SECTION IX.—CURRENT RATES OF WAGE AND HOURS OF LABOUR.

General.—The collection of material respecting the current rate of wage payable in different callings and in occupations in various industries carried on in each State of the Commonwealth was first undertaken by this Bureau in the early part of the year 1913. which was confined to the rate of wage payable to adult workers only.* was further limited in a degree to those industries in operation within the metropolitan area of the capital town in each State. † ticulars acquired were obtained primarily from awards, determinations, and industrial agreements under Cominonwealth and State Acts, and related to the minimum wage prescribed. In cases where no award, determination or agreement was in force, the ruling union or predominant rate of wage being paid was ascertained from employers and secretaries of trade unions. For convenience of comparison, weekly rates of wage. were adopted, though in many instances they were actually based on daily or hourly rates, as specified in awards, determinations, or agreements.t.

The information thus obtained referred to the weekly rate of wage in upwards of 400 industries, and related to 1569 male occupations or callings. These particulars furnished the necessary data for the computation of average rates of wage in various industrial groups, and in each State and all States. The average rate of wage thus computed represented the arithmetic average || of the rate of wage payable in all classified occupations. It was not claimed that results obtained by this method are precisely correct, but owing to the difficulty in obtaining any satisfactory data as to the number of persons engaged in each of the occupations for which rates of wage had been obtained, no detailed system of weights could be applied. For final results for each State and for each industrial group throughout the States, however, a careful system of weighting was adopted. For example, in computing the

† In order to make the inquiry a comprehensive one, it was necessary to include certain industries which obviously are not carried on in the capital towns, e.g., Mining, Shipping, Agricultural, and Pastoral.

§ The following industrial classification of industries was adopted :-

Classification of Industries and Occupations.

I. II. III.	Wood, Furniture, Sawmill, Timber- works, &c. Engineering, Metal Works, &c. Food, Drink, and Tobacco, &c., Manu-	VIII.	Mining, &c. Raliway and Tramway Services.
IV. V. V VI. VII.	Clothing, Hats, Boots, Textiles, &c. Books, Printing, Bookbinding, &c. Other Manufacturing. Building.	XI. XII. XIII. XIV.	Shipping, Wharf Labour, &c. Pastoral, Agricultural, Rural, Hortl cultural, &c. Domestic, Hotels, etc. Miscellaneous.

If The summation of the weekly rate of wage divided by the number of occupations included.

This limitation was necessary owing to the difficulty of ascertaining reliable particulars of the numbers of apprentices, improvers and other juvenile workers, to whom progressive rates of wage, fixed or otherwise, according to increasing age or experience, are payable from year to year.

[‡] This precaution was necessary, in view of the fact that it is often in those industries and occupations in which employment is of an exceptionally casual or intermittent nature that wages are fixed and paid at a daily or hourly rate. Hence the average weekly earnings in such occupations will probably fall considerably short of the computed weekly rates.

[¶] Though a great deal of information as to the number of persons engaged in different industries and occupations was available from the Census (1911) results, it was found impracticable to bring the classification of these results into line with the detailed classification of occupations in the various industries, as set out in the awards, determinations, etc.

result for any State in any year, the computed average wage in each industrial group was multiplied by a number (weight) representing the relative number of all male workers engaged in that group of industries in the particular State. The sum of the products thus obtained, divided by the sum of the weights, represents the relative aggregate average wage for that State for the particular year.*

The whole question of weighting was referred to in some detail in Report No. 1 (*Prices, Price Indexes and Cost of Living*) of the Labour and Industrial Branch of this Bureau. With the necessary verbal modifications, many of the statements there made and the problems there considered in regard to the subject of prices, etc., refer equally to the question of weighting in other investigations, such as the present. Any inquirer wishing to thoroughly understand the subject may refer to

that Report.

The results thus ascertained for the year 1913 were published in Labour Report No. 2, pp. 28-43. In the early part of the year 1914 the scope of the inquiry was considerably extended, and particulars of the weekly rates of wage in 930 specified industries and 4256 adult occupations (3948 male, and 308 female)† were included, and results obtained thereby to the 30th April; 1914, were published in Labour Report No. 5, pp. 44-50. These results were further analysed, and the number of working hours which constituted a full week's work in each occupation was averaged and weighted in a similar manner to the rates of wage. This course was adopted in order to overcome the difficulty of making comparisons of the rates of wage in any specified occupation, owing, in many instances, to a different number of working hours constituting a full week's work in separate States. By dividing the weighted average number of working hours into the weighted average weekly rate

The weights used in the computation of the average wage were as follows:—
 Current Rates of Wage for Adult Male Occupations. Weights used for

of wage, what for some purposes may be considered a more adequate standard of comparison was ascertained. Results obtained from these computations were given for each industrial group for each State.

Since the 30th April, 1914, the number of occupations included in comparative computations have been kept constant, but the particulars of wages contained in Appendixes VII. and VIII. to this Report include those for many additional occupations. In most instances these have been taken from awards or determinations made subsequent to that date by industrial tribunals or from agreements registered under Commonwealth or State Acts, or as a result of direct inquiry.

- 2. Weekly Rates of Wage and Wage Index-Numbers in States and in Classified Industries, 31st December, 1918.—The particulars given in the Appendixes, referred to above, furnish the necessary data for the computation of relative rates of wage in the different States and classified industrial groups at the 31st December, 1918.
- (i.) Weighted Average Nominal Weekly Rate of Wage Payable to Adult Male Workers in each State, 31st December, 1918.—The following table shows the weighted average nominal weekly rate of wage payable at the 31st December, 1918, to adult male workers for a full week's work in each State and the Commonwealth. These results are based on the rates of wage in a large number of important industries, and serve to indicate with a considerable degree of precision the relative conditions in the For the purposes of comparison as between States it several States. should, however, be observed that the lists of occupations to which the rates of wage refer are not by any means uniform, neither do they necessarily include all industries carried on in each State. An examination of the Appendixes, however, will shew that the rates of wage for all occupations and callings which are common to all States are included. Any conclusions drawn from the tables must be subject to these qualifica-Taking the weighted average rate of wage for the six States as base (= 1000), index-numbers for each State are also shewn.

Weighted Average Nominal Weekly Rate of Wage payable to Adult Male Workers for a Full Week's Work, and Wage Index-Numbers in each State and Commonwealth, 31st December, 1918.

· Weighted average.

The results show that the weighted average nominal weekly rate of wage was highest in Western Australia, followed in the order named by Queensland, New South Wales, South Australia and Victoria (equal), and Tasmania.

(ii.) The following table gives particulars in regard to the weighted average nominal weekly rate of wage at the 31st December, 1918, for adult male workers in each of the several industrial groups and to the weighted average for all groups combined. In computing the indexnumber for each industrial group, the weighted average rate of wage for all groups is taken as base (= 1000).

Weighted Average Nominal Weekly Rate of Wage payable to Adult Male Workers for a full Week's Work, and Wage Index-Numbers in each Industrial Group, 31st December, 1918.

Weighted average.

It may be seen from the above table that the highest weighted average nominal weekly wage at the end of the year 1918 was paid to employees in the Mining industry (Group VIII.), 78s. 6d. per week, followed by Group VII. (Building), 74s. 3d., and Group V. (Books, Printing, etc.), 74s. 1d. The lowest weighted average nominal weekly wage was that paid to persons engaged in Hotels, Restaurants, etc. (Group XIII.), 56s. 7d. The average wage paid in the Mining industry (Group VIII.) was 18 per cent. higher, while the average in Group XIII. (Domestic, Hotels, etc.) was 15 per cent. lower than the average wage for all groups.

The highest weighted average nominal weekly rate of wage for female workers was paid in Western Australia, followed in the order named by Queensland, New South Wales, Victoria, South Australia, and Tasmania.

(iv.) The following table gives particulars regarding the weighted average nominal weekly rate of wage of adult females in these industrial groups in which they are mainly employed, and the weighted average for all groups combined. Index-numbers based on the weighted average for all groups (= 1000) are also given:—

Weighted Average Nominal Weekly Rate of Wage payable to Adult Female Worker's for a Full Week's Work, and Wage Index-Numbers in Industrial Groups, 31st December, 1918.

Industrial Groups.	No. of Rates Included.	Weighted Aver. Weekly Rate of Wage (for Full Week's Work).	Index-Numbers

All Groups	308	31 9	1,000†	

^{*} See footnote § to table on preceding page.

The results set out in the above table shew that the highest weighted average was paid in Group XIII. (Domestic, Hotels, etc.), 34s. 1d, followed in order by Group XIV. (Shop Assistants, Clerks, etc.), 32s. 4d., and the combined Manufacturing group, 32s. 0d. The average wase paid to employees in Group III. (Food, Drink, etc.), 29s. 3d., is 8 per cent. lower, while that paid in Group XIII. (Domestic, Hotels, etc.) is 7 per cent. higher than the average rate of wage for all groups.

- 3. Relative Weekly Wages and Wage Index-Numbers in each State and for all States, 1914-18.—The arithmetic average of the rates of wage given in the appendixes referred to furnishes the basis for the computation of relative weighted wages in different industrial groups and States. In the following tables particulars are given of the results thus obtained of the weighted average nominal weekly rates of wage payable to adult workers, male and female, separately, at the 30th April, 1914, and approximately at the end of each subsequent quarterly period to the 31st December, 1918, for a full week's work, in each State and for all States.
- (i) Weighted Average Nominal Weekly Rates of Wage Payable to Adult Male Workers in each State, 1914-18.— The following table shews the weighted average nominal weekly rate of wage payable to adult male workers for a full week's work, together with index-numbers for each State at each specified interval with the average for all States at the 30th April, 1914, as base (=1000).

[†] Weighted average.

Weighted Average Nominal Weekly Rate of Wage payable to Adult Male Workers for a Full Week's Work, and Wage Index-unmbers in each State and Commonwealth, 30th April, 1914, to 31st December, 1918.

Note.—Index-number based on the average wage for the Commonwealth at the 30th April, 1914 (55.12s.) as base (=1000). The index-numbers in this table are comparable throughout.

In the preceding table it will be seen that the average weekly wage for adult male workers, as indicated by index-numbers at the 30th April, 1914, in two States, viz., New South Wales and Western Australia, exceeded the weighted average wage for the Commonwealth. This feature remained constant in varying degrees of excess throughout the period under review until the end of September, 1917, when the indexnumber representing the average wage for Queensland also was higher than the weighted average wage index-number for the Commonwealth.

During the year 1918, the average weekly rate of wage advanced considerably in Victoria, Queensland and South Australia. The effect of these advances was such, that at the 31st December, 1918, the average weekly rate for the Commonwealth exceeded that for New South Wales The rates for Queensland and Western Australia were higher at the end of 1918 than the average weekly rate for the Commonwealth, while those for Victoria, South Australia and Tasmania, as well as that for New South Wales, were lower.

(ii.) Weighted Average Weekly Rate of Wage payable to Adult Female Workers in each State, 1914-18.—The first part of the following table shows the weighted average weekly rate of wage payable to adult female workers for a full week's work in each State and the Commonwealth at the 30th April, 1914, and at approximately quarterly periods to the 31st December, 1918. The table shows index-numbers for each State based on the average weekly wage at the end of each of the periods indicated, computed with the weighted average wage for all States at the 30th April, 1914, as base (=1000).

From the following table it will be seen that the general upward movement in the average weekly wage for adult female workers, as indicated for the whole Commonwealth, was comparatively small during 1914 and 1915. From the beginning of the year 1916, the average wage has increased rapidly, the increase during the year 1918 being very noticeable, particularly in the fourth quarter. The advance during the whole period under review has been 16,8 per cent., and this increase has practically taken place since the beginning of 1916.

Weighted Average Nominal Weekly Rate of Wage payable to Adult Female Workers for a Full Week's Work, and Wage Index-numbers in each State and Commonwealth, 30th April, 1914, to 31st December, 1918.

Nors.—Index-number based on the average wage for the Commonwealth at the 30th April, 1914 (27s. 2d.) as base (= 1000). The index-numbers in this table are comparable throughout.

(iii.) Weighted Average Weekly Rate of Wage Payable to Adult Male Workers in each Industrial Group, 1914-1918.—The following table gives particulars in regard to (a) the average weekly rate of wage in each of the industrial groups, and (b) the weighted average wage for all groups combined, as at 30th April, 1914, at 31st December, 1914 to 1917, and at approximately quarterly periods during the year 1918. Index-numbers for each industrial group and all groups, based on the average wage for all groups at 30th April, 1914 (= 1000), are given:—

Weighted Average Nominal Weekly Rate of Wage payable to Adult Male Workers for a Full Week's Work, and Wage Index-numbers in each Industrial Group, 30th April, 1914, to 31st December, 1918.†

Nore.—Index-numbers for each industrial group and all industrial groups, based on the average wage for all groups at 30th April, 1914 (55s. 1d.), as base (= 1000). The index-numbers in this table are comparable throughout.

[•] See footnote to table on page 83. . . † Particulars for the quarters omitted from this table will be found on page 73 of Report No. 8.

The above table shews that the rate of increase in the weighted average weekly wage in occupations and callings classified in the fourteen industrial groups during the period 30th April, 1914, to 31st December, 1918, was greatest in Group XI. (Shipping), 31.8 per cent., followed in the order named by Groups XII. (Agricultural, etc.), 27.6 per cent., and X. (Other Land Transport), 24.2 per cent. In ten of the groups the increase was less, in one group equal, and in three groups more than the increase in the weighted average for all groups.

(iv.) Weighted Average Weekly Rate of Wage Payable to Adult Female Workers in Industrial Groups, 1914-18.—The following table gives particulars of the weighted average weekly rate of wage payable to adult female workers at the 30th April, 1914, at 31st December, 1914 to 1917, and at approximately quarterly periods during the year 1918, in the industrial groups in which they are mainly employed, and in all groups combined. Taking the average wage for all groups at the 30th April, 1914, as base (= 1000), index-numbers are given, computed on the average rate of wage ruling at the end of each period indicated.

Weighted Average Nominal Weekly Rate of Wage payable to Adult Female Workers for a Full Week's Work, and Wage Index-numbers in each Industrial Group, 30th April, 1914, to 31st December, 1918.‡

Note.—Index numbers for each Industrial Group and all Industrial Groups, based on the Average Wage for all groups at 30th April, 1914 (27s. 2d), as base (= 1000). The index numbers in this table are comparable throughout.

^{*}See footnote § to table on page 83. † Weighted average. ‡ Particulars for the quarters omitted from this table will be found on page 74 of Report No. 8.

It may be seen from the above table that the greatest increase in the weekly rate of wage has occurred in Group III. (Food, Drink, etc.), 30.2 per cent., followed in the order named by Groups IV. (Clothing, Boots, etc.), 24.1 per cent.; I., II., V. and VI. (All Other Manufacturing), 18.9 per cent., XIII. (Domestic, Hotels, etc.), 9.7 per cent., and the last group (Miscellaneous), 7.1 per cent. The weighted average weekly rate of wage for all groups was 16.8 per cent. higher at the end of 1918 than on the 30th April, 1914.

4. Hours of Labour and Hourly Rates of Wage, 31st December. 1918.—The rates of wage referred to in the preceding paragraphs of this Section relate to the minimum rates payable for a full week's work. It should be observed, however, that the number of hours which constitutes a full week's work differs in many instances, not only as between various trades and occupations in each State, but also as between the same trades and occupations in the several States. order to secure what may be for some purposes a more adequate standard of comparison, the results given in the preceding paragraphs are herein reduced to a common basis, viz., the rate of wage per hour, classified according to industrial groups in each State and all States. In Appendixes VII. and VIII. of this Report, particulars in detail regarding the number of hours worked per week in the various industries in the several States are shown. It will there be seen that the specified number of hours of labour per week covers a very wide range. In the following tables the average number of hours per week for each State, according to industrial groups, is given.

The tables on pages 91 and 92 shew (a) the average weekly wage, (b) the average number of working hours per week for a full week's work, and (c) the average hourly wage for adult male and female workers in each State and industrial group except Groups XI. (Shipping, etc.), and XII. (Pastoral, Agricultural, etc.). Owing to the fact that many of the occupations included in these two groups are of a casual or seasonal nature, and that the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or otherwise, the necessary particulars for the computation of average working time and hourly rates of wage are not available.

The general effect of reducing the weighted average rates of wage to a common basis (i.e., per hour) is to eliminate on comparison any apparent difference between the several States which may be due to unequal working time.

Relative Hours of Labour and Hourly Rates of Wage, 1914 to 1918.—Particulars are given in the following table, classified according to States for male and female occupations separately at 30th April, 1914, and at the end of December, 1914 to 1918. These particulars relate to (a) the weighted average weekly wage, (b) the weighted average number of working hours constituting a full week's work, and (c) the weighted average hourly wage. It should be observed that the weighted average weekly wage relates to all industrial classes combined, and includes the value of board and lodging where supplied in land occupations and the value of victualling in marine occupations, whereas the number of working hours, and the hourly wage relate to all industrial classes other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Owing to the fact that many of the occupations included in these two groups are of a casual or seasonal nature, and that the hours of labour in these occupations are not generally regulated either by awards or determinations of industrial tribunals or otherwise, the necessary data for the computation of the average number of working hours are not available.

Weighted Average Nominal Weekly and Hourly Rates of Wage payable to Adult Workers, and Weekly Hours of Labour, 30th April, 1914, and at the end of the years, 1914 to 1918.

^{*} Weighted average weekly wage in all industrial groups combined.

From the foregoing table it may be seen that there has been a diminution in each of the States in the number of working hours constituting a full week's work for male occupations, and (with the exception of Western Australia) for female occupations also. The effect of these changes on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers given in the following table. In each instance (male and female occupations separately) the basis taken is the weighted average for the Commonwealth at the 30th April, 1914 (= 1000).

[†] Weighted average working hours per week, and computed hourly rates of wage for all industriat groups excepting Groups XI. (Shipping, etc.), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for occupations classified in Industrial Groups XI. and XII.

Relative Index-numbers for Weekly and Hourly Weighted Average Wage, 30th April, 1914, 31st December, 1914 to 1918.

Note.—Weighted Average for the Commonwealth at 30th April, 1914, as base (= 1000).

SECTION X.—VARIATIONS IN NOMINAL AND EFFECTIVE WAGES.

1. General.—From the beginning of the year 1913, records have been kept of all changes in rates of wage and hours of labour, the number of workers affected, and the methods by which such changes are brought about. The results of these records have been published in the quarterly Labour Bulletins and in Labour Reports Nos. 5, 6, 7 and 8. In order to supplement the results thus obtained, investigations have been made regarding rates of wage in past years with a view to shewing their general trend in each State and in various industrial groups. The methods adopted for the collection of the data and computation of the results were explained in Report No. 2 (see pages 23-4), and will not be repeated here. The particulars given in this Section shew variations in nominal wages from year to year in each State and in various industrial groups. Index-numbers are also given shewing variations in effective wages in each State.

• The total number of occupations for which particulars are available back to 1891 is 652. In 1913, however, the scope of the investigation was extended, and particulars for that year are available for no fewer
