1958.

BULLETIN No. 76.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,

BY
S. R. CARVER,
COMMONWEALTH STATISTICIAN.

DEMOGRAPHY, 1958.

PREFACE.

This Bulletin, which is the seventy-sixth in the series, furnishes detailed statistics relating to the year 1958. Some comparative tables are included in each Section, but where the comparison is on the basis of individual years the period covered is necessarily limited. The more widely used totals and rates for each State and Territory for each year from 1881 to 1958 are given in a separate Statistical Summary included as Section VIII.

All statistics contained in this Bulletin are exclusive of full-blood aborigines.

Section I., which presents population statistics up to 31st December, 1958, contains a summary of certain Census results up to and including the Census of 30th June, 1954, together with population estimates for selected dates and estimates of the mean population for selected periods. All population statistics for dates up to 30th June, 1954, and all mean populations for calendar years up to 1953 and financial years up to 1953-54, inclusive, are final, having been adjusted to accord with Census results.

For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census, plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate, and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions were substantial after the Census of 1954.

For the period September, 1939 to March, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel and internees and enemy prisoners of war sent to Australia from overseas are excluded from the estimates of population.

Detailed statistics of oversea arrivals and departures are included in Section II., in which the figures relate to oversea passenger-journeys whether by sea or air. The statistics for the period September, 1939 to June, 1947, exclude movements of defence personnel and internees and enemy prisoners of war from overseas. In the tables showing migration according to countries limitation of space prevents the inclusion of the full list of countries used in original tabulations, but the additional information is available in the Bureau for reference.

The deaths as recorded in Section VI. include deaths of defence personnel which were registered with civil registrars in the period September, 1939 to December, 1941, but from January, 1942 to June, 1947, deaths of Australian and Allied defence personnel and internees and enemy prisoners of war from overseas are excluded. The figures shown in this Section for the latter period thus relate to the Australian civilian population. Death rates for the years 1939 to 1947 are calculated on total population and must be regarded as approximate.

From 1950 to 1957 the classification of causes of death has been in accordance with the International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth Revision, 1948, of the International List of Causes of Death) together with the international rules for selecting the underlying cause of death, as explained more fully in *Official Year Book No. 39*, Chapter XIV.—Vital Statistics. Although the classification is made in accordance with the full detailed list of three-digit categories (with some fourth-digit sub-categories), the tables presented in this Bulletin have been shortened by grouping categories which are not important as causes of death. This grouping has been arranged so as to preserve comparability with past statistics as much as possible and to permit re-grouping into the Intermediate List of 150 Causes.

Deaths registered in 1958 have been classified in accordance with the Seventh Revision (1955) of the International Statistical Classification of Diseases, Injuries and Causes of Death. The Seventh Revision was limited to essential changes and amendment of errors and inconsistencies. Except where noted in the tables, the 1958 figures are comparable with those for the years 1950 to 1957.

For convenience in presentation and economy of space the Statistical Summary in Section VIII. has been restricted to the 78 years, 1881 to 1958. Similar statistics for each year from 1860 to 1880 will be found in Demography, Bulletin No. 67, 1949.

The graphs have been continued and appear at the end of this Bulletin.

Thanks are expressed to the Deputy Commonwealth Statisticians, the State Government Departments responsible for the registration of births, deaths and marriages and to the Department of Territories for the valuable assistance rendered by them in furnishing the data for the compilation of the vital statistics. I am especially indebted to Mr. V. E. Pickering, B.A., Supervisor of the Demography Branch, and to Mr. F. J. Colwell, B.Com., and other officers of this Branch for the care and attention bestowed on the compilation of this Bulletin and the preparation of the material for the Printer.

(a) For total increase recorded for each year commencing with 1881, see Section VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For the period September, 1939 to June, 1947 troop movements have been excluded and deaths of Australian defence personnel, whether in Australia or overseas, included. (e) Revised figures based on the results of the June, 1957 Population Count of Canberra are:—1954—males, 368; females, 1,224; persons, 1,592; 1955—males, 1,157; females, 1,497; persons, 2,654; 1956—males, 1,938; females, 930; persons, 2,868; 1957—males, 1,267; females, 1,019; persons, 2,286.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables Nos. 9, 10 and 11 (natural increase, recorded net interstate and oversea migration and deaths of Australian defence personnel respectively) represent adjustments for differences disclosed by the results of the 1947 and 1954 Censuses. Particulars of total increase have been adjusted for these differences, but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures. See Table No. 12 for summary.

Minus sign (-) denotes decrease.

NOTE.—The Metropolitan Urban Divisions relate to the capital cities of the States and Canberra, the capital city of Australia, together with adjoining urban municipal areas within boundaries used for Census purposes.

Other Urban Divisions comprise the capital city of the Northern Territory, all other municipal areas and non-municipal towns with a population of 1,000 persons or more (750 or more in Tasmania).

Rural Divisions comprise the remaining portion of each State and Territory, including not-incorporated areas.

"Migratory" relates to persons not elsewhere enumerated who, at midnight between 30th June and 1st July, 1954, were travelling on ships or on long-distance trains or aircraft.

(a) Based on the age distribution at the Census of 30th June, 1954 (adjusted only for "not stated" ages) and on subsequent births, recorded ages at death and recorded ages of migrants.

SECTION II.—OVERSEA ARRIVALS AND DEPARTURES.

NOTE.—(1) This section relates to arrivals from and departures to places outside Australia by sea and air. Prior to 1st July, 1922, crew members as well as passengers were included in the statistics but since that date the figures relate to passengers only.

(2) Certain of the descriptive headings previously used in tables in this section have been changed, commencing with issue No. 75 of this Bulletin, to ensure more accurate definition and to assist interpretation of the figures. The tables themselves, however, are exactly comparable with tables previously published under the title "Oversea Migration".

Currently, arrivals and departures of all oversea passengers are classified under the following descriptive headings:—

"*Short Term Movement*" (formerly described as "*Temporary Movement*")—

relating to *persons arriving* and intending to reside in Australia for a period of less than one year; and to *persons departing* and intending to reside abroad for a period of less than one year.

"*Long Term and Permanent Movement*" (formerly described as "*Permanent Movement*")—

relating to *persons arriving* who state that they intend to reside in Australia for a period of one year or more; and to *persons departing* who state that they intend to reside abroad for a period of one year or more.

No change of classification has been effected: movement formerly described as "*Permanent*" is herein described as "*Long Term and Permanent*", and movement formerly described as "*Temporary*" is herein described as "*Short Term*".

This basis of classification has been continuously applied in Australia since 1924, in accordance with international usage, and it does not purport to indicate "permanent migration" as such.

(3) Troop movements were excluded from statistics of oversea arrivals and departures for the period September, 1939 to June, 1947. Since June, 1947, Australian troops have been included, irrespective of length of stay overseas, in the figures of "*Short Term Movement*".

(4) "Country of Last Residence" means the country in which the passenger was last resident for a period of one year or more. "Country of Intended Future Residence" means the country in which the passenger intends to reside next for a period of one year or more.

(5) "Country of Embarkation" refers to the country in which the passenger embarked on the particular ship or aircraft which brought him to Australia. "Country of Disembarkation" refers to the intended country of disembarkation from the particular ship or aircraft which takes the passenger from Australia.

Note.—This table indicates the State or Territory where passengers disembarked from or embarked on the ship or aircraft. The figures do not indicate the full effect of movements to and from oversea countries on the population of the States as numbers of passengers use interstate transport to commence or complete their journey. This is particularly so in respect of oversea air passengers.

Note.—This table indicates the State or Territory where passengers disembarked from or embarked on the ship or aircraft. The figures do not indicate the full effect of movements to and from oversea countries on the population of the States, as numbers of passengers use interstate transport to commence or complete their journey. This is particularly so in respect of oversea air passengers.

(b) Not available.

Note.—Under the migration schemes in operation up to 1940 it was possible to show the number of migrants according to State or Territory of destination with reasonable accuracy. Such statistics are shown in Table No. 38a. Under the various migration schemes which came into operation in 1947 and subsequent years it is not possible to show, from information obtained at time of disembarkation, the number of migrants destined for the various States and Territories because of the practice of allocating certain categories of migrants in Immigrant Reception and Holding Camps and subsequently allocating them to another State or Territory. Therefore these statistics for the years 1947 to 1958 have been confined to the Australian total as shown in Table No. 38b.

No. 66.—Grounds on which Dissolutions of Marriage, (a) Nullities of Marriage and Judicial Separations were Granted, 1958.

NOTE.—The grounds for dissolution of marriage vary in each State and Territory. The main differences are: (i) Insanity is not a ground in New South Wales or the Australian Capital Territory; (ii) In New South Wales and the Australian Capital Territory a suit for dissolution of marriage or judicial separation may forthwith be instituted against a respondent who fails to comply with an order for restitution of conjugal rights; (iii) Separation for over five years is a ground only in Western Australia; (iv) Separation for over five years under a decree of judicial separation or an order granting relief from co-habitation is a ground only in South Australia; and (v) in Western Australia impotence is a ground for dissolution, instead of nullity, of marriage.

Ground.	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Australian Capital Territory.	Australia.

(a) Number of live births per 1,000 of mean population. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Revised rates, based on population estimates adjusted in accordance with the results of the June, 1957 Population Count of Canberra, are:—1951-55, 32.22; 1954, 28.17; 1955, 26.30; 1956, 30.47; 1957, 29.84.

NOTE.—(1) For crude birth rates recorded for each year commencing with 1881 see Section VIII.—Statistical Summary.

(2) The birth rates in the table above are based on live births registered in the respective States and Territories. Prior to 1939 a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border. With improved hospital facilities in the Territory the position was reversed until late in 1952, when maternity accommodation was again provided in Queanbeyan. The following rates, based on births in respect of which the mother's usual residence is the Australian Capital Territory, are a truer measure of crude birth rates in the Australian Capital Territory:—

	Average Annual Rates.	Annual Rates.
1931-35 ..	19.53	1954 .. (a) 28.67
1936-40 ..	19.29	1955 .. (a) 26.53

1946-50 ..	27.13	1957 .. (a) 29.58
1951-55 ..	(a) 28.39	1958 .. 31.04

(a) Revised rates based on population estimates adjusted in accordance with the results of the June, 1957 Population Count of Canberra are as follows:—1951-55, 28.32; 1954, 28.63; 1955, 26.27; 1956, 30.07; 1957, 29.29.

The variations similarly caused in the birth rates for the States and the Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1958:—New South Wales, 21.65; Victoria, 22.36; Queensland, 24.02; South Australia, 22.29; Western Australia, 23.74; Tasmania, 25.46; and Northern Territory, 36.15.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (c) The "net" reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based.

NOTE.—The numbers of females of child-bearing age on which the rates above are based for the years 1948 to 1953 have not been adjusted in accordance with the results of the Census of 30th June, 1954.

(a) The classification used for Class XVII. is that according to external cause (the E code).

NOTE.—Deaths for the years 1954 to 1957 have been classified according to the Sixth Revision (1948) of the International Statistical Classification of the Causes of Death and for the year 1958 according to the Seventh Revision (1955) of the Classification. The Seventh Revision was limited to essential changes and amendment of errors and inconsistencies. For the major changes comparable figures have been shown in the footnotes in this table, except in respect of rubric "153 Malignant neoplasm of the large intestine, except rectum". In this case, the figures that are available have been shown in the table. In other tables figures are based on the Seventh Revision.

(a) In New South Wales, Victoria and Queensland persons registering deaths of males who were mainly dependent on pensions are required to state the previous occupation of the deceased and for the purposes of this table such deaths are shown where possible under the previous occupation.

NOTE.—The classification of occupations used in compiling these figures is identical with that used for the 1947 Census, and is not directly comparable with that in use prior to 1947.

DEMOGRAPHY.

PAPUA.

NOTE.—Because of the outbreak of hostilities in the Pacific during the 1939–45 War, civil administration in Papua was suspended on 11th February, 1942, and was not re-established until 30th October, 1945. Registration of births, deaths and marriages was resumed in 1946 and since then there have been many delayed registrations of vital events which occurred during the period of suspension; also, owing to geographic conditions, there is some delay at any time. For these reasons the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

NEW GUINEA.
(TRUST TERRITORY.)

NOTE.—Because of the outbreak of hostilities in the Pacific during the 1939–45 War, civil administration in New Guinea was suspended on 11th February, 1942. Part of the Territory was returned to civil administration on 30th October, 1945, and, as circumstances permitted, civil control was extended until the whole of the Territory came under control of civil authorities on 24th June, 1946. Registration of births, deaths and marriages was resumed in 1946 and since then there have been many delayed registrations of vital events which occurred during the period of suspension; also, owing to geographic conditions, there is some delay at any time. For these reasons the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

DEMOGRAPHY.

NAURU.

(TRUST TERRITORY.)

NOTE.—With the occupation of Nauru by enemy forces during the 1939–45 War, the registration of births, deaths and marriages was completely disorganized. Registration was resumed in October, 1945, when civil administration was re-established, and since then there have been many delayed registrations of vital events which occurred during the period of enemy occupation. For this reason the birth and death tables below have been designed to show both the number of births and deaths registered in each year and the number of births and deaths which actually occurred in each year, irrespective of the date of registration.

(a) For years prior to 1881 see Demography, Bulletin No. 67, 1949.

(b) Northern Territory figures included with those for South Australia prior to 1900.

(c) Part of New South Wales prior to 1st January, 1911. The estimated male population on 31st December, 1910, was 969.

(d) Population increased by 156 males owing to the transfer of the Jervis Bay area to the Australian Capital Territory.

(e) Revised estimates based on the results of the June, 1957 Population Count of Canberra:—1954, 16,458; 1955, 17,615; 1956, 19,553.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. Figures from 1939 to 1946 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services

(a) For years prior to 1881 see Demography, Bulletin No. 67, 1949.
 (b) Northern Territory figures included with those for South Australia prior to 1901.
 (c) Part of New South Wales prior to 1911.
 (d) See note (d) to Table No. 154c.
 (e) For the period September, 1939 to June, 1947 troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included.
 (f) Revised figures based on the June, 1957 Population Count of Canberra are:—1954, 1,592; 1955, 2,654; 1956, 2,868; 1957, 2,286.

NOTE.—Differences between the figures above and totals of figures for elements of increase shown separately in the following two tables (natural increase and recorded net interstate and oversea migration) represent, after taking into account deaths of defence personnel, differences disclosed by the final results of the 1947 and 1954 Censuses. Particulars of total increase have been adjusted for these differences, but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by the 1933 and earlier Censuses were adjusted on recorded departures.

Minus sign (—) denotes decrease.
