separately.

Further particulars of these contracts appear in Chapter XXVII. "Miscellaneous".

7. Wool Appraisements.—Details of the quantity and value of wool appraised by the Central Wool Committee during 1939-40 and 1940-41 are given in the following table. The quantities include the production for the years shown plus any unappraised wools carried forward.

WOOL APPRAISEMENTS: AUSTRALIA.

(a) Period September, 1939-June, 1940.

8. Consumption of Locally Processed Wool.—It is impossible to obtain particulars of the total consumption of wool in Australia, as considerable quantities of manufactured woollen goods are imported. It is possible, however, to secure with reasonable accuracy the quantities of wool used in Australian factories and mills to produce woollen cloth and other woollen goods, such as blankets, rugs and knitted-wear. Some difficulties arise in the aggregation of returns from individual mills concerned with only one process in manufacture and whose output constitutes the raw material of other mills, but the risk of duplication has been reduced to a minimum. Reference is made to the woollen mills established in Australia in Chapter XXI. "Manufacturing Industry".

The factors used to convert scoured wool and woollen yarn processed in Australia into their greasy equivalent are now computed from the data furnished by woollen mills. In 1939-40 these factors were:—I lb. of worsted yarn was taken to equal 2.45 lb. of greasy while the greasy equivalent of I lb. of scoured wool was 1.94 lb.

Wool. 465

In the following table particulars are given of the quantity of wool processed in Australian factories during each of the past ten years.

CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA.

(In terms of greasy.)

	Year.		Quantity.		Year.		Quantity.
			lb.				lb.
1930-31			35,200,996	1935–36			70,205,840

1934-35		\	55,753,47 ⁸	1939-40		\	93,847,066

9. Exports of Wool.—(i) Greasy—Quantities. Of the total weight of greasy wool shipped overseas during the five years ended 1938-39, 38 per cent. was sent to the United Kingdom, the same proportion as that dispatched during the years 1909 to 1913. The other leading consignees during the same period were Japan 17 per cent.; Belgium 14 per cent.; France 13 per cent.; and Germany 5 per cent. The balance of 13 per cent. was distributed among all other countries. The following table shows the quantities of greasy wool exported, and the principal countries of recorded destination.

Particulars for later years are not available for publication.

⁽a) Included with Other Foreign Countries.

⁽ii) Scoured and Washed including Tops, Noils and Waste—Quantities. The exports of "scoured and washed" wool including tops, noils and waste during the period shown were as follows. Later details are not available for publication.

(iii) Total Value of Exports. Particulars of exports during 1939-40 are not available for publication but the value of wool exported from Australia during the five years ending 1938-39 averaged 39 per cent. of the value of the exports of merchandise of local origin, but during 1938-39 the proportion was only 36 per cent. The value during the period under review together with the principal countries to which wool was exported is shown in the next table:—

Country to which Exported.	Average Five Years 1909-13.	1934-35.	1935-36.	1936–37.	1937-38.	1938-39.

VALUE OF WOOL EXPORTS: AUSTRALIA.

(a) Included with Other Foreign Countries.

- 10. Exports and Local Sales of Wool.—Approximately 90 per cent. of Australian wool is normally disposed of locally. Under pre-war conditions buyers from the United Kingdom, France, Belgium, Germany and other European countries, and from America, Japan, China and India attended the sales conducted in Sydney, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Hobart and Launceston. Particulars regarding exports and local sales, as well as quantities and proportions of the various descriptions of wool marketed in each State, will be found in the *Production Bulletin*, Part II., issued by this Bureau.
- 11. Value.—Wool is the chief factor in the pastoral wealth of Australia, and the nation's prosperity is largely dependent upon the satisfactory sale of the clip. During the ten years ended 1938-39, the price of greasy wool sold in the selling centres of Australia averaged 11½d. per lb. This figure may be compared with an average of 18d. per lb. during the nine post-war years ended 1928-29, and 9d. per lb. for the seven pre-war years ended 1913-14. The heavy decline in the price of wool which commenced in 1929-30 continued during the succeeding three years. In 1933-34, prices rose in a remarkable manner, averaging 15.84d. per lb., compared with 8.72d. per lb. for the previous year, an increase of 81.6 per cent. A decline in 1934-35 was succeeded by a period of rising prices in the two years following, but in 1937-38 and in 1938-39 prices again receded.

As mentioned in paragraph 6 above, the price of wool is now determined by the Imperial wool contract. The price as fixed for 1939-40 and 1940-41 was 13.4375d. per lb.

The effect of fluctuating wool values upon the national income is reflected in the following figures. Based upon appraisement in each State plus certain adjustments as recorded by the State Statisticians, the gross value of the wool clip for Australia for 1939-40 amounted to £61,759,000 compared with £42,043,000 realized during 1938-39 under open market conditions. These values may be compared with £81,430,000 in 1924-25 when the record price was realized, and £34,804,000 in the depression year 1930-31.

The estimated value of the clip for 1940-41 is £62,400,000, which is subject to revision.

Wool. 467

The following table gives the average auction-room price in Australia of greasy wool as compiled by the National Council of Wool-selling Brokers. This price represents the average price realized for all greasy wool of whatever type or quality marketed during the years indicated.

WOOL: AVERAGE MAR	KET PRICE	PER	LB.
-------------------	-----------	-----	-----

Description.	1934-35.	1935-36.	1936-37.	1937-38.	1938–39.	1939-40.	1940-41.
Greasy (a)	 <i>d</i> . 9∙75	d. 14.01	d. 16.48	d. 12.51	d. 10.39	d. (b)13.44	d. (b)13.44

⁽a) National Council of Wool-selling Brokers. sterling.

Measured in terms of Australian, sterling and gold currencies the approximate values of greasy wool per lb. since 1931-32 were as follows:—

GREASY WOOL: AVERAGE VALUES PER LB.

	Year.		Australian Currency.	Sterling.	Gold Prices
			<u>d.</u>	d.	d.
1931-32		• •	.8.46	6.69	5.10
1932-33			8.72	6.98	4.84
1933-34			15.84	12.65	8.19
1934-35			9.75	7.78	4.68
1935–36	• •	• •	14.01	11.19	6.79
1936-37			16.48	13.16	8.03
1937-38			12.51	9.99	6.15
1938–39			10.39	8.30	4.84
1939–40			13.44	10.75	5.37
1940-41			13.44	10.75	5.34

The average values shown in sterling and gold currencies have been calculated by converting the average prices shown in Australian currency on the basis of the average rates of exchange between the months of September and June in each year. Though not exact these results will suffice for general purposes.

12. United Kingdom Importation of Wool.—The appended statement of the quantities and values of wool imported into the United Kingdom during 1939 from the principal wool-producing countries shows the important position which Australia occupies in the supply of wool to the Mother Country. Particulars for later years are not available for publication.

WOOL (a): IMPORTS INTO UNITED KINGDOM, 1939.

⁽a) Greasy and Scoured.

⁽b) The equivalent of the contract price of road.

Of the importations of wool into the United Kingdom during 1939, Australian wool represented 40 per cent. of quantity and 43 per cent. of value, and New Zealand 25 per cent. of quantity and 25 per cent. of value. Altogether, 726,921,300 lb., valued at £31,679,777, were received from British Possessions, these figures being equivalent to S1 per cent. of the total weight and 82 per cent. of the total value of all wool imported.

13. Principal Importing Countries and Sources of Supply.—The following table furnishes, in respect of the principal importing countries, details of their production and imports of wool for 1938, together with the chief sources of supply. The quantities imported refer to the actual weight of wool without distinguishing between greasy and scoured. They are also exclusive of any wool imported on skins. Later details are not available for publication.

WOOL: PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1938.

(In millions of lb.)

- 	Produc-

Total		833	302	302	200	456	2,153

(a) As in the grease.

As a considerable transit trade exists between continental countries, it must not be assumed, that the whole of the imports recorded by these countries are retained for their own consumption. The countries chiefly concerned with the transit trade are United Kingdom, Belgium, and France. The quantities re-exported during 1938 were:—United Kingdom, 269 million lb., or 30 per cent., of the total imports; Belgium, 76 million lb., or 35 per cent.; and France, 49 million lb., or 13 per cent.

14. Inquiry into Wool Industry.—A Committee was appointed by the Commonwealth Government on 15th August, 1932, to inquire into and report on the condition of the Australian wool industry. The report of the Committee was presented on 24th November, 1932. The inquiry covered costs of production, prices, etc., and recommendations were made for the rehabilitation of the industry. For fuller details see Official Year Book No. 29, p. 644.

§ 6. Trade in Hides and Skins.

1. Extent of Trade.—In addition to the hides and skins treated locally, considerable quantities are exported; the value of cattle and horse hides, and sheep and other skins sent overseas during the five years ended 1939-40 amounted to £27,420,963, or an average of £5,484,193 per annum.

2. Sheepskins with Wool.—The exports of sheepskins with wool aggregating £14,392,801 during the five years constitute the largest item in the values referred to in the preceding paragraph. During 1938-39 France was the largest purchaser, taking 74 per cent. of the total consignments, while the United Kingdom ranked next with 15 per cent., followed by Germany, with 7 per cent. Details for 1939-40 are not available for publication. The exports of sheepskins with wool during each of the years from 1935-36 to 1939-40 were as follows:—

EXPORTS OF SHEEPSKINS WITH WOOL: AUSTRALIA.

Particulars.	1935-36.	1936–37.	1937–38.	1938–39.	1939–40.
Number	11,811,480 2,805,083	12,130,265	12,713,364	12,625 200	(a)
Value £		3,636,659	3,381,480	2,301,800	2,267,779

(a) Not available for publication.

3. Sheepskins without Wool.—Sheepskins without wool are exported chiefly to the United States of America. During 1938-39 this country accounted for 40 per cent. of the total shipments while 24 per cent. were exported to France and 16 per cent. to the United Kingdom. Quantities and values for the last five years are given in the table hereunder:—

EXPORTS OF SHEEPSKINS WITHOUT WOOL: AUSTRALIA.

Particulars.	1935–36.	1936-37.	1937-38.	1938-39.	1939–40.

Value £	19,370	169,250	79,461	68,152	101,027

4. Hides.—(i) Exports. The export trade in cattle hides during 1938-39 was distributed as follows:—United Kingdom, £410,100; Japan, £143,882; Germany £76,502; Finland, £44,722; United States of America, £40,151; Denmark, £33,452; Other Countries, £147,943. Details for later years are not available for publication.

The exports during the last five years are given in the table below :-

EXPORTS OF CATTLE HIDES: AUSTRALIA.

Particulars.	1935–36.	1936–37.	1937-38.	1938-39.	1939-40.
Number	807,604	1,034,937	1,063,896	1,186,543	559,490
Value £	613,717	940,024	1,092,048	896,752	579,640

Calfskins exported during the five years ended 1939-40 numbered 3,376,682 valued at £823,691 and were shipped mainly to the United States of America. The annual export of horse hides is very small, and for the past five years numbered 39,267 hides valued at £23,672.

(ii) Imports. The imports of cattle hides and calfskins are fairly large, the chief source of supply being New Zealand, and small quantities are obtained from the Pacific Islands, France and Italy. The quantities and values of cattle hides, including calfskins, imported into Australia during the years 1935-36 to 1939-40 were as follows:—

IMPORTS OF CATTLE HIDES: AUSTRALIA.

Particulars.	1935-36.	1936–37.	1937–38.	1938–39.	1939-40.
Quantity ewt. Value (a)	64,902	47,705	69,955	80,641	24,985
	301,217	248,848	363,573	280,273	88,667

(a) Australian currency values.

The number of horse hides imported into Australia is small. The value of imports during 1939-40 amounted to £11 in Australian currency.

5. Other Skins.—The exports of skins other than those mentioned in the preceding paragraphs were valued as follows:—

EXPORTS OF OTHER SKINS: AUSTRALIA.

Description.		1935-36.	1936–37.	1937-38.	1938-39.	1939-40.
		£	£	£	£	£
Rabbit and 1	Hare	1,744,834	1,649,412	1,052,709	429,140	(a) 911,384
