BALANCE OF PAYMENTS

- The current account deficit, seasonally adjusted, rose \$7,001m to \$13,347m in the June quarter 2009. There was a turnaround of \$5,934m on the balance on goods and services, resulting in a \$1,667m deficit in the June quarter 2009. The income deficit increased \$1,064m (10%) to \$11,489m.
- In seasonally adjusted chain volume terms there was an increase of \$683m (36%) in the deficit on goods and services. This is expected to detract 0.2 percentage points to growth in the June quarter 2009 volume measures of GDP.

INTERNATIONAL INVESTMENT POSITION (IIP)

Australia's net IIP fell \$7.5b to a net liability position of \$725.9b in the June quarter 2009.
 Australia's net foreign debt liability decreased by \$42.5b to a liability position of \$633.2b.
 Australia's net foreign equity liability increased \$35.0b to a liability position of \$92.7b.

REVISIONS

Table 36 summarises revisions, in original current price terms, since the last issue of this publication, for the last three years and six quarters.

Incorporation of the latest survey and administrative data has resulted in revisions to the current account back to September quarter 2007. In original terms, these revisions have increased the 2007–08 current account deficit by \$1,872m (3%) and increased the deficit for the March quarter 2009 by \$1,487m (36%). In seasonally adjusted chain volume terms, these revisions increased the volume deficit on goods and services by \$979m for the March quarter 2009.

The financial account and international investment position have been revised back to September quarter 2007, resulting in a decrease of \$1,275m in Australia's net IIP liability as at 31 March 2009 to a liability position of \$733,363m.

CHANGES TO NEXT ISSUE

Significant changes to the presentation of statistics in this publication will be made in the next issue. Mock-ups of the time series spreadsheets will be released on 27 October 2009 with new series identifiers. For details see page 5 - *Changes in September issue*.

TREND ESTIMATES

Caution should be used when interpreting recent trend estimates as they may be affected by unusual economic factors. For more details on trend estimates, please see paragraph 11 of the explanatory notes.

CHANGES IN SEPTEMBER ISSUE

CHANGES TO NEXT ISSUE

The ABS will introduce revised international standards into the Balance of Payments, National Accounts and related series with the September quarter 2009 releases. To enable series to be complied and validated according to the new standards, the September quarter issue of this publication will be released one week later than normal. Details about the implementation of the new standards are provided in the following information papers:

An *Information paper: Revisions to international standards in quarterly Balance of Payments and International Investment Position statistics from September 2009* (cat. no. 5302.0.55.002) was released on 22 July 2009. This paper describes the main changes to the international standards, timing for implementing the changes in Australian statistics, impact on time series and presentation of statistics in this publication. It also provides mock-ups of the proposed publication and related time series spreadsheets. New series identifiers will be added to the mock-ups of the time series spreadsheets on 27 October 2009.

An *Information paper: Estimation of Worker's Remittances based on Balance of Payments and International Investment Position Manual, Sixth Edition, September 2009* (cat. no. 5302.0.55.003) was released on 14 August 2009. This paper discusses the treatment of Workers' remittances and the methodology that has been developed to estimate Workers' remittances debits (i.e. payments out of Australia). The new data series will commence from September quarter 1989 and will be included under Personal transfers in the Secondary income account of the balance of payments from the September quarter 2009 issue of this publication.

An *Information paper: Revisions to international standards in monthly international trade in goods and services statistics from August 2009* (cat. no. 5368.0.55.012) was released on 4 June 2009. This paper outlines the changes to the international standards and the impact on the presentation of statistics in *International Trade in Goods and Services, Australia* (cat. no. 5368.0). It also describes the background to the changes, timing of the proposed changes and provides mock-ups of the proposed publication and the related time series spreadsheets.

An *Information paper: Implementation of revised international statistical standards in ABS National and International Accounts* (cat no. 5310.0.55.002), scheduled to be released on 30 September 2009 will describe the impact of the international standards on Australia's macro economic accounts including key aggregates for the balance of payments and international investment position. Technical information included in this paper will describe the most significant changes in more detail.

ANALYSIS AND COMMENTS

BALANCE OF PAYMENTS

CURRENT ACCOUNT

The trend estimate of the balance on current account for the June quarter 2009 was a deficit of \$9,907m in current price terms. This was an increase of \$1,865m (23%) on the deficit recorded for the March quarter 2009 where:

- the goods and services surplus fell \$1,447m (49%) to \$1,479m
- the income deficit rose \$399m (4%) to \$11,185m
- the current transfers deficit rose \$19m (10%) to \$201m.

In seasonally adjusted current price terms, the current account deficit rose \$7,001m to \$13,347m between the March quarter 2009 and June quarter 2009 where:

- there was a turnaround of \$5,934m on the balance on goods and services resulting in a deficit of \$1,667m
- the income deficit rose \$1,064m (10%) to \$11,489m
- the current transfers deficit rose \$4m (2%) to \$192m.

Goods and Services

The trend estimate of the balance on goods and services at current prices was a surplus of \$1,479m, a decrease of \$1,447m (49%) on the March quarter 2009 surplus.

In seasonally adjusted terms, the balance on goods and services was a deficit of \$1,667m, a turnaround of \$5,934m on the March quarter 2009 surplus where:

- there was a turnaround of \$6,283m on net goods resulting in a deficit of \$1,885m
- there was a turnaround of \$351m on net services resulting in a surplus of \$219m.

The turnaround in the goods surplus resulted from the decrease in goods credits (exports), down \$11,156m (19%) exceeding the decrease in goods debits (imports), down \$4,873m (9%).

Contributing to the decrease in goods credits were:

- non-rural goods, down \$8,061m (18%)
- other goods, down \$2,390m (37%)
- rural goods, down \$706m (9%).

Contributing to the decrease in goods debits were:

- other goods, down \$2,079m (47%)
- capital goods, down \$1,950m (15%)
- intermediate and other merchandise goods, down \$1,300m (6%).

Partly offsetting these decreases was consumption goods, up \$456m (3%).

The surplus on services of \$219m was a turnaround of \$351m on the March quarter 2009 deficit of \$132m. This resulted from the increase in services credits, up \$354m (3%) exceeding the increase in services debits, up \$3m.

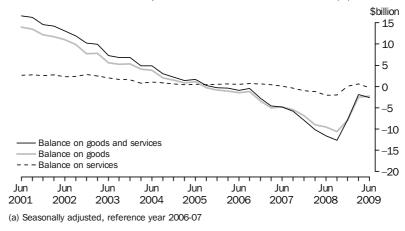

In seasonally adjusted volume terms, the deficit on goods and services was \$2,570m, an increase of \$683m (36%) on the \$1,887m deficit recorded in the March quarter 2009. The net deficit on goods fell \$199m (8%) to \$2,287m. Goods credits rose \$288m (1%) and goods debits rose \$89m. The net services balance was a deficit of \$283m, a turnaround of \$882m on the surplus of \$599m in the March quarter 2009.

Goods and Services continued

Preliminary analysis included in the June 2009 issue of International Trade in Goods and Services (cat. no. 5368.0) stated that goods debits volumes in seasonally adjusted terms decreased about 1.9% during June quarter 2009, the implicit price deflator fell 7.2% and in original terms, the Chain Laspeyres price index fell about 6.1% and the implicit price deflator fell 7.6%. Further process of June quarter data resulted in these initial estimates being revised with volumes increasing 0.2% and the implicit price deflator falling 9.1% in seasonally adjusted terms while in original terms, the Chain Laspeyres price index fell about 8.1% and the implicit price deflator fell 9.6%.

The increase of \$683m in the deficit on goods and services in volume terms is expected to detract 0.2 percentage points from growth in the June quarter 2009 volume measure of GDP, assuming no significant revision to the GDP chain volume estimate for the March quarter 2009.

GOODS AND SERVICES, CHAIN VOLUME MEASURES(a)

Goods Credits

The trend estimate of goods credits at current prices fell \$5,834m (10%) to \$51,853m in the June quarter 2009.

In seasonally adjusted terms at current prices, goods credits fell \$11,156m (19%) to \$47,602m.

Exports of rural goods, in seasonally adjusted terms at current prices, fell \$706m (9%) to \$7,156m, with volumes up 1% and prices down 10%. All components contributed to this fall in rural goods, with the largest decreases in:

- other rural, down \$377m (11%), with volumes up 2% and prices down 13%
- meat and meat preparations, down \$160m (8%), with volumes down 2% and prices down 7%
- cereal grains and cereal preparations, down \$114m (6%), with volumes up 4% and prices down 10%.

Exports of non-rural goods, in seasonally adjusted terms at current prices, fell \$8,061m (18%) to \$36,394m, with volumes up 4% and prices down 21%. All components contributed to this fall in rural goods, with the largest decreases in:

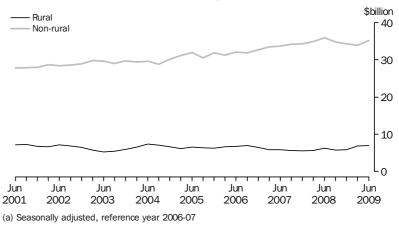

- coal, coke and briquettes, down \$3,295m (26%), with volumes up 17% and prices down 37%
- metal ores and minerals, down \$2,768m (21%), with volumes up 6% and prices down 25%

Goods Credits continued

- other mineral fuels, down \$883m (18%), with prices down 18%
- transport equipment, down \$412m (36%), with volumes down 31% and prices down 8%.

Exports of other goods, in seasonally adjusted terms at current prices, fell \$2,390m (37%) to \$4,052m. The main contributor to this decrease was the non-monetary gold component, down \$2,309m (40%), with volumes down 31% and prices down 13%.

GENERAL MERCHANDISE CREDITS, CHAIN VOLUME MEASURES(a)

Goods Debits

The trend estimate of goods debits at current prices fell \$3,799m (7%) to \$50,601m in the June quarter 2009.

In seasonally adjusted current price terms, goods debits fell $4,873 \, \mathrm{m}$ (9%) to $49,487 \, \mathrm{m}$.

Imports of consumption goods, in seasonally adjusted terms at current prices, rose \$456m (3%) to \$15,285m, with volumes up 11% and prices down 7%. The largest increases were in:

- household electrical items, up \$290m (23%), with volumes up 46% and prices down 16%
- non-industrial transport equipment, up \$183m (7%), with volumes up 8% and prices down 1%.

Partly offsetting these increases was the textiles, clothing and footwear component, down \$122m (6%), with volumes up 6% and prices down 11%.

Imports of capital goods, in seasonally adjusted terms at current prices, fell \$1,950m (15%) to \$11,415m, with volumes down 6% and prices down 9%. All components contributed to this fall in capital goods with the largest decreases in:

- machinery and industrial equipment, down \$713m (15%), with volumes down 6% and prices down 9%
- capital goods, n.e.s., down \$607m (17%) with volumes down 8% and prices down 9%
- industrial transport equipment, n.e.s., down \$370m (27%), with volumes down 21% and prices down 7%.

Goods Debits continued

Imports of intermediate and other merchandise goods, in seasonally adjusted terms at current prices, fell \$1,300m (6%) to \$20,407m, with volumes up 2% and prices down 8%. The largest decreases were in:

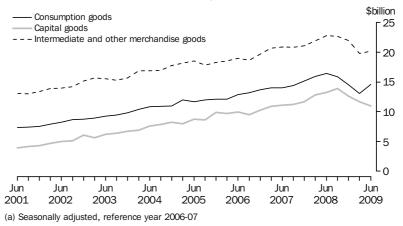

- processed industrial supplies, n.e.s., down \$561m (11%), with volumes down 2% and prices down 9%
- iron and steel, down \$356m (29%), with volumes down 5% and prices down 25%
- primary industrial supplies, n.e.s., down \$136m (30%), with volumes up 1% and prices down 31%
- parts for transport equipment, down \$132m (7%), with volumes up 2% and prices down 9%.

Partly offsetting these decreases were:

- other merchandise goods, up \$138m (57%), with volumes up 67% and prices down 6%
- fuels and lubricants, up \$128m (2%), with prices up 2%.

Imports of other goods, in seasonally adjusted terms at current prices, fell \$2,079m (47%) to \$2,380m. The largest decreases were in the non-monetary gold component, down \$1,902m (51%), with volumes down 43% and prices down 14%, and the goods for processing component, down \$193m (53%), with volumes down 45% and prices down 14%.

GENERAL MERCHANDISE DEBITS, CHAIN VOLUME MEASURES(a)

Services

The trend estimate of net services at current prices was a surplus of \$226m, a turnaround of \$587m on the revised March quarter 2009 deficit of \$361m.

In seasonally adjusted terms at current prices, net services recorded a surplus of \$219m, a turnaround of \$351m on the revised March quarter 2009 deficit of \$132m.

Services credits, in seasonally adjusted terms at current prices, rose \$354m (3%) to \$13,862m, with volumes up 2% and prices up 1%. The largest increases were in:

- travel services, up \$268m (3%), with volumes up 3% and prices up 1%
- other services, up \$112m (3%), with volumes up 3%.

Partly offsetting these increases was the transportation services component, down \$26m (1%), with volumes down 1%.

Services continued

Services debits, in seasonally adjusted terms at current prices, rose \$3m to \$13,643m, with volumes up 10% and prices down 9%. The largest increases were in:

- travel services, up \$255m (5%), with volumes up 16% and prices down 10%
- other services, up \$70m (2%), with volumes up 12% and prices down 10%.

Partly offsetting these increases was the transportation services component, down \$321m (9%), with volumes down 3% and prices down 6%.

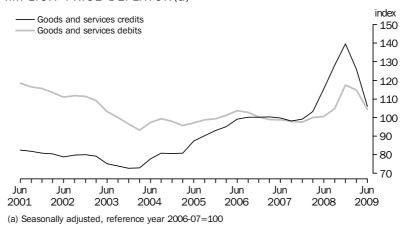

Seasonally adjusted, tourism related services credits rose \$226m (3%) to \$9,049m, and tourism related services debits rose \$196m (3%) to \$7,095m.

IMPLICIT PRICE DEFLATOR*

In seasonally adjusted terms, the implicit price deflator (IPD) for total goods and services credits fell 15.8%. In original terms, it decreased 16.2% and the chain Laspeyres price index for goods and services credits fell 16.3%. In original terms, the IPD for goods credits fell 20.2% and the IPD for services credits rose 0.5%.

The total goods and services debits IPD fell 9.1% in seasonally adjusted terms. In original terms, it fell 9.4% and the chain Laspeyres price index for goods and services debits fell 8.1%. In original terms, the IPD for goods debits fell 9.6% and the IPD for services debits fell 8.8%.

IMPLICIT PRICE DEFLATOR(a)

Relationship to IPI and FPI*

In original terms, the implicit price deflator (IPD) for total goods credits fell 20.2% while the chain Laspeyres price index for goods exports fell 19.9%. The export price index (EPI) fell 20.6% during the June quarter 2009.

In original terms, the implicit price deflator for total goods debits fell 9.6% while the chain Laspeyres price index for goods imports fell 8.1%. The import price index (IPI) fell 6.4% during the June quarter 2009.

Terms of Trade*

Australia's seasonally adjusted terms of trade fell 7.4% to 101.7, with a decrease of 15.8% in the IPD for goods and services credits and a decrease of 9.1% in the goods and services debits IPD. The trend estimate of the terms of trade decreased 6.9% to 104.0.

* On this commentary movements in indexes are based on data to four decimal places.

Income

The trend estimate of the net income deficit increased \$399m (4%) to \$11,185m in the June quarter 2009.

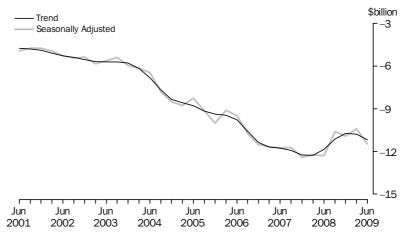

In seasonally adjusted terms the net income deficit increased 1,064m (10%) to 11,489m. Income debits increased 495m (2%) to 20,543m and income credits decreased 568m (6%) to 9,055m.

The main contributors to the increase in income debits were a \$441m (6%) increase in direct investment in Australia, income on equity and a \$274m (3%) increase in portfolio investment liabilities, income on debt.

The main contributor to the decrease in income credits was a decrease of \$525m (10%) in direct investment abroad, income on equity, which was offset partially by a \$163m (7%) increase in portfolio investment assets, income on debt.

In original terms the net income deficit increased \$696m (7%) to \$10,792m in the June quarter 2009. Income debits increased \$490m (2%) to \$20,291m and income credits decreased \$206m (2%) to \$9,499m.

NET INCOME

Current Transfers

In seasonally adjusted terms, the net current transfers deficit was \$192m, an increase of \$4m (2%) on the \$188m deficit recorded in March quarter 2009. Current transfer credits fell \$8m (1%) and current transfer debits fell \$5m in the June quarter 2009.

CAPITAL AND FINANCIAL ACCOUNT

Capital Account

In original terms, the capital account surplus was \$458m, down \$228m (33%) on the March quarter 2009 surplus. Capital transfer credits fell \$493m (39%) to \$778m and capital transfer debits fell \$263m (45%) to \$320m. Net acquisition/disposal of non-produced, nonfinancial assets was balanced.

Financial Account

The balance on financial account recorded a net inflow of \$11.5b, with a \$16.7b inflow of equity and a \$5.3b outflow of debt.

The financial account surplus increased by \$6.8b from \$4.7b in the March quarter 2009 to \$11.5b in the June quarter 2009 in line with the increase in the current account deficit, which increased from \$5.7b last quarter to \$11.6b this quarter.

Financial Account continued

Net debt issues rose from \$16.2b in the March quarter 2009 to \$42.0b in the June quarter 2009. The main contributor was a turnaround of \$24.8b in net issues of money market liabilities by depository corporations. This was offset by an increase in other investment assets, currency and deposits from \$4.5b in the March quarter 2009 to \$17.8b in the June quarter 2009, and an increase in reserve assets from \$1.8b in the March quarter 2009 to \$13.0b in the June quarter 2009.

Direct investment in Australia recorded an inflow of \$9.8b in the June quarter 2009, an increase of \$3.0b on the March quarter 2009 inflow of \$6.7b. Australia's direct investment abroad recorded an outflow of \$12.4b, a decrease of \$1.1b on the previous quarter's outflow of \$13.6b. In net terms, direct investment recorded an outflow of \$2.7b in the June quarter 2009, a decrease of \$4.2b on the outflow of \$6.8b in the March quarter 2009.

Portfolio investment recorded a net inflow of \$37.8b, an increase of \$1.5b on the inflow of \$36.3b in the March quarter 2009. This was driven by a net inflow of \$42.0b in portfolio investment debt securities liabilities.

Other investment recorded a net outflow of \$10.7b, a decrease of \$13.7b on the net outflow of \$24.4b in the previous quarter.

Reserve assets recorded a net outflow of \$13.0b, an increase of \$11.1b on the previous quarter's net outflow of \$1.8b.

INTERNATIONAL INVESTMENT POSITION

INTERNATIONAL INVESTMENT

Australia's net international investment position at 30 June 2009 was a net foreign liability of \$725.9b, down \$7.5b (1%) on 31 March 2009. The decrease consisted of:

- price changes of –\$35.6b
- exchange rate changes of \$16.8b
- net transactions of \$11.5b.

During the June quarter 2009 Australia's net foreign equity liability increased \$35.0b (61%) to \$92.7b. The increase was due to exchange rate changes of \$46.9b and net transactions of \$16.7b, partially offset by price changes of -\$28.6b.

Australia's net foreign debt liability decreased \$42.5b (6%) to \$633.2b. The decrease was due to exchange rate changes of -\$30.1b, price changes of -\$7.1b and net transactions of -\$5.3b.

FINANCIAL YEAR: 2008-2009 SITUATION

BALANCE OF PAYMENTS

In original terms, the balance on current account for 2008–09 was a deficit of \$38.4b, a 47% decrease on the deficit of \$72.5b recorded for 2007–08. The balance on goods and services was a surplus of \$5.8b, a turnaround of \$29.4b on the deficit of \$23.6b recorded in 2007–08. Goods credits increased \$48.9b (27%) and goods debits increased \$18.4b (9%).

The 2008–09 services deficit of 2.4b was an increase of 1.2b on the deficit of 1.2b in 2007–08

The 2008–09 net income deficit decreased \$5.0b (10%), with a decrease in income credits of \$1.8b (4%) and a decrease in income debits of \$6.8b (7%).

The balance on financial account recorded a net inflow of \$37.2b, with a net inflow on equity of \$66.3b and a net outflow on debt of \$29.1b. This result was down \$31.0b on the net inflow of \$68.1b recorded for the previous year as a result of:

- a turnaround of \$60.2b to a net inflow on portfolio investment
- a turnaround of \$56.2b to a net outflow on reserve assets
- a turnaround of \$20.6b to a net outflow on other investment
- a decrease of \$15.8b on the net inflow on direct investment
- a decrease of \$1.4b on the net outflow on financial derivatives.

INTERNATIONAL INVESTMENT POSITION

Australia's net international investment position as at 30 June 2009 was a net foreign liability of \$725.9b. This was up \$50.0b (7%) on the position a year earlier as a result of:

- net transactions of \$37.2b
- exchange rate changes of \$31.5b
- price changes of –\$18.6b.

During 2008-09, Australia's net foreign equity liability increased to \$92.7b, up \$33.5b (57%) on the previous financial year, with transactions of \$66.3b and price changes of \$11.2b partially offset by exchange rate changes of -\$43.3b and other changes of -\$0.7b.

Net foreign debt liability rose to \$633.2b, up \$16.5b (3%) on the previous financial year, with exchange rate changes of \$74.7b and other changes of \$0.7b partially offset by price changes of -\$29.9b and transactions of -\$29.1b.

At 30 June 2009, the ratio of Australia's net international investment position to GDP using the latest available GDP figure (for the year ended 31 March 2009 using current prices) was 60.6%. This compares with 59.7% one year ago and 52.9% one decade ago.

⁽a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

 $[\]begin{tabular}{ll} \textbf{(b)} & \textbf{For all time periods, estimates for sugar, sugar preparations and honey are included in 'Non-rural goods'.} \end{tabular}$

⁽c) In using this seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

⁽d) Caution should be used when interpreting recent trend estimates as they may be affected by unusual economic factors. For more details on trend estimates, please see paragraph 11 of the Explanatory Notes.

⁽e) A trend break of \$0.5b has been applied to Capital goods debits and related aggregates in December quarter 2008. This trend break will be reassessed when sufficient observations become available. Recent quarters should be used with caution.

⁽f) A trend break of \$8.2b has been applied to Non-rural goods credits and related aggregates in June quarter 2008. This trend break will be reassessed when sufficient observations become available. Recent quarters should be used with caution.

⁽a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

⁽b) These components are not seasonally adjusted.

⁽c) From December month 2008, the Civil aircraft series and commodities subject to a 'no commodity details' or 'no value details' restriction are included in Capital goods n.e.s.. From September to November 2008 commodities with these restriction are included in Civil aircraft and for earlier periods are included in Other merchandise goods.

⁽d) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal nattern.

⁽e) From December quarter 1995, this component is not seasonally adjusted.

⁽a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

^{&#}x27;Passenger transportation services' includes agency fees and commission receipts for air transport.

⁽c) These components are not seasonally adjusted.

⁽d) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

⁽e) For a more detailed explanation of tourism related services, see paragraphs 23 and 24 of the Explanatory Notes.

Caution should be used when interpreting recent trend estimates as they may be affected by unusual economic factors. For more details on trend estimates, please see paragraph 11 of the Explanatory Notes.

^{..} not applicable

⁽a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

⁽b) Reference year for chain volume measures and price indexes is 2006-07. See paragraphs 12 to 13 of the Explanatory Notes.

⁽c) 'Passenger transportation services' includes agency fees and commission receipts for air transport.

⁽d) These components are not seasonally adjusted.

⁽e) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

⁽f) Quarterly figures are derived from seasonally adjusted data.

nva not vet available

⁽a) Derived from current price original data. The net international investment position ratios are derived from the net foreign liabilities at the end of the period and GDP for the year ended with that period. Other ratios use only data for the year ended with the period shown.

⁽b) For the latest reference period, GDP for the year ended with the previous quarter is used.

EXPLANATORY NOTES

INTRODUCTION

- **1** This publication presents comprehensive details of Australia's international accounts: its balance of payments and international investment position statistics.
- **2** The conceptual framework used in Australia's balance of payments and international investment position statistics is based on the Fifth edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and international investment position, and the sources, methods and terms used in compiling the estimates are presented in Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (cat. no. 5331.0), which was released on 22 September, 1998.

SIGN CONVENTION

- **3** In keeping with balance of payments conventions, credit entries are shown without sign and debit items are shown as negative entries. However, references to debit items in Key points and Analysis and comments are made without regard to sign.
- **4** International investment position statistics follow the balance of payments sign convention. For foreign liabilities, position data and any transaction increase or other flow increase in liabilities is shown without sign. A negative sign for transactions and other flows in liabilities denotes a fall in liabilities. For foreign assets, position data and any transaction increase or other flow increase in assets is shown with a negative sign. Transactions and other flows in assets shown without sign denote a decrease in assets.
- **5** Movements over time are expressed as percentage changes. A minus sign means a decrease in credit entries, a decrease in debit entries, a decrease in a surplus or an increase in a deficit. The absence of a sign means an increase in credit entries, an increase in debit entries, an increase in a surplus or a decrease in a deficit.

ACCURACY AND RELIABILITY

- **6** The transactions recorded in the balance of payments are of many different kinds, and therefore the compilation of balance of payments and international investment position estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness.
- **7** Care should be exercised in the use and interpretation of estimates in this publication. While every effort is made to ensure the accuracy and reliability of estimates; for the latest quarter estimates for the non-goods items are based on preliminary data from providers (using careful estimates where exact figures are unavailable) and fewer survey responses than subsequent estimates. Also, detailed investigations into reported data may be ongoing. As late returns are received, investigations are finalised and more accurate data come to hand, revisions will be made to improve the quality of these estimates.

SEASONAL ADJUSTMENT

- **8** The quarterly current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation.
- **9** The seasonally adjusted statistics in this publication use the concurrent seasonal adjustment technique and Autoregressive Integrated Moving Average (ARIMA) Modelling to estimate factors for the current and previous quarters. Under concurrent seasonal adjustment, the estimates of seasonal factors are fine tuned as new original estimates become available each period. The seasonally adjusted estimates are subject to revisions at each reference quarter as the estimates of seasonal factors are improved. For more information on seasonal adjustment methods, see Information Paper: An Introductory Course on Time Series Analysis, Jan 2005 (cat. no. 1346.0.55.001), Time Series Analysis Frequently Asked Questions, 2003 (cat. no. 1346.0.55.002), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail <ti>time.series.analysis@abs.gov.au>.

EXPLANATORY NOTES continued

SEASONAL ADJUSTMENT continued

10 ARIMA modelling relies on the characteristics of the series being analysed to project future period data. ARIMA modelling is used on a case-by-case basis where it results in reduced revisions to seasonally adjusted series when subsequent data become available. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process. The ARIMA model is assessed as part of the annual re-analysis and, following the 2008 annual re-analysis, 45 of the 54 directly seasonally adjusted trade in goods and services time series use an ARIMA model. For more information on the details of ARIMA modelling see *Feature article: Use of ARIMA modelling to reduce revisions* in the October 2004 issue of Australian Economic Indicators (cat. no. 1350.0).

TREND ESTIMATES

11 The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. For more information on trend estimates methods, see Information Paper: A Guide to Interpreting Time Series - Monitoring Trends (cat. no. 1349.0), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail < time.series.analysis@abs.gov.au>.

CHAIN VOLUME MEASURES

12 To enable analysis of the movement of goods and services in 'real' terms, estimates of chain volume measures are compiled and published each quarter. Chain volume measures are derived by deflating the original current price series by specially compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated in this issue. The reference year is updated with the release of each September quarter issue of this publication. Prior to the reference year chain volume measures are non-additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For more information on chain volume measures refer to the ABS publication Information Paper: Australian National Accounts, Introduction of Chain Volume and Price Indexes (cat. no. 5248.0), which was released on 19 March, 1998.

INDEXES

IMPLICIT PRICE DEFLATOR
(IPD)

13 The quarterly implicit price deflators (IPDs) are derived by dividing current price estimates by the corresponding chain volume measures. Movements in IPDs can be greatly affected by changes in the physical composition of the aggregates and their components. The quarterly IPDs derived from seasonally adjusted data are preferred to those using original data because the seasonal adjustment process removes some of the seasonal changes in the composition of this series. However, the seasonal adjustment process itself is also a possible source of distortion.

TERMS OF TRADE

14 There are several ways of measuring the terms of trade. In the relevant Time Series Spreadsheets associated with this publication, the following index is used:

 $\frac{\textit{implicit price deflator for the credit item}}{\textit{implicit price deflator for the debit item}} x 100$

Quarterly estimates of the terms of trade shown in table 6 of this publication are derived from seasonally adjusted data.

CHAIN LASPEYRES

15 The chain Laspeyres indexes are derived by combining individual component prices with weights which reflect the average relative importance of the components in the previous year. These are then indexed to the relevant reference year. For all periods since the latest reference year, reference year weights are used.

EXPLANATORY NOTES continued

DIRECT INVESTMENT
ADJUSTMENT

16 Total assets and liabilities presented in tables 1, 2, 3, 4, 30, 31 and 32 differ from other tables in this publication which present assets and liabilities on the basis of foreign investment in Australia (FIA) and Australian investment abroad (AIA). The difference is due to the Direct investment adjustment which adjusts total foreign assets and liabilities to the net basis used for FIA and AIA. For both FIA and AIA, the adjustment is symmetrical and includes claims of Australian direct investment enterprises on direct investors abroad plus liabilities of Australian direct investors to direct investment enterprises abroad.

FOREIGN DEBT

- **17** Foreign debt levels as recorded in tables 30, 31 and 32 in this publication between direct investors and direct investment enterprises are recorded on a gross basis for assets and liabilities.
- **18** In table 32 'currency' refers to the currency in which assets or liabilities are likely to be repaid, while 'residual maturity' refers to the time remaining until an asset or liability is due to be fully repaid. Reserve assets are not allocated by currency. All reserve assets are allocated to the repayment category 'less than or equal to 90 days' although a range of maturities may be involved.

INDUSTRY DATA

19 The industry categories shown are based on the Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993 (1292.0). Industry statistics should be treated with some caution as they do not necessarily reflect the industry of the end use of the funds. First, the statistical unit (that is, the unit of observation and classification) generally consists of all enterprises in an enterprise group within a single resident institutional sector. The industry of this statistical unit, which may cover a broad range of activities, is determined on the basis of the predominant activity of the unit as a whole which may be quite different from the industry in which funds are used. Second, financial enterprises such as trading and merchant banks, may borrow funds as principals and then on-lend to clients in other industries.

COMMODITY BREAKDOWNS
OF GENERAL MERCHANDISE

- **20** Commodity breakdowns of general merchandise credits are provided in table 7 (at current prices), 9 (at current prices, seasonally adjusted), 11 (chain volume measures, seasonally adjusted) and 13 (implicit price deflators, seasonally adjusted). The groupings shown are based on the United Nations' *Standard International Trade Classification*.
- **21** Commodity breakdowns of general merchandise debits are provided in table 8 (at current prices), 10 (at current prices, seasonally adjusted), 12 (chain volume measures, seasonally adjusted) and 14 (implicit price deflators, seasonally adjusted). The three broad end-use categories *Consumption goods, Capital goods and Intermediate and other merchandise goods* are based on United Nations' *Classification of Broad Economic Categories* (BEC), but differ from the BEC to the extent that intermediate goods are combined with other merchandise goods. These broad end-use categories are further divided into a total of 25 SITC based commodity groupings.
- **22** For more information on the commodity classification of general merchandise debits and a detailed concordance between balance of payments general merchandise debits end-use categories, commodity groups, BEC and SITC, Rev 4, refer to the ABS Information Paper: Impact of introducing Revision 4 of the Standard International Trade Classification, 2008 (cat. no. 5368.0.55.010).

TOURISM RELATED SERVICES

23 The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. These series are not compiled on a Balance of Payments conceptual basis. However, they do provide a reasonable approximation of world tourism related activities.

EXPLANATORY NOTES continued

TOURISM RELATED SERVICES continued

ROUNDING

RELATED PRODUCTS AND SERVICES

- 24 The memorandum items have been derived by re-aggregating relevant components of the international trade in services series of the balance of payments accounts. The tourism related indicator has been derived by combining total travel services (business, education-related and other personal travel) and passenger transportation services (which includes agency fees and commission receipts for air transport).
- **25** Discrepancies may occur between totals in this publication and the same aggregates from other sources, and between sums of component items and totals due to rounding.
- **26** Users may also wish to refer to the following publications which can be downloaded free of charge from the ABS web site:
 - International Trade in Goods and Services, Australia (cat. no. 5368.0) monthly
 - International Merchandise Imports, Australia (cat. no. 5439.0) monthly
 - International Trade Price Indexes (cat. no. 6457.0) quarterly
 - International Investment Position, Australia: Supplementary Country Statistics (cat. no. 5352.0) annual
 - Foreign Currency Exposure, Australia (cat. no. 5308.0) irregular, issued on 22 November 2005
 - Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (cat. no. 5331.0)
 - Information Paper: Quality of Australian Balance of Payments Statistics (cat. no. 5342.0), issued on 20 February 1996
- **27** Estimates for periods prior to those shown in this publication are available from Time Series Spreadsheets. Detailed data on exports and imports of goods, including dissections by commodity and country of origin, are also available from Time Series Spreadsheets on a recorded trade basis (see tables 12 to 15 and 31 to 37 of 5368.0 or tables released with 5439.0). If more detailed data is required it can be obtained by contacting the Client Service telephone number shown on the back of this publication. There may be a charge for this information, depending on the volume of data requested.
