Question Specifications

KEY

Italic text is used within this question specification to denote instructions for interviewers, notes for users, or any other text which was not read out to respondents.

Throughout this document outlining the question specifications, the following abbreviations are used:

Ctrl K – “Don’t know” response accepted

Ctrl R – “Refusal” response accepted

WS – “Word substitution” is in use (ie. “WS1” means that Word Substitution number one is used at this position of the question wording). Word substitution specifications can be found at the end of each question module.

Sequencing between the Violence and the Abuse before the age of 15 Question modules:

Note that the “Violence” and “Abuse before the age of 15” questions intersect one another as visually represented below. This diagram shows (with arrows) the order in which a respondent will be sequenced between the violence question module and the abuse question module.

Respondents will be asked Loops 1-4 of the Violence module (*sexual* violence questions) before being sequenced into Loop 1 of the Abuse module (*sexual* abuse before the age of 15). They will then be sequenced back into Loops 5-8 of the Violence module (*physical* violence questions), and finally respondents will be asked Loop 2 of the Abuse module (*physical* abuse before the age of 15).
