DEMOGRAPHY.

1960.

BULLETIN No. 78.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER,

BY

S. R. CARVER,

COMMONWEALTH STATISTICIAN.

DEMOGRAPHY, 1960.

PREFACE.

This Bulletin, which is the seventy-eighth in the series, furnishes detailed statistics relating to the year 1960. Some comparative tables are included in each Section, but where the comparison is on the basis of individual years the period covered is necessarily limited. The more widely used totals and rates for each State and Territory for each year from 1881 to 1960 are given in a separate Statistical Summary included as Section VIII.

All statistics contained in this Bulletin are exclusive of full-blood aboriginals.

Section I, which presents population statistics up to 31st December, 1960, contains a summary of certain Census results up to and including the Census of 30th June, 1954, together with population estimates for selected dates and estimates of the mean population for selected periods. All population statistics for dates up to 30th June, 1954, and all mean populations for calendar years up to 1953 and financial years up to 1953-54, inclusive, are final, having been adjusted to accord with Census results.

For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census, plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate, and are subject to revision in accordance with the results of the Census of 30th June, 1961.

For the period September, 1939 to March, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel and internees and enemy prisoners of war sent to Australia from overseas are excluded from the estimates of population.

Detailed statistics of oversea arrivals and departures by sea and air are included in Section II. The statistics for the period September, 1939 to June, 1947, exclude movements of defence personnel and internees and enemy prisoners of war from overseas. In the tables showing migration according to countries, limitation of space prevents the inclusion of the full list of countries used in original tabulations, but the additional information is available for reference in this Bureau.

The deaths as recorded in Section VI include deaths of defence personnel which were registered with civil registrars in the period September, 1939 to December, 1941, but from January, 1942 to June, 1947, deaths of Australian and Allied defence personnel and internees and enemy prisoners of war from overseas are excluded. The figures shown in this Section for the latter period thus relate to the Australian civilian population. Death rates for the years 1939 to 1947 are calculated on total population and must be regarded as approximate.

Death registered in 1960 are classified in accordance with the Seventh Revision (1955) of the International Statistical Classification of Diseases, Injuries and Causes of Death. The Seventh Revision, which was first used in Australia for deaths registered in 1958, was limited to essential changes and amendment of errors and inconsistencies. The principal changes affecting comparability are shown in a note to Table No. 105 on page 134. Commencing with deaths registered in 1960, the querying of medical certificates of the cause of death has been extended in an endeavour to reduce the number of assignments to residual disease categories.

The Statistical Summary in Section VIII shows the 80 years, 1881 to 1960. Similar statistics for each year from 1860 to 1880 will be found in Demography, Bulletin No. 67, 1949.

The graphs on population, oversea arrivals and departures, births, deaths and marriages (numbers and rates), and infant mortality rates have been continued, and appear at the end of this Bulletin.

Thanks are expressed to the Deputy Commonwealth Statisticians, the State Government Departments responsible for the registration of births, deaths and marriages, and the Department of Territories for the valuable assistance rendered by them in furnishing the data for the compilation of the vital statistics. I am especially indebted to Mr. V. E. Pickering, B.A., Supervisor of the Demography Branch, and to Mr. F. J. Colwell, B.Com., and other officers of this Branch for the care and attention bestowed on the compilation of this Bulletin and the preparation of the material for the Printer.

SECTION I.—POPULATION.

NOTE.—Estimated Population of States. For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census, plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate, and are subject to revision when the actual population of each State is ascertained at the next Census.

The population estimates for dates prior to the Census of 30th June, 1954 have been revised, and are final. For some States the revisions were substantial.

(a) For total increase recorded for each year commencing with 1881, see Section VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For the period September, 1939 to June, 1947 troop movements have been excluded and deaths of Australian defence personnel, whether in Australia or overseas, included. (e) Revised figures based on the results of the June, 1957 Population Count of Canberra are:—1954—males, 368; females, 1,224; persons, 1,592; 1955—males, 1,157; females, 1,497; persons, 2,654; 1956—males, 1,938; females, 930; persons, 2,868; 1957—males, 1,267; females, 1,019; persons, 2,286.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables Nos. 9, 10 and 11 (natural increase, recorded net interstate and overseas migration and deaths of Australian defence personnel respectively) represent adjustments for differences disclosed by the results of the 1947 and 1954 Censuses. Particulars of total increase have been adjusted for these differences, but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures. See Table No. 12 for summary.

Minus sign (—) denotes decrease.

NOTE.—The Metropolitan Urban Divisions relate to the capital cities of the States and Canberra, the capital city of Australia, together with adjoining urban municipal areas within boundaries used for Census purposes.

Other Urban Divisions comprise the capital city of the Northern Territory, all other municipal areas and non-municipal towns with a population of 1,000 persons or more (750 or more in Tasmania).

Rural Divisions comprise the remaining portion of each State and Territory, including not incorporated areas.

"Migratory" relates to persons not elsewhere enumerated who, at midnight between 30th June and 1st July, 1954, were travelling on ships or on long-distance trains or aircraft.

(a) Based on the age distribution at the Census of 30 June, 1954 (adjusted only for "not stated" ages) and on subsequent births, recorded ages at death and recorded ages of migrants.

SECTION II.—OVERSEA ARRIVALS AND DEPARTURES.

NOTE.—(1) This section relates to arrivals from and departures to places outside Australia by sea and air. Prior to 1st July, 1922, crew members as well as passengers were included in the statistics but since that date the figures relate to passengers only.

(2) In view of misconceptions that had arisen, certain of the descriptive headings used in tables in this section were changed as from issue No. 75 of this Bulletin. The wording then adopted is as follows:—

“Short Term Movement” (formerly described as “Temporary Movement”) relating to—

persons arriving and intending to reside in Australia for a period of less than one year; and to persons departing and intending to reside abroad for a period of less than one year.

“Long Term and Permanent Movement” (formerly described as “Permanent Movement”) relating to—

persons arriving who state that they intend to reside in Australia for a period of one year or more; and to persons departing who state that they intend to reside abroad for a period of one year or more.

A minor modification was made as from 1st January, 1959, as a result of which Australian residents departing overseas for one year or more who stated Australia as their country of intended future residence were included in “Short Term Movement” and were excluded from “Long Term and Permanent Movement”. In the year 1959 the number of Australian residents departing in this category was 2,749 (males 1,569, females 1,180).

(3) Troop movements were excluded from statistics of oversea arrivals and departures for the period September, 1939 to June, 1947. Since June, 1947, Australian troops have been included, irrespective of length of stay overseas, in the figures of “Short Term Movement”.

(4) “Country of Last Residence” means the country in which the passenger was last resident for a period of one year or more. “Country of Intended Future Residence” means the country in which the passenger intends to reside next for a period of one year or more.

(5) “Country of Embarkation” refers to the country in which the passenger embarked on the particular ship or aircraft which brought him to Australia. “Country of Disembarkation” refers to the intended country of disembarkation from the particular ship or aircraft which takes the passenger from Australia.

(6) The basis of the classification referred to in (2) above has been substantially applied in Australia since 1924, in accordance with international usage, and it does not purport to indicate “permanent migration” as such.

NOTE.—This table indicates the State or Territory where passengers disembarked from or embarked on the ship or aircraft. The figures do not indicate the full effect of movements to and from oversea countries on the population of the States as numbers of passengers use interstate transport to commence or complete their journey. This is particularly so in respect of oversea air passengers.

NOTE.—This table indicates the State or Territory where passengers disembarked from or embarked on the ship or aircraft. The figures do not indicate the full effect of movements to and from overseas countries on the population of the States, as numbers of passengers use interstate transport to commence or complete their journey. This is particularly so in respect of overseas air passengers.

(a) Assisted migration was discontinued during the 1939-45 War and was not recommenced until 31st March, 1947. (b) Not available.

NOTE.—Under the migration schemes in operation up to 1940 it was possible to show the number of migrants according to State or Territory of destination with reasonable accuracy. Such statistics are shown in Table No. 39. Under the various migration schemes which came into operation in 1947 and subsequent years it is not possible to show, from information obtained at time of disembarkation, the number of migrants destined for the various States and Territories because of the practice of accommodating certain categories of migrants in Immigrant Reception and Holding Camps and subsequently allocating them to another State or Territory. Therefore these statistics for the years 1947 to 1960 have been confined to the Australian total as shown in Table No. 40.

(a) Decrees absolute.

No. 68.—Grounds on which Dissolutions of Marriage,(a) Nullities of Marriage and Judicial Separations were Granted, 1960.

NOTE.—Until the operation of the Commonwealth Matrimonial Causes Act of 1959, the grounds for dissolution of marriage varied between each State and Territory. The main differences were: (i) Insanity was not a ground in New South Wales or the Australian Capital Territory; (ii) In New South Wales and the Australian Capital Territory a suit for dissolution of marriage or judicial separation could forthwith be instituted against a respondent who failed to comply with an order for restitution of conjugal rights; (iii) Separation for over five years was a ground only in Western Australia; (iv) Separation for over five years under a decree of judicial separation or an order granting relief from co-habitation was a ground only in South Australia; and (v) Impotence was a ground for dissolution in Western Australia, but a ground for nullity of marriage in each other State and Territory.

In addition, some dissolutions granted under previous Commonwealth legislation in a particular State, could be on grounds not provided for in that State's legislation. (Commonwealth legislation which established uniform grounds throughout the Commonwealth for the termination of marriage, came into operation on 1st February, 1961.)

(a) In cases where usual residence of mother is outside the State or Territory the birth is included in the division in which it occurred.

NOTE.—The figures in this table relate to "period of registration" and, being affected by differences in registration practices as between States, such as the length of time allowed for registration, the figures are in no way a guide as to "period of occurrence". Owing to a change in registration procedure in Victoria, the figures for July to December 1960 are not strictly comparable with those for corresponding periods of other years.

(a) Number of live births per 1,000 of mean population. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Revised rates, based on population estimates adjusted in accordance with the results of the June, 1957 Population Count of Canberra, are:—1951-55, 32.22; 1956-60, 30.10; 1956, 30.47; 1957, 29.84.

NOTE.—(1) For crude birth rates recorded for each year commencing with 1881 see Section VIII.—Statistical Summary.
 (2) The birth rates in the table above are based on live births registered in the respective States and Territories. Prior to 1939 a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border. With improved hospital facilities in the Territory the position was reversed until late in 1952, when maternity accommodation was again provided in Queanbeyan. The rates in the following table, based on births in respect of which the mother's usual residence is the Australian Capital Territory, are a truer measure of crude birth rates in the Australian Capital Territory. The variations similarly caused in the birth rates for the States and the Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1960:—New South Wales, 21.42; Victoria, 22.15; Queensland, 24.08; South Australia, 22.11; Western Australia, 23.16; Tasmania, 25.34; and Northern Territory, 36.94.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (c) The "net" reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based.

NOTE.—The numbers of females of child-bearing age on which the rates above are based for the years 1950 to 1953 have not been adjusted in accordance with the results of the Census of 30th June, 1954.

(a) In 1959 medical certifiers were queried as to whether the lung was the primary site. As a consequence deaths classified to rubric 163 in that year represent those cases in which the certifier was not able to state that the lung was the primary site, or did not reply to the query. For comparison with other years it is necessary to combine rubrics 162 and 163. (a) In 1960 medical certifiers were queried as to whether the growth originated in the cervix or in the corpus uteri. As a consequence deaths classified to rubric 174 represent those cases in which the certifier was not able to state the site of the growth, or did not reply to the query. For comparison with earlier years it is necessary to combine rubrics 171, 172, 173 and 174.

NOTE.—(i) Deaths for the year 1957 have been classified according to the Sixth Revision (1948) of the International Statistical Classification of Causes of Death and for the years 1958, 1959 and 1960 according to the Seventh Revision (1955) of the Classification. The Seventh Revision was limited to essential changes and amendment of errors and inconsistencies. For the major changes involved comparable figures, i.e., between the Sixth and Seventh Revisions, for the year 1958 only, are—

Sixth Revision, (1948).—Class I.: males 776, females 343; 020-029, males 138, females 39; 022, males 85, females 27. Class II.: 162, males 483, females 84; 163, males 752, females 109. Class III.: males 798, females 1,071; 240-245, males 260, females 206; 241, males 260, females 206. Class VII.: males 18,731, females 13,761; 450-456, males 1,219, females 1,175; 451, males 254, females 101. Class VIII.: males 3,187, females 1,824; 500-502, males 724, females 191; 500, males 47, females 33; 501, males 69; females 48; 502, males 608, females 110. In other instances, the numbers involved in the transfers were not recorded as the basic disease pattern was not changed; for example, in respect of the numbers involved in the transfers from 330 to 332 and 334 to 445, from 422 to 433 and from 447 to 444.

(ii) As explained in the Preface to this Bulletin, the querying of medical certificates of the cause of death has been amplified commencing with deaths registered in 1960 in an endeavour to reduce the number of assignments to residual and ill-defined disease categories.

(a) In cases where usual residence is outside the State or Territory the death is included in the division in which it occurred.

NOTE.—The figures in this table relate to "period of registration", and, being affected by differences in registration practices between States, such as the length of time allowed for registration, are in no way a guide as to "period of occurrence". Owing to a change in registration procedure in Victoria, the figures from July to December of 1960 are not strictly comparable with those for corresponding periods of other years.

DEATHS.

SECTION VII.—POPULATION AND VITAL STATISTICS OF EXTERNAL TERRITORIES.

NOTE.—(1) The particulars of estimated populations of the External Territories and the data for compilation of vital statistics are supplied by the Department of Territories.

(2) In the population estimates for Papua, New Guinea and Nauru distinction is made as between the "indigenous" and "non-indigenous" population. The estimates of indigenous population for Papua and New Guinea are based on counts of the population by administrative patrols in areas under full administration control and in the remaining areas on whatever information is available. The variations that exist between the latest estimate and those for previous years are partly due to the extension of administrative control which makes possible the replacement of estimates by more accurate enumeration. The estimates of non-indigenous population are subject to revision when actual population figures are ascertained at the next Census.

(3) The particulars of vital statistics relate to the total population for Norfolk Island and Christmas Island and to the non-indigenous population for Papua, New Guinea and Nauru. Particulars are not available, however, for the Home Island in the Cocos (Keeling) Islands.

For a number of reasons registration of vital events are often delayed (e.g. suspension of civil administration arising out of the 1939-45 War, access to the registration authorities) and particulars of births and deaths are shown in respect of events registered on the basis of "year of occurrence".

(a) For years prior to 1881 see Demography, Bulletin No. 67, 1949. (b) Northern Territory figures included with those for South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) See note (d) to Table No. 136c. (e) For the period September, 1939 to June, 1947 troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included. (f) Revised figures based on the June, 1957 Population Count of Canberra are:—1954, 1,592; 1955, 2,654; 1956, 2,868; 1957, 2,286.

NOTE.—Differences between the figures above and totals of figures for elements of increase shown separately in the following two tables (natural increase and recorded net interstate and overseas migration) represent, after taking into account deaths of defence personnel, differences disclosed by the final results of the 1947 and 1954 Censuses. Particulars of total increase have been adjusted for these differences, but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by the 1933 and earlier Censuses were adjusted on recorded departures.

Minus sign (-) denotes decrease.

(a) The rates represent total increase in population during the year expressed as a proportion per cent. of the population at the end of the previous year. See NOTE to Table No. 136a. For years prior to 1881 see Demography, Bulletin No. 67, 1949. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Population increased by 156 males and 126 females owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (e) For the period, September, 1939, to June, 1947, troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included. (f) Rates based on the revised estimates of population for the Australian Capital Territory consequent on the June, 1957, Population Count of Canberra are:—1954, 5.36; 1955, 8.48; 1956, 8.45; 1957, 6.21.

NOTE.—Minus sign (—) denotes rate of decrease.

A^{M54}

- l_x = Number Surviving at each Age out of 100,000 Born.
- d_x = Number Dying in each Year of Age out of 100,000 Born.
- p_x = Probability of Surviving One Year at each Age.
- q_x = Probability of Dying within One Year at each Age.
- μ_x = Force of Mortality at each Age.
- e_x = Complete Expectation of Life at each Age.

A F54

l_x = Number Surviving at each Age out of 100,000 Born.
 d_x = Number Dying in each Year of Age out of 100,000 Born.
 p_x = Probability of Surviving One year at each Age.
 q_x = Probability of Dying within One Year at each Age.
 μ_x = Force of Mortality at each Age.
 e_x = Complete Expectation of Life at each Age.
