# POPULATION AND VITAL STATISTICS

## PREFACE

This issue of the *Population and Vital Statistics* Part of the *Statistical Register of New South Wales* contains population statistics for 1960 and vital statistics for 1959 and 1960, as well as statistics for earlier years.

Preliminary results of the census of 30th June, 1961 have been incorporated wherever possible in this issue, and the tables concerned noted accordingly. No results were available for the age distribution of the population at the time the manuscript was being prepared, and the tables dealing with this have been omitted.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the most recent statistics, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

K. Davison  
Deputy Commonwealth Statistician  
and  
Government Statistician of New South Wales

Bureau of Census and Statistics,  
Sydney.

## EXPLANATORY NOTES

1. **Boundaries of Metropolis.** The boundaries of the Metropolis, as defined for statistical purposes, have been extended to include the following local government areas :—

- (a). From the date of the 1911 census—  
Shire of Ku-ring-gai (incorporated as a municipality in 1927).
- (b). From 1st January, 1929—  
Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.
- (c). From 1st January, 1933—  
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).
- (d). From 1st January, 1954—  
The Guildford and Wentworth Wards of Holroyd Municipality, Fairfield Municipality, Sutherland and Warringah Shires, and the following parts of Blacktown and Liverpool Municipalities and of Baulkham Hills and Hornsby Shires:—
  - (i). That part of Liverpool Municipality north and east of a line commencing at the junction of Hume Highway and Campbelltown Road (Cross Roads), and following Hume Highway, Bringelly Road, and Old Cowpasture Road to the northern boundary of the Municipality.
  - (ii). That part of Baulkham Hills Shire south and east of a line commencing at the junction of Old Windsor Road and Seven Hills Road, Seven Hills, and following Seven Hills Road, Chapel Lane, New Windsor Road, Gladstone Road, Victoria Road, Carrington Road, Showground Road, Castle Lane, Castle Street, and Old Northern Road to the shire boundary at Rogan's Hill.
  - (iii). That part of Blacktown Municipality east of a line commencing at the junction of Chandos Road and Eastern Creek on the southern boundary of the Shire, and following Eastern Creek, Breakfast Creek, Sunny Holt Road, and Meurants Lane to the north-eastern boundary of the Shire on Old Windsor Road, Parklea.
  - (iv). That part of Hornsby Shire south and east of a line commencing at the junction of Castle Hill Road and New Line Road, West Pennant Hills, and following New Line Road, Boundary Road, Thornleigh Gully Creek, Fish Pond Creek, Berowra Creek, Berowra Ferry Road, the Great Northern Railway, a line drawn south-easterly from the 21 mile peg (between Berowra and Mount Ku-ring-gai) to the head of Apple Tree Bay, Apple Tree Bay, and Cowan Water to the eastern boundary of the Shire at Bobbin Head.

In *Section I. Population*, unless otherwise stated, figures relating to the Metropolis are on the basis of the boundaries as delimited from 1st January, 1954. Figures for the Metropolis in *Section II. Vital Statistics* are based, unless otherwise stated, on the boundaries at the dates shown.

2. **Newcastle Urban Area.** From 1st January, 1954, a "Newcastle Urban Area" was defined for statistical purposes. This area includes the City of Newcastle, and that part of Lake Macquarie Shire east and north of Lake Macquarie, bounded on the west by Cockle Creek, Cocked Hat Creek, West Wallsend Road, and Minmi-Young Wallsend Road.

3. **Aboriginals.** Full-blood aboriginals have been excluded from all population statistics, and have been excluded from statistics of births and deaths since 1st January, 1933.

#### 4. Population and Migration Statistics.

##### (a). *Population of New South Wales.*

The periodic census enumerations are the most accurate source of information about the population of New South Wales.

For periods between censuses, the population of the State is estimated by adding the subsequent natural increase (the excess of births over deaths) and recorded net migration (the excess of arrivals over departures) to the population ascertained at the previous census. Accurate data as to natural increase are ensured by the compulsory registration of births and deaths. A system of recording arrivals and departures is maintained, but complete records of interstate movements are not available and the recorded net migration is therefore approximate. The intercensal estimates are subject to revision when the population is ascertained at the next census, and any discrepancy disclosed by the census is added to the recorded net migration.

In this issue, the population estimates for periods between the 1954 and 1961 censuses of population have been revised in the light of preliminary results of the 1961 census, which disclosed that the estimated population of the State at 30th June, 1961 had been understated by 4,520, or by 0.1 per cent.

##### (b). *Migratory Population.*

Shipping population and other migratory population are not included in any subdivisions of the State.

## EXPLANATORY NOTES (*continued*)

### 4. Population and Migration Statistics (*continued*).

#### (c). *Oversea Migration.*

(i). Unless otherwise stated, the figures of oversea arrivals and departures represent the movement of oversea passengers by sea or air through the ports of New South Wales. They include oversea passengers travelling via New South Wales to or from other States, and exclude those travelling via other States to or from New South Wales. The figures should not be taken to represent the true oversea migration to or from New South Wales.

(ii). Oversea arrivals and departures are classified according to intention in regard to residence, as declared upon embarkation (in the case of departures) or disembarkation (in the case of arrivals). In this classification:—

*Short Term Movement* refers to persons who state they intend to reside for a period of less than one year, in Australia in the case of arrivals and abroad in the case of departures;

*Long Term and Permanent Movement* refers to persons who state they intend to reside for a period of one year or more, in Australia in the case of arrivals and abroad in the case of departures.

As a result of a minor modification of the classification, operative from 1st January, 1959, Australian residents departing oversea for a period of one year or more, but stating Australia as their country of intended future residence, are included in Short Term Movement, and not, as formerly, in Permanent and Long Term Movement. Since June, 1947, Australian troops have been included in the figures for Short Term Movement, irrespective of their length of stay oversea.

(iii). Crew members of planes and ships are excluded from figures of oversea arrivals and departures.

### 5. Vital Statistics.

(a). *For Subdivisions of the State.* The births registered in New South Wales are allocated to a subdivision of the State according to the usual residence of the mother, and the deaths registered are allocated according to the usual residence of the deceased; in cases where the usual residence is outside the State, the birth or death is allocated to the subdivision in which it occurred. As the information reported is in many cases insufficient to establish the usual residence with complete accuracy, the figures for individual local government areas should be regarded as approximate.

(b). *Rates.* Rates per 1,000 of mean population shown in this issue have been calculated on estimates of population revised in accordance with preliminary results of the 1961 census. Consequently, they may differ from the rates shown in earlier issues.

6. *Still-births.* For purposes of record, still-births are registered as deaths as well as births, but in these tables still-births are not included in the statistics of deaths. Compulsory registration of still-births became effective in 1935. A still-born child is defined as "any child of seven months gestation or over, not born alive, and includes any child not born alive which measures at least fourteen inches, but does not include any child which has actually breathed".

### 7. Classification of Causes of Death.

(a). From 1st January, 1958, deaths have been classified according to the Seventh Revision (1955) of the International Statistical Classification of Diseases, Injuries, and Causes of Death. The international rules for selecting the underlying cause of death have been used in coding. The full 3-digit classification (with some 4-digit categories) has been used in tabulation, but certain categories have been grouped together for publication purposes. Accidents, poisonings, and violence (Class XVII) have been classified according to the external cause of injury.

(b). Causes of death for the years 1950 to 1957 were tabulated on the basis of the Sixth Revision (1948) of the International Classification. This Revision was in use for a shorter period than usual, and the Seventh Revision was limited to essential changes. Except for certain causes of death (see footnotes to Table 50, pages 63 to 68), comparability has not been significantly affected by the adoption of the Seventh Revision.

### 8. Statistical Summary (pages 186 to 189).

(a). For the sake of uniformity, the population estimates published by the Commonwealth Statistician have been adopted for all years. On this account, estimates of population shown for years prior to 1921 differ slightly from the estimates (which included full-blood aboriginals) published in the 1949-50 and earlier issues of *Population and Vital Statistics*. All estimates have been adjusted in accordance with the results of the various censuses. Birth, death, and marriage rates shown on page 189 have been based on these population estimates.

(b). The figures of natural increase shown for 1932 and earlier years in Table 2 were compiled by the Government Statistician of New South Wales, and are the same as in previous issues of *Population and Vital Statistics*. They include births and deaths of full-blood aboriginals, and consequently differ from the figures published by the Commonwealth Statistician.

(c). In Table 2, the difference between (i) the sum of the natural increase and the net migration, and (ii) the total increase in population, represents:—

(i). for the period 1907 to 1932, the difference between the natural increase as shown and the natural increase as compiled by the Commonwealth Statistician and used in the population estimates; and

(ii). for the period from September, 1939 to June, 1947, the deaths of defence personnel.

Particulars of total increase have been adjusted for these differences, but the individual elements of increase have not been adjusted separately.

## No. II. Population of Municipalities and Shires in Statistical Divisions of N.S.W., 1947 to 1961

Notes:—

- The estimates for the intercensal years 1955 to 1960 have been revised in the light of preliminary results of the 1961 census of population. The revised estimates, which are shown in this table, replace the estimates made prior to the census.
- The figures for each local government area are on a comparable basis for all the years 1947 and 1954 to 1961, and relate to its area as defined at 30th June, 1961. An asterisk (\*) attached to the figure for a particular year indicates that that figure and those for preceding years have been adjusted because of a change in the boundaries of the local area. In some cases, the figures shown for the census years 1947 and 1954 for local areas affected by boundary changes embody a measure of estimation.

† Excess of live births over deaths.

‡ Excess of overseas and interstate arrivals over departures. The sign (-) denotes an excess of departures over arrivals.

¶ Adjusted in accordance with preliminary results of the 1961 census; see Explanatory Note 4 (a), page 6. Figures for Net Migration for 1933 and later years have been revised to include adjustments for discrepancies in population estimates disclosed by periodic censuses.

§ For Natural Increase and Net Migration, the rate is the increase per 1,000 of mean population; for Total Increase, the rate is the percentage increase based on the population at the end of the previous year.

|| Australian Capital Territory separated from N.S.W. South Wales on 1st January, 1911, and Jervis Bay area transferred to Australian Capital Territory in 1916.

\*\* Excess of births over civilian deaths from September, 1939 to June, 1947.

†† Excludes troop movements from September, 1939 to June, 1947.
